**PRAY DO NOT CUT THIS CATALOGUE, BUT QUOTE
NUMBERS OF ILLUSTRATIONS AND PAGES.**

F. LASSETTER & CO., LIMITED

A WORLD CONDENSED IN A BOOK.

The Buyer's Encyclopaedia

All prices subject to market fluctuations.

When sending any order do not cut page—simply mention price, number of page and number of illustration.

TERMS AND RULES.

This Catalogue is designed for the benefit of those residing in the country districts of Australia, and in the Islands of the Pacific, especially for customers who have little opportunity of inspecting the various goods.

LASSETTERS have more knowledge of the country order business than any other house in Australasia, and not alone by their prices do LASSETTERS save money for their customers, but they have reduced the art of executing country orders to a positive science, and possess the secret of how to send the most goods for the least possible freight.

LASSETTERS' OBJECTIVE.—To supply their customers with the best goods at the lowest prices. LASSETTERS guarantee satisfaction, and any article found unsatisfactory may be returned at our expense.

HOURS OF BUSINESS.—8 a.m. to 6 p.m. week days, and 1 p.m. on Saturdays. LASSETTERS are closed on all Public Holidays.

TERMS.—Cash with order except where accounts have been opened. LASSETTERS are always ready to open accounts on receipt of satisfactory references.

Cheques and Post Office or Postal Orders should be made payable to F. LASSETTER and Co., LTD. No exchanges are charged on cheques drawn on banks in New South Wales.

BANKING.—Deposit and current accounts are opened and interest allowed at the rate of 4 per cent. per annum on fixed deposits for six months, and $3\frac{1}{2}$ per cent. per annum for amounts withdrawable at any time without notice. Cheque books issued. The cheques are available to make withdrawals for personal use, and may be cleared through a bank in the ordinary manner.

LETTER ORDERS.—All letters are opened in the presence of Mr. LASSETTER, who personally supervises all country correspondence. All orders are placed in hand within an hour of receipt, and, unless goods have to be made in the factory, or require special packing, are despatched the same day.

LETTERS should state—(a) Name (whether Mr., Mrs., or Miss).

(b) Postal address.

(c) Address for goods.

(d) Whether by goods or passenger train, steamer, or parcel post.

Lassetters' Address: Cheapside, Sydney.

TELEGRAMS.—Telegraphic orders are attended to by a special staff.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

Orders required to be sent by the North-West Mail should reach LASSETTERS' by noon for Parcel Post; 1.30 p.m. by train. Main North Line, north of Glen Innes, 2 p.m. for Parcels Post, 3.30 p.m. by train. By other Mails up to 3 p.m. Parcels Post, 5 p.m. by train.

Telegraphic Address: LASSETTERS, Sydney.

SHIPPING ORDERS. Special attention is given to the execution and shipment of all orders to customers in New South Wales, to other colonies, and to the Islands of the Pacific.

LASSETTERS insure all goods outside of New South Wales of the value of £5 and over, and charge the amount in the account. Goods under the value of £5 are at customer's risk. To ports in New South Wales we only insure when specially instructed, all goods being at customer's risk. Insurance covers against jettison and washing overboard, as well as when the ship is stranded, sunk or burnt.

LASSETTERS place their services at the disposal of their customers, and transact business of all descriptions for their clients; rents collected; powers of attorney accepted.

FREE CARRIAGE OF GOODS.—Lassetters pay trainage or shipping freight on all Parcels of Drapery, Boots and Shoes, Electro-plated Ware, and Cutlery, in New South Wales, and on similar goods to the value of £2 and upwards to any port in Australasia, New Zealand, or the Pacific Islands.

ON TEA, LASSETTERS pay trainage to any railway station, and shipping freight to any port in New South Wales on parcels of 20 lbs. or over; and to any port in Australasia, New Zealand, or the Pacific Islands, on half chests.

PARCELS BY POST.—LASSETTERS pay the postage on Drapery, Boots, Electro-plated Ware and Cutlery, when the amount does not exceed the cost of rail or steamer. In any case LASSETTERS only charge the difference, which, in many cases, does not exceed the rail or steamer freight, but LASSETTERS do not pay the carriage on goods sent on appro. and returned.

LASSETTERS pay postage on Watches, Jewellery, Smoking Pipes, Cigar and Cigarette Holders, and cases over the value of fifteen shillings (15/-) to any post office in Australasia, New Zealand or the Pacific Islands.

REGISTRATION FEE; if specially instructed, 8d. extra.

RAILWAY FREIGHTS.—LASSETTERS will always pay freight by goods or passenger train for their customers when instructed to do so. **Kindly send instructions to pay with each order.** In case of customers having no account, goods will be sent Freight Forward unless a sufficient sum for freight is remitted with the order. For parcels by mail or passenger trains the Railway Commissioners charge 50 per cent. more when the freight is not prepaid.

STEAMER FREIGHT.—The steamship companies trading on the coast of New South Wales refuse to accept goods unless the freight is paid in Sydney. LASSETTERS are always ready to pay the freight for customers having an account, but in the case of customers not having an account a delay may occur unless a sufficient sum for freight is remitted with the order. There is a stamp duty of sixpence on every bill of lading at ports outside New South Wales, which amount should be added by those who have no account at LASSETTERS.

GOODS DAMAGED IN TRANSIT. Should it be discovered that goods have been damaged or articles lost from packages during transit, customers should NOT give a clean receipt to the railway or shipping companies, as the authorities always refuse to recognise any claims after a receipt is given. Customers employing carriers or teamsters should specially call their attention to this matter. LASSETTERS DO NOT HOLD THEMSELVES RESPONSIBLE FOR ANY DAMAGE OR LOSS SUSTAINED AFTER GOODS HAVE BEEN DELIVERED TO THE POST OFFICE, RAILWAYS OR SHIPPING COMPANIES.

EVERYTHING SOLID VALUE

Q.F. LASSETTER & CO., LIMITED

GOODS REPORTED MISSING.—All orders are most carefully called over and checked before despatch, and, where goods have apparently been omitted, a careful search in the straw or packing may be respectfully recommended, as in almost every case the goods are discovered to have been received, but overlooked.

EMPTYES.—Returned empties received in good condition, carriage paid, will be allowed for in full. They should be advised upon being sent off, and a credit note will be posted on receipt of empties. LASSETTERS particularly request, when empties are returned, that the name and address of sender be legibly written upon each package.

DELAYS.—When delay occurs in the arrival of an order, customers are recommended to write at once to the authorities in Sydney. In the case of packages by goods train to

The Goods Manager, Challis House, Martin Place, Sydney.

In the case of mail and passenger train to

Superintendent of Lines, Railway Station, Sydney.

Should the customer not receive a satisfactory explanation they should THEN write to LASSETTERS, who will at once communicate direct with the Chief Railway Commissioner.

In the case of parcels or packet by post write to

The Deputy Postmaster General, G.P.O., Sydney.

Should the customer not receive satisfaction write to LASSETTERS, who will then communicate direct with the Hon. The Postmaster General.

PATTERNS.—LASSETTERS send patterns and self-measurement forms post free on application. When returning patterns please post them in the wrapper they were received in, and erase your name and address. Affix postage, a penny stamp for every two ounces.

PARCELS RATES.

Special attention is drawn to the following reduced and convenient scale:—

STAMPED PARCELS (PREPAID) RATES.

MILES.		Not exceed ng—														Each additional 28lb. or part thereof.					
		3lb.		7lb.		14lb.		28lb		42lb.		56lb.		70lb.				84lb.		98lb.

Over	510	2	0	2	6	3	0	4	6	6	0	8	0	9	9	11	6	13	3	15	0

There are special rates to Branch Lines:—

Goulburn to Crookwell.

Gundagai to Tumut.

The Rock to Lockhart.

Nevertire to Warren.

Temora to Barellan.

Burren Junction to Walgett.

Culcairn to Corowa.

Koorawatha to Grenfell.

Bogan Gate to Tullamore.

Byrock to Brewarrina.

Manilla to Barraba.

Burren Junction to Collarenebri East.

LASSETTERS prepay parcels rates on behalf of their customers to save expense, otherwise 50 per cent. advance would be charged.

Those not having an Account must remit the amount with order.

CHEAPSIDE, SYDNEY.

© UNIVERSAL PROVIDERS. ©

FREIGHT BY GOODS TRAIN.—LASSETTERS have a special staff of freight clerks whose duty it is to make a study of the different rates, so as to classify the various goods; if this work is not carefully done a large sum is wasted in the course of a year. LASSETTERS save this for their customers, and will always prepay freight for them. Kindly send instructions to pay with each order.

UNATTENDED PLATFORMS.—The Railway Commissioners only accept goods at risk of consignee or customer, and freight must be prepaid. Those not having an account must remit the amount. LASSETTERS ACCEPT NO RESPONSIBILITY WHATEVER WITH REGARD TO GOODS LEFT AT UNATTENDED PLATFORMS.

RATES OF POSTAGE.

PATTERNS AND SAMPLES.

	6 oz. ...	3d.	
Merchandise to other places can only be sent by Parcel Post.			

VALUE PAYABLE POST.

If preferred LASSETTERS will send goods by the "V.P." system, by which means customers can pay the full amount to the Post Office, and be saved all trouble of sending a cheque, postal order, or draft. The exact sum due being charged by the Post Office.

LASSETTERS' GIFT.—Hitherto the country people of New South Wales have had to pay ... postage on all orders sent to LASSETTERS.

LASSETTERS have had a hard fight at the Post Office in Melbourne to get this REDUCED to A PENNY, and have at last succeeded. This will save thousands of pounds a year to LASSETTERS' customers. As long as the undermentioned rules are observed, 2ozs. in weight can be sent for 1d. instead of only half an ounce for 2d.

RULES.—(1) The order must be partly printed. N.B.—LASSETTERS will be pleased to supply books of order forms with a duplicate leaf, post free on application. The order MUST be in an envelope with the flap left UNSEALED or fastened with a binder, or tied with string, so as to permit of easy withdrawal of the contents.

No Remittances such as cheques, postal notes, or stamps can be enclosed; but drapery patterns, or other samples may be enclosed with the order.

Nothing in the nature of a personal communication must be enclosed with the order, such as allusions to the customer's account or other matters.

Nothing must be embodied in the order relating to any other subject requiring an answer.

Instructions as to packing, the route for forwarding and effecting insurance may be added.

POSTAGE—1d. per 2 ozs.

Ready-made Mosquito Curtains

To ensure a proper fit, it is necessary when ordering Mosquito Curtains for Half-tester Bedsteads, to send paper pattern showing exact size and shape of bow of bedstead. This may easily be done by placing the bow on a sheet of paper and drawing a pencil round the outside. With Italian Canopy Bedstead it is only necessary to give the length of canopy arms and width of bedstead. For four-post bedsteads, please give length and width, measuring from the outside. All LASSETTERS' Mosquito Curtains are cut to proper shape, made extra full to allow for shrinkage when washed, and carefully examined before leaving our workrooms.

Lassetters' Patent Sun Blind

(As Illustrations.)

MA 102.—LASSETTERS' PATENT SUN BLIND (as illustration). Illustration No. 1 shows the Blind rolled up out of the weather; illustration No. 2 shows the blind down; illustration No. 3 shows the side view.

This Blind can only be supplied by F. Lassetter and Co., who hold the Patent for the State of New South Wales.

Special advantages of F. Lassetter & Co.'s Patent Blind:—

1.—When not in use for shading purposes, being fixed on a strong spring roller, it rolls up into a box frame and is protected from the weather.

2.—When down, it shades the windows and lets a current of air into the room.

3.—It is adjusted from the inside or outside of the window and fastened at each side, so that it can defy the elements.

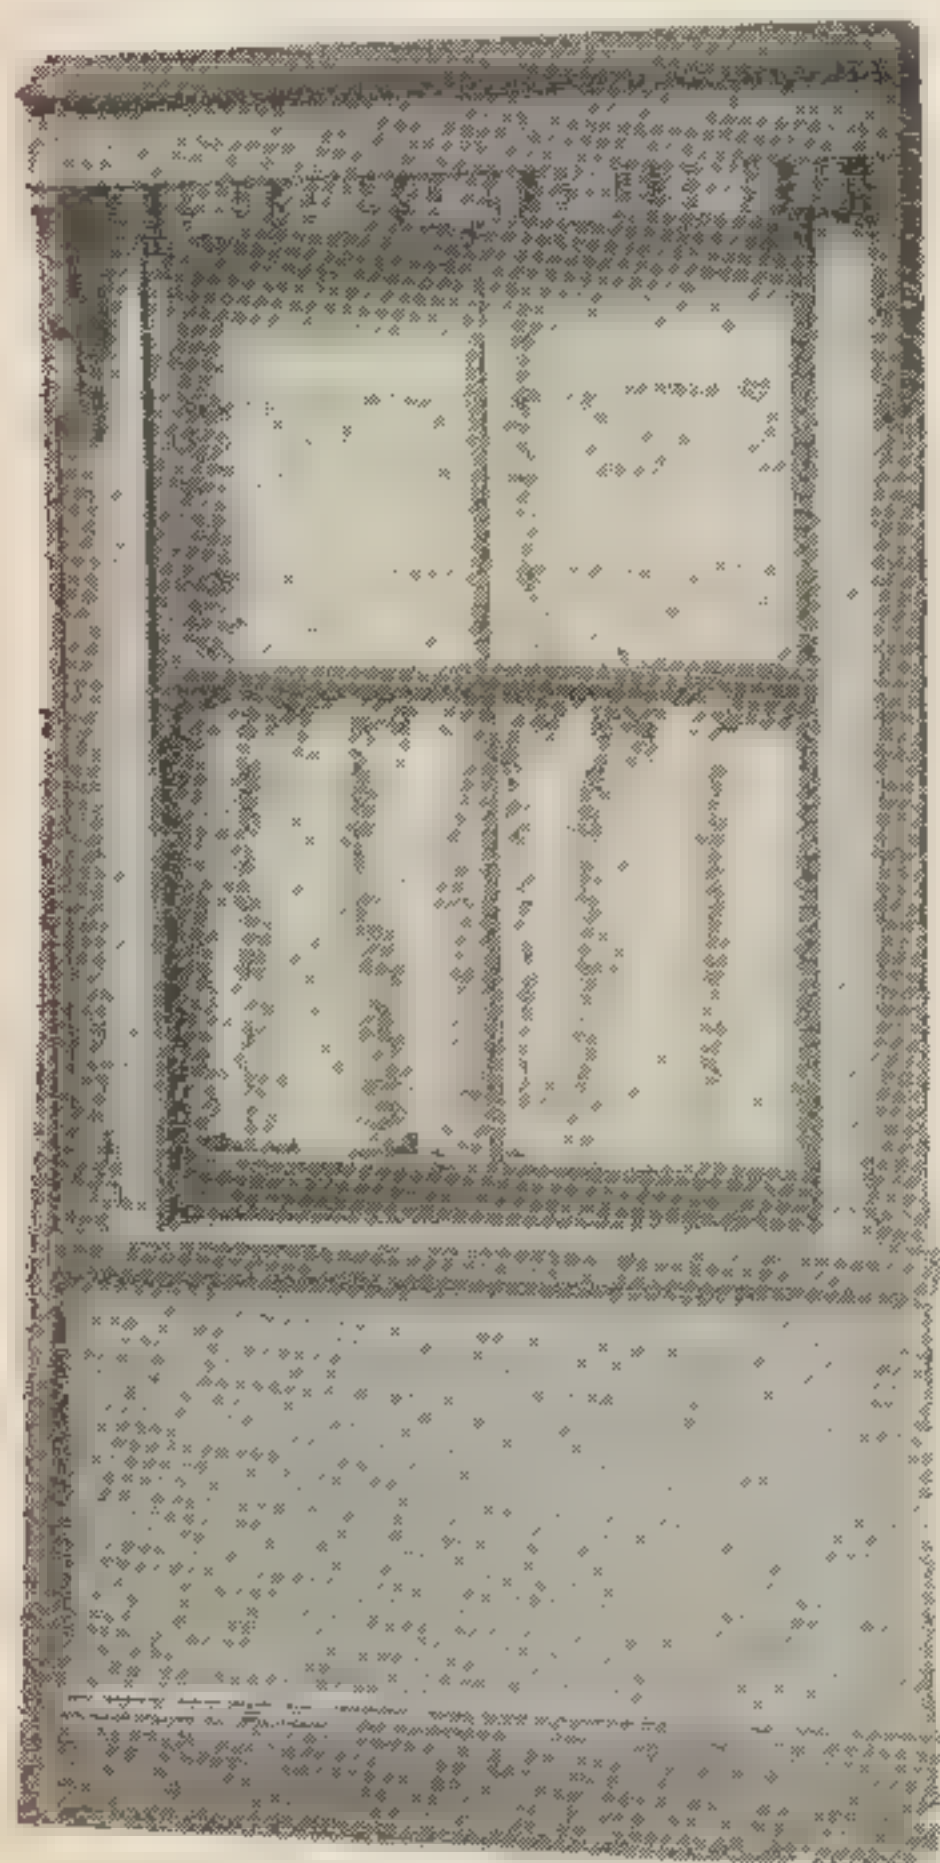

Cannot get out of order.

A child can adjust it when once fixed.

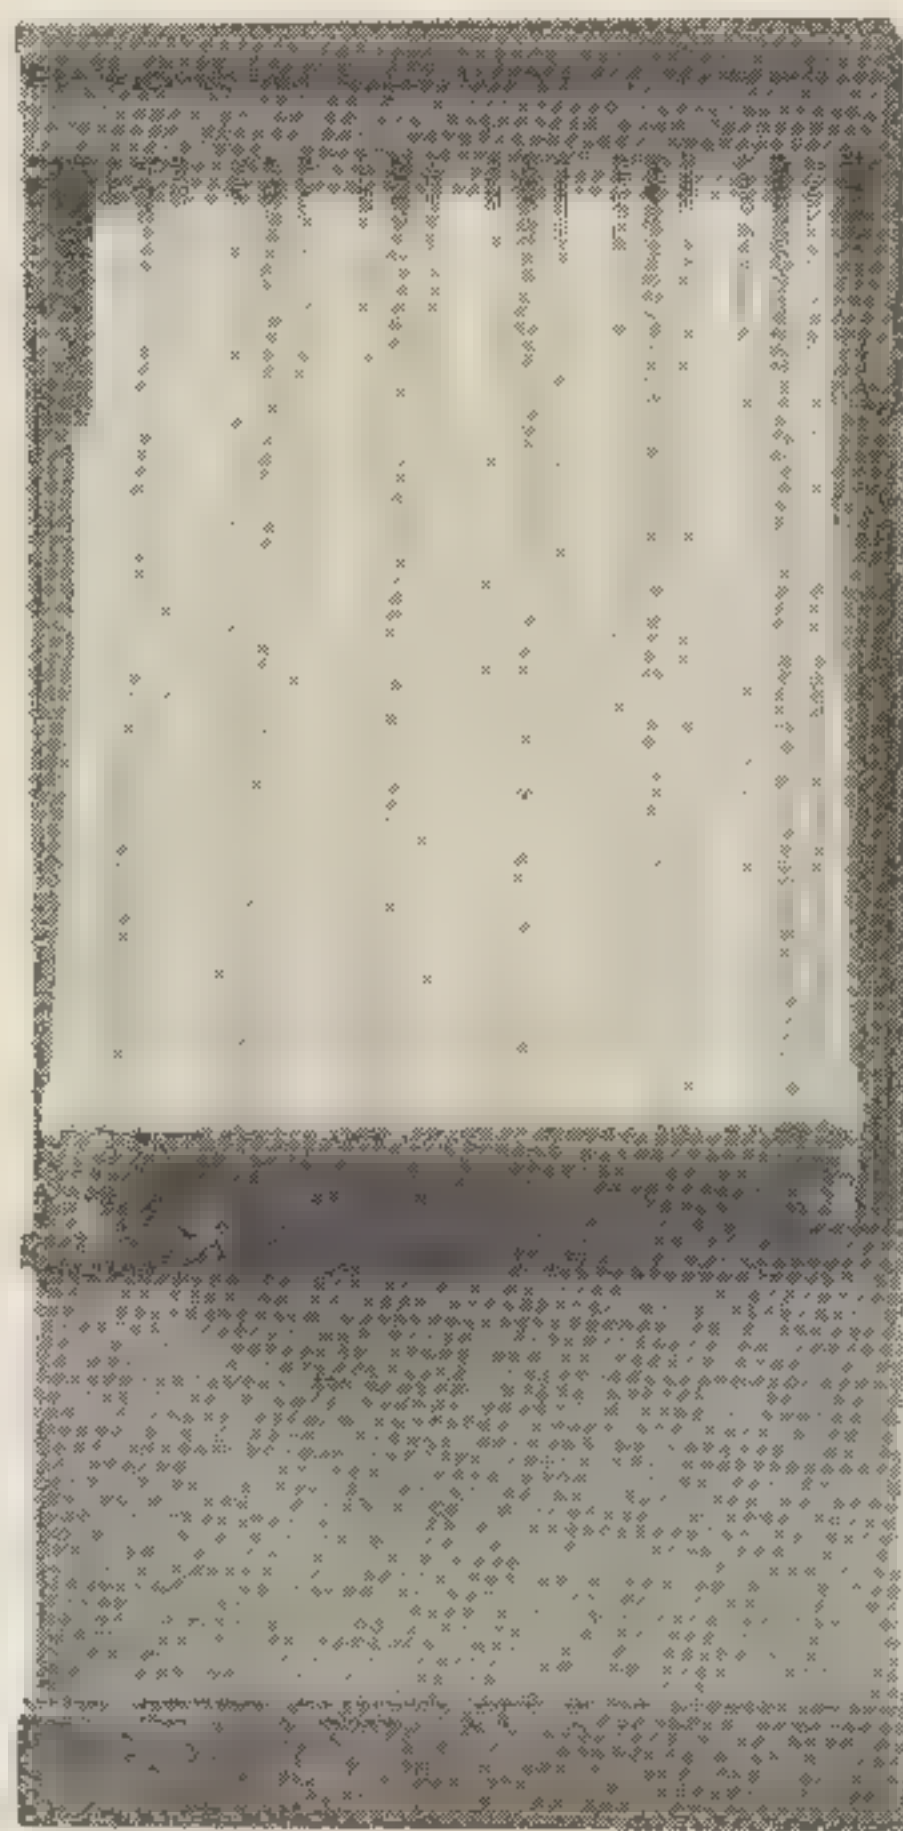

Fixed by competent men free of charge.

Price for Blind, No. 1 or 2 Quality Blind Tick, 1,2 (one shilling and twopence) a square foot. Thus a Blind 3ft. wide and 6ft. deep will cost you only 21/- each. All other sizes in proportion.

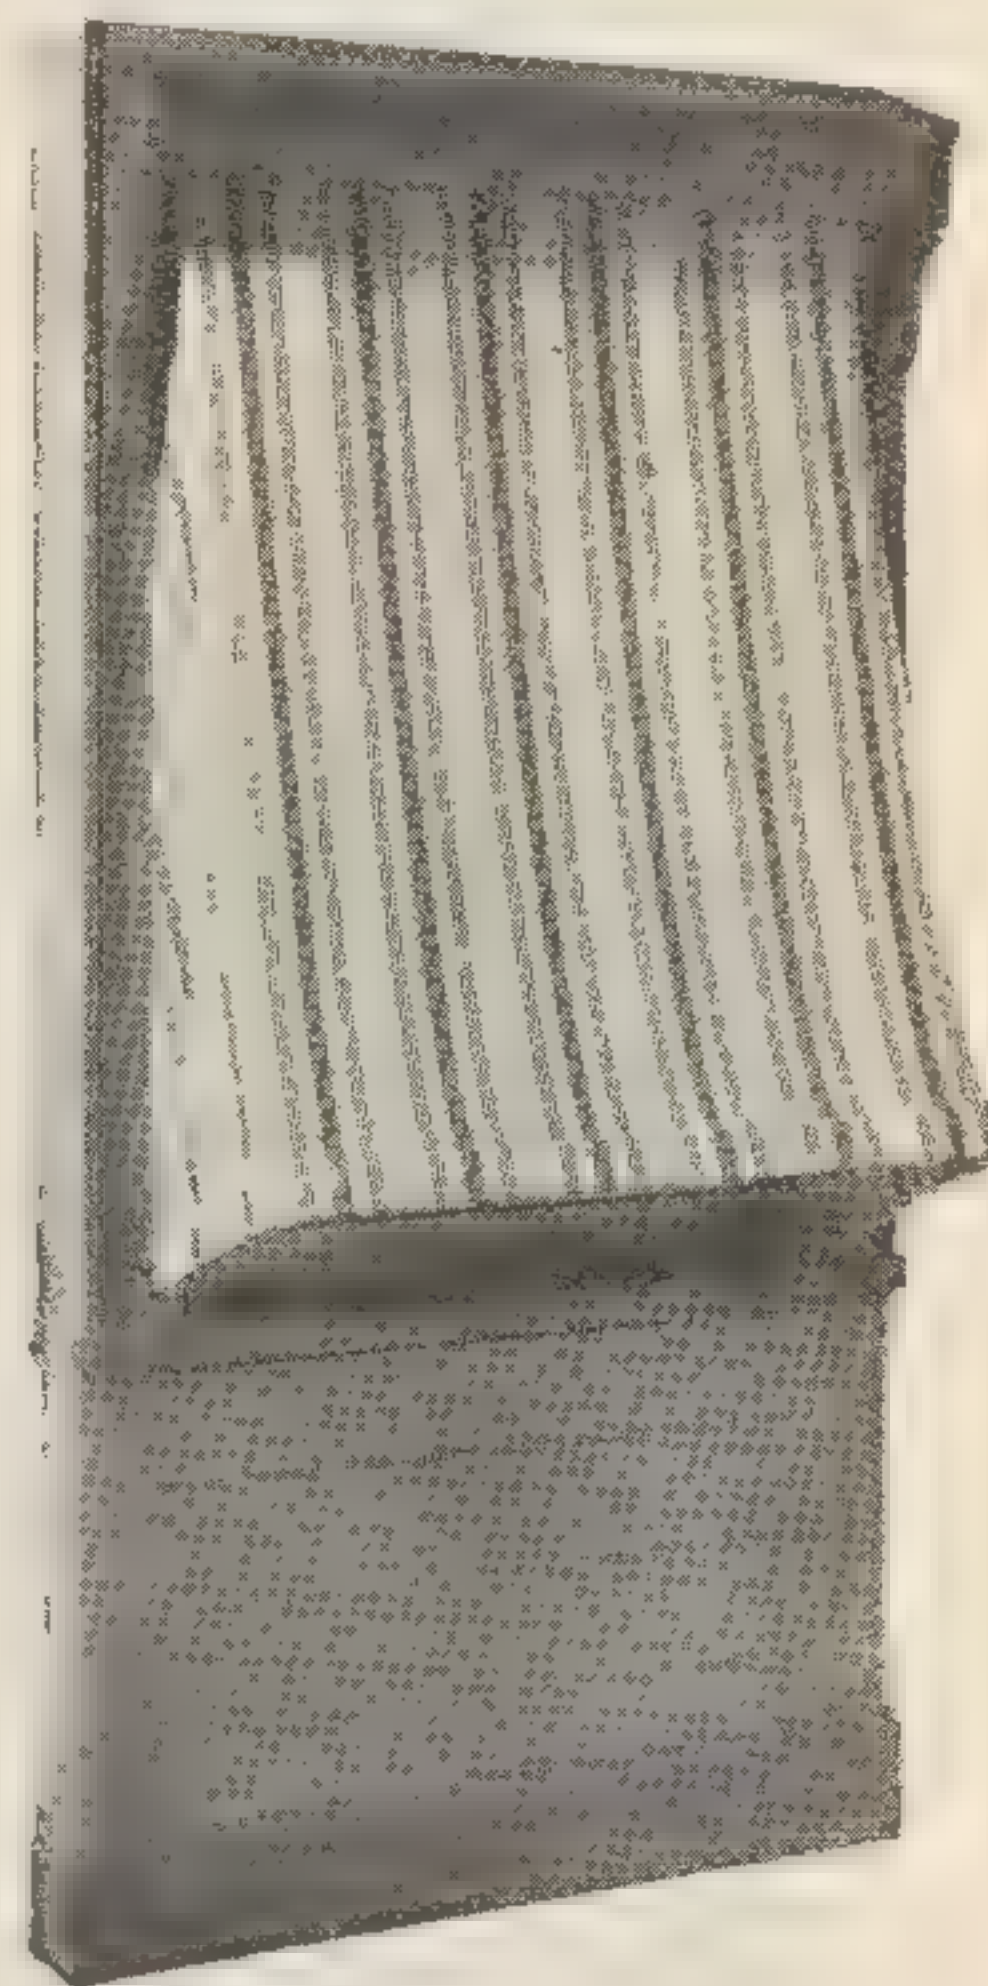

N.B.—When ordering this Blind, please send us the outside measurement of the architrave and length of blind from top of architrave to window sill.

MA 102.—Showing Blind Up.

MA 102A.—Showing Blind Down.

MA 102B.—Showing Side View.

DRESS DEPARTMENT

COLORED DRESS MATERIAL

In Quoting for Dress Goods, we wish you to acknowledge the fact "that it is impossible to do so for every line stocked," as, owing to the change of fashions, and the introduction of new designs, and makes of materials, it would be most misleading.

We, therefore, to avoid any disappointment, quote only for those lines which are in every day use, and procurable almost at all times.

For any line not quoted, drop LASSETTERS' a POST CARD, and they will be pleased to forward by return, Patterns and Prices. In doing so, it will be much to your advantage, to give us some idea of the Color and Price, and where possible, some idea of the purpose for which it is intended.

FRENCH CASHMERE'S, all Colors—

40/42in.	1 6½, 1 11½
42 44in.	2 6, 2 11

Ladies' Back and Side Combs

We are continually opening shipments of these goods, and always hold a large and varied assortment of the latest productions. The vagaries of Fashions, however, cause the designs to be constantly changing, and it is, therefore almost impossible to particularise. These remarks also apply to Ladies' Belts, of which we hold a large and varied assortment, being all of the newest designs.

UNIVERSAL PROVIDERS.

MB 1.—MOST BECOMING LACE AND NET HAT, in White, Cream, or Black, with lovely Rose and Ribbon trimmings 21/-

Ladies' French and English Millinery

Hats, Toques and Bonnets direct from the fashionable centres of Europe.

Opened every Summer season about 1st September.

Opened every Winter season March 1st.

It is impossible to describe these, as the fashion changes so decidedly every season; but Lassetters' are noted for the originality of their Model Millinery. Prices from 2 to 5 guineas.

Charming Models, copied from the original French and English models, in beautiful colorings. From 21/- to 63/-.

Our choice and extensive assortment of Model Millinery is selected by our London and Parisian buyers. The greatest care and attention is devoted to this most important department, and ladies will find no difficulty in choosing their season's Millinery. Any lady consulting our Milliners can rely on receiving disinterested advice. Our object is to give satisfaction and secure for us a regular customer.

MILLINERY DEPARTMENT

All Millinery sent by post is carefully packed in extra thick and strong Board Boxes, to ensure safe delivery; but, in consequence of the perishable nature of this class of goods, we cannot send on approbation or receive Millinery back on any condition whatever.

Costumes, Mantles, Jackets, and Blouses

We are constantly receiving the
Latest Gowns
and most
Elegant Models from Paris.

We have pleasure in submitting our Latest Fashion Publication, which we have confidence in recommending as containing illustrations of some of the newest and most exclusive Paris Modes for the Spring, Summer, Autumn and Winter seasons.

Originality in design, refined tastes and moderate costs are not generally synonymous. But the models herein illustrated will demonstrate that it is possible to secure the most exclusive and tasteful of garments stamped with the Hall-mark of Originality, at prices strikingly moderate, considering the excellence of materials employed. Apart from the garments depicted in the following pages, we have a variety of the most elegant Models, designed expressly for us by the most exclusive Paris Modistes which we neither illustrate in catalogues, fashion papers, nor show in our windows.

Whatever you want in Blouses you can get at Lassetters' and the prices are right.

MB40.—GRACEFUL MODEL GOWN, in rich Satin Imperial, trimmed fringe, Bodice finished at neck, and Sleeves with fine Embroidered Net and Gold Tinsel trimming. Patterns and estimates on application.

We are constantly receiving the latest Gowns and most elegant Models from Paris.

UNIVERSAL PROVIDERS.

Diaries

A Diary should form part of the equipment of every desk. For personal, business or professional purposes it is indispensable. Engagements made, promises to be fulfilled, bills or insurances due, future fixtures, recurring events at stated intervals, records of correspondence, of expenditure, of cash received, of one hundred matters requiring future attention—all these items can be conveniently, safely, and expeditiously recorded and stored for immediate reference within the pages of a Diary.

New Styles, Popular Sizes, Cheapest and Best Series.

As the demand for Diaries continues to increase from year to year, we shall esteem it a great favour to have your order at the earliest possible moment, so as to avoid the risk of inconvenience and disappointment arising through not getting supplies when wanted.

Collins' Pocket Diaries

LETTS'S HOUSEKEEPERS' DIARIES.

HOUSEKEEPERS' ACCOUNT BOOK. The principle of these Account Books is so simple that no difficulty will be found in understanding them, and the comparison of figures they permit is productive of much economy. They are so arranged that the Daily, Weekly and Monthly Expenses and Receipts may be seen at a glance, and be subdivided under different heads as Butcher, Baker, Brewer, etc.; also spaces are provided for noting Engagements for each day in the year, Visiting List, etc.; on tain also much useful Information and Tables. Cloth 2/6

HOUSEKEEPER ENLARGED. A similar Book to the above, with the addition of Ruled Pages with Printed Headings, enabling the sums paid under each head of expenses to be compared weekly, monthly, or yearly. This is the most complete Housekeepers' Account Book published. Cloth, 3/-.

EVERYTHING SOLID VALUE

Books which are an Investment

To Justices of the Peace, Pastoralists, Bankers, Shire Councillors, and all business men.

"THE NEW SOUTH WALES LAWYER." 2nd Edition. Pages 369, large post octavo, including full index. Deals under 96 headings with the general law of New South Wales, devotes some 34 pages to the Crown Lands Laws, details the Duties and Powers of a J.P., and states the law in regard to about 150 matters upon which a J.P. may adjudicate. With small supplement bringing the book right up to date. Price, 8/-.

Apart from its special value to Js.P., Pastoralists, etc., any intelligent man can put the legal information contained in this book and the 26 simple forms of Contracts, Leases, Wills, etc., to practical use, and thus save more than its cost.

"BROOKS CONCISE LAWYER." A Manual of the ever day Commercial and Banking law of this State, to which are added the principal Duties and Powers of a J.P.; Sections on the law of Master and Servant, and Landlord and Tenant, and seven serviceable forms, including Will, with full directions. See Table of Contents. Price, 2/-; or, in cloth, 2 6.

This publication can be put to practical use. A purchaser writes of it, "I am well satisfied with my money's worth. It would cost me ten times the amount in £ to ferret half the information there contained out of the spurious article of real life."

DIGEST OF THE "PASTURES PROTECTION" AND "STOCK" ACTS. States the laws regulating the Destruction of Rabbits, Branding, Travelling, Export, Import, and Introduction of Cattle and Sheep, and diseases in the latter. Summary of Drovers', Owners' and Stock Directors' duties, Abstract of the Regulations, and some useful forms. Price 2/6

This publication gives the full contents of every section of the above Acts which is full of practical utility.

"GUIDE TO THE LOCAL GOVERNMENT (SHIRES) LAW." Deals in alphabetical order with the "Shires Act, 1905," and gives the full contents of every section of practical utility. For convenience reference matters relating to Shire Councillors, Endowment, Owners and Occupiers, Rates, Elections, Valuations, etc., have been brought under single headings. Price, 2/-; or, in red cloth, 2/6.

Will render its possessor, for all ordinary purposes, independent of the Statute, and is the only publication handy for the pocket, and from which, at a single reference, the exact information desired can be quickly obtained. Leaflet inserted showing alterations made in consolidating the "Shires Act" in the "Local Government Act."

UNIVERSAL PROVIDERS.

For Queenslanders, Etc

"THE CONCISE QUEENSLAND LAWYER," by H. V. Edwards, Solicitor, and D. J. R. Watson, Barrister, of Queensland.

A handbook of the every-day Commercial and Banking law of Queensland. Includes also a Chapter for Justices of the Peace for that State; a Chapter on the Queensland Crown Land laws, and some useful Forms. Price, 4/-; or, bound in blue cloth, 4/6.

SUPPLEMENTS TO THE "N.S.W. LAWYER."

(a) Supplement to the 1st Edition. Contains the amendments made by the commission for the revision of the Statute law, and some additional matter. Price, 1/6, post free.

(b) Supplement to the 2nd Edition. Contains some important legislation of 1905 (Crown Lands, District Courts, and Small Debts Recovery), which happened to affect some sections of the book, and brings the volume right up to date. This supplement is given in with present purchases of the N.S.W. Lawyer.

Price, separately, 6d., post free.

Family Bibles. Six Different Styles

No. 1 QUARTO SIZE (12 $\frac{1}{2}$ x 9 $\frac{3}{4}$ inches)—

Contains the Old and New Testaments, with explanatory notes throughout; marginal references; condensed concordance; a synopsis of the Four Gospels; offices and conditions of men; tables of weights, measures, money and time; a description of the illustrations of antiquities, etc. There are also a colored four page family register; a colored map of the prevailing religions of the world; other maps, colored and plain, and a beautifully engraved title page. In addition there are more than nine hundred (900) illustrations embellishing the book. It is strongly bound in leather with the words "Holy Bible" in gilt letters on the side and back. Price, £1/7/6.

No. 2, THE SAME, IN SIZE, CONTENTS AND BINDING.—

With a strong, gilt metal clasp in addition. Price, £1 10/-.

No. 3, THE SAME, IN SUPERIOR BINDING, WITH RED UNDER GOLD EDGES.—

Gilt rim inside cover, and very pretty gilt metal corners and two clasps—a beautiful volume. Price, £1/15/-.

Being crowded with illustrations, the above three Bibles are eminently suited for family reading.

No. 4, LARGE QUARTO SIZE (13 x 10 $\frac{3}{4}$ INCHES).—

Contains the Old and New Testaments; Scott and Henry's commentaries; besides many thousands of critical and explanatory notes selected from the great standard authors of Europe and America by the Rev. John Eadie, D.D., LL.D., Professor of Biblical Literature to the United Presbyterian Church; a preface by Dr. Eadie; a chronological index; a concise Harmony of the Gospels; proper names with their significations; Scripture measures, weights, and coins; a concise Biblical Encyclopædia, alphabetically arranged; the Psalms in Metre, etc. It also contains a beautiful colored title page; an illuminated family register of four pages in gold and colors and it is illustrated with many superb illustrations by Gustave Dore, besides others in colors. There is also—between the Old and New Testaments—a literary curiosity that will gratify very many purchasers, i.e., the verse "God hath made of one blood all nations of men." Printed in 103 languages, this bible is handsomely bound in leather, with the title on side and back, and has gilt metal corners and clasps. Price, £2/2/-.

No. 5, THE SAME CONTENTS AS NO. 4.

Without the Dore illustrations, but containing many more beautifully colored and tinted pictures. The binding is very rich, being full gilt on the side and back, with superior corners and clasps—a very handsome volume. Price, £2/10 0.

No. 6, THE SAME CONTENTS AS NO. 4.

But with an engraved instead of a colored title page. It is illustrated with a larger number of colored illustrations than either numbers 4 or 5, and contains besides a fine selection of black and white pictures on Plate paper after the best artists. It is superior even to number 5 in the binding, having full gilt side and back in a very beautiful and elaborate pattern. The gilt corners and clasps are of a very choice kind. Price, £3.

When ordering, please quote above numbers.

UNIVERSAL PROVIDERS.

JOHNSTON'S "NEW CENTURY" GLOBE. An up-to-date 12-inch Terrestrial Globe, showing latest changes in South Africa and elsewhere. British Possessions colored in red. The cover is printed in W. and A. K. Johnston's best style; it shows Ocean Currents, Isothermal Lines, and Date Line. The Globe has a strong Metal Semi-meridian, marked in Degrees; the Stand is of heavy Metal, and gives designs of the Rose, Thistle and Shamrock. The Best Globe for Schools, Public Libraries, and for Home Reference **27/6**
A Packing Case is included in this charge.

"UNRIVALLED" TERRESTRIAL GLOBE. 6-inch. A marvel of cheapness, in Pasteboard Box ... **5/-**

BOTANY SHEETS FOR BEGINNERS, by Alexander JOHNSTONE, F.G.S., Lecturer on Botany, Edinburgh School of Medicine. Sheet 1, Roots; Sheet 2, Stems; Sheet 3, Leaves; Sheet 4, Leaves; Sheet 5, Flowers; Sheet 6, Fruits and Seeds. Sheet 1 gives views of the different kinds of common roots; sheet 2 shows the shape and different habits of growth of common stems; sheets 3 and 4 contain numerous interesting examples of leaves; sheet 5 is made up of typical flowers, sheet 6 of various common fruits and seeds. Copious explanatory letterpress is given at the foot of each sheet. Size, 34 x 28 inches each. Mounted on Cloth, Rollers, and Varnished each **3/6**

"HUMAN ANATOMY AND PHYSIOLOGY," by Sir Wm. Turner, Professor of Anatomy, University of Edinburgh. Sheet 1: 27 Diagrams, and Handbook, giving the Bones, the Ligaments, the Muscles, the Heart and Arteries. Sheet 2: 42 Diagrams, and Handbook, giving Veins and Organs of Respiration, Lymphatics and Organs of Digestion, the Brain and Nerves, the Senses. Size, 50 x 42 inches each. Colored and Mounted on Cloth and Rollers. Varnished each **12/-**

MOVABLE ALPHABETS AND NUMERALS. For Elementary Schools and Home Teaching. This consists of—An Alphabet of Capital Letters; an Alphabet of Small Letters, with repetition of many of the Letters most commonly used; a Set of Points and a Set of Numerals. All Printed on strong Cardboard, and enclosed in a Box. A Wooden Board for hanging up, having Slits into which the Letters, etc., can be inserted. This Board will hold a Word of Eight Letters. Price **6/-**.

A Movable Alphabet commends itself not only to the Teachers of Infant Classes as something unique, but to the Children themselves, who can hardly fail to take an interest in it.

LIFE HISTORY OF THE WHEAT PLANT. A Series of Eight Colored Diagrams representing—I., The Structure of the Grain; II., Germination of the Grain; III., The Young Plant; IV., Early Growth of the Ear; V., Growth of the Ear and Flower; VI., The Flower; VII., Ripening of the Grain; VIII., The Wheat Straw. These Diagrams are Reproductions of Original Drawings by Francis Bauer, Botanical Department of the British Museum. With each set is sent a Pamphlet by Mr. William Carruthers, F.R.S., entitled "The Wheat Plant: How it Feeds and Grows"; being Notes explanatory of the Diagrams. Size of Diagrams, 30 x 22 inches. Price (including Explanatory Pamphlet), **10/-** per Set of Eight Diagrams, in Sheets; or **20s.** Mounted on Cloth and Rollers, Varnished. Further Copies of the Explanatory Pamphlet may be obtained at the price of **3d.** each.

ONE HUNDRED OF THE CHIEF FLAGS OF ALL NATIONS. Accurately Printed in Colors. Size, 34 x 28 inches. Mounted on Cloth and Rollers, Varnished **2 6**

RACES OF MANKIND. 35 x 30. Beautifully Printed in Colors. Mounted on Cloth, Rollers, and Varnished Price **3 6**

CLOCK FACE, with Relative Time over the Globe. For Elementary Schools and Home Teaching. This Clock Face is 15 inches in diameter, with movable brass hands. Around it are 16 small dials, which show the corresponding time at various parts of the Globe, when the hands in the large dial are at 12 o'clock noon, Greenwich time. Suitable pictorial work has been introduced round the smaller dials, making the diagram both attractive and useful Price **5/-**

"THE PHYSICAL CONFIGURATION OF THE AUSTRALIAN CONTINENT," by Ernest Favenc (Author of "Geographical Development of Australia," etc., etc.). It tells of the surface and contour of our Continent; gives the work of the latest surveys; a remarkable view of Australia in relief (the only *accurate* one published); a colored map of our river systems; a map of ranges, tablelands, and plains; other maps and charts Price, **9d.**
PRESS NOTICES:—"Sydney Morning Herald."—"Will be acclaimed by teachers and students with a hearty welcome." "Town and Country," October 25.—"An honest description of the surface characteristics of Australia." "The Examiner," Launceston, October 3.—"Admirably designed to foster the growth of a National Australian feeling." "Melbourne Punch," October, 1905.—"A map of the river system impresses us particularly."

THE FIRST DISCOVERY OF AUSTRALIA AND NEW GUINEA, being the Narrative of Portuguese and Spanish Discoveries in the Australian Regions between the years 1492-1606, with descriptions of their old Charts—many of these are facsimiles; rare and ancient in all their quaint colorings. By George Collingridge De Tourney, M.C.R.G.S. of Australia, etc., etc.
Price, post free, **3/6.**

THE GEOGRAPHICAL DEVELOPMENT OF AUSTRALIA. A Century of Progress, 1788-1888. By Ernest Favenc. It teaches Australian Geography at a glance. Nine progressive maps show the advance of Australia from a wilderness to a nation. The map of the River System is original and deeply interesting. The nine maps have been produced on one sheet, mounted on rollers and varnished; size 28½ x 39. The price of the book is **2/-**. Price of Wall Map, **10/6**

PHYSICAL GEOGRAPHY. By E. C. Andrews. Illustrated by D. H. Souter. A fascinating subject, discussed in a fascinating manner. It is a story of the ages in which the geographer's minute may embrace man's history on earth Price **1/6**
PRESS NOTICES:—“Sydney Morning Herald.”—“A capital guide to those who wish to pursue a fascinating study.” “Australian Journal of Education,” October, 1905. “It should hold place as a valuable Supp. Reader, for, while stating great truths, it entertains with nature's marvels; marvel greater than ever appeared in book of fiction.”

SONG STORIES OF AUSTRALIA (Music and Words). A Musical Treat for Children. The “Sydney Morning Herald” says:—“‘Song Stories of Australia’ is a book that should be in the possession of all Australians who have an ear for music. The music and illustrations are by Edith G. Walker, and the words by Jeanie G. Dane. We have here pretty song stories set to suitable music—songs which are purely Australian, and purely sweet and wholesome, music which represents beauty and makes it lasting .. Price, post free, **3/6**

BROOKS' DATE BOOK OF AUSTRALIAN HISTORY. This little book has been revised and enlarged. It is a “multum in parvo” of Australian History Price **3d.**

MG 124.—“STICKFAST” PASTE—“This’l Stick.” The “A1” Crown Brand; a clean white, and tenacious Adhesive, of most exceptional strength, simply ideal for office and all general purposes; grips at once, and never lets go; complete with metal cap and Brush, 1/- size bottle, 6d. each; 5/3 doz.

FOUNTAIN PENS.

Supersede dirty ink pots, rusty steel nibs, penholders, etc. **A GOOD FOUNTAIN PEN IS INDISPENSABLE** in these days of hurry. It is also much more comfortable to use than the old style of steel nib. There is no trouble of dipping into the inkwell and the chance of a blot. You always have the same pen, that will write in the same way, and, in fact, becomes “An Old Friend.”

On the Care of Fountain Pens.

Strangely enough, many purchasers seem to regard a Fountain Pen as something having mysterious features, which render even the most ordinary care quite unnecessary. Being a Fountain Pen, whether suitable or not, they expect it to write perfectly for all time. A little thought will quickly correct this impression. First of all the Gold Nib must be exactly fitting and suited to the hand. If one is accustomed to bear heavily on a stiff, fine pen, a flexible broad pen cannot possibly work well. With Steel Pens the point does not so much matter, as it will wear to the user; but a Gold nib will not: therefore—**CHOOSE THE RIGHT NIB.**

With each Pen full instructions as to its use are given. Don't believe you know all about Pens, but spend a few moments to read our directions. Much disappointment would be avoided if this were more often done:—

Don't take Fountain Pens to pieces.

Use good clean Ink from a corked bottle.

Keep the Pen clean.

Carry it Point up in the pocket.

Don't Lend your Fountain Pen.

And if it gives trouble at any time, send it direct to us for examination—only by so doing can we make good to our customers our promise of **FULL SATISFACTION.**

Our Fountain Pens are fitted with Nibs to suit all writers, and can be used for any purpose.

HINTS.

When the ink flows too freely, it means that there is too little ink in the barrel.

Give the Point Cover a slight twist and it will come off more readily from the barrel.

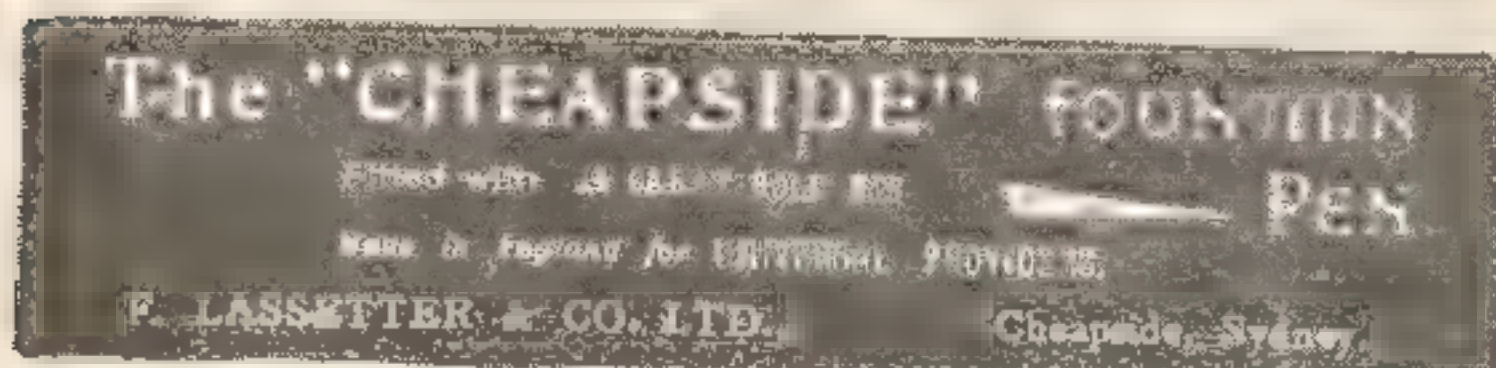

When requiring to fill the pen, and the Point Section is too stiff to be readily unscrewed from the barrel, put a rubber band round the Point Section—it gives an effective grip.

Do not remove the Nib or Feed Bar from the Point Section; this is the experts work.

Empty the ink from the pen before sending it by post.

© CHEAPSIDE. SYDNEY. ©

UNIVERSAL PROVIDERS.

THE "LASSETTER" No. 9 FOUNTAIN PEN, with patent underfeed special ducts in the feed bar, prevents blotting. The Pen is simple in construction and is easily cleaned; holds a large supply of Ink; fitted with strong Gold Nib with channelled feed. Price 6/- each.

As Illustrated.

THE "CHEAPSIDE," LONDON-MADE FOUNTAIN PEN can be supplied in Fine, Medium, or Broad Points. The "Cheapside" is the best cheap Fountain Pen made. It is always ready for service, and is a pleasure to use, with patented feed, and 14ct. Gold Iridium Tipped Nib. A most serviceable Pen, widely used, and very popular. Wonderful value 3/- each.

THE "LASSETTER" No. 5 FOUNTAIN PEN—Fine, Medium, or Broad Points. A first-class British-made Pen; will last, with ordinary care, for many years. Any Steel Pen can be matched, with large 14ct. Pen; can be had in Black, Mottled or Tan Colors. Finely polished, hard Vulcanite—4/6 each.

THE "LASSETTER" No. 6 FOUNTAIN PEN can be supplied in Fine, Medium, or Broad Points. A strong useful Pen, holding a large quantity of Ink. Suitable for Red or Copying Ink. Screw point section. Splendid value. Stocked in Black, Tan, or Mottled color 4/6 each.

THE "GLOBE" No. 13 FOUNTAIN PEN, in Fine, Medium, or Broad points; made in the new Art Green Vulcanite, with two Rolled Gold Bands; a splendid Pen for presentation, packed in velvet-lined cases; a very popular line, and quite new. Splendid value, and specially recommended. With twin-feed and silver wire 8/6 each.

As Illustrated.

THE "FLASH," Self-Filling, large 14ct. Gold Nib. "Press the button," filled instantly. Writes when it touches the paper; with screw cap 7/- each

MG 126.—A GOOD BARGAIN is when you get your money's worth and more. You get a splendid bargain when you exchange 3/- for a "CHEAPSIDE" FOUNTAIN PEN, as illustrated

MG 127.—THE "SIMPLEX" SELF-FILLING FOUNTAIN PEN, fitted with 14ct. Gold Nib, with channelled feed; self-filling, self-cleaning, nothing to get out of order, no perishable rubber tube. The "Simplex" Pen is cleaned by a few turns of the piston in clean water. Because of the ease with which the "Simplex" Pen can be cleaned, copying or any other Ink may be used. "Simplex" Fountain Pens are made on the principle of a syringe, and are filled by simply pulling out the piston rod. A splendid Commercial Pen; Nibs to suit all writers, and of the highest class workmanship. The simplest Pen made, and every Pen a pleasure; the Gold Nib is Iridium-pointed, and therefore indestructible. Price 8/6 each.

EVERYTHING SOLID VALUE

Swan Fountain Pen

FOR COMFORT,
DURABILITY AND CONVENIENCE
IT STANDS PRE-EMINENT.

The "Swan" System—Feed and Holder.—The system and feed are the scientific means of conducting the ink from the reservoir to the nib, and of air to the reservoir to replace the ink used. There are various systems, but the "Swan" feed, serving both the top and bottom of the Nib, is, and has been proved the best. The holder is of the strongest and finest grade Vulcanite, shaped to the most comfortable form, highly finished and perfect fitting, part to part. Complete, it is a convenient Pocket Pen, ready for instant use, with ink capacity for many hours of continuous writing. The latest patterns and shapes stocked.

With a "SWAN" one may write at all times and anywhere that is coolest—on the verandah, in the garden, or on the steamer's deck.

MG 129—"SWAN" FOUNTAIN PENS, without "cut off" or other adjustments, and therefore always ready to write immediately. To be carried upright. The perfect Pen for Shorthand Writers. A busy writer's greatest aid.

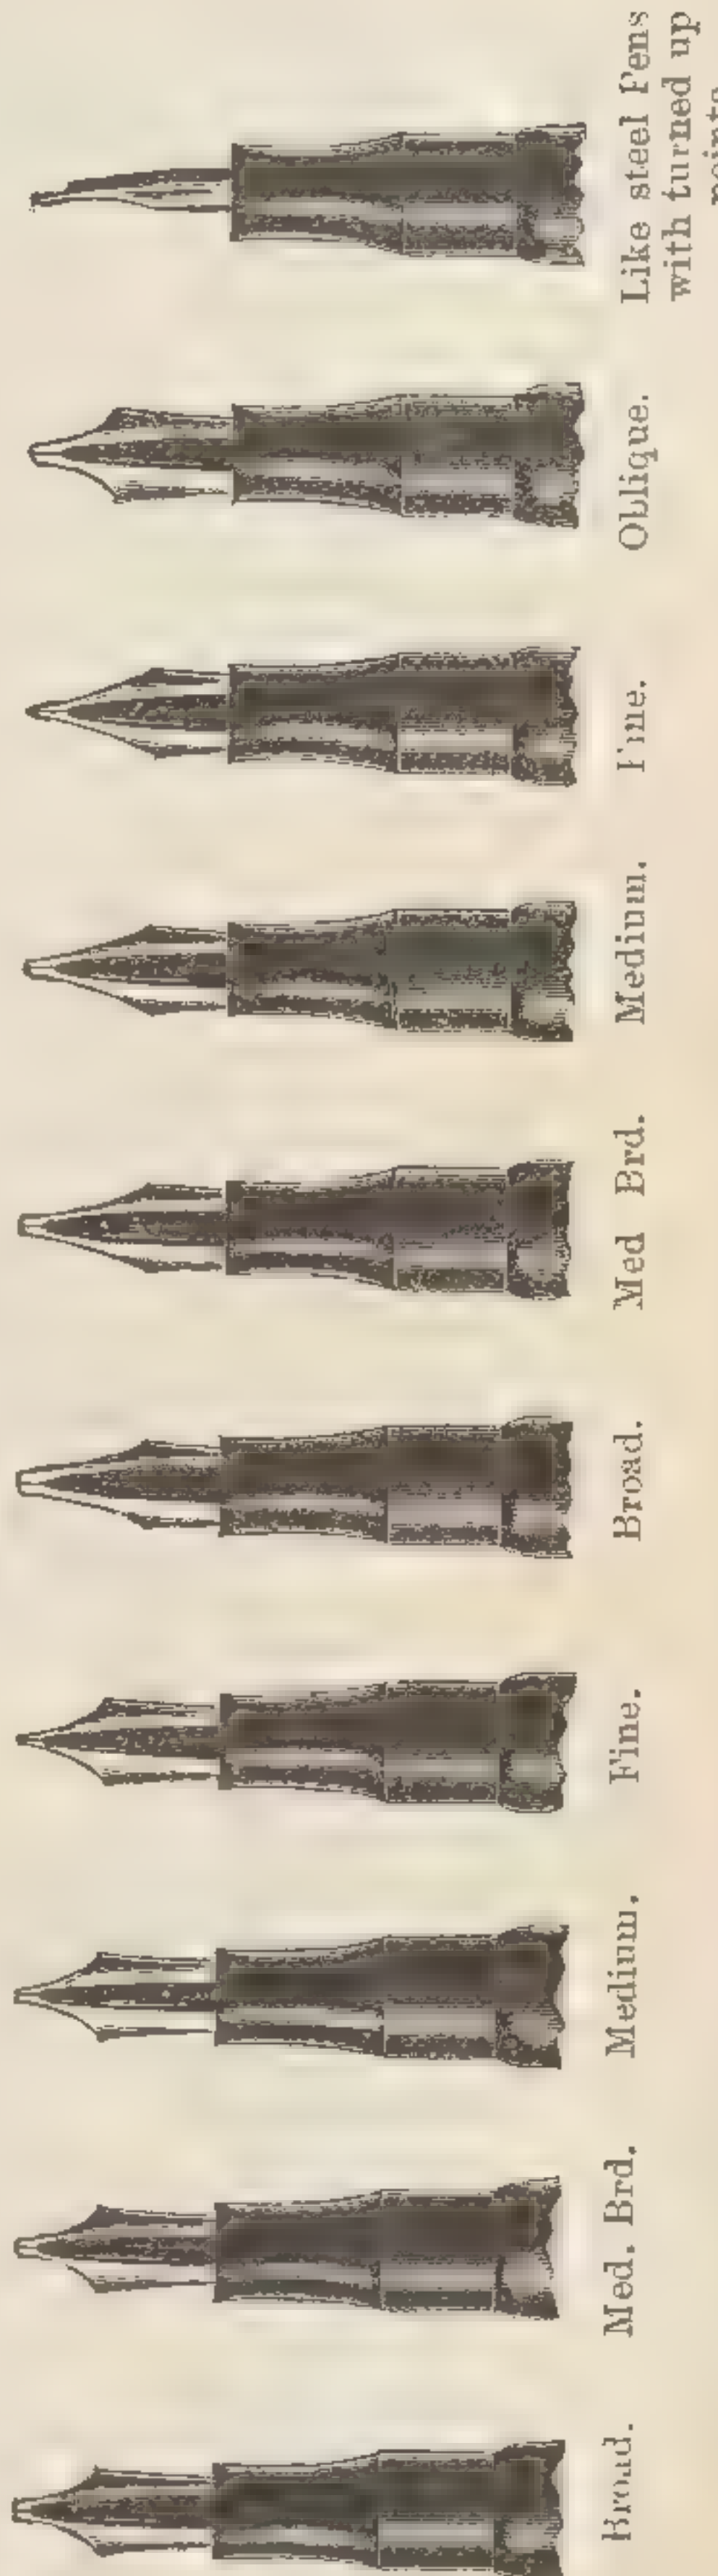

MG 130.

Fine, Medium, Medium Broad, or Broad Points—
10/6 each.

SPARE PARTS of the "SWAN" FOUNTAIN PEN—Size No. 1. These are not absolutely interchangeable, therefore complete Pen should be sent when repairs are required: Reservoir, 3/-; Nib Section, 2/-; Point Cover, 1/-; 14ct. Gold Nib, 5 6; Silver Spiral Wire, 6d.; Delivery or Feed Bar, 1/3. Allowance on old Nib, if returned, 1/6.

Suitable for Christmas, New Year,
Birthday, Wedding or Public
Presentations.

For Price of Leather Pockets, etc., to
hold Fountain Pens, see page 239.

The various widths of point of "Swan" Pens have a distinctive number which is stamped on the opposite end. Those here illustrated are the styles most commonly in use, though there is a large variety besides. Where possible, we recommend enclosing a sample steel Pen used just to state best liked, a specimen of handwriting, and leaving the selection of point to us; when this is impracticable, these illustrations will assist in making a choice.

Waterman Fountain Pens

MG 134, MG 135, MG 136, MG 137, MG 138, MG 139, MG 140, MG 141, MG 142,

9 Different Styles of the Waterman Pens.

- 1.—WATERMAN'S "IDEAL" is the simplest Fountain Pen made—there is only one feed.
- 2.—The Spoon Feed is a Special Patent, which totally prevents blotting, etc. An exclusive Waterman Patent.
- 3.—The Pen is always ready to write, directly it touches the paper.
- 4.—There is no trouble in keeping Waterman's "Ideal" in work. It takes but a few seconds to fill it.
- 5.—There are so many varieties of Nibs that the most difficult handwriting is suited.
- 6.—There is a guarantee that every Pen is effective. Every Pen that does not give satisfaction will be gladly replaced.

The filling of the Pen is very simple. After having unscrewed the point section and charged the filler with ink, hold the barrel slanting towards you. Let the ink pour slowly down the side of the barrel nearest to you. This prevents air bubbles arising. Should, however, the air bubbles arise in spite of

these precautions, a simple method to get rid of them is to extract them by means of the empty filler.

Any good fluid ink may be used. Avoid ink that has been left exposed, as it is probably full of dust and grit, which would tend to close the fissures in the feed and retard the flow of ink.

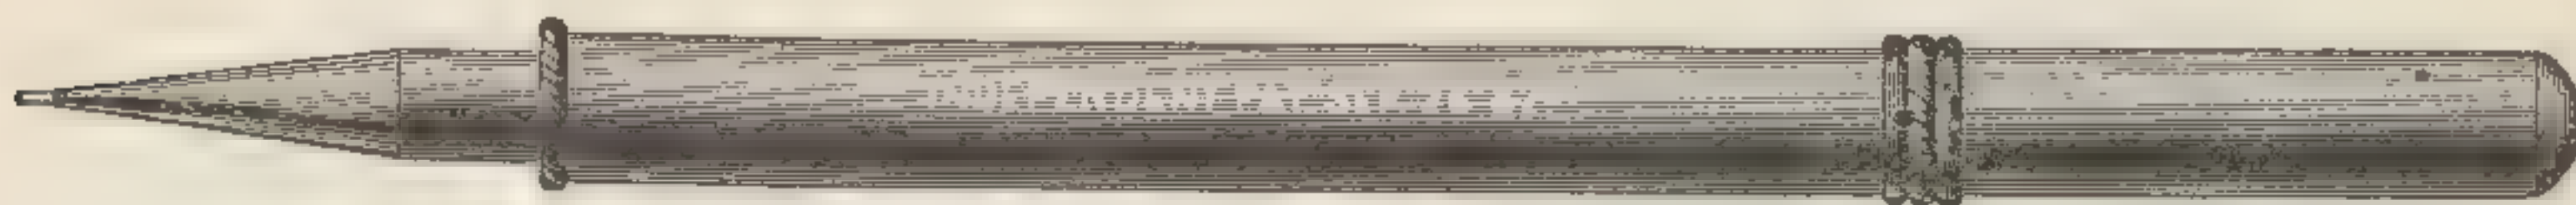

How to clean the Pen without taking it apart.—Unscrew the point section from the barrel, then attach the rubber bulb of the filler to the threaded end of the point section and force water in and out through the feed. This will effectively remove any grit which may have gathered in the fissures without in any way disturbing the adjustment of pen and feed, which should never be done except by an expert. Hot water must not be used, as this will cause the vulcanite to turn grey.

Prices 12/6, 17/6, 20/-, 25/-, 30/- each.
With Plain or Chased Gold Bands, 17/6, 22/6, 25/30/- each.

Covered, Silver 22/6, 25/-, 35/-, 40/-, 45/-, 55/- each
Covered, Gold, 40/-, 60/-, 70/-, 80/-, 90/-, 105/- each

UNIVERSAL PROVIDERS.

Stylographic Pens

MG 143.

STYLOGRAPHIC PENS are most useful for making notes, etc., as they can be carried in any position in the pocket, without fear of leakage. They write as smoothly as a lead pencil, and are always ready for use. Each Pen is packed in a separate box, together with a glass filler and cleaner.

MG 143.—THE "INDEPENDENT"—One of the best Stylo. Pens made. Fitted with a needle and a Platinum Point, which is carefully rounded, and thus writes like a lead pencil 2/6 each

THE "CROWN A1" STYLO PEN.

Solid Crayon for Pocket, in Metal Case.

For Price List of Solid Crayons, see page 245.

THIS IS THE POINT

Is your pencil a

KOH-I-NOOR

or only an imitation?

The KOH-I-NOOR PENCIL is the best made, and lasts six times as long as an ordinary pencil.

MG 182.

"KOH-I-NOOR" PENCILS are the finest Pencils made. Owing to the special process of manufacture, the lead assumes a highly compressed form, which secures for it remarkable lasting qualities, thus rendering the Koh i-noor Pencils not only the best, but the cheapest Pencils to use. Hexagon; Yellow Polished; stocked in 17 degrees: B to 6B, HB, F, H, 2H to 9H, also Copying Ink. Unsurpassed for purity, smoothness and durability—
4d. each; 36 per doz.

The best pencil for Bookkeepers, Engineers, Architects, and for general office use is the Koh-i-Noor. Will retain a working point much longer than any other pencil yet produced.

MG 212.

A MOST USEFUL NOVELTY.

MG 211 and MG 212—EAGLE "ARROW" PENHOLDER—

This penholder is more especially intended for pocket use, as it is hermetically sealed against dirt or dust when closed.

In appearance and working it greatly resembles the celebrated Automatic Pencil, though in its mechanism it is entirely different.

A simple pressure upon its cap, when held point downward, will release the check or button, and the pen drops into position, the check slipping into a groove made for the purpose in the penholder and holding it securely.

To close the penholder, simply reverse it and press upon the cap, when the check will be released and the pen slides back into the holder.

THE ARROW POCKET PENHOLDER, in black Japanned case 5d. each; 4/9 per doz.

POCKET VULCANITE PENHOLDERS, with reversible point 6d., 9d., 1/- each

Latest and Best Numbering Machines

Besides the Repeating, Consecutive and Duplicating movement, this Machine can be set to Triplicate and Quadruplicate.

The different movements are instantly changed from one to another by simply turning an indicator. The dial will always show the operator how the machine is set.

The machine is an advanced improvement on all other Automatic Numbering Machines in the market. It is a Marvel of Simplicity, works accurately and does not get out of order through mechanical complications. The highest possible grade of materials, workmanship and finish has been attained in this machine. It is light in weight, has steel wheels, and drop cyphers. All the wearing parts are of hardened steel.

MG 219.—With 3, 4, 5, and 6 Hard Steel Wheels—
each 55/-, 60/-, 65/-, 70/-.

The "Pentland" Series of Letter Files

Showing action of Mechanical Lever, etc.
MG 267.

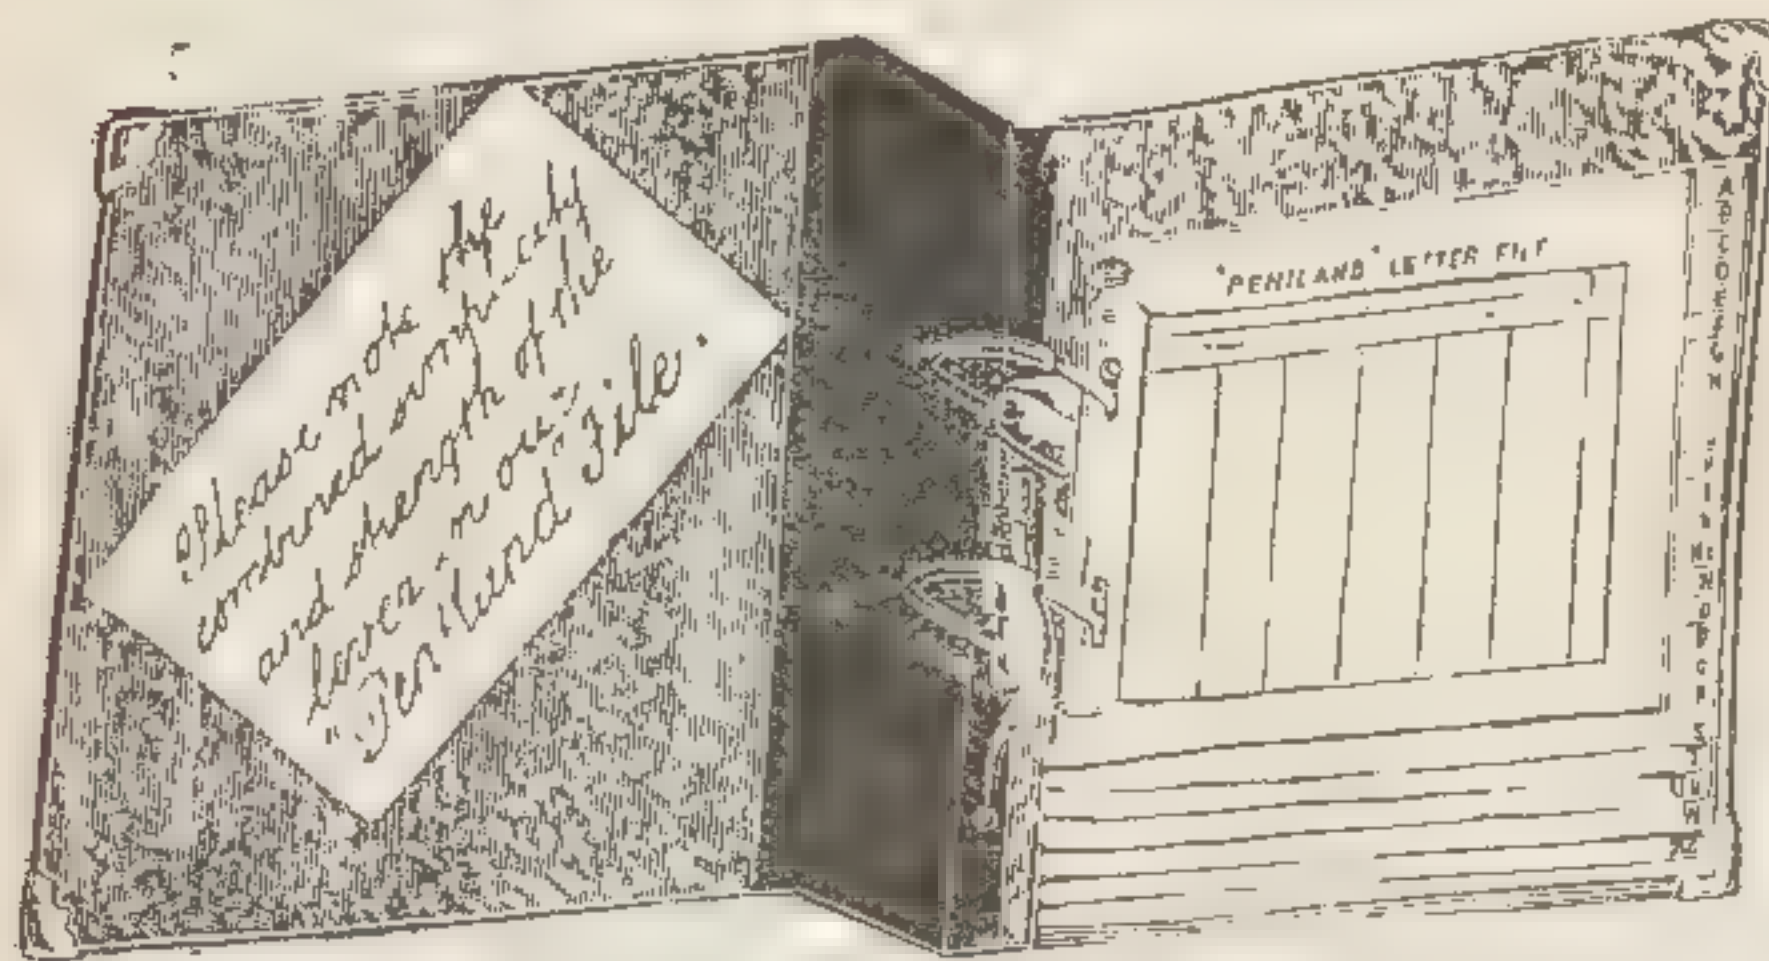

Simplicity—Durability—Moderate Price.

Once used, always used. The File of the Age.

The best finished, strongest, and most economical Files on the Market.

The Lever of these Files combines Simplicity with Strength, and thereby avoids the liability to getting out of repair, so prevalent in the ordinary run of Files. This gives great superiority to the "Pentland" Files.

The "Pentland" Book File

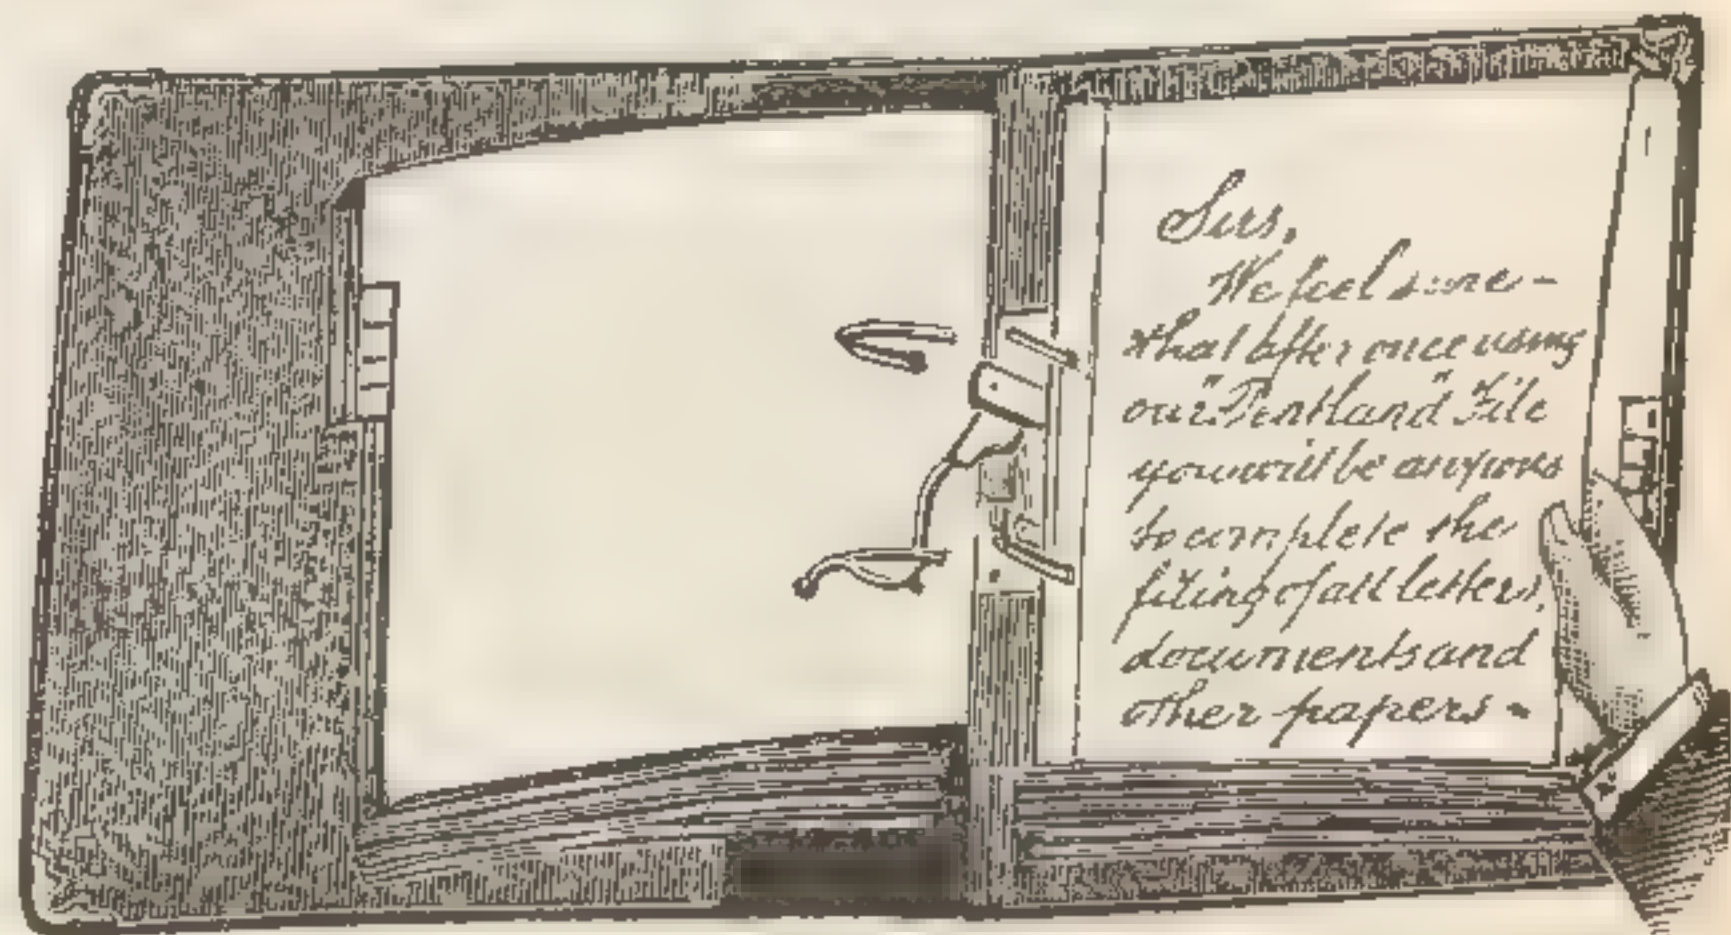

Book File open, before use.

With strong Nickel-plated Lever Fittings as above, Manilla one letter Index, and stout cloth-lined Covers, Marble Sides, Nickel Corners.

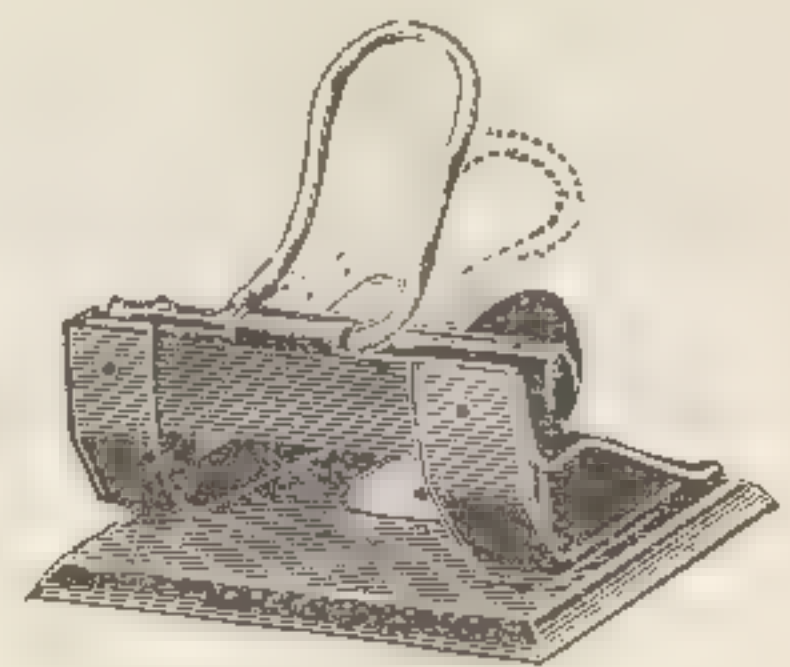

Quarto size 2/9 each.
Foolscap size 3/6 each.

Book File open in use.

This illustrates the ease with which one document may be removed from the File without displacing the others.

MG 268.

Perforator, showing Action.

The Perfect Composition Roll

A new and improved method for reproducing letters, plans, circulars, Customs entries, manifests, typewritten matter, music, bills of fare, etc., etc., and all written or drawn work.

MG 277.

An
Indispensable
Line for
Hotelkeepers.

MG 278.

MG 277.—THE PERFECT COMPOSITION ROLL is composed of a strong cartridge paper, surfaced to a certain thickness with a composition which has the properties of reproducing copies (see directions for use). It is in lengths of 18 feet, and is made in four widths, viz.:—

Width.	Price.	Price per post.
9 inch	10/6 each	12/- each.
11 inch	12/6 each	14/- each.
14½ inch	17/- each	19/- each.
18 inch	25/- each	27/6 each.

The Roll is packed in tins so shaped as to save an immense amount of trouble to the user, as the "Directions for Use" will explain. Does not require washing. Is not affected by climate influences.

MG 278.—INK FOR THE PERFECT COMPOSITION ROLL—

Color of Ink.	Price.	Price per Post.
Black	1/6 per bottle	1/8 per bottle.
Violet	1/- per bottle	1/2 per bottle.
Green	1/- per bottle	1/2 per bottle.
Red	1/- per bottle	1/2 per bottle.

Black Ink is the most powerful ink we manufacture; 150 copies can always be taken from one impression.

Violet, Red, and Green are equally popular, and will give up to 100 excellent copies.

If only 3 to 10 copies are required, use Violet or Green Ink for the original.

For Music.—Paper kept in stock with Staves ruled in "Purple-Black Ink." This makes it an easy matter to obtain perfectly neat copies.

24 Staves on Sheet 3d.; 4d. per post.

One hundred copies can always be taken from a typewritten original if a Hectograph Ribbon or Hectograph Carbon has been used in the Type writer.

Hectograph Ribbons 3/6 each; 4/8 per post.

Hectograph Carbon Paper ... 5/9 qr.; 6/- per post

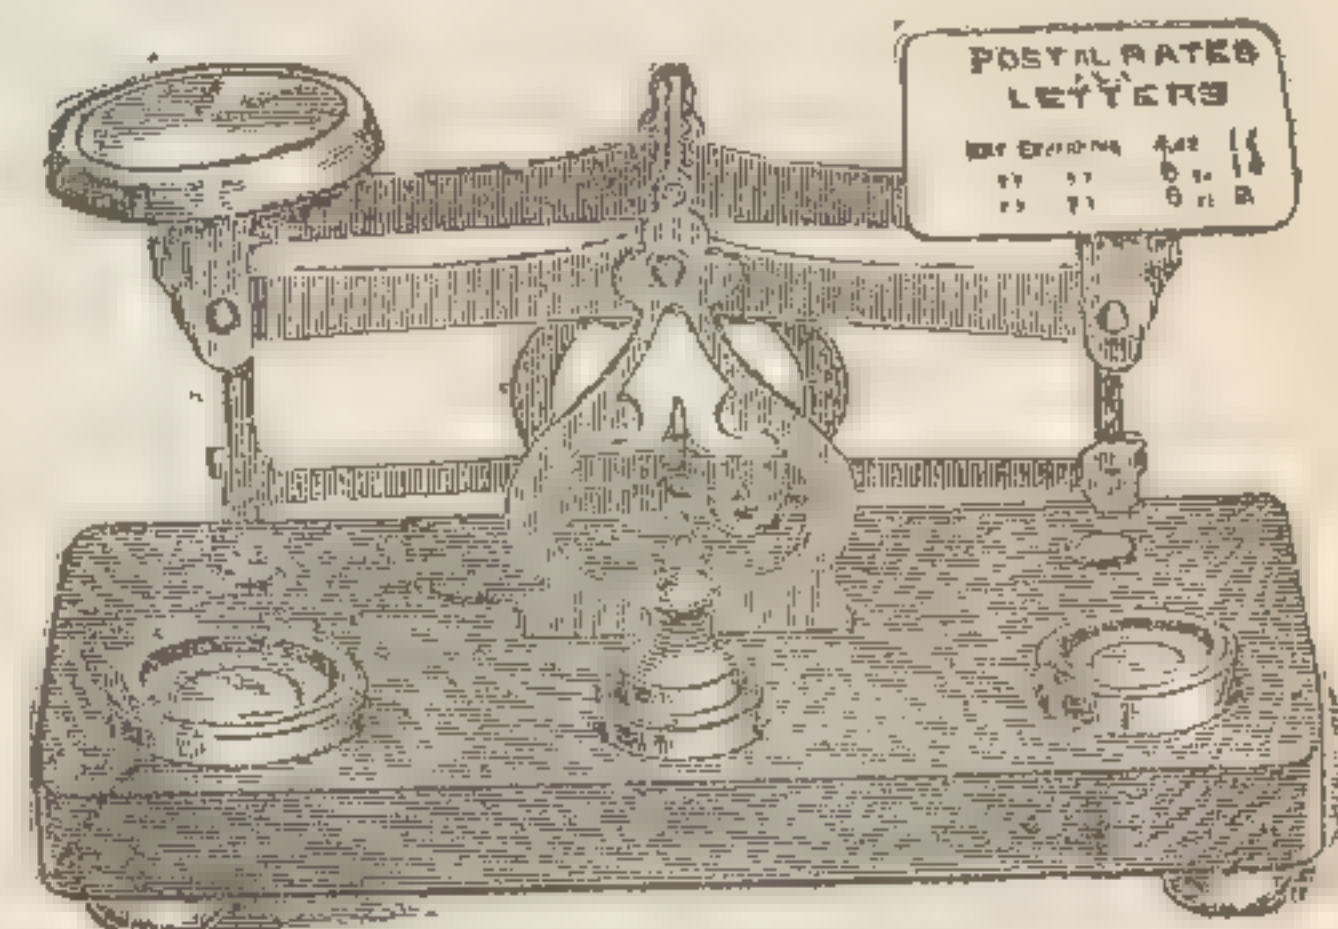

THE NEO-CYCLOSTYLE COPYING PROCESS, Gestetners' Patent, hand rolled apparatus, for reproducing typewriting or handwriting, drawings, or music, in indelible black ink or colored ink; apparatus complete, in handsome wooden case (including Cyclostyle Pen, Stencil Paper, Ink, and Roller—

Letter size 37/6

Foolscap size 50

"Dancing Girl" Crepe Paper.

The original and only make which has the depth, solidity and permanency of colour, necessary to obtain lasting results in making any kind of decorative or useful article. It is crimped up more than the imitation makes, which renders it elastic and more capable of retaining its crimped and rich appearance, after stretching and manipulating.

The Crêpe can be folded, twisted, plaited, stitched by hand or machine, like cloth, and is confidently recommended as an effective substitute for silk and other expensive materials for all kinds of decorations, etc.

The "Dancing Girl" Crêpe Rolls, although nominally 7 feet long, stretch easily to 14 feet of finely creped paper.

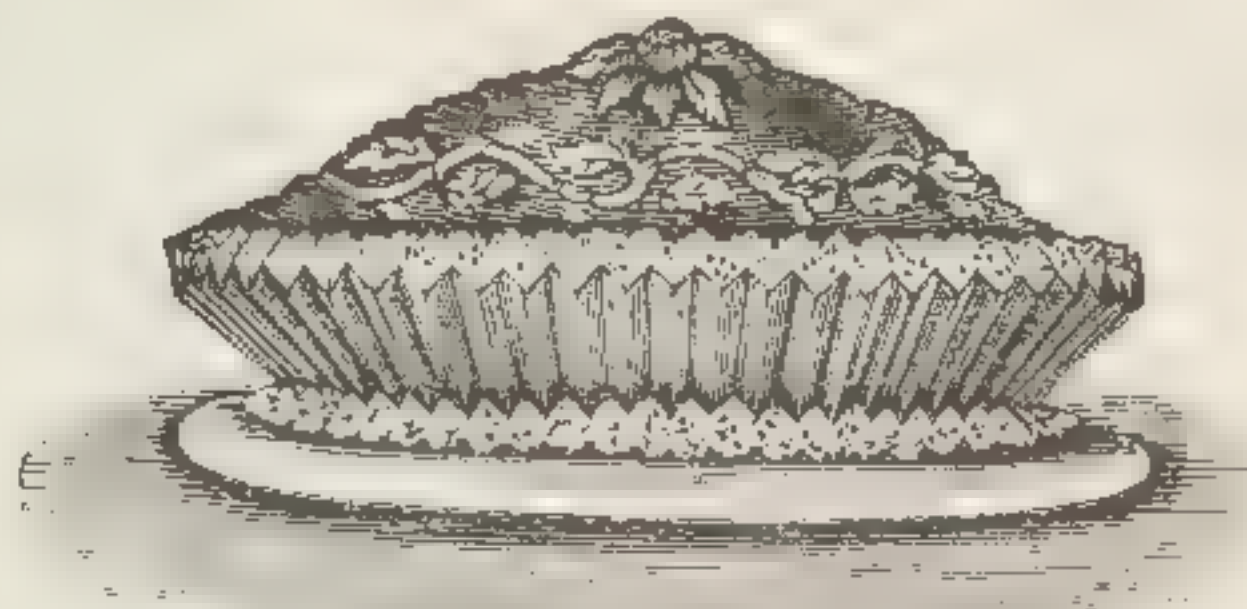

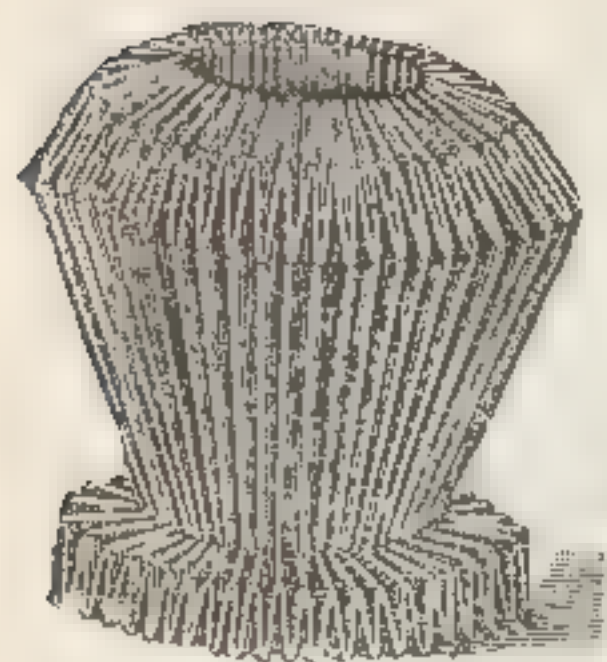

When ordering it is sufficient to quote Number.

THE "DANCING GIRL" BRAND CRINKLED PAPER, in rolls 20½ inches wide and about 7ft. long. Stocked in 40 colors, for making Lamp Shades, Candle Shades, Fans, Fancy Ball Dresses, and an endless variety of Fancy Articles. The demand for this brand has reached large proportions because of its uniformly high grade, delicate coloring, and great strength, 5d. per roll, 4 9 doz.

CHEMISTS' DEPARTMENT

Showing a small selection from Stock carried of Pure Drugs, Chemists' and Druggists' Sundries, Proprietary Medicines, Perfumery, Brushes, Etc.

In issuing this, we would call attention not only to the moderation of our prices, which are acknowledged—but to the excellent quality of the whole of our chemists' stock, fresh, up-to-date and, when seen, most inviting. Visit this department and judge for yourselves.

Dispensing Department

This most important section of our business is, by agreement with our Mr. Arthur Bainbridge, under his personal supervision his qualifications are now too well known to need repetition suffice it, his West End, London, and ripe Australian experience is a guarantee that the ethics of the profession will be duly and faithfully observed. Only qualified dispensers are employed, and only recognised and purest drugs, chemicals and pharmaceutical preparations used. We would impress upon the Medical Profession and our friends generally that, where possible, our drugs are standardised and physiologically tested.

Our well-known facilities of quickly reaching our most distant customers, is a great argument in favour of this department. "Urgency" in medicines necessitating quick despatch, our friends may rely upon our immediate attention to their wants in every branch of this business.

As we are the only chemists who have as large a country connection as a town one, it follows that we have a larger volume of business than any other chemist. This in itself is a guarantee that our **DRUGS ARE ALWAYS FRESH.**

Drugs and Chemicals in Common Use

ACID, BORACIC, Powder or Crystals .. per lb. 6d.

In all cases the exact measurement of the limb, taken next to the skin, must be sent.

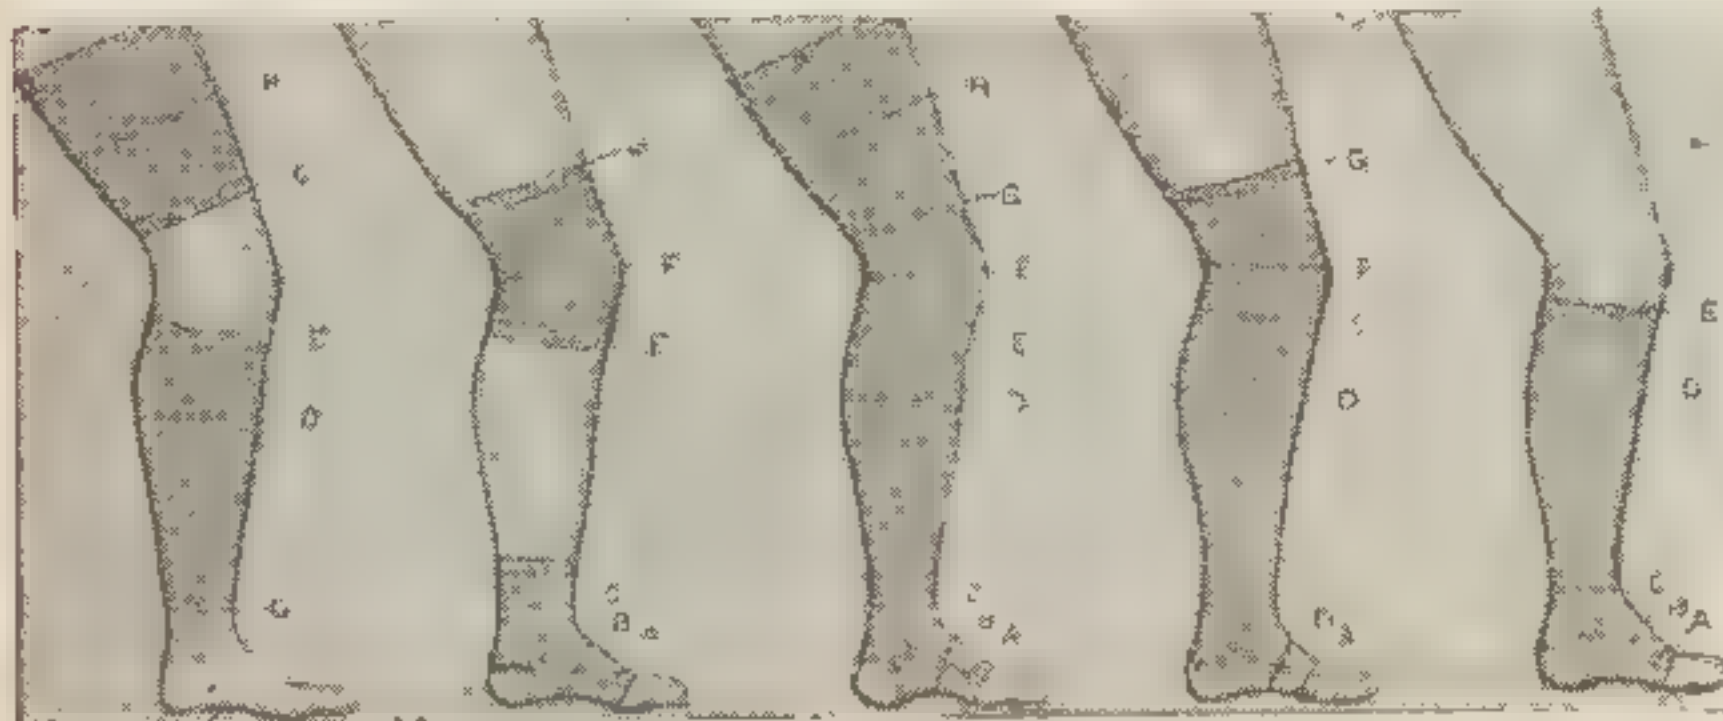

Measurements should be taken on first rising in the morning, since the limb is then in the most natural condition.

Directions for taking measurements for Stockings, Kneecaps, Anklets, etc., etc.—

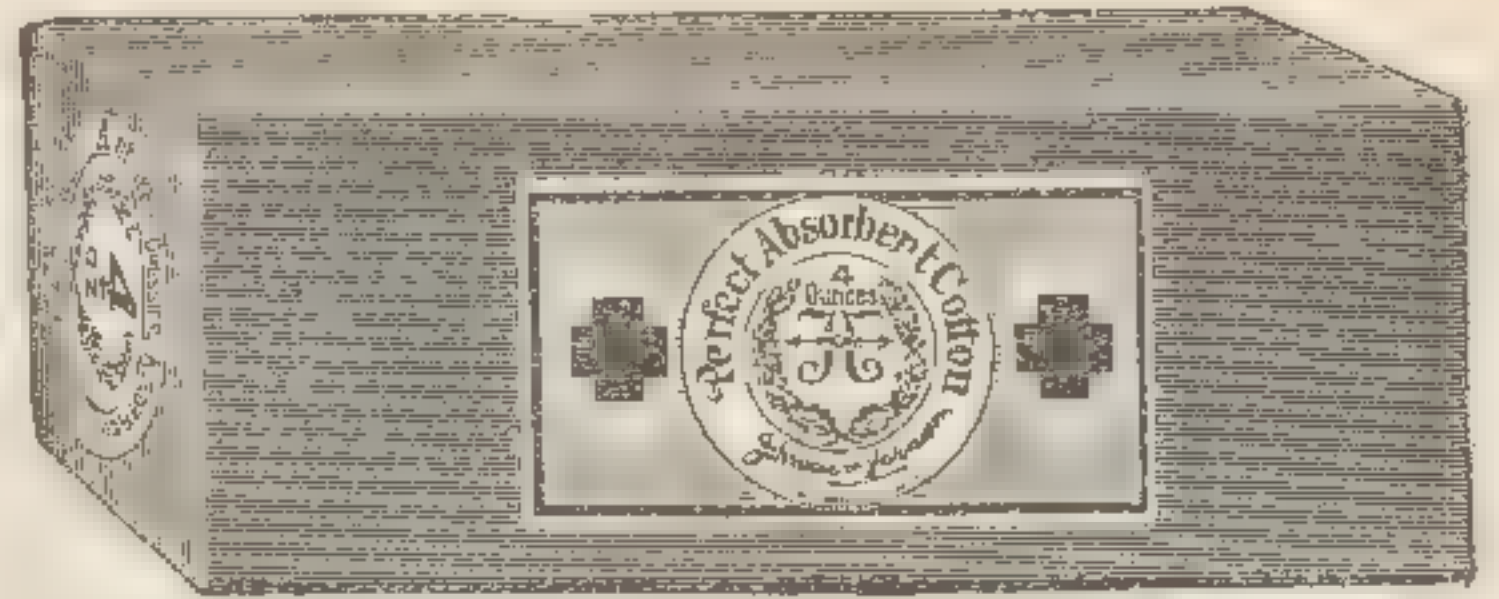

For an Anklet, take circumference at A B C and length of sole of foot to C.

For a Kneecap, take circumference at E F G.

For a Knee Legging, circumference at C D E F G, length from C to F.

MJ 186.

WARREN'S COOKING POTS (OVAL).

2 gallons ...	25/- each.	4 gallons ...	35/- each
3 gallons ...	30/- each.	6 gallons ...	40/- each

The novel process introduced consists in cooking without the viands coming in contact with water or steam. The meat is cooked in an inner vessel, the outer one containing the water being kept at a boiling point.

The food thus prepared is cooked in its own vapour, and none of its nutritious properties wasted.

MJ 187.

TEA URNS.

MJ 188.

OHIO STEAM COOKER.

The Ohio is a cooker, not a cheap bucket steamer. It costs a little more than the round kind, but is worth a great deal more. The Ohio is constructed on scientific principles, everything from soup to dessert can be cooked at the same time, over one burner, without the intermingling of odors whatever.

Ironing Day's Wants

MJ 294.

"MRS. POTTS' " IRONS.

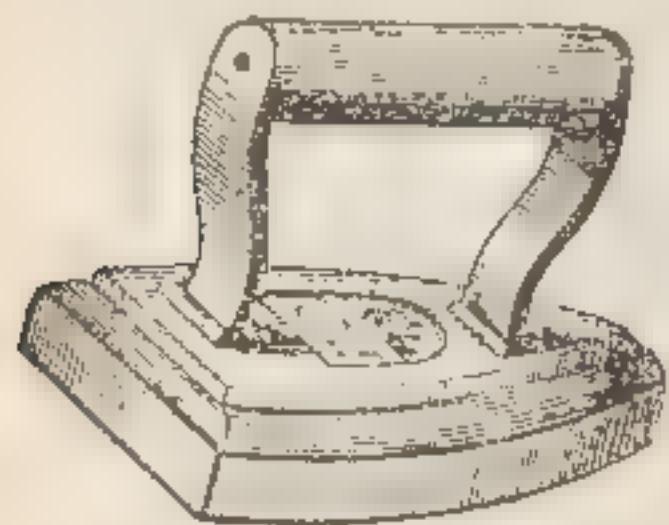

Nickel-Plated.

The great merits of these irons are universally known. They are better made and fine finished, and hold the heat longer than any other iron, and being double pointed will iron either way. The handle is made of walnut, and detachable by a spring, and being circular shape fits the hand naturally, so all straining is avoided. The sets comprise three irons and one handle. No. 1 weighs four lbs., No. 2 five lbs., No. 3 six lbs.

Per set of Three, with handle and stand 5 -

THE "DALLI" BOX IRON.

Double the work in Half the Time.

MJ 297.

As the "Dalli" Box Iron gives intense and uninterrupted heat, all the labor is saved of taking the iron to and from the stove, and as the Iron never loses its heat it need not be passed over the linen so often, like the old fashioned iron; a vast amount of muscular energy is therefore saved. Directions for use are attached to each Iron.

Save the Children — Have Pure Milk

AYMARD'S
PATENT
MILK
STERILISER.

MJ 304.

What is Sterilized Milk?—
Milk which has been Heated
in such a manner that the
GERMS OF DISEASE, and
NOT the Milk itself, have
been Destroyed.

The Report of the recent Royal Commission upon Consumption states that Consumption is conveyed directly to the human body by means of cows' milk and also that early signs of Consumption in cows are very difficult to detect.

The infected milk of many thousands of Consumptive cows is being daily distributed throughout the colonies.

The Royal Commission recommended all Milk to be Sterilized.

The Entire Medical Profession recommended all Milk to be Sterilized.

Infant Feeding.—Extract from "British Medical Journal," December 7, 1895.

"By using Sterilized Milk the additional advantage gained is that the curd of the Milk is separated into minute particles or flocculi, and so softened that it does not form hard concretions in the digestive tube of the infant. It is much better adapted therefore, for infantile feeding, and is also of great use in the case of adults who have feeble digestion, or for other reasons find ordinary milk objectionable. The use of condensed milks may seem to answer for a time, but are very defective sources of nourishment, and should never be employed when fresh Sterilized Milk can be procured."

Children and Adults object to cold milk which has been heated, because of the presence of scum and the alteration in taste.

Sterilized Milk keeps in hot weather. How can it be done? By using the AYMARD MILK STERILIZER. The "Lancet" says:—

"A new and simple apparatus for the Sterilizing of Milk by heating it rapidly and effectually in such a manner that it is not altered by evaporation. The manner of using is very simple, and the result is better than when a number of small bottles are treated at the same time, according to the usual practice, etc."

MJ 416.

The Best Spring Brass Wire is used in the construction of our cages. Every wire is firmly rivetted to the rails by machinery, no solder being used. This, together with the closing of the wires at the top into a heavy brass ring, in place of the usual method of soldering, gives these Cages a strength and firmness combined with lightness, and a durability unequalled by any other on the market.

Among the other special improvements which these Cages possess, attention is called to the patent fastening of the body to the base. This is so arranged that it can be reached easily, being on the under side of the base; and it is not necessary when attaching the body to place it in any particular position. However placed, the sides hold equally well, and in a way that makes accidental unfastening impossible.

The Best and Cleanest for Kitchen Use

Aluminite

A New Porcelain which withstands the effect of fire, and may be placed directly on the flame or stove.

French Fire-Proof China

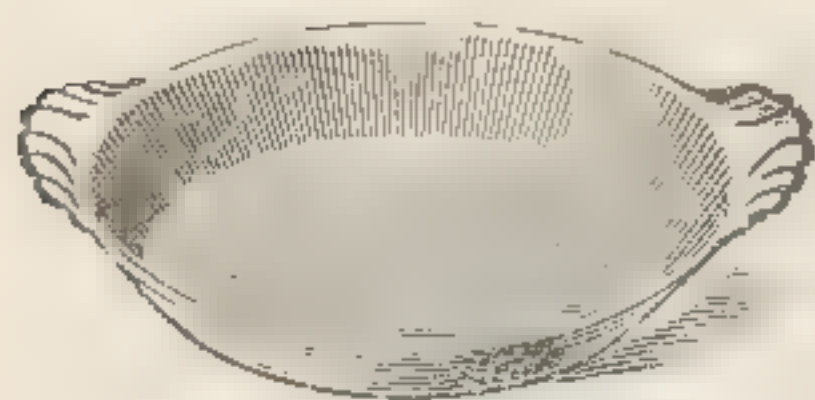

The articles made in this celebrated Fireproof China are admirably suited for cooking purposes. The Cafetieres, though made on the same principle as metal ones, are far sweeter. Coffee can be boiled in them and remain without taint. Saucejans, Milk Boilers, etc., are equally serviceable, and are always kept in stock. It is certain that the superiority of French cookery is mainly due to the extensive use of this Fireproof China.

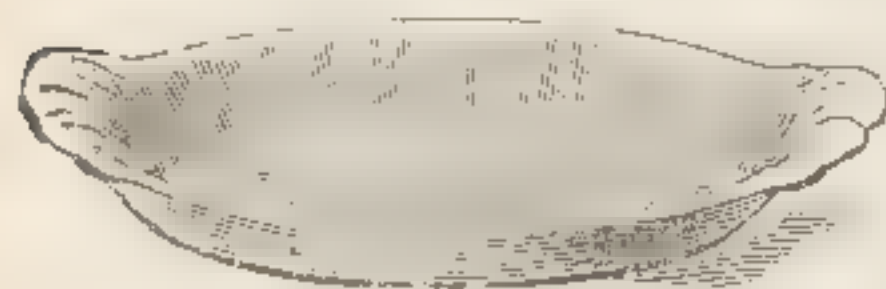

MK 72.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

Watch, Jewellery & Optical Department.

Each Section is complete, with nothing but HIGH QUALITY GOODS
AT THE VERY LOWEST PRICES

WE have endeavoured to illustrate for the benefit of our patrons most of the leading lines with which this Department is stocked. As our London Buyer sends us a continual supply of all the most modern designs in Artistic Jewellery and Up-to-date Optical Goods, we, of a necessity, are quite unable to give an adequate description in the following pages of the immense stock we carry. Should we have omitted to mention or illustrate any particular article required, we shall be only too pleased to forward a detailed description of same with quotations per return mail.

It is our endeavour always to sustain the reputation we have enjoyed for so many years of being able to guarantee the quality of every article supplied by us.

WATCHES A SPECIALITY.

25 YEARS GUARANTEE WITH LASSETTERS' WATCHES.

We make a speciality of a line of **WATCHES**, which are illustrated in this section. Every Watch sent out bears our guarantee that satisfaction will be given or money promptly returned.

We employ First-class Watchmakers only, to undertake repairs of any description of Watches or Clocks sent to us, also a Staff of Working Jewellers who will remodel your old Jewellery into modern designs or repair your broken Jewellery.

First-class Workmanship and moderate charges ensured.

OPTICAL DEPARTMENT.

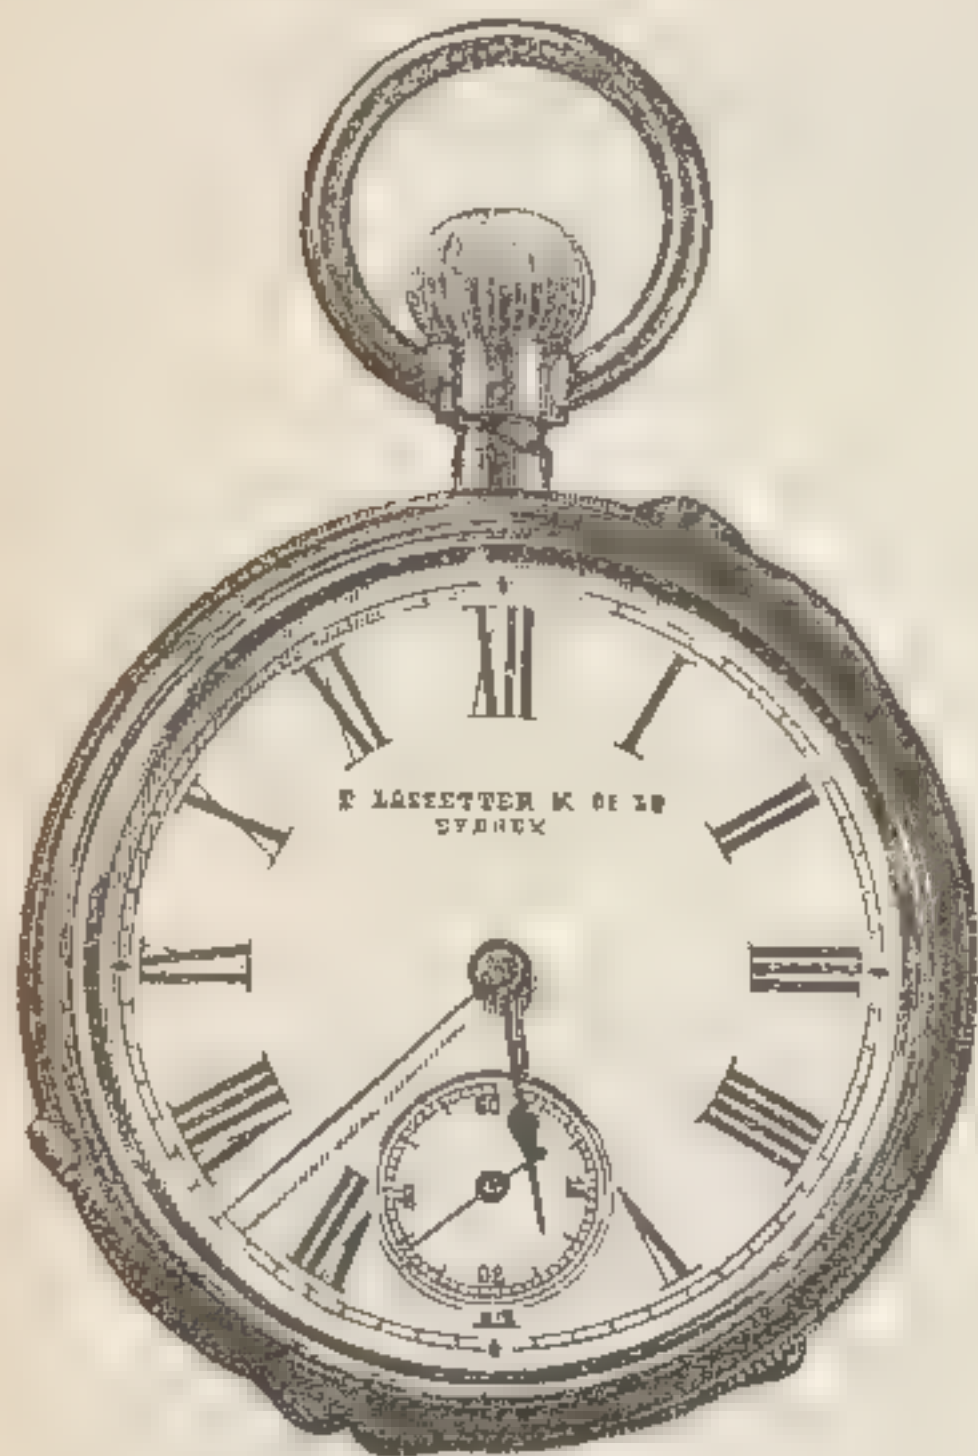

We ask you, under no consideration, to miss reading our remarks and words of advice which are printed on Pages 434 and 435, you may save another's sight even if your own is perfect.

Our stock of Spectacles, Frames, Reading Glasses, Compasses, Thermometers, Barometers, Telescopes, Field and Opera Glasses, is one of the most complete in the Commonwealth.

EVERYTHING SOLID VALUE

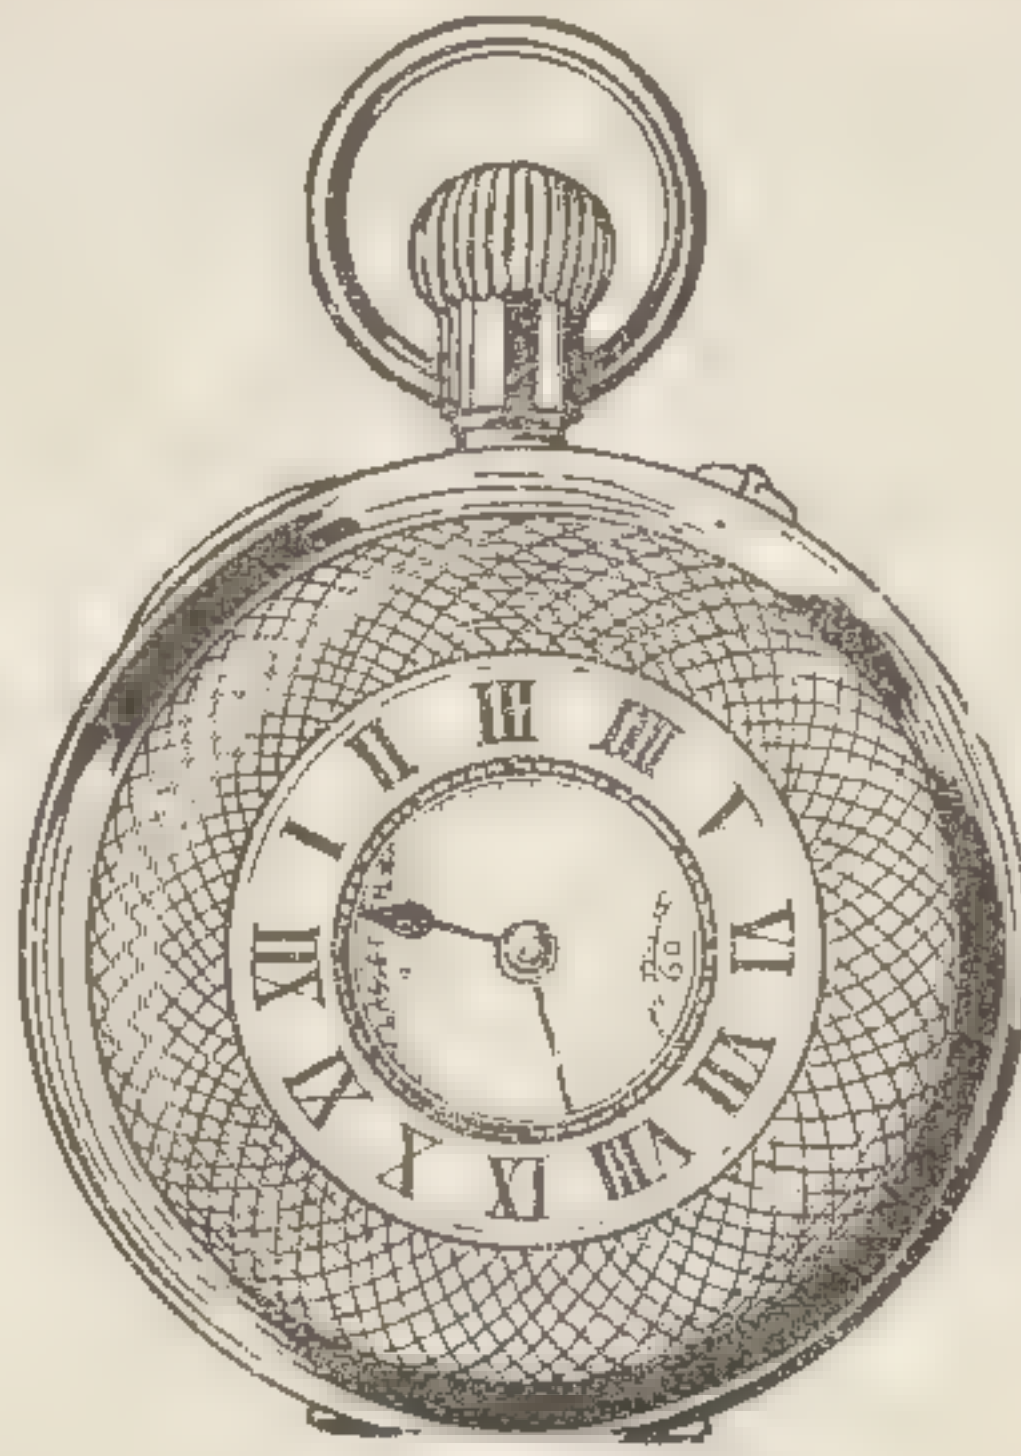

F. LASSETTER & CO., LIMITED

Lassetters' Famous Watches Warranted for 25 Years

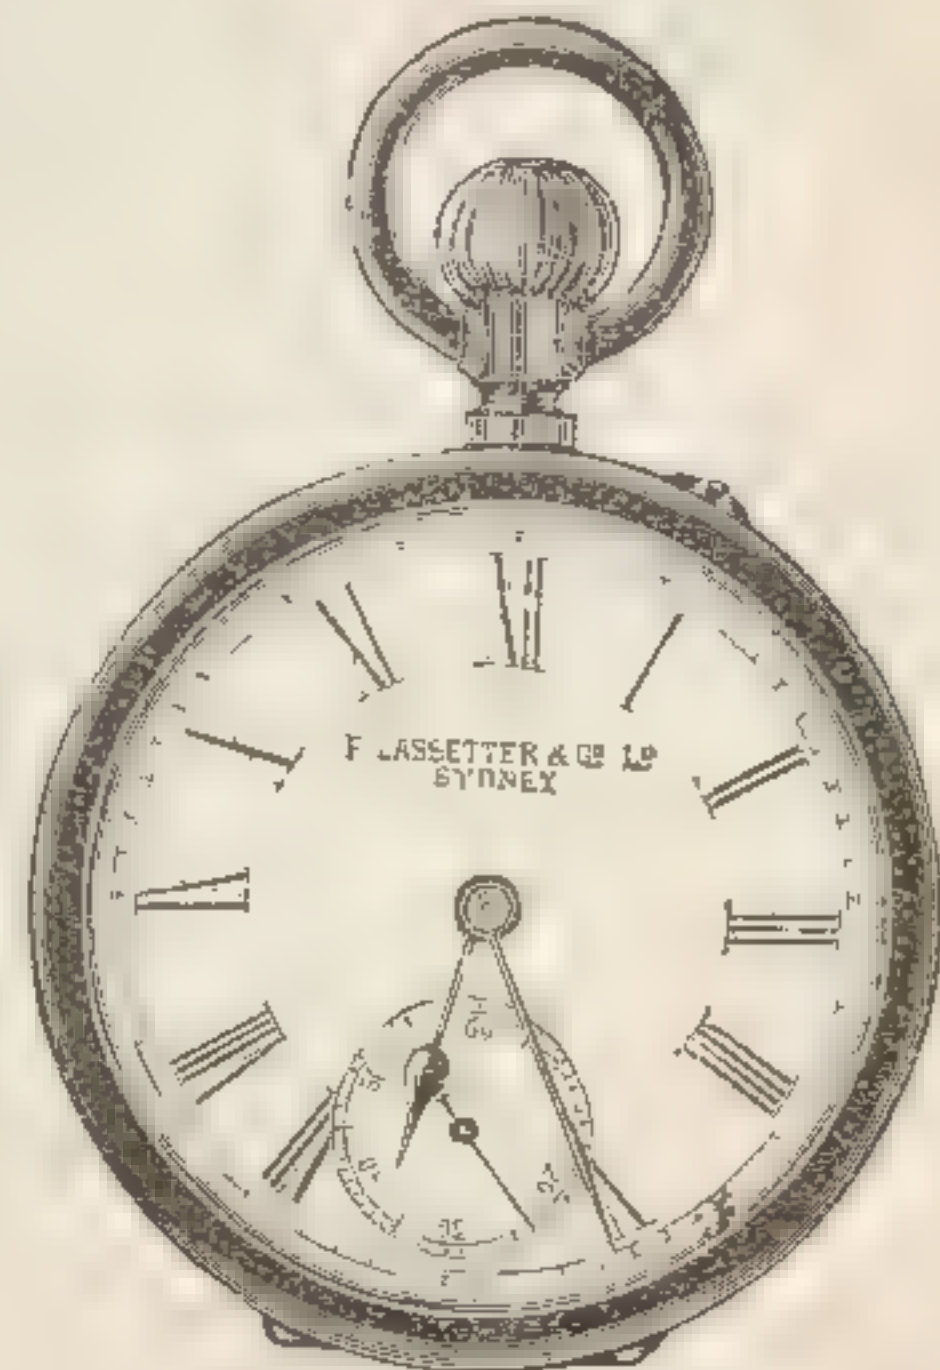

ML 1.—LASSETTER'S FAMOUS "WANDERER" WATCH. This is the article which has built us up a great and lasting reputation for a most reliable and strong Watch. Lever Movement, Heavily Silver-plated Case. Post free 17/6.

Every watch is thoroughly examined and regulated by our own watchmaker before delivery.

ML 2.—LASSETTER'S DEMI HUNTING "CAPTAIN CUTTLE" WATCH. Same movement as our Hunting Case Captain Cuttle. The case of this watch has enamelled figures on the outside; thus the movement is kept cleaner, there being no occasion to open the front to see correct time. You have the facilities of an open face watch and the protection of a double case.

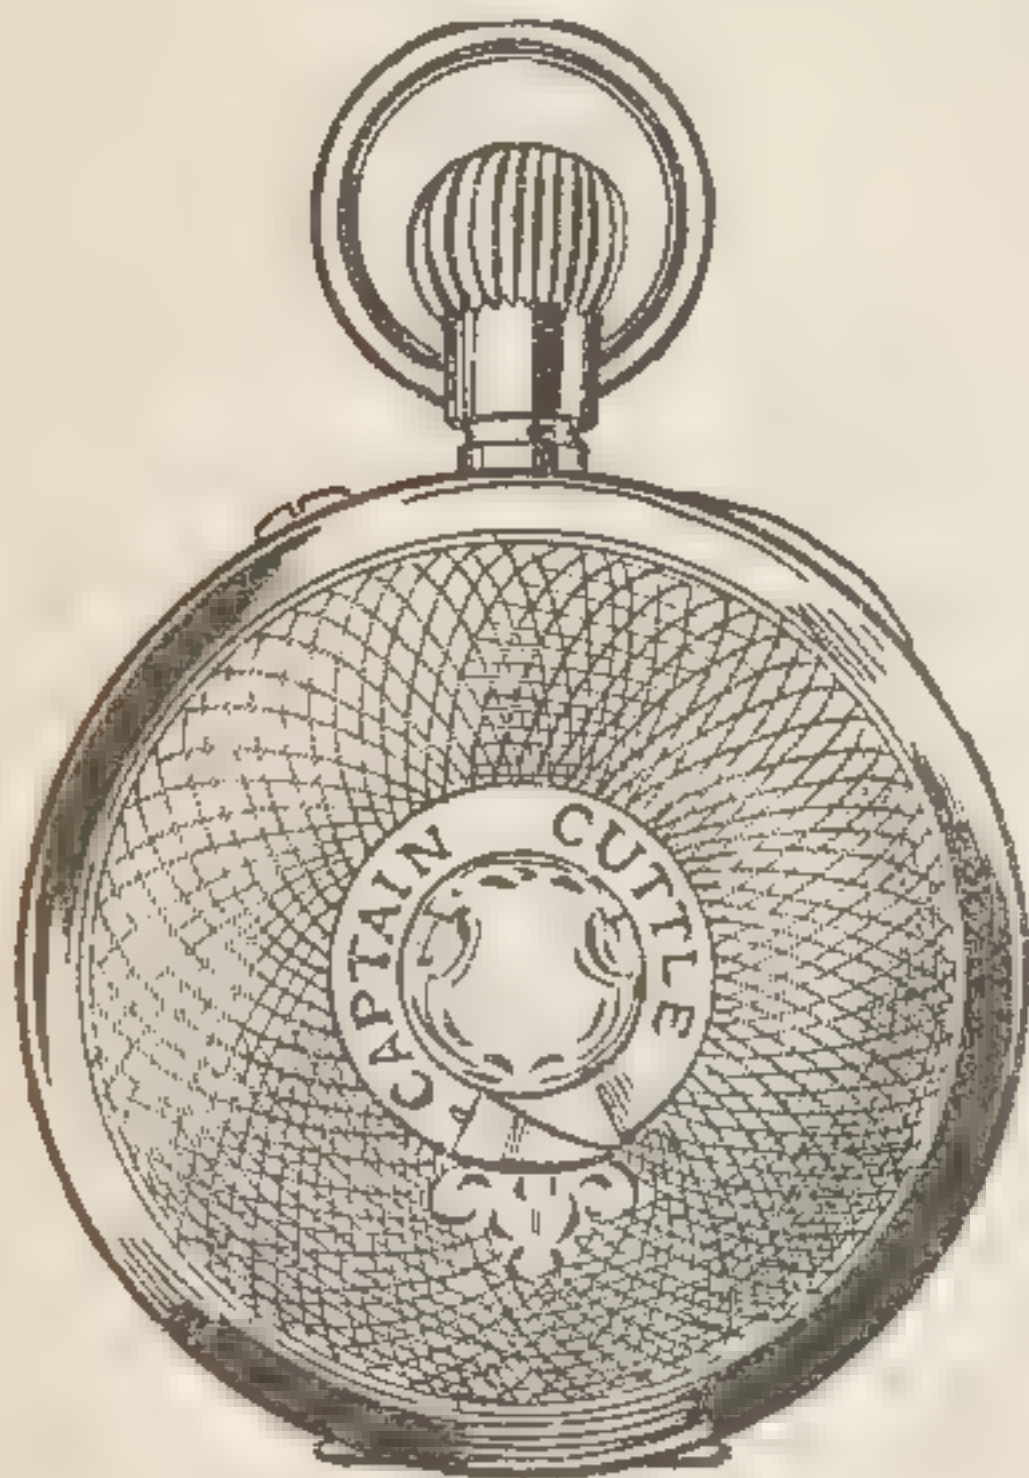

Post free 25 -.

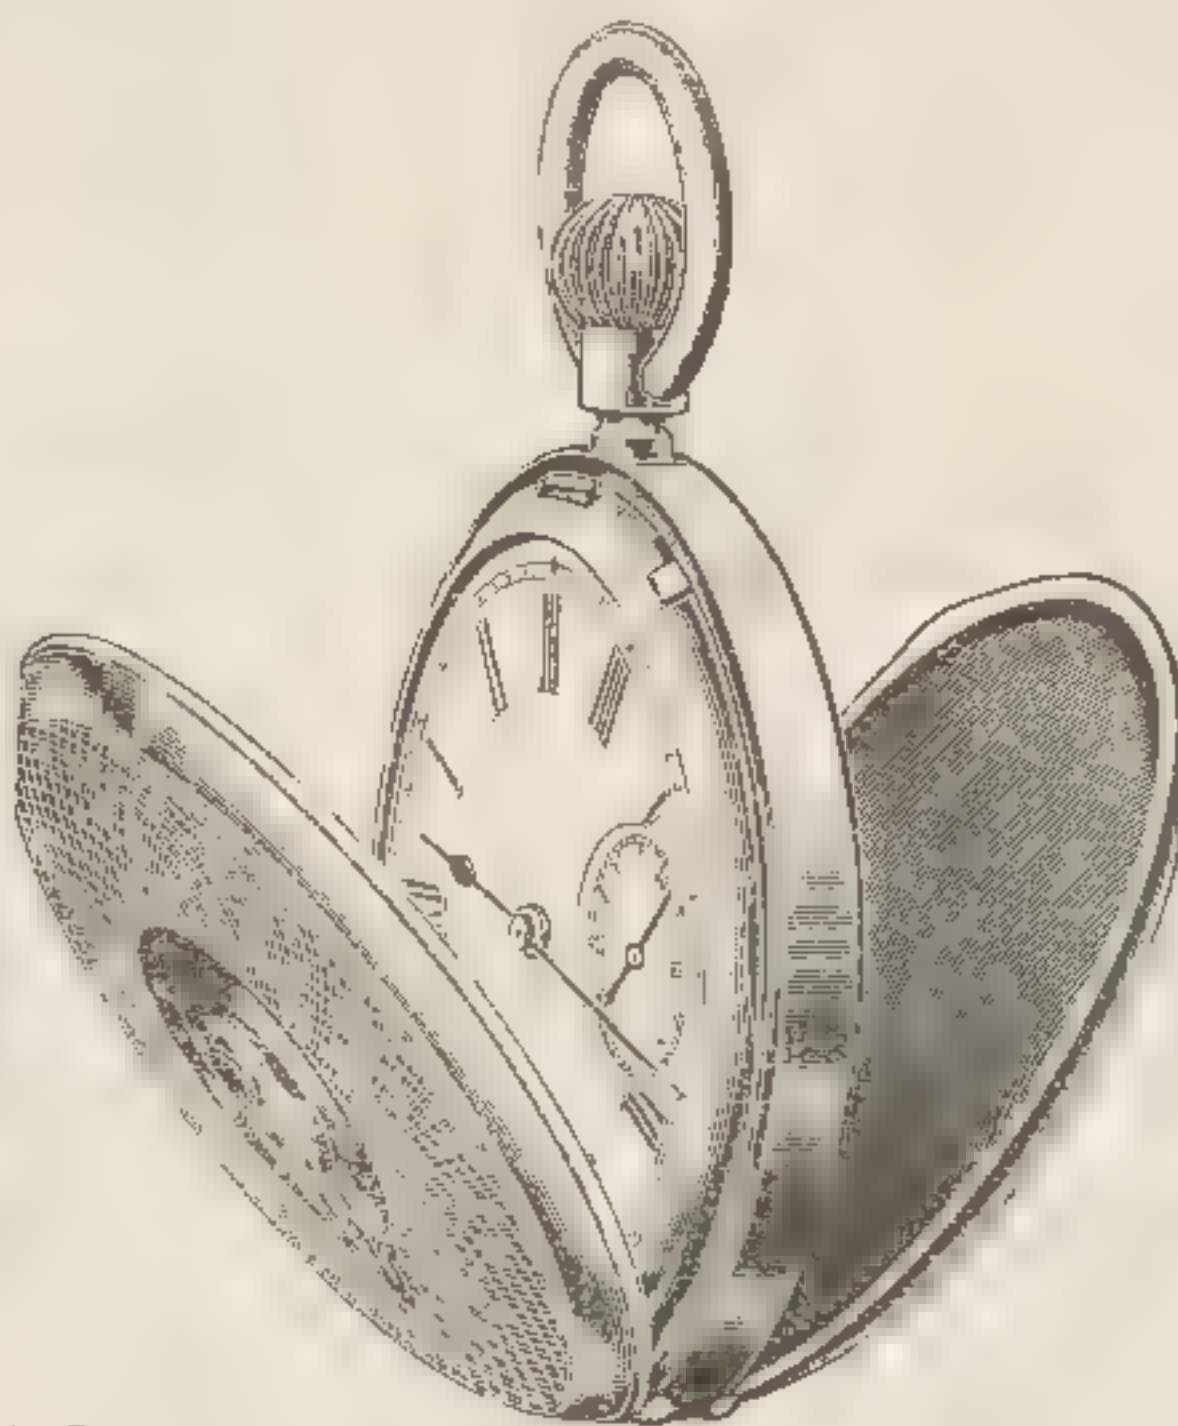

ML 3.—LASSETTER'S OXIDISED "WANDERER." Precisely the same as our Famous Silver-plated "Wanderer," only in a strong, well-fitting Oxidised Steel Case.

Post free 20 6.

Should any of our watches prove unsatisfactory, we will willingly supply a new one in its place.

ML 4.—LASSETTER'S RENOWNED "CAPTAIN CUTTLE" WATCH. This Watch is specially built to stand rough and hard wear. Lever Movement, Strong, Heavily Silver-plated Hunting Case. The Watch for Station use or Farm Work. Post free 22 6.

ML 5.—LASSETTER'S "TRUE AS STEEL" WATCH. This watch was specially built to Mr. Frederick Lassetter's own specification, and has proved itself a most accurate and reliable timekeeper. Fully Jewelled Movement, in a neat Sterling Silver Hunting Case. Post free 40 -.

ML 6.—LASSETTER'S DEMI-HUNTING "BARON." A high class Fully Jewelled Movement, in a well-made and handsome Sterling Silver Demi-Hunting Case.

Post free 45 6.

CHEAPSIDE. SYDNEY.

We repair any make of Watch you wish to send us.

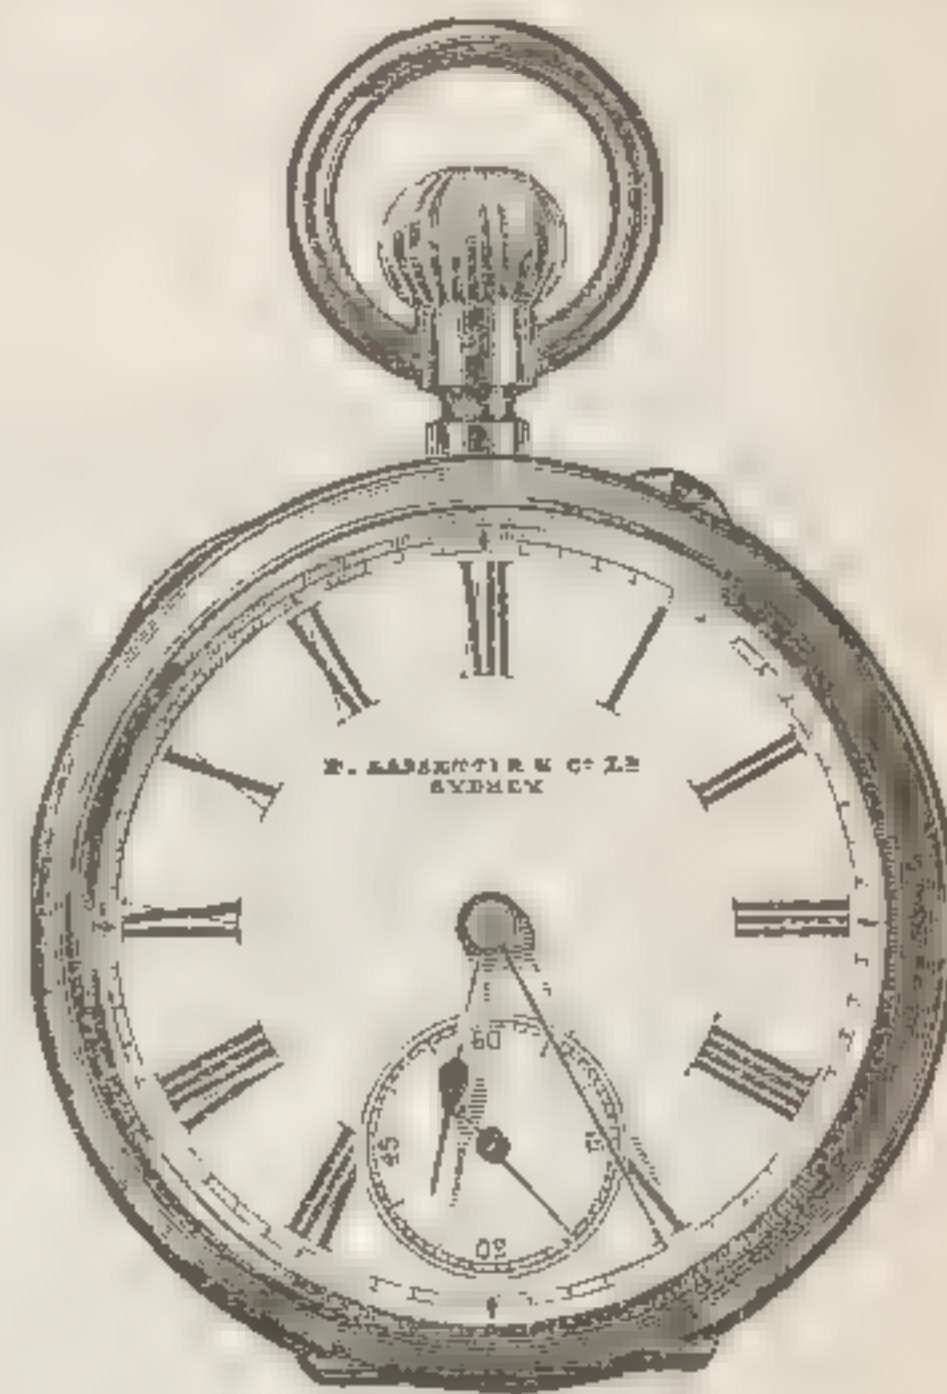

Only fully qualified Watch-makers employed.

All Repair Work Guaranteed 12 months.

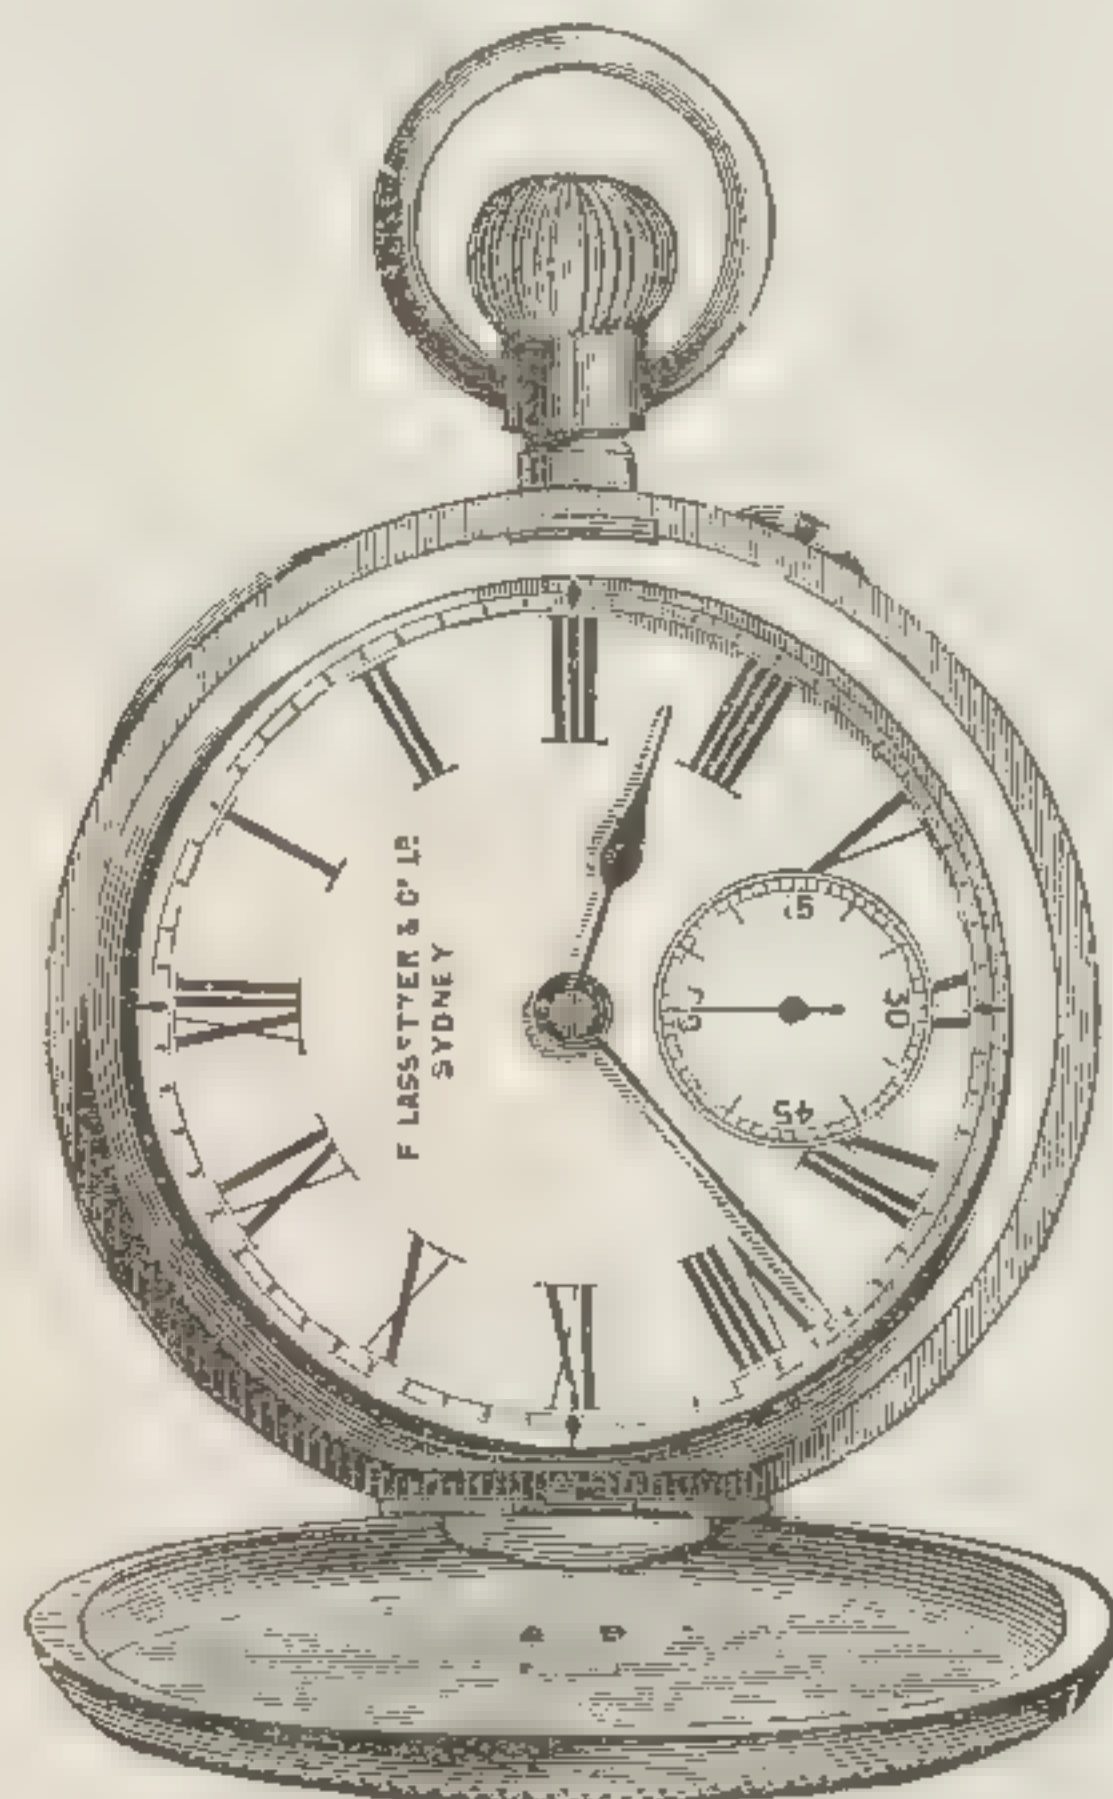

ML 7.—LASSETTER'S "VICTORIA" WATCH. High-class Fully Jewelled Movement, in a Sterling Silver well-finished Open Face Case. Neat, Accurate and Reliable.

Post free, 32/6.

ML 8.—LASSETTER'S OXIDISED "CYRUS" WATCH—Gent.'s Size. A splendid Fully Jewelled Movement, in a strong, well-finished, dust-proof Oxidised Open Face Case

Post free 30/-

ML 9.—LASSETTER'S PRESENTATION GOLD WATCHES. We have a large and varied stock of these watches, and for price and grade of watch we guarantee every satisfaction.

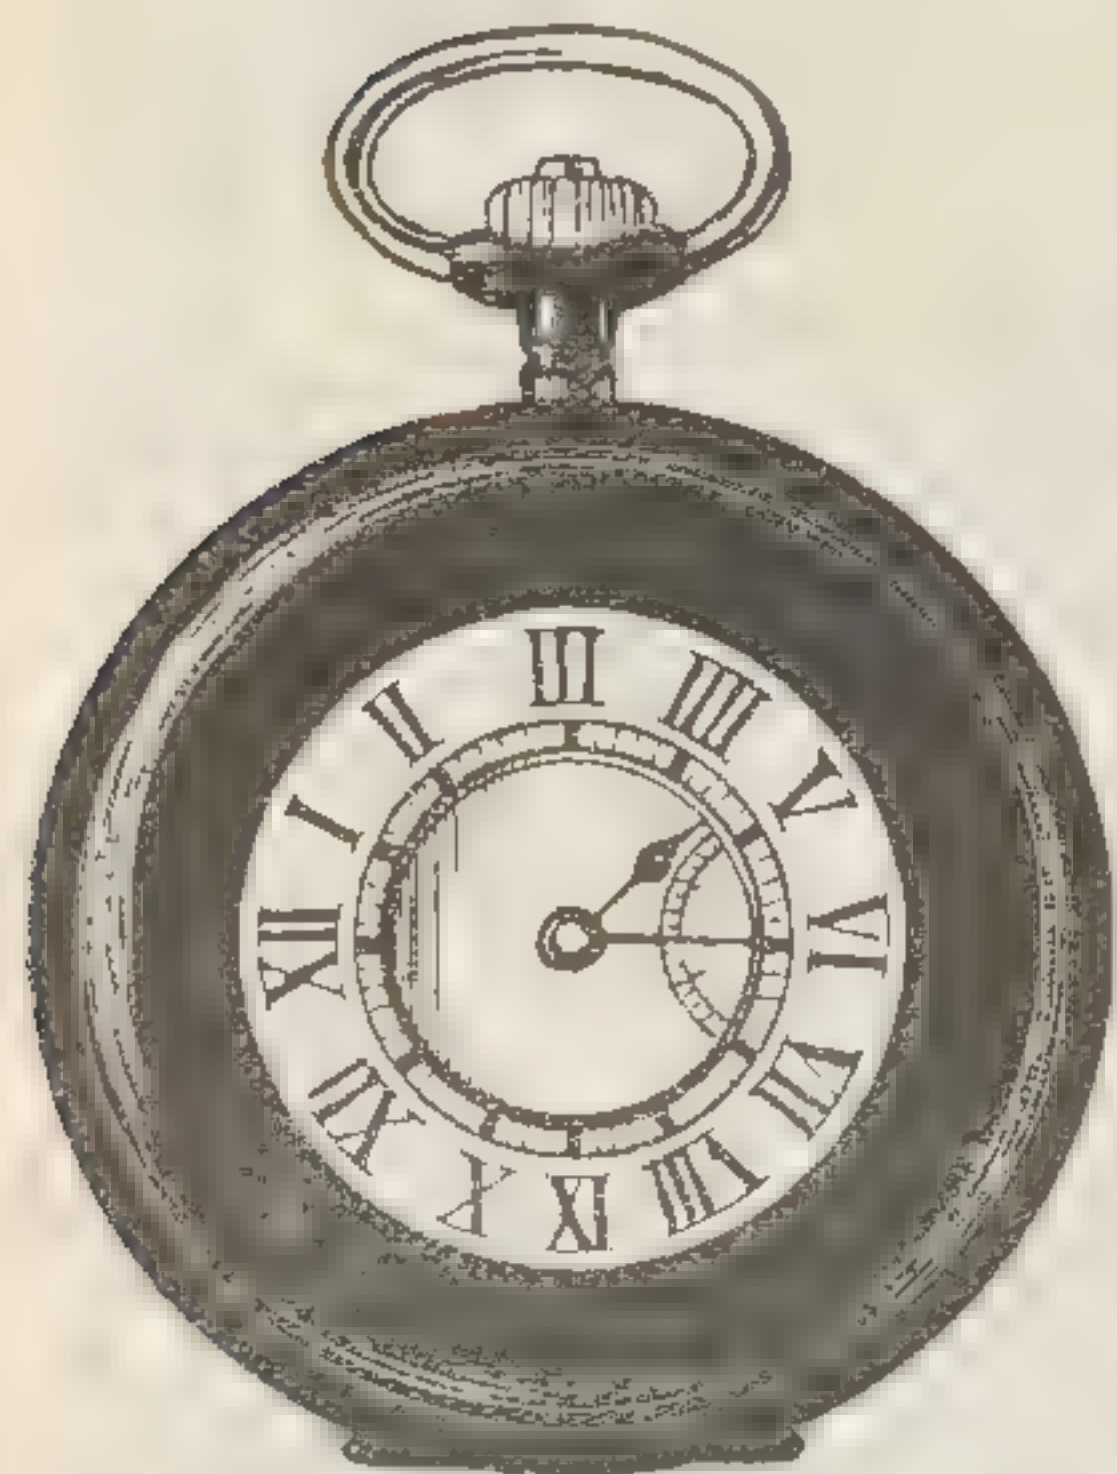

1st Grade £7/10/, £10 10/-, and £12.

2nd Grade £5, £6 and £7.

Eighty Years' Reputation to back our Watches.

PRESENTATION WATCHES

A Specialty

ML 10.—LASSETTER'S DEMI-HUNTING OXIDISED "CYRUS." A beautifully-finished and strong Watch—the Height of Neatness. Our esteemed Chairman is wearing one of these watches, and he declares it to be the best timekeeper he ever carried. Post free 50/-.

ML 11.—LASSETTER'S ROLLED GOLD "CYRUS" WATCH. Fine engine-turned case. English made. This watch is equal in appearance to a handsome solid gold case. Movement is freely jewelled. A watch we can recommend for timekeeping and appearance. Post free 55/-.

We are Sight Specialists.

—Eyesight Defects and Cures—

WARNING.

IMPORTANT

INTRODUCTION.

Selecting Spectacles at random is Most Injurious to the Sight.

Read what an eminent Oculist has to say on this Subject:

A mere *spectacle vendor* is not an *optician*. He is a *particularly dangerous quack*. He should be shunned even more than the so-called quack doctor—because why? The eyes are most important organs in the human frame, and require most careful attention.

“There is one chance in a hundred that the glasses bought from one of these spectacle vendors will assist your eyesight, but there are ninety-nine chances they will seriously injure it, therefore it is very important that your glasses should be *exactly correct*.”

A slight correction, promptly and properly attended to, may ensure you perfect vision to the end of your life.

The skilful optician has special methods for aiding defective sight. A careful study of the laws of optics, the anatomy and physiology of the eye, makes it possible to correct or assist all ordinary defects by the adoption of suitable lenses.

The knowledge of our optician is at your service FREE GRATIS. He will examine your eyes and advise you honestly.

Call and see us on your next visit to town.

THE CONTENTS OF THIS SECTION MAY NOT
INTEREST YOU IF YOUR SIGHT IS PERFECT.

But—IS IT PERFECT?

REMEMBER THIS:

Your Daily Bread
Your Happiness -
Your All - -

DEPENDS ON YOUR
- HAVING GOOD -
SIGHT.

ML 310.

Let us assist you to secure and retain the pleasure of GOOD SIGHT.
A pair of LASSETTERS' SPECTACLES will make all things clear and
pleasant.

You may save a friend's sight even if your own is perfect, or a child's future happiness may be saved even if your own is secure. Therefore, these facts are worth your keeping.

We do not intend to dwell on the numerous defects of eyesight, only giving space to a brief outline of the most prevalent. But we do want to impress on you the absolute necessity of having your eyes attended to, and at once.

**DO IT TO-DAY—for
TO-MORROW NEVER COMES.**

OUR KNOWLEDGE is the result of years of CAREFUL STUDY.
OUR METHODS and **INSTRUMENTS** are the VERY LATEST.
OUR CHARGES are the LOWEST.

NO CHARGE FOR EXAMINATION.

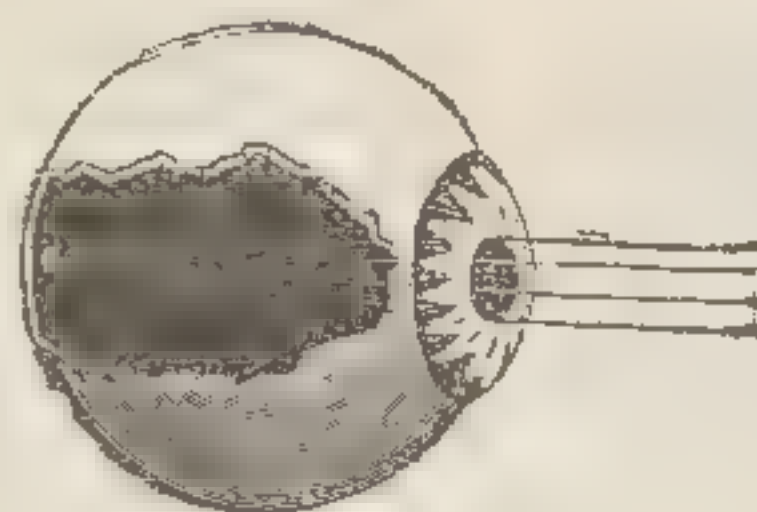

This is the Most Valuable Catalogue you ever had.

© CHEAPSIDE, SYDNEY. ©

UNIVERSAL PROVIDERS.

OUR KNOWLEDGE IS YOURS FOR THE ASKING.

This illustration shows the parallel rays of light entering the pupil, passing through the refracting media, and coming to a correct focus on the retina. Such an eye is called "Emmetropic," or "In Measure."

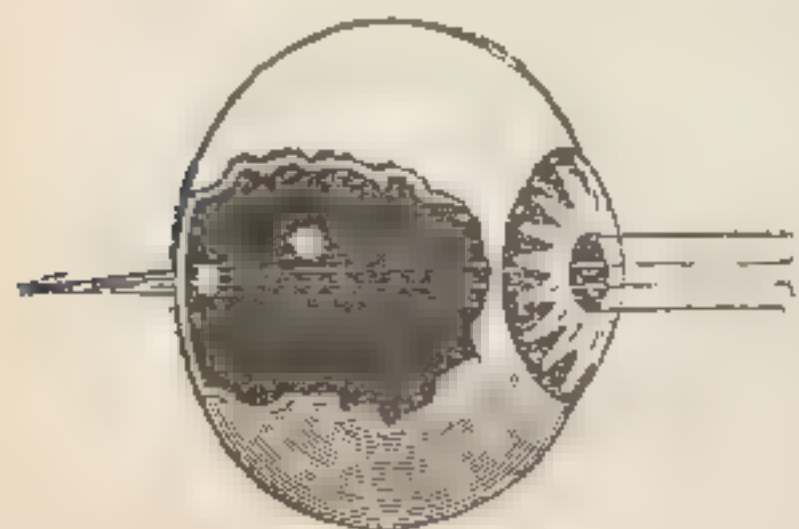

Emmetropic Eye

or

Eye in Measure

Are YOUR Eyes "in Measure?"

ML 312.

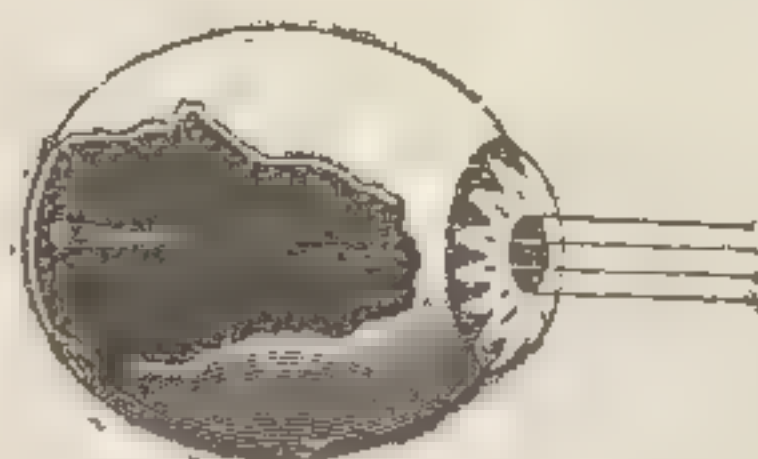

Hypermetropic Eye

or

Long Sight Eye.

ML 311.

Owing to the eyeball being long, the parallel rays entering the eye come to a focus too soon, consequently they cross and cause imperfect vision. Patients with such eyes as this cannot see objects at any great distance, their vision being limited.

Myopic Eye

or

Short Sight Eye

ML 313.

This is the result of advancing years, and is due to a natural hardening of the crystalline lens. The need of glasses begins to show itself from the age of 35 years.

Do you hold the paper further away than you used to?
Or do your eyes soon tire after reading or doing close work?
Possibly headaches frequently occur.

PRESBYOPIA Or OLD SIGHT.

The trouble is this:—The crystalline lens is able, with the aid of the ciliary muscle, to change its convexity and so accommodate the eye for near and distant objects; but when this lens begins to get hard the muscle cannot get it to work so freely as it used to, consequently the aid of artificial assistance in the shape of properly adjusted lenses is **absolutely necessary**.

Reading, writing, sewing, or any near use of the eyes will become a pleasure when the correct lenses are fitted.

Our Home Testing Chart will place you in this pleasant position. You can test yourself, your friends and relations in your own home.

ASTIGMATISM

This defect is due to the irregular curvature of the cornea or outside portion of the eyeball. Although fully 50 per cent. to 60 per cent. of the headaches are caused by this refractive error, very few people will act wisely and have their eyes properly examined, and so do away with the trouble which causes these headaches.

We have the **MOST MODERN** of OPTICAL INSTRUMENTS.

We have the **EDUCATION** which enables us to **FIND** and **CORRECT THE ERROR**.

We have the **LARGEST SELECTION** of LENSES and FRAMES in the States.

We have the **LOWEST SCALE OF CHARGES**.

So why not hit the nail on the head, and have your eyes examined **at once**? It costs nothing for the examination, and we charge catalogue prices—not high fancy prices.

Hospital and Doctors' Prescriptions Accurately made up at Lowest Prices

Specially Low Quotations for Charitable and Hospital Work.

YOUR EYESIGHT IS VALUABLE. DO NOT DELAY.

Over 1000 Pairs of Eyes successfully Fitted with Correct Glasses during the last 12 months.

F. LASSETTER & CO., Sydney.

— Closing Remarks. —

It is almost Imperative that, sooner or later, you must wear glasses.

Why ?

FOR THIS REASON—

The physiological change, as explained in this booklet under heading "Presbyopic," must come, and necessitate the wearing of glasses for near use, such as reading, sewing or kindred work; although you hear some people remark, "My father (or my great grandfather) never used glasses." How is that? The explanation is easy. In the first place, these people with the so-called wonderful sight had a defect in the early part of their life; this defect was "myopia," or short sight. But, being content to struggle through this error, and putting up with just reading or doing what the eyes would allow under this defect, they gradually drifted into the "presbyopic" stage, and as these two defects almost balance the vision, there was no need for them to wear glasses at the later part of their lives.

BUT WHY SHOULD YOU STRUGGLE THROUGH

as they did, and simply see and do things
which the eye will allow ?

A Pair of Correctly-Fitted Glasses will bring fresh visions of Gladness and
... give the Ease and Comfort we all hope and live for ...

Lassetters' Optical Information Sheet.

READING TYPE.—Bring the Test Sheet (back of this page) towards the face until the letters seem to fade or run one into the other. Measure the distance between the Test Sheet and the Face.

DISTANCE TEST LINES.—See that they are in a good light.

Kindly answer these questions carefully, and **UNDER NO CONSIDERATION USE YOUR GLASSES** when going through these tests, but when you cannot see any of the reading type without the aid of your glasses you may then use them, but they must be sent along with answers to the Information Sheet.

Question No. 1.—Which test line can you see most distinctly when at a distance of 20 feet?

Question No. 2.—Which test line at 15 feet.

Question No. 3.—On holding the test sheet with both hands, with your back to the light but allowing the light to fall on the test sheet, what is the **very closest** you can read
1st reading type? 2nd reading type? 3rd reading type?

Question No. 4.—What is your age?

Question No. 5.—Do your eyes ache when reading or doing close work, or does the pain in the eye-ball gradually drift to a headache?

Question No. 6.—To ensure our fitting the spectacles to rest comfortably on the face, kindly tell us—
Have you a wide, medium, or narrow face?
Is the bridge or smallest part of the nose high or flat?

Question No. 7.—Do you require glasses for close work, such as reading and sewing, or for distance?

Do not detach this sheet from Catalogue, but simply say when writing:—Answer to Question No. 1, and so on.

LASSETTERS' SPECIAL SIGHT MEASURE will be posted promptly on receipt of address.

In answering Questions, say—Answer to Question No.

Optical Goods of Every Description

1st READING TYPE.

The Gallic tribes fell off and sued for peace. When the Batavians became weary of the hope- less contest, which they had been fighting, they sent an embassy to the Roman Emperor, Augustus, to request that he would grant them peace. The Emperor, who was a very merciful man, granted their request, and they were allowed to live in peace. The Roman Emperor, Augustus, was a very wise and just man, and he was very kind to the Batavians. He granted them peace, and they were allowed to live in peace. The Roman Emperor, Augustus, was a very wise and just man, and he was very kind to the Batavians. He granted them peace, and they were allowed to live in peace.

2nd READING TYPE.

with those who were now his enemies. He accepted the offer of negotiation from the Batavians. The Roman Emperor was a very wise and just man, and he was very kind to the Batavians. He granted them peace, and they were allowed to live in peace. The Roman Emperor, Augustus, was a very wise and just man, and he was very kind to the Batavians. He granted them peace, and they were allowed to live in peace.

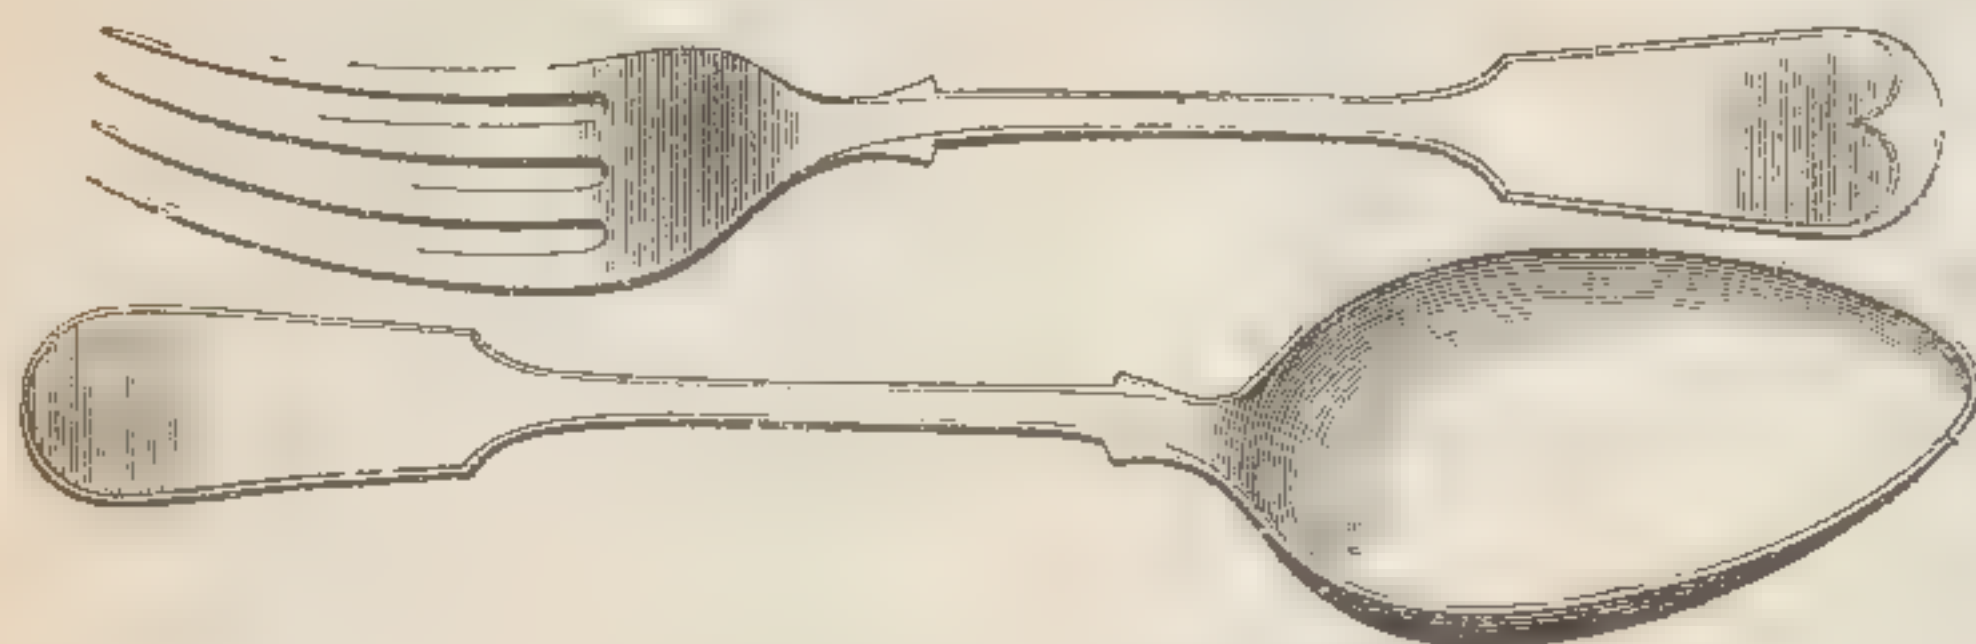

3rd READING TYPE.

waters of the Rhine with the lake of Flevo, flowed between the Batavians and the Roman Emperor. The Roman Emperor was a very wise and just man, and he was very kind to the Batavians. He granted them peace, and they were allowed to live in peace. The Roman Emperor, Augustus, was a very wise and just man, and he was very kind to the Batavians. He granted them peace, and they were allowed to live in peace.

"Floral Aid."

These illustrations clearly show how flowers may be arranged in any open bowl by means of "Floral Aid."

MM 399.

MM 399.—"FLORAL AID" is specially designed for use in open bowls. By its help flowers of every description—and particularly those with long stems—can be arranged in bold, free, artistic groups with due regard to their natural pose and charm. With a little manipulation of the foliage "Floral Aid" may be easily hidden. For the purpose of changing the water daily "Floral Aid" can be removed without disarranging the flowers.

In six sizes, 9d., 1/3, 2/3, 3 6, 4 6, 6 6 each.

MN 127.—BESTON'S PATENT STROPPER each 15 -

Thousands of Gentlemen know the difficulty of effectively Stropping a Razor on an ordinary Strop; they invariably cut and destroy the Strop in the process of Stropping, and often spoil a good razor.

This is especially the case with the fine, hollow-ground razor now generally in use. All drawbacks incidental to want of dexterity and expertness in Stropping a razor on the ordinary strop is now overcome by this very ingenious invention.

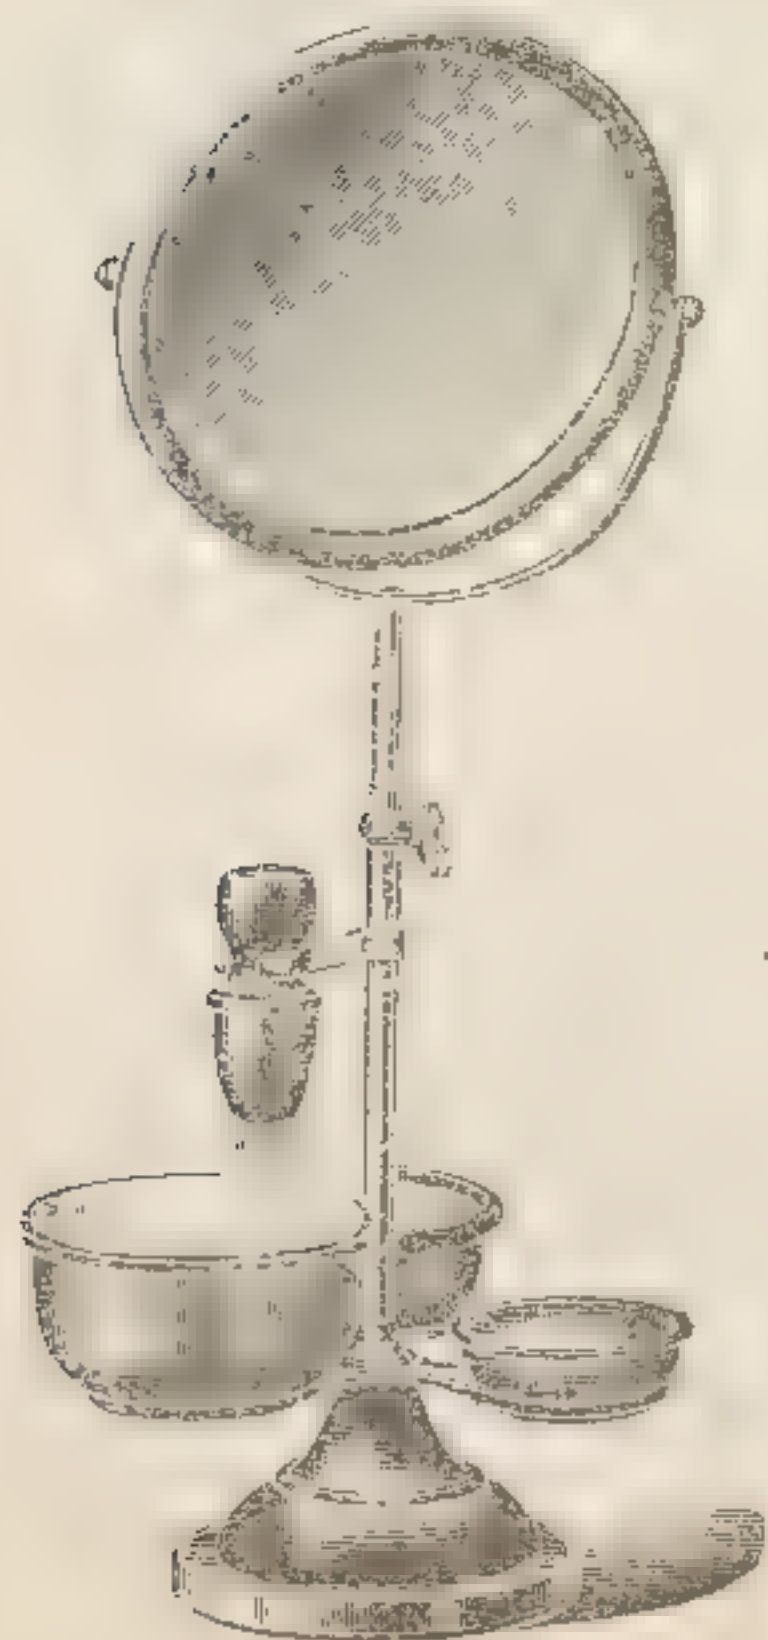

MN 126.—TORREY'S ROLL-UP RAZOR STROPS. Leather, 1 6, 2 3, 3 6.

Door Hangers

MCCABE'S BALL-BEARING DOOR HANGERS covers the requirements of all conditions of Sliding Doors. The Steel Tube is made perfectly smooth on the inside to ensure easy running.

There is no possibility of wheels jumping the track. The Carriages are made with adjustments, whereby the door may be raised or lowered as required. All steel portions of carriages are cased hardened, and in cases of Elevator and Parlour Door Hangers are supplied with compressed fibre wheels, thereby reducing noise to a minimum.

ness—

Sizes	3	2 1/2	2	1 1/2	1	inches width
	2 -	1/7	1/3	1/-	7d.	each

CARE AND ABUSE OF BRUSHES.

Persons should be very careful where they keep their brushes. They should never be kept near a stove or other hot place, but in a cool or damp spot, and as near the floor as possible. A continued exposure to heat will sometimes cause the wood to shrink and the best Brush to shed bristles.

Before a new Brush (Paint or Whitewash) is used, or should a Brush have shrunk from above causes, place it in water for about five minutes.

Whitewash Brushes should never be put in hot or newly-slacked lime, or lime with acids in it, as this burns the bristle and causes it to lose its vitality, and makes the ends break off.

A Brush, after being cleaned, should not be placed near a fire nor exposed to the sun.

Varnish Brushes must not be soaked in water, as they are generally cemented at the bindings, and the water softens the cement, with the result that the Brush falls to pieces. After use they should be kept in linseed oil.

MASURY'S PAINTS, FOR COACHPAINTING, &c.—

Made up in 1-lb. tins. Ground in Japan, Japan Gold Size, or Varnish, as may be required by the peculiar natures or properties of the various Paints, and they are all quick-drying. The drying may be retarded by adding a little raw linseed oil. The Paints simply require thinning with Turpentine to be ready for use, and finished off when dry with good Body or Carriage Varnish. Among some of the colours we stock are:—

Coachpainters' Green, Light, Medium, or Dark,	per lb.	1/9
Quaker Green, Light, Medium, or Dark,	per lb.	1/11
Brewster Green, Light or Dark	per lb.	1/9
Royal Green, Light or Dark	per lb.	1/6
Special Black	per lb.	10d.
Drop Black	per lb.	1/4
Ivory Black	per lb.	1/9
Chrome Yellow, Light	per lb.	1/9
Chrome Orange	per lb.	1/9

SENOUR'S FLOOR PAINT

MANUFACTURED ONLY BY

SENOUR MANUFACTURING COMPANY

2516 2522 QUARRY STREET.

CHICAGO, ILL.

MP 29.

This Paint is composed of Natural Mineral and Hydraulic Cement, and will outwear other pigments. It will cement up the cracks, fill the pores of the wood, and make a hard and serviceable covering. Floors are necessarily washed frequently—this Paint will harden almost to stone under the influence of water by reason of the cement. Does not scratch like the old-fashioned stains. Sold in 10 colours. Tint Card forwarded on application.

COPPER PAINT—

Tarr and Wonson's, in quart tins. 3/- each.

ASPINALL'S SUPERIOR ENAMEL PAINTS—

Tins 1/1. Tinlets 6d. each.

Brilliant gloss, works easily, and flows well under the brush; very durable. Fifty Tints stocked. Tint Card forwarded on application.

ASPINALL'S SPECIAL BATH PAINT—

Resists hot water. Colours stocked—White, Flesh Colour, and Eau de Nil. 1/4 per tin.

SAPOLIN BATH ENAMEL—

An excellent Paint. Colours stocked—White, Nile Green, and Rose. 1/6 and 2/10 per tin.

GOLF BALL ENAMEL PAINT—9d. per tin.

@ F. LASSETTER & CO., LIMITED @

Calcimo

A Sanitary Calcimine for interior decoration. Simply requires mixing with cold water. Sold in 24 Tints and White. Made up in 5-lb. packets.
1/2 per packet.

Indelible

A washable, sanitary, fireproof, weatherproof, and durable preparation for interior and exterior work of every description of buildings. Will not rub off or peel away (if applied to a solid surface). It is a substitute for Oil Paint. Sold in 24 Tints and White. Made up in 5-lb. packets.
1/9 per packet.

Riley's Refrigerating Composition

For coating roofs of buildings, either of slate, iron, or glass, at a very moderate cost.

It is invaluable for reducing the temperature of warehouses and iron stores. It will not wash off, provided the roof has been coated 24 hours previous to its raining. It may require renewing with one coat (only) every year or two. It has been successfully used for many years. It will not injure rain water, but will harden it at first. We would suggest that, where the water is used for domestic purposes, the first shower or two be allowed to run to waste, which can be done by putting something into the mouth of the down-pipe which conveys the water to the tank. After that, scarcely any traces are left; in fact, what remains will tend rather to purify the water than otherwise.

Sold in 50-lb. cases, with instructions for mixing and application, which are extremely simple. It only requires water to mix with the composition. A 50-lb. case will do about 170 yards superficial. Applied with a whitewash brush.

12/6 per case, 4d. per lb.

Painters' & Plumbers' Lamps

MP 31. — THE "PACQUELIN" LAMP.— Burns Benzoline—

MP 31.

ADVANTAGES.

FOR PAINTERS.—This Lamp removes old paint in less time and gives a greater heat than any other Lamp in the market.

The flame penetrates into the mouldings and sash bars, and in a few seconds softens the paint for removal by a chisel knife without breaking the glass, etc.; it is particularly recommended on this account.

It can be used in any position.

It gives a heat of more than 1,500 degrees.

It is thoroughly safe, and so simple that a boy could use it.

It is easily extinguished by blowing through the hole at the bottom, and instantly re-lit if blown out.

It should not be placed on the cold ground or stone when heated.

It will work in a gale of wind.

It has no complications, and duplicate parts can be obtained at a small cost.

No pumping required, the action being quite automatic.

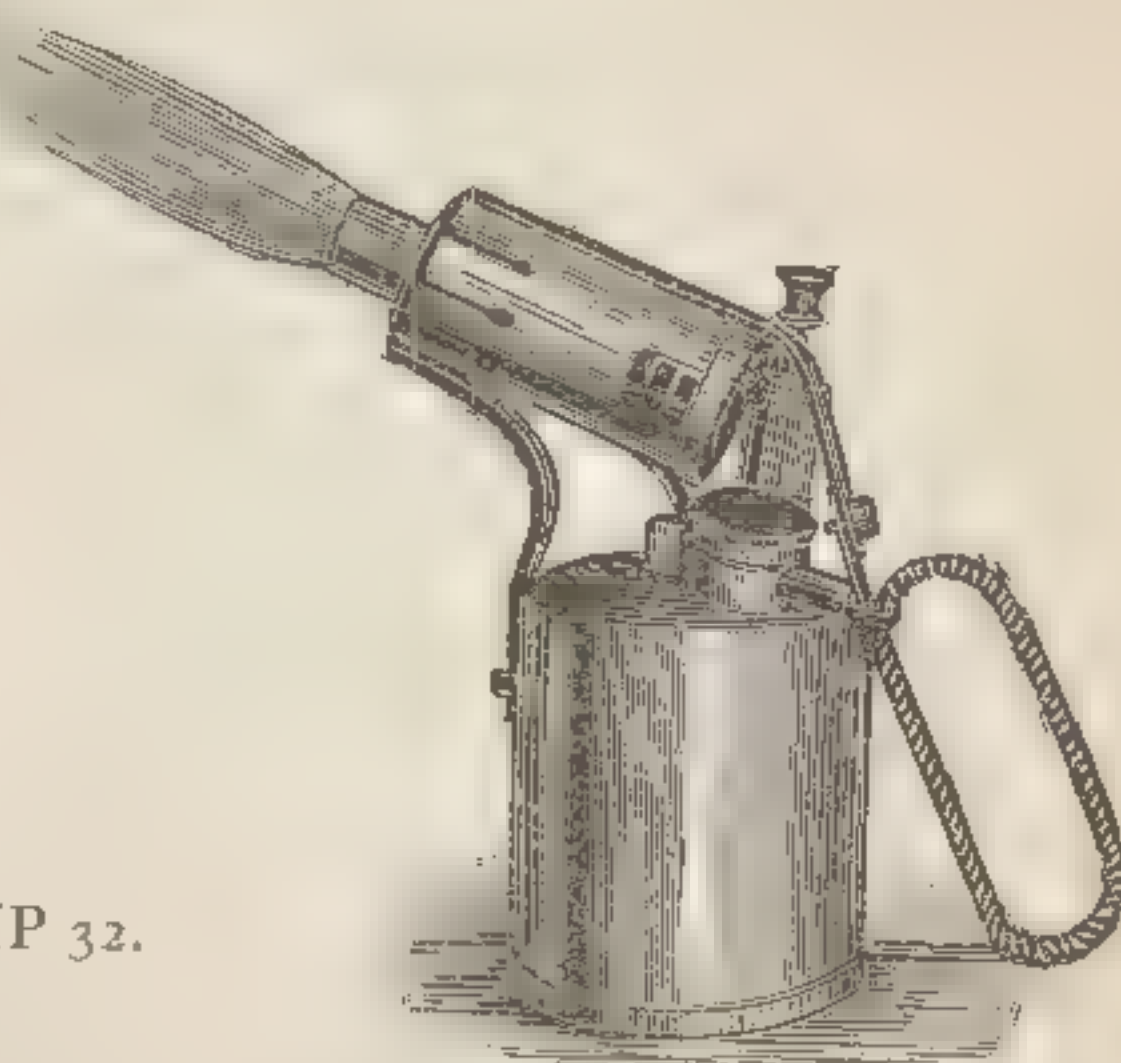

It only weighs 20 ozs., so can be used with one hand without any fatigue.

The cost of its working is about 1d. per hour.

It repays its cost with a week's use.

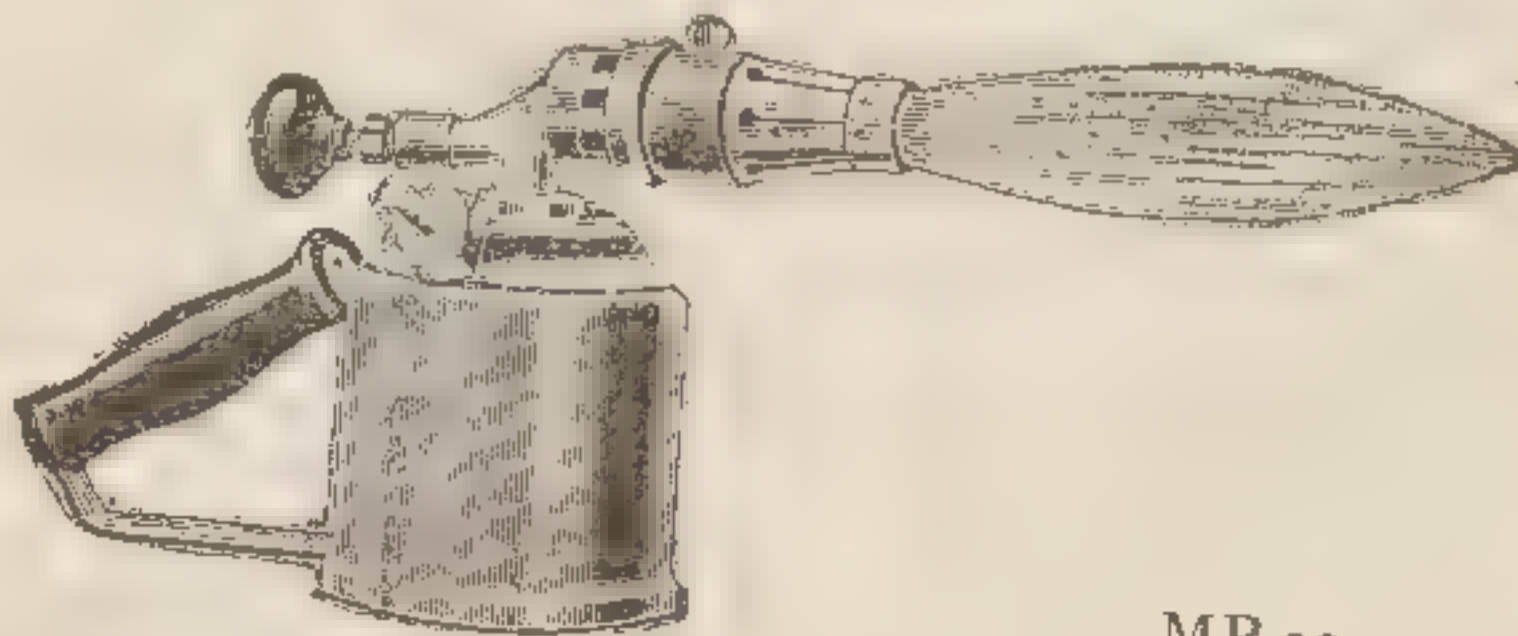

12/6 each.

Also suitable for Plumbers and others.

MP 32.

MP 32.—THE "ETNA" LAMP.—Burns Kerosene—
For Plumbers' and Painters' use. Substantially made of stout Brass. The flame is easily regulated. Will work in wind or rain. One of the best lamps for tradesmen's use. 13/6 each.

MP 33.

MP 33.—THE PATENT "NEW" LAMP.—Burns Benzoline.—

For burning off paint, soldering, etc. It works immediately, and produces an intense heat in the open air, which can be regulated by means of the Regulator. The Lamp is put out by closing the Regulator, thus saving the Benzoline which is not yet burnt. In some of the other Lamps, on being put out, the vapor continues to escape, which means a serious loss. Price, 15/-.

LIQUID PAINT REMOVER—

Instantly removes old paint from woodwork, etc.

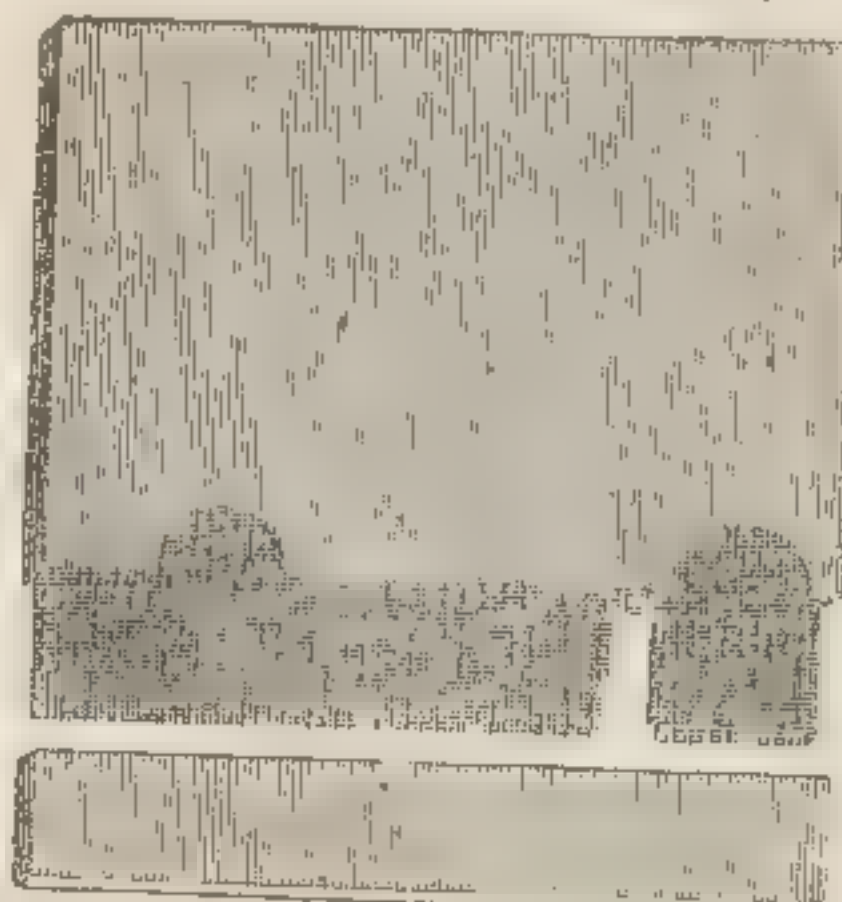

Quart bots. 3/4, pint bots. 1/8.

LIQUID VARNISH REMOVER—

Instantly removes old Varnish from Woodwork, etc.

Quart bots. 2/6, pint bots. 1/3.

PAINT STRAINERS 1/6 and 2/- each

MP 34.—GRAINING COMBS—

12 Combs, in cases 2/9, without cases 2/3.

GILDERS' CUSHIONS—

8 x 5½ in., 1/6 each.

EVERYTHING SOLID VALUE

@ F. LASSETTER & CO., LIMITED @

William Harland and Son's Superior English Varnishes, For Coachbuilders

BEST PALE DURABLE BODY VARNISH—
The palest, most durable, and lustrous Coach Varnish manufactured. Used for finishing coats on the bodies of carriages. Dries in about 10 hours.

1 gall. 27/6, ½ gall. 14/6, 1 quart 7/6, 1 pint 4/6.

BEST PALE CARRIAGE VARNISH—

For carriage wheels, shafts, and underparts of carriages, etc. It possesses perfect flow, is easy to work, and has most brilliant lustre. Far more elastic than any other varnish sold under this term. Dries in about 10 hours.

1 gall. 20/6, ½ gall. 10/3, 1 quart 5/6, 1 pint 3/6.

HARD-DRYING CARRIAGE VARNISH—

Has all the good qualities of the above, with slight increase of drying and hardening qualities.

1 gall. 20/6, ½ gall. 10/3, 1 quart 5/6, 1 pint 3/6.

POINTS ON OIL VARNISHES.

Drying and Hardening.—Proper light and ventilation are absolutely necessary to facilitate drying and hardening. Varnish applied in buildings that are damp and not properly heated in cold weather will be considerably retarded in drying and hardening. Extremely hot weather will also keep varnish soft for a long time. The best results are obtained at a temperature of 70 to 75 degs. Fahrenheit.

Turning White.—Is caused by the action of water and dampness. The more elastic the varnish the better it will resist this action, whereas cheap, brittle, quick-drying varnishes are very easily affected.

Brittleness.—Is an inherent defect in the varnish caused by an excess of dryer, lack of oil, or by adulterated materials having been used in its manufacture. If a varnish powders white under friction of the finger, or easily scratches white, that is incontrovertible evidence of its poor quality. Brittle varnishes should not be used, even for the undercoats, as they destroy the toughness and durability of the finish, despite its being protected with an elastic, durable finishing varnish. It is poor economy, in any event, to use brittle varnishes, as the cost of application, which is the main expense, is the same as if good material were employed.

Chilling.—As its name implies, is caused by exposure to cold weather. Varnish should never be used when chilled. The remedy is to keep the chilled varnish in a warm room until it has been restored to its normal condition. Long exposure to cold weather may also cause the varnish to become "specky" and "seedy," in which event it is necessary to keep it near a steam pipe or warm stove for some time until the chilled particles have disappeared.

@ CHEAPSIDE . SYDNEY. @

UNIVERSAL PROVIDERS.

Cracking.—Is caused by the undercoats not having been dry when the finishing coat was applied, or when abnormally heavy coats have been used, especially for the undercoats. Brittle varnishes are liable to crack when exposed to sudden changes of temperature.

Blooming or Going Foggy.—Is caused by exposure to dampness, moisture, or gases after the varnish has become hard. The more elastic the varnish, the less liable is it to "bloom" or become "foggy."

Wrinkling, Crawling, Crimping, or Sagging.—Is caused by applying the varnish too heavily or by exposure to sudden changes of temperature while in the process of drying, or if the undercoats are not dry when the finishing coat is applied.

Deadening or Sinking Away.—Is caused by the undercoats not having been allowed sufficient time to dry, resulting in the finishing coat becoming absorbed while in the course of hardening. Insufficient foundation coats will also cause the finishing coat to sink away.

Blistering.—Is caused by the action of heat, especially from the concentrated rays of the sun, or if sap or dampness is retained in the wood, or if moisture exists in the undercoats when the finishing coat is applied.

Pitting.—Is caused by applying the varnish over an oily or damp surface, also if the varnisher is not careful to thoroughly incorporate the turpentine in reducing the varnish, or uses improper thinning material.

Thinning.—When found necessary, should be done with spirits of turpentine. In order to ensure proper amalgamation, neither the varnish nor the turpentine should be too cold when mixing. The warmer the varnish and turpentine, the quicker the amalgamation. After reducing the varnish, allow it to stand a while before using. Oil, japan, or liquid dryer should never be added to varnish.

Sweating.—Is caused by rubbing the undercoats before they are thoroughly dry.

BLUNDELL'S TRANSPARENT PETRIFYING LIQUID, for Damp Walls. Sold in $\frac{1}{2}$ -gal. tins. 13, 6 gal.

Stable Requisites

Similar Patterns, but in lighter shades—

from 4d. per roll; 3.9 per doz.

The variety of color and pattern in this make of paper is almost inexhaustible. They are suitable for Kitchens, Dining Rooms, Bedrooms, Parlors, etc.

SANITARY WALL PAPER—

from 5d. per roll; 4/8 per doz.

Sanitary Wall Paper, being stained or printed in oil, is less likely to absorb injurious particles than other kinds. It can be washed with warm water when soiled, no small advantage.

Dados, Dado Rails, Friezes, Borders and Ceiling Decorations to match Sanitary Papers. Prices on application.

FLORAL AND OTHER PATTERNS ON LIGHT OR DARK GROUND—

For Dining Rooms, Bedrooms, Parlors, etc.—

from 9d. per roll; 8/4 per doz.

These papers, from the best White Pulp, are machine or hand-made, according to price. Some really lovely effects are available.

GOLD PAPERHANGINGS—

In endless variety of pattern and shade, and in qualities ranging from 10d. per roll, with Dados, Friezes, etc., to match.

LIGNOMUR—

A most suitable material for wall and ceiling decoration, in high relief, and of light texture. It adapts itself to any scheme of decoration.

SELF-COLORED INGRAINS—

All Colors from 1.6 per roll

DECORATED INGRAINS—

All Colors from 2/- per roll

SILKS—

Floral and Striped, all Colors .. from 10d. per roll

EMBOSSSED PAPERS—

All colors from 2/6 per roll.

IMITATION LEATHER PAPERS—

In all Wood Colorings from 4/6 per roll

CEILING PAPERS from 6d. per roll

DAMP-PROOF PAPERS—

For Damp Walls 8d. per roll

TINTED SELF-COLORED LINING PAPERS—

from 9d. per roll

BORDERS—

To match all Wall Papers, from 3, 5, 7 to 10 in. wide.

FRIEZES—

To match all Wall Papers, from 18, 21 to 30 in. wide. Patterns and Prices on application.

NEW DESIGNS AND COLORINGS EVERY MAIL.

ABSOLUTELY NO OLD STOCK.

OUR STOCK OF WALL PAPERS IS THE FINEST IN AUSTRALASIA.

HIGH CLASS ARTISTIC DESIGNS FROM ENGLISH, FRENCH, CANADIAN, AMERICAN, AND GERMAN MANUFACTURERS.

OUR SHOWROOM IS THE BEST IN SYDNEY, AND SO ARRANGED THAT WE CAN SHOW THE WALL DECORATION, FRIEZE, AND CEILING AT THE ONE TIME; THUS, AT A GLANCE, ONE CAN JUDGE THE WHOLE EFFECT OF THE DECORATION.

How to Select Papers

Dark Papers reduce the Glare in a too bright room.

A light paper must be put in a Dark room.

In the DRAWING-ROOM OR PARLOR, if you have old-fashioned, heavy furniture, never use delicate tints of Wall Papers.

Papers with Green, Red, Brown, or Blue Grounds are best suited. If the furniture be quite modern, delicate tints are, as a rule, the most successful.

In the modern house it is important that the HALL should possess a harmonious color scheme, as in it the visitor gains his first impression of the interior of the house. Hall and Staircase look well hung in green, because the eye is usually fatigued with the strong glare of the sunlight, and Green is the most refreshing color. Besides Green, Red, Browns, and Blues are all good shades for Hall Decoration.

The DINING-ROOM should always be made warm and cosy, not cold and cheerless. As a rule, rich Browns, Reds, or other warm colors are much preferable to delicate tints.

To the LIBRARY or STUDY a plain or decorative Ingrain Paper, with 21in. Frieze to match, goes well with pictures and books.

BEDROOMS should always be papered with a cheerful, light-colored paper, with Frieze border to match.

A Decorative Papered Ceiling will last clean much longer than the one that is whitened. It is then economical to paper your ceilings.

Hints to Users of Paper-Hangings

Whilst the greatest care is exercised in the manufacture of Ingrains and Plain-tinted Papers, blemishes will sometimes occur, and they are only offered subject to such. Plain papers often give beautiful effects, but perfect solidity of color can only be ensured by "Flatted Paint," and users of these papers should bear this in mind.

PERMANENCE.—All colors are more or less susceptible to influence of light, gas, damp etc. This is naturally more apparent in plain than figured goods, and more in certain colors than in others.

PASTE.—Owing to the delicate nature of some of the dyes used to produce the shades manufactured, it is imperatively necessary that none but a perfect, pure flour and water paste be used, entirely free from acid or other preservative. If used stale, hot, or doctored with alum, it is very injurious to colors. We recommend all plain papers being hung over a white lining paper; especially in the case of Reds is this precaution most necessary.

HANGING.—Great care should be exercised in the hanging of same to effect perfect joints, and to this end a minimum quantity of paste should be used, and the lengths should on no account be allowed to soak, or the resulting shrinkage of the paper when dry will show the walls through the joints. It is better to reverse every other length in hanging to avoid any variation in shade which might occur.

Write for Samples, which will be posted free.

UNIVERSAL PROVIDERS.

F. LASSETTER & CO., Limited,

For the Best Assortment of Scales, Spring Balances and Weighing Machines in the Commonwealth.

MR 1

Fairbanks' Austral Scales

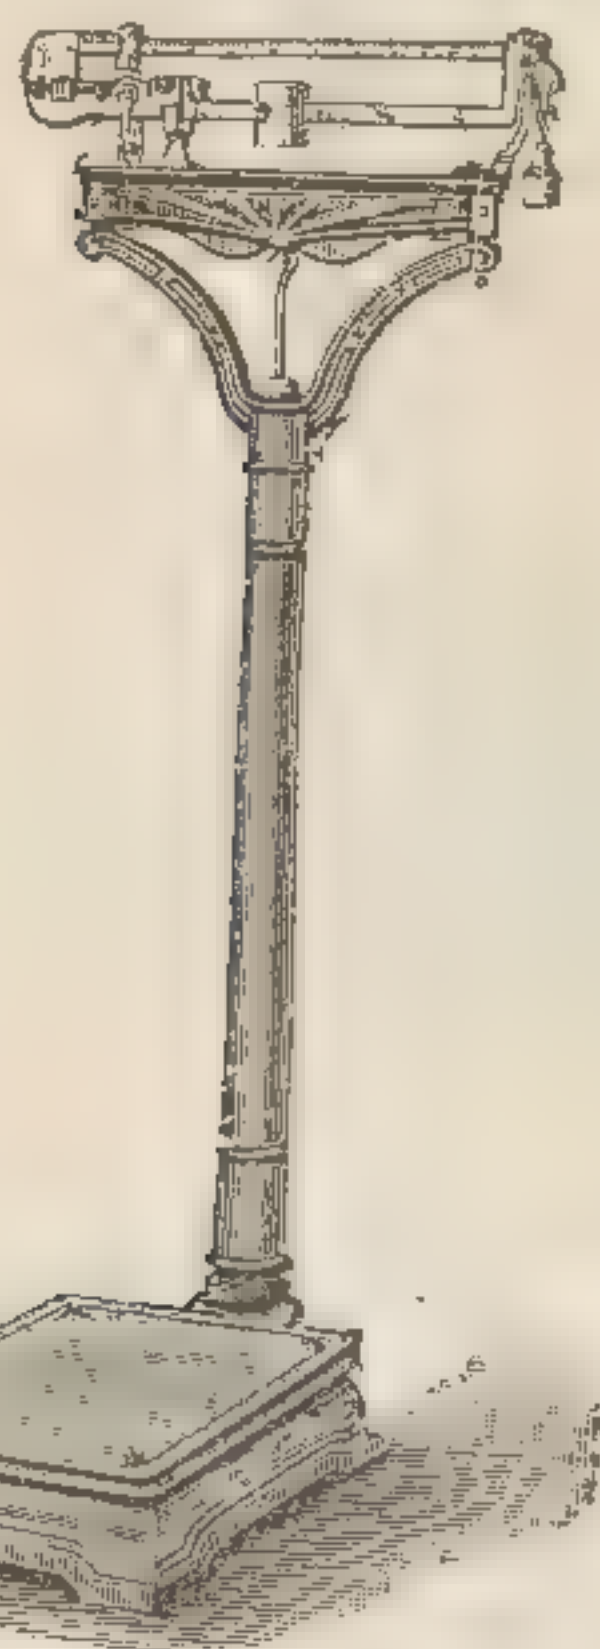

MR 1.

We have much pleasure in recommending these Weighing Machines. They are specially designed and adapted for weighing Wool, Grain, etc., and being entirely constructed of Iron, Steel, and Gun Metal, they are proof against hot winds and white ants. They have large platforms, and are furnished with wheels and back rack, and are beautifully finished.

They have the following points of superiority over other Scales in the market:—

1. The metal being of superior quality, it is not necessary for them to be so heavy, thus effecting a saving in carriage to the country.
2. The beam is of gun metal, consequently it cannot rust.
3. It has a Slide Poise, which is much more convenient and quicker than the old style.
4. The beam has a capacity of 1 cwt. in the larger sizes, thus doing away with several small loose weights.
5. They will weigh accurately from the smallest to the largest weight in their capacity.

A station possessing a 10-cwt. Austral Scale and a Fairbanks' Union Scale will be well equipped for all necessary weighing, from half an ounce to half a ton.

MR 2.

MR 2.

PHYSICIAN'S SCALE.

FAIRBANKS'.

Fitted with N.P. Measuring Rod.

Capacity, 300 lbs.

Platform 13½ x 19.

Suitable for HOTELS, HOSPITALS, CLUBS, DOCTORS, etc., etc.

£8 10/-.

Prices

Capacity.	Size of Platform.	£	s.	d.
3 cwt.	20 x 22 inches	6	0	0
4 cwt.	22 x 25	6	12	6
5 cwt.	25 x 25	7	15	0
7 cwt.	30 x 42	10	10	0
10 cwt.	32 x 50	11	10	0
20 cwt.	38 x 57	18	10	0

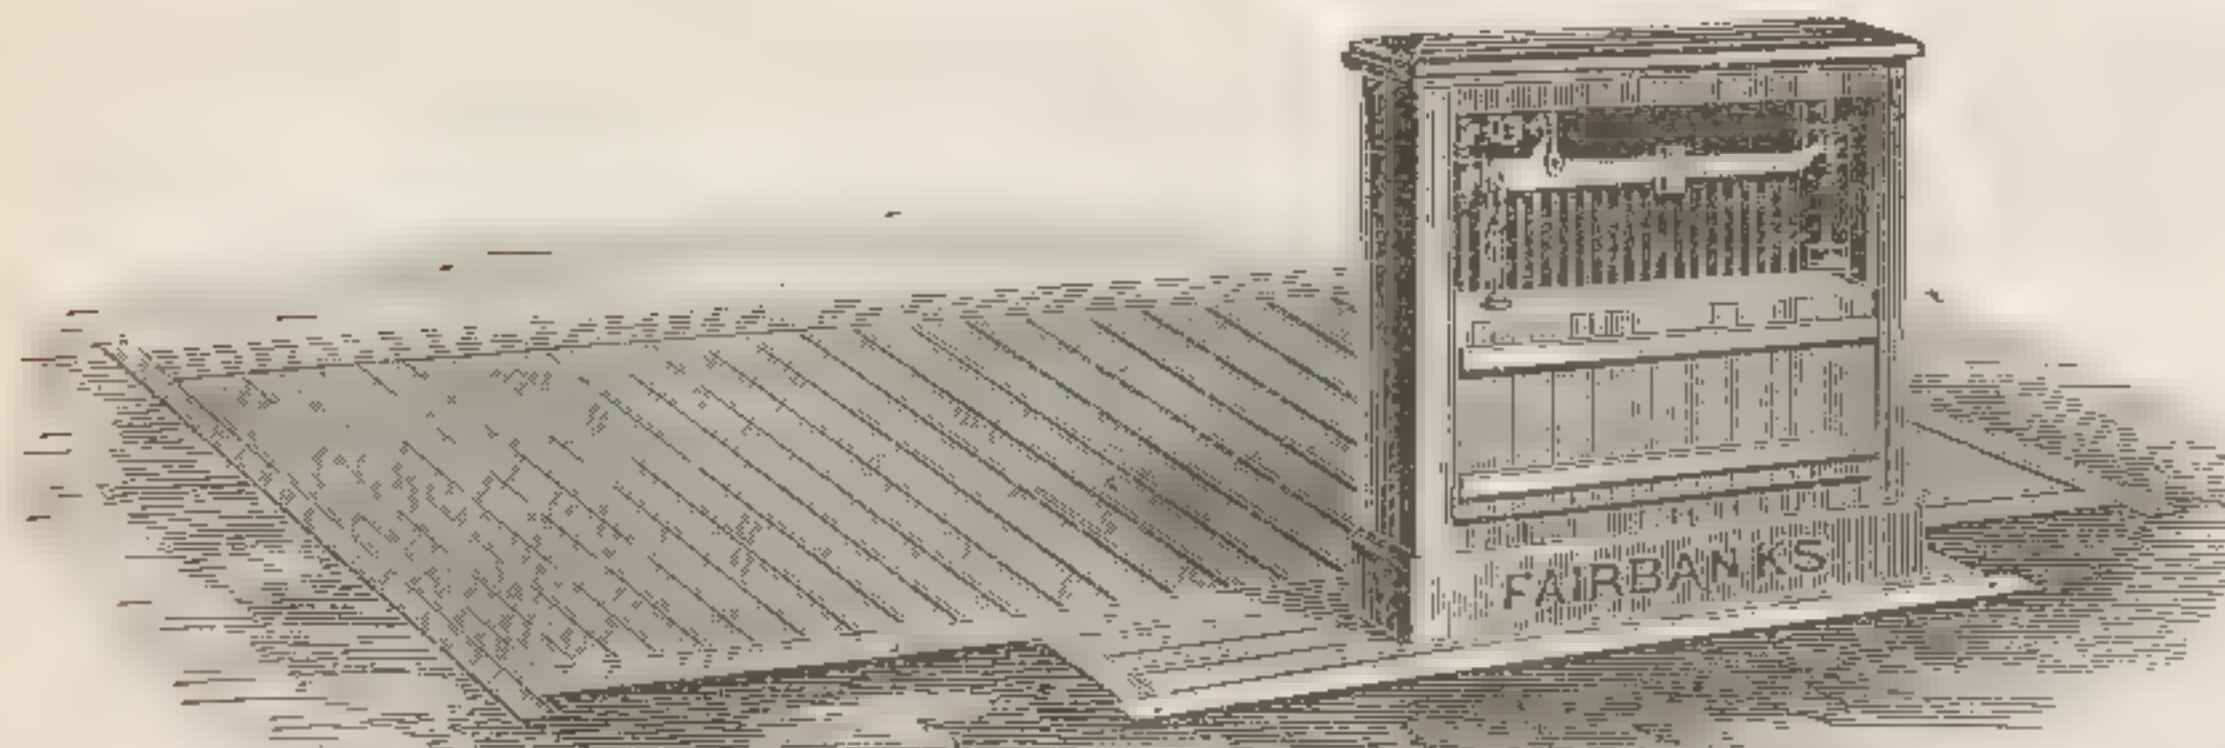

We are now importing (at no extra cost to purchaser) these machines with two sets of Weights, one set marked in hundredweights and the other set in centals, or hundred pounds. Should customer, when purchasing one of these machines, require it to be tested by the Government Inspector, there will be a Government fee of 6d. per cwt. extra. For instance, a 5 cwt. machine, when weighted to its full capacity, will weigh 6 cwt.; therefore, the fee for a 5 cwt. machine with one set of Weights would be 3s., and with both sets of Weights tested the fee would be half as much again, viz., 4 6.

UNIVERSAL PROVIDERS.

Mitre Boxes

MR 102.—STANLEY'S IMPROVED MITRE BOX—

This Mitre Box can be used with a back saw or panel saw equally well. If a back saw is used, both links which connect the rollers, or guides, are left in the upper grooves, and the back of the saw is passed through under the links. If a panel saw is used the link which connects the rollers on the back spindle is changed to the lower groove, and then the blade of the saw will be stiffly supported by both sets of rollers, and work like a back saw. Moulding of any size up to 4 inches can be cut in this box.

STANLEY'S MITRE BOX, without Saw, 24/6 each

Saw Clamps

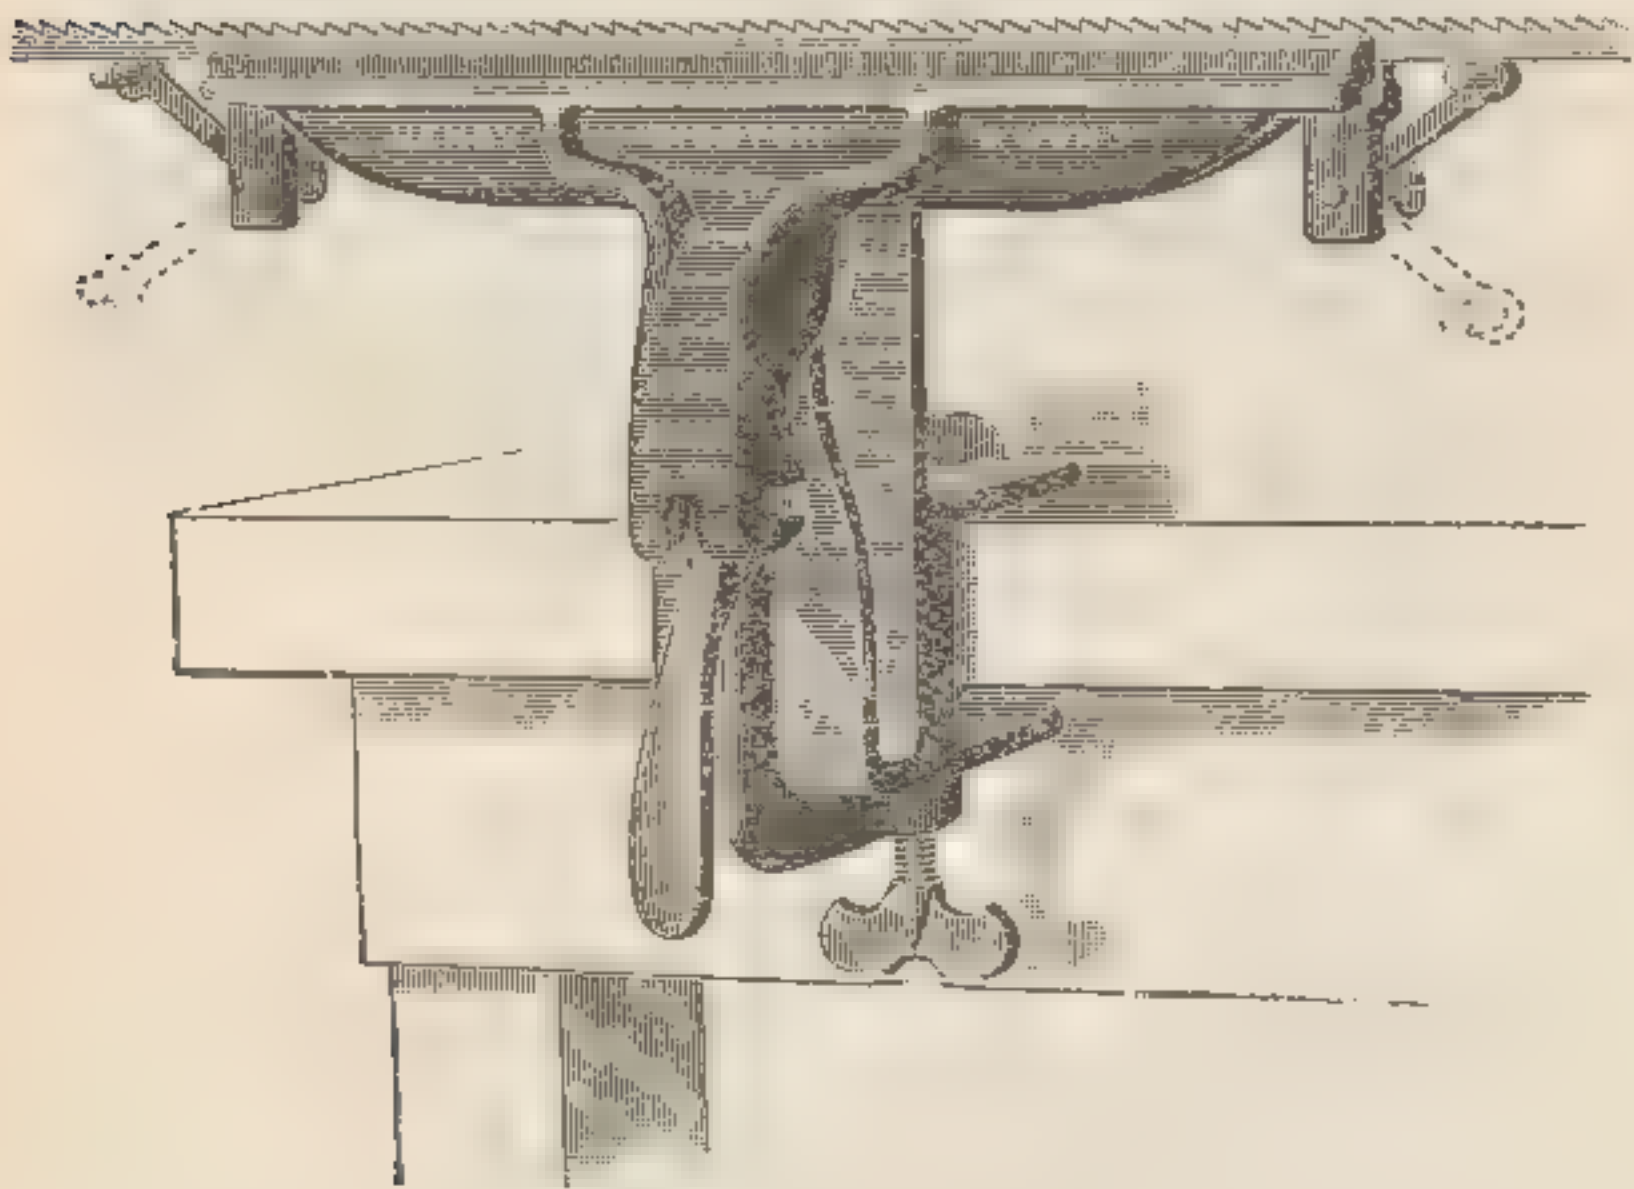

MR 101.

rect position loosen the wing nut and move the guide around to the point desired; after tightening wing nut, loosen screw in the file handle until file gives the shape tooth wanted.

A good way is to select a tooth of correct shape and let file down into it. tighten set screw in handle, then file a tooth to see if the shape suits. If not, turn the file a little to the right or left and try another tooth until the proper shape is obtained. Then file every other tooth. When one side is filed, reverse the saw and attachment and file the other teeth. For Rip Saws, place the file at right angles with the saw, and file every tooth. Always keep the file as nearly horizontal as possible.

This guide is sold only attached to our No. 3 clamp, and price includes Clamp, Filing Guide, File and Handle—9/-.

MR 163.—NO. 4 ADJUSTABLE SAW CLAMP, Japanned 5/- each

Particularly adapted for use when filing narrow band saws, etc. The supporting levers are adjustable, and can be regulated to suit the various widths of saws to be filed, the blade being maintained in the same position throughout, and by slightly raising lever, can be moved along.

MR 162. — DISSTON'S SAW VICE, with Filing Guide Attachment.—

Especially Designed to assist those not skilled in the art of Saw Filing to File a Saw Correctly.

This cut shows a saw and the attachment in proper position for filing the first side. There are three marks on the hubs of the swivel attachment, and one mark on the other. One of the three marks shows when it is in position for first side and the other designates when it is in position for filing the other side. The third, or centre mark, shows when it is in position for filing Rip saws. To obtain the cor-

Canvas

No. 1 Tarpaulin Canvas, 24 inches wide—

Bolt of about 42 yards 11d. per yard
Less than Bolt 1 - per yard

Canvas for Making Water Bags, 24 inch—

Bolt of about 42 yards 1/4 per yard
Less than Bolt 1/5 per yard

Tarpaulins

Made from No. 1 Plain Canvas.

The sizes given are the usual trade sizes, that is, the amount of canvas used in the making. There is a small amount taken up in the seams and hems, leaving the tarpaulins a few inches shorter and narrower than the stated sizes.

inch cutter 5/3, 6/- each

MR 308.—ADJUSTABLE CIRCULAR PLANE—
HEAVIER MAKE, Nickel Plated 2/6, 9/6 each
12/9 each

These planes have a flexible steel face, which can easily be shaped to any required arc, either concave or convex, by turning the knob on the front of the plane.

MR 309.—WOODWORKERS' ROUTER PLANE—
6/9 each

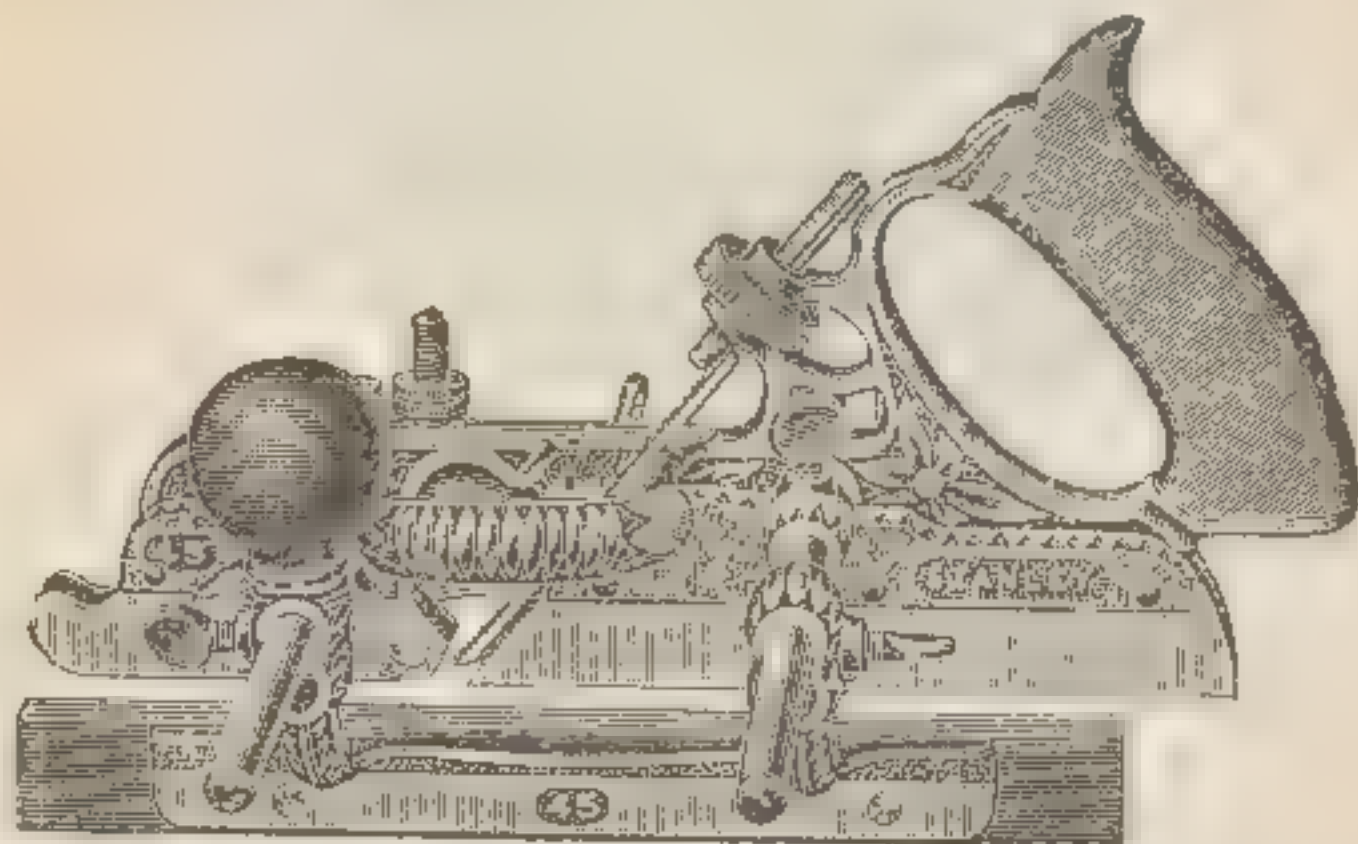

This tool should be added to the kit of every skilled carpenter, cabinet maker, stair-builder, pattern maker or wheelwright. It is perfectly adapted to smooth the bottom of grooves, panels, or any depressions below the general surface of any woodwork. The Bits can also be clamped to the back sides of the upright post, and outside of the stock. In this position they will plane into corners, will router out mortices for sash-frame pulleys, or will smooth surfaces not easily reached with any other tool.

MR 310.—IRON SCRUB OR GERMAN JACK
PLANE, length 9½ inches, 1½ inch cutter .. 3/6 each

Saw Swages

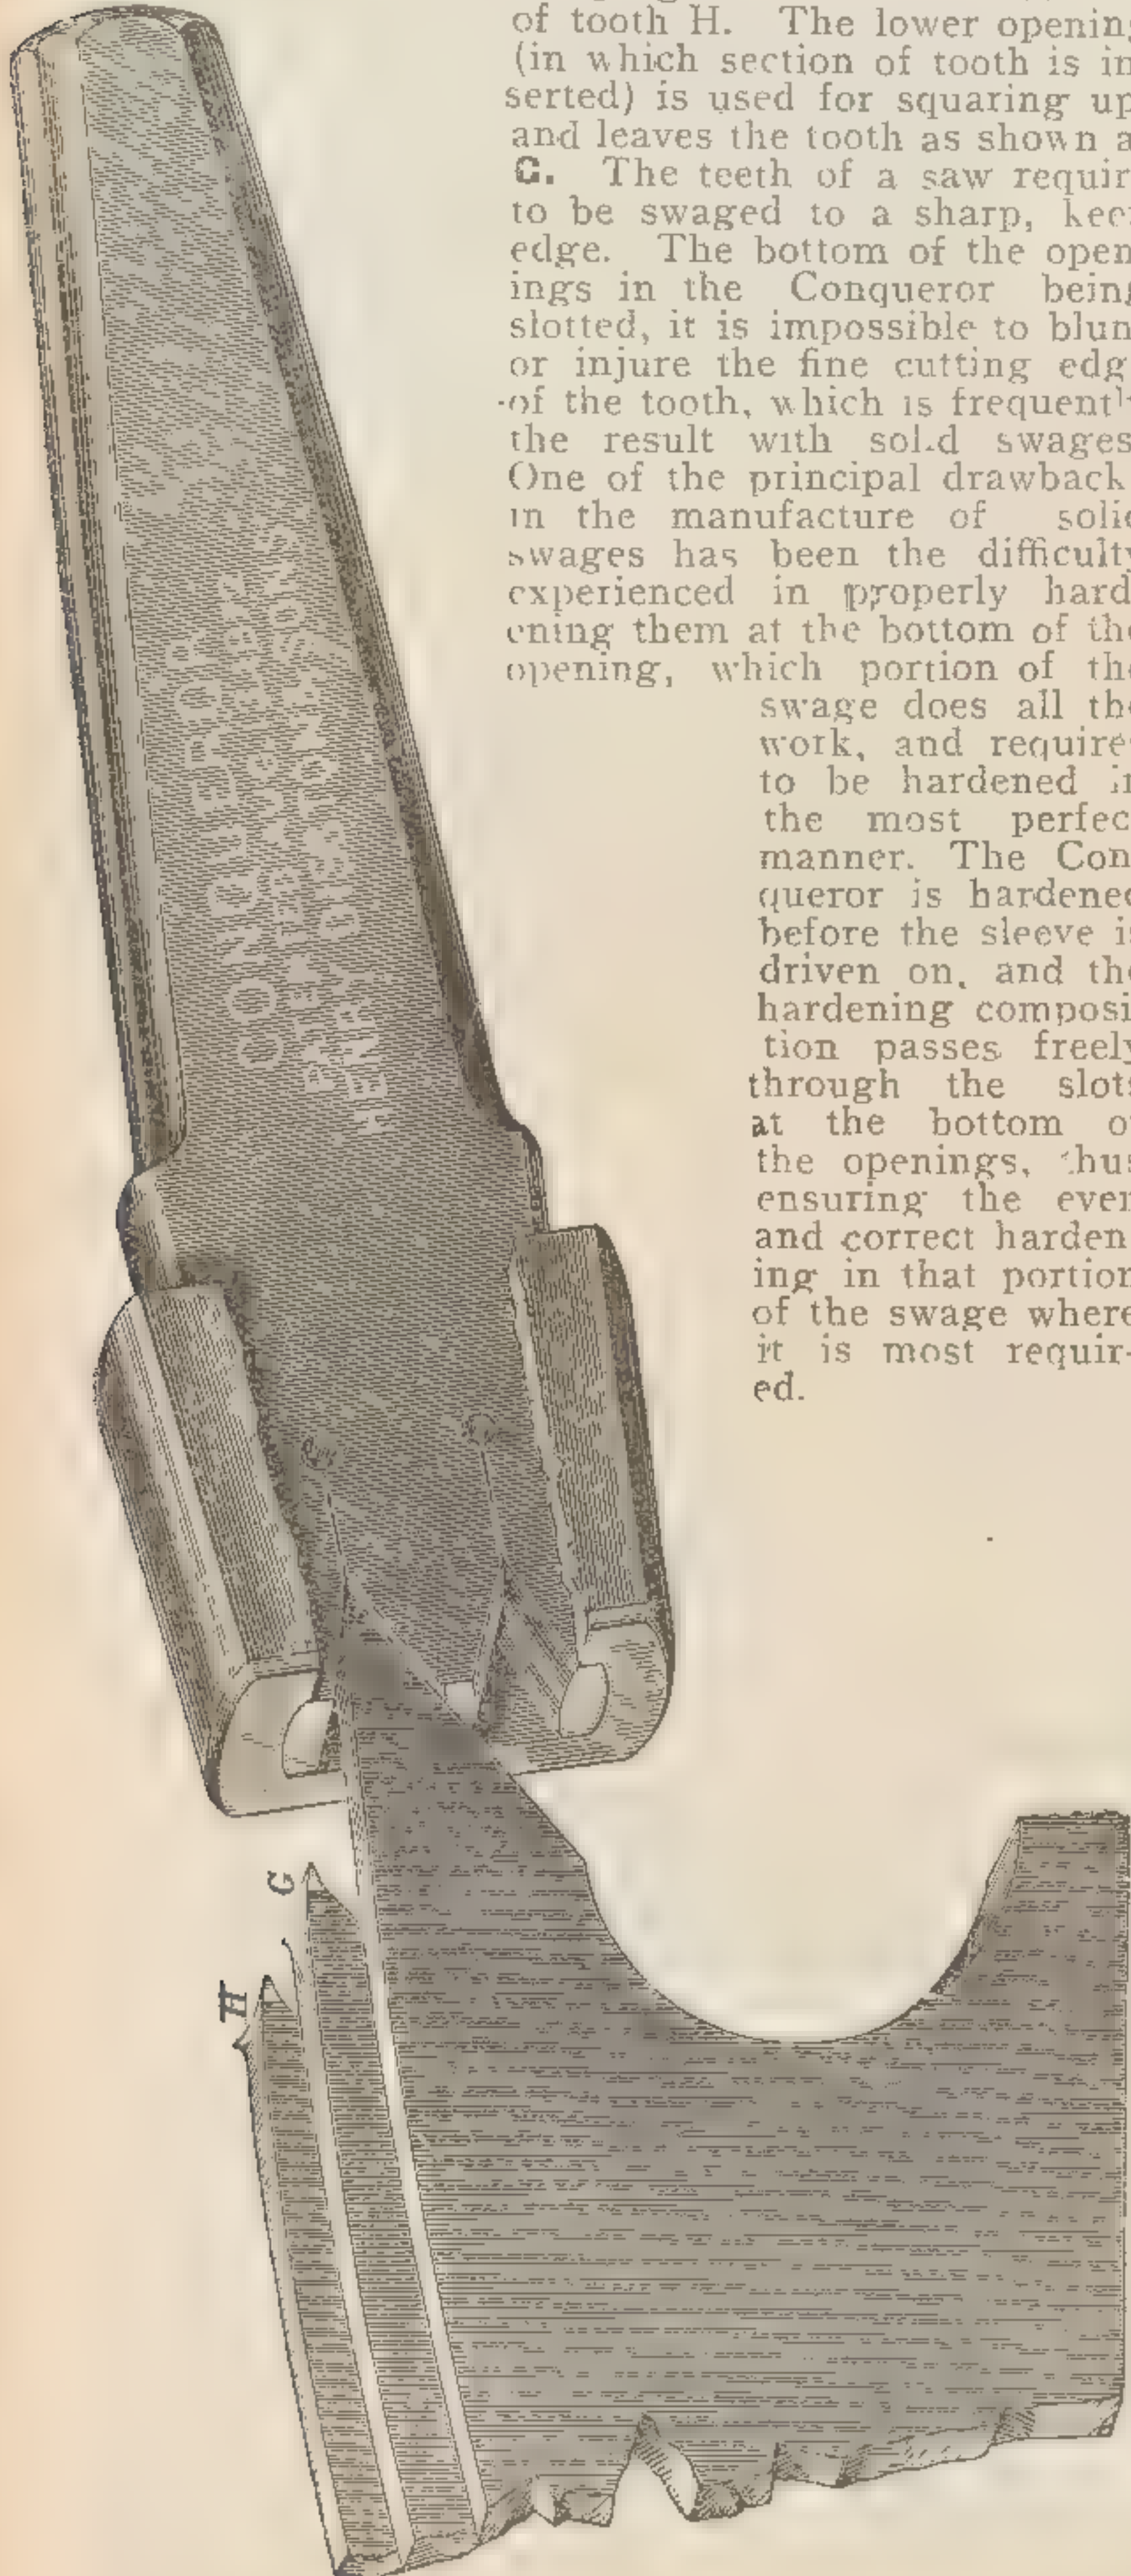

THE CONQUEROR, JUMPER OR UPSET—

No. 1, for large Circular Saws 9,3 each

No. 2, for small Circular and Mill Saws .. 8/- each

The upper opening in the swage being rounded on the bottom, takes its bearing on the centre of the tooth, spreading and shaping it as shown on section of tooth H. The lower opening (in which section of tooth is inserted) is used for squaring up, and leaves the tooth as shown at C. The teeth of a saw require to be swaged to a sharp, keen edge. The bottom of the openings in the Conqueror being slotted, it is impossible to blunt or injure the fine cutting edge of the tooth, which is frequently the result with solid swages. One of the principal drawbacks in the manufacture of solid swages has been the difficulty experienced in properly hardening them at the bottom of the opening, which portion of the

swage does all the work, and requires to be hardened in the most perfect manner. The Conqueror is hardened before the sleeve is driven on, and the hardening composition passes freely through the slots at the bottom of the openings, thus ensuring the even and correct hardening in that portion of the swage where it is most required.

MR 367.

MR 368.

A is the plunger, which can be operated by a treadle attached to E, under the machine, and a slight tap with the foot will set the tooth; B, the hammer or striking part; C, the anvil; D, the movable gauge; F, the screw to regulate the amount of set. The striking part and the anvil, or portion which receives the blow are star-shaped, and similar in construction. The points are all different sizes, and are numbered from 1 to 6, and are designed to set different sized teeth. It will strike a blow as sharp and effective as though done by a hammer, and is the most useful and complete saw-set that has ever been offered. If the saw is hard, several blows should be given in setting it. Raise the back of the saw from the guide-screw F, when the first blow is given, and gradually lower it with each blow until the process is complete. Thus many a good saw will be saved from utter ruin. A trial will suffice. Be sure to clean the saw teeth before setting.

Saw Sets

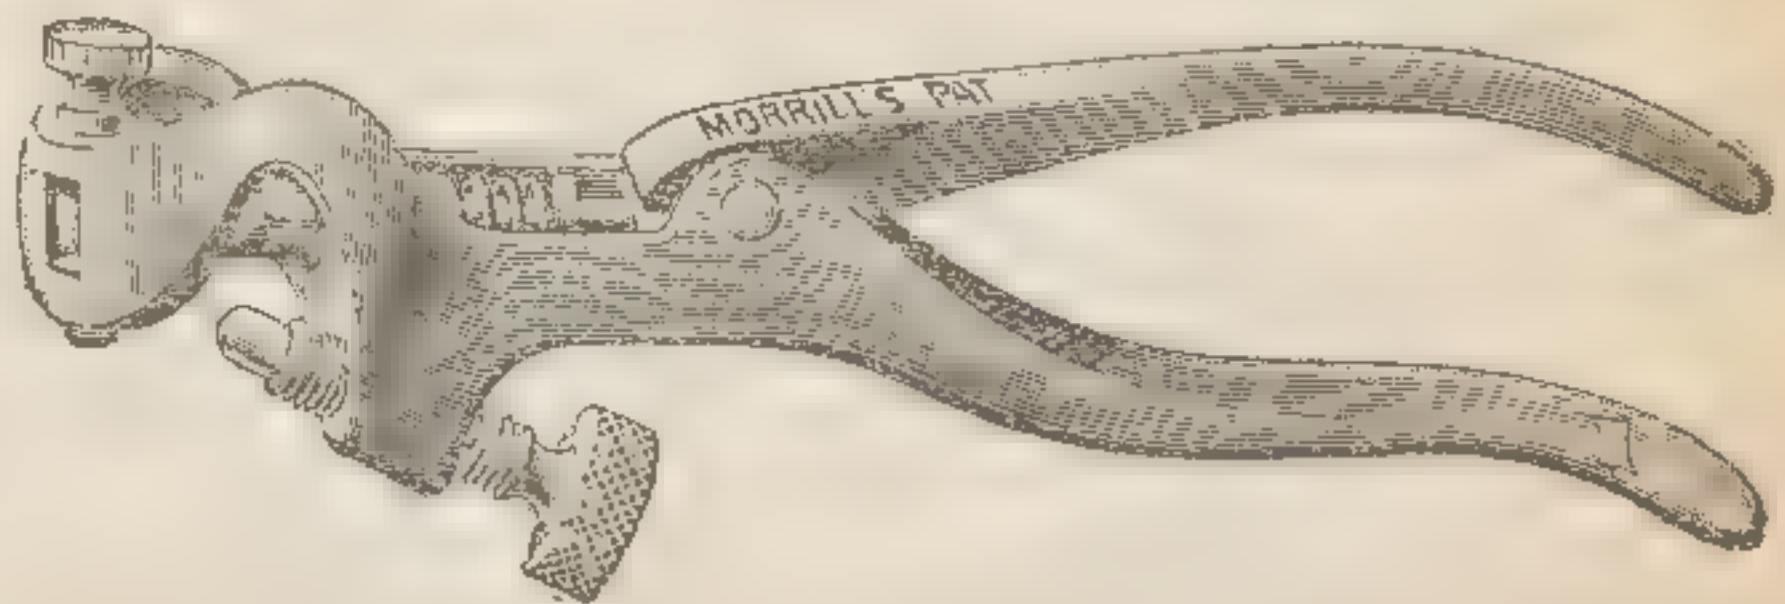

DISSTON'S STAR SAW SETS—for Hand, Back, Band Web, Wood, and small Circular Saws, not thicker than 18 gauge.

Prominent among the advantages claimed for this Set is that it can be operated by the foot by means of a treadle, thus leaving the hands free to guide the saw; or it can be used by striking on the top with a light mallet.

Price 2 6 each

Instruction for Fret Work

Having chosen your design, procure a piece of wood, planed quite smooth on each side, and from $\frac{1}{8}$ in. to $\frac{1}{4}$ in. thick, according to the size and strength of the work required. The woods most suitable are Mahogany, Walnut, Oak, Holly. Paste the design upon the wood, and give it time to dry; then with the drill bore a small hole through each of the interior part of the design which have to be cut out. The bradawl may be used for this purpose, if the wood be of a kind, soft nature, but greater care will be required to avoid splitting it, and for the same reason it is better to bore all the holes before cutting out any part of the design.

You might obtain or make a Cutting Board.

Fix the Cutting Board firmly to a table by means two Screw Cramps, allowing one of the ends with a V shaped opening to project a few inches beyond the table.

Next fasten one of the Saw Webs in the lower part of the frame, being particular to place the teeth so that they will cut most keenly with the downward stroke of the saw.

Seat yourself opposite the board, but rather to the left hand, and place your work upon the table; thread the Web through one of the holes in the design; now compress the frame with thumb and finger of one hand, and while thus held, secure the Web with the other to the upper part of the frame, and when the pressure of the thumb and finger is removed the Web will be found to be sufficiently tight.

Now cut round the pattern, feeding the work to the saw, and turning it upon the board with the left hand until the piece is cut out; then detach the saw from the upper part and proceed as before.

When the whole of the work is cut out, the paper side of it should be slightly damped with a sponge, or, better still, a piece of wet blotting paper placed upon it for a few minutes, when it will readily come off. Care should be taken not to use more water than is necessary, or it will cause the wood to warp.

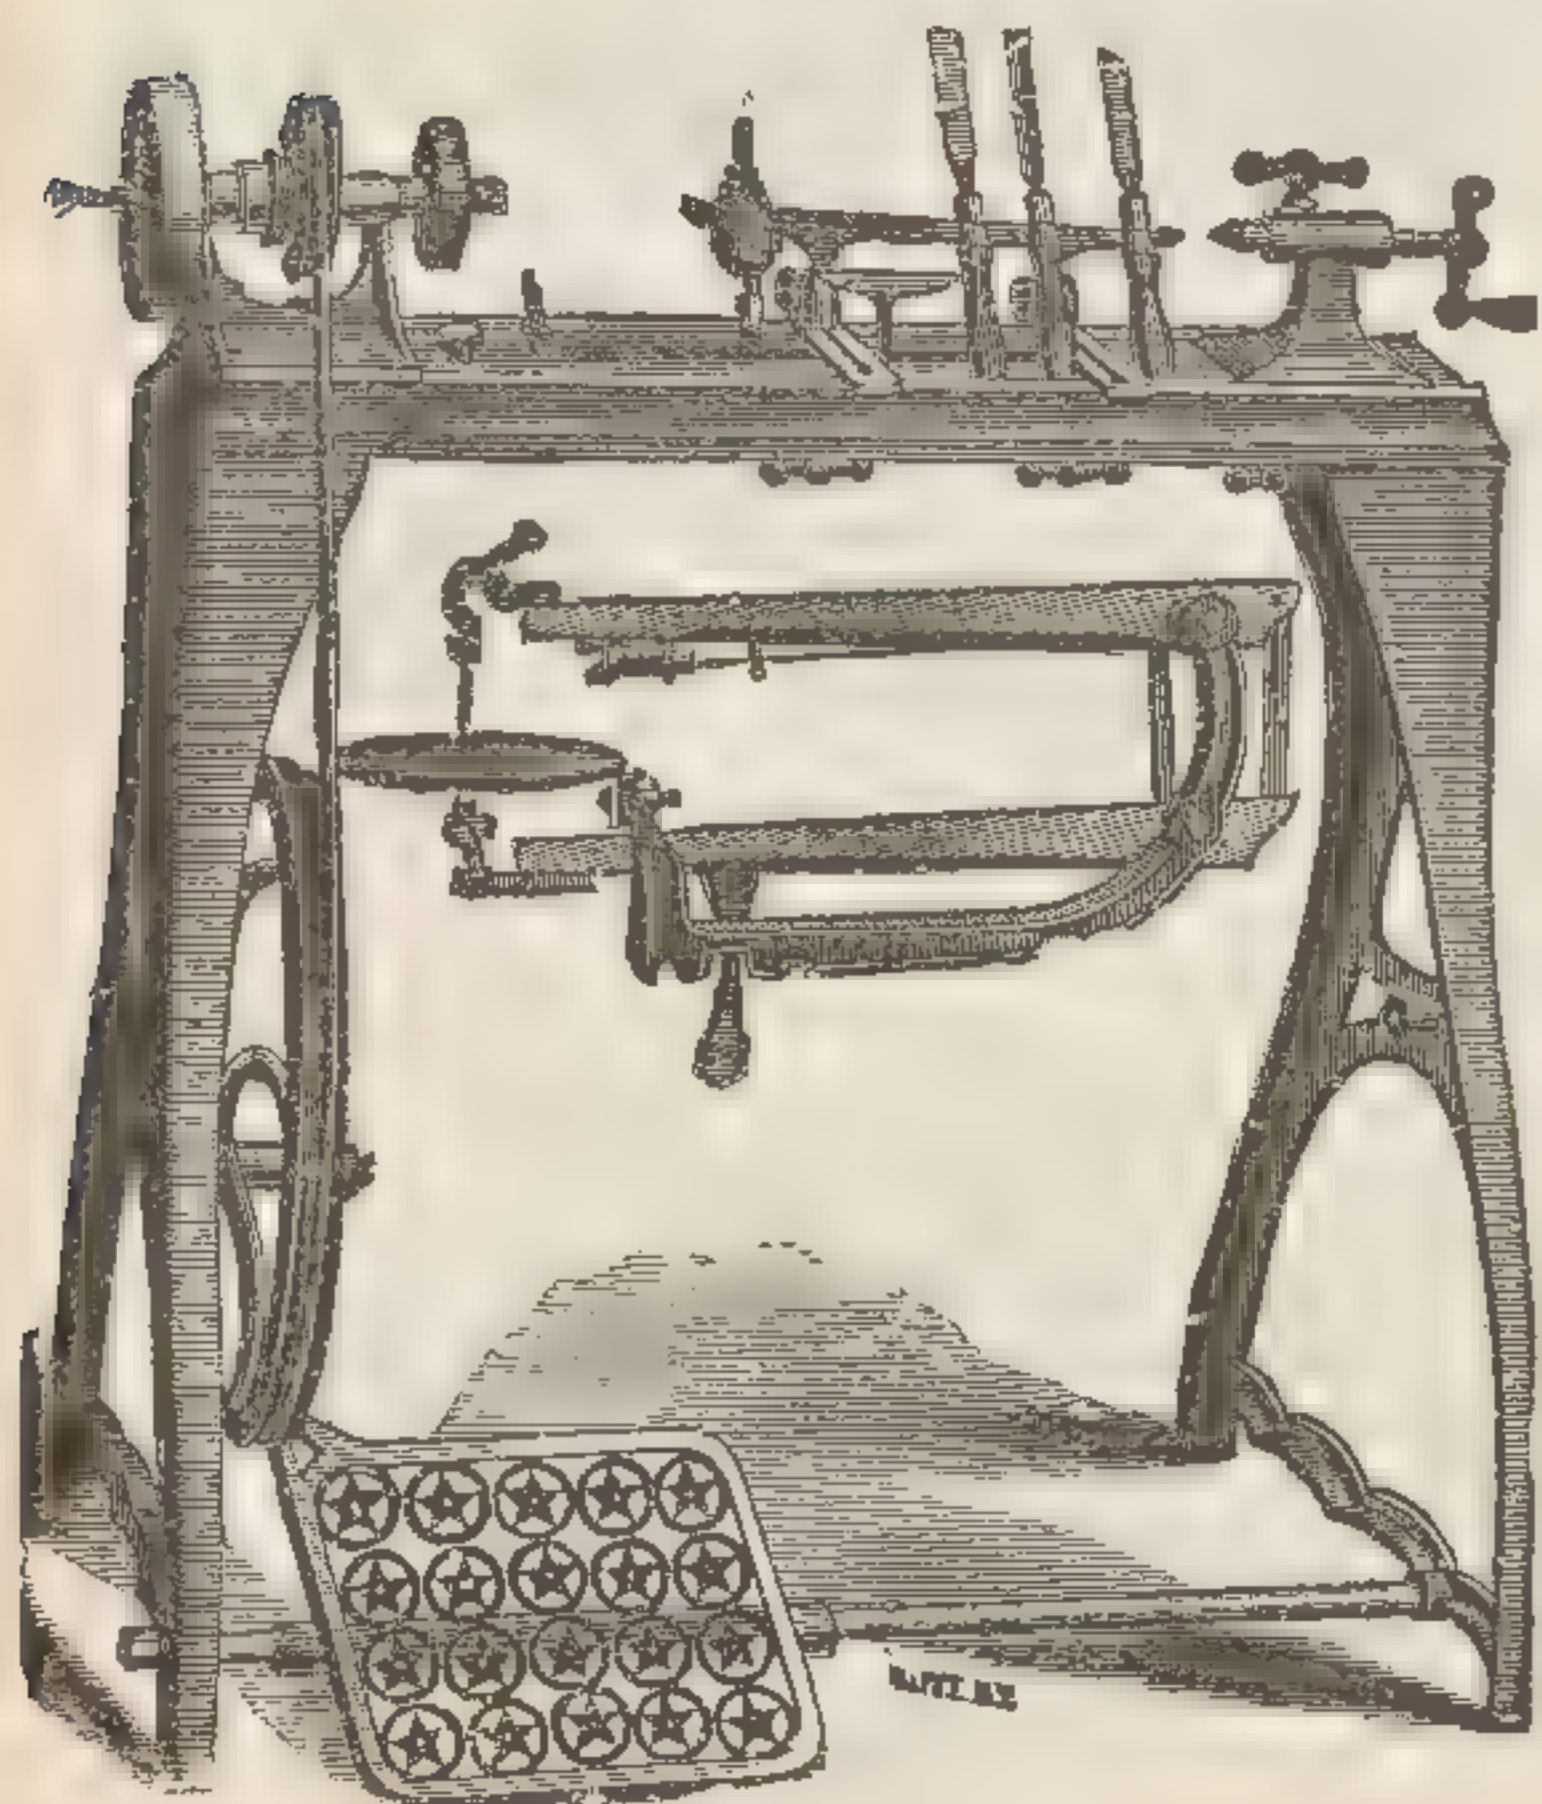

It should now be trimmed up with the files where required; then got up smoothly with sand paper, which should be wrapped tightly round a small square piece of wood, and the work rubbed with it in the direction of the grain, and not across it.

After this finishing process, the work can either be considered completed, or it can have a coating of French Polish, according to taste.

47,6		69,-			

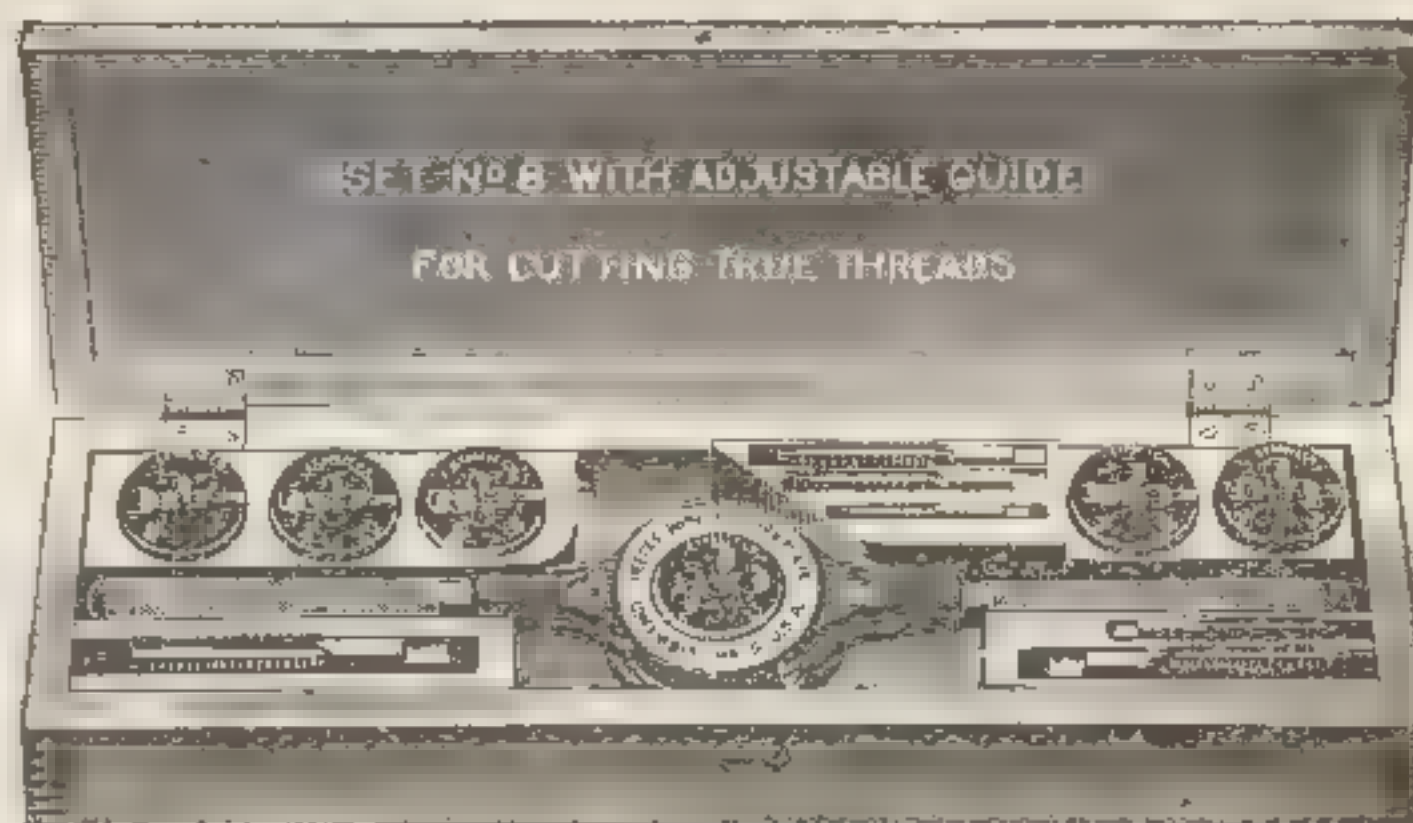

No. 1 MR 384.

As will be seen from the above illustration the "Reece" dies are sawed through on one side and a screw inserted through the edge of one half, while on the opposite side the dies are chambered out and spring tempered. Thus, when the adjusting screw is turned out the spring temper causes the die to close together and it will cut smaller.

To make the dies cut larger it is only necessary to turn the adjusting screw in and the die will be opened up to cut larger. This method of adjustment is the simplest and most positive that we know of, and it does not require a mechanic to adjust our dies as is the case with many other makes.

The Reece dies, being joined together on one side, the cutting edges are held in line and are superior to dies made in two or more pieces, because, in the case of dies made in two or more pieces, dirt, chips, etc., are liable to get under the dies in the collet, causing the dies to cut double or imperfect threads.

No. 2 MR 385

No. 3 MR 386.

No. 1 shows the Die.

No. 2 shows Set in Case.

No. 3 shows the Adjustable Guides on the Stock.

IMPORTANT.

We claim that the Reece Improved Screw Plates are constructed on the only correct mechanical principles and that they will do more and better work than those of any other make. On this and the preceding pages we have endeavoured to show in some measure the important features embodied in the construction of the Reece Screw Plates.

However, you cannot fully appreciate the excellent qualities of these Screw plates unless you have used them yourself. A few points of superiority are:—

The Adjustable Guide centres the iron accurately and therefore the dies will cut true, straight and perfect threads at one cut.

The Reece Patent Dies are constructed on the only correct mechanical principle, hence will do more work than other dies.

They are more easily adjusted than any other style of dies and the cost of repairs is much less.

The Stocks all have knurled handles to prevent the hands from slipping when oily.

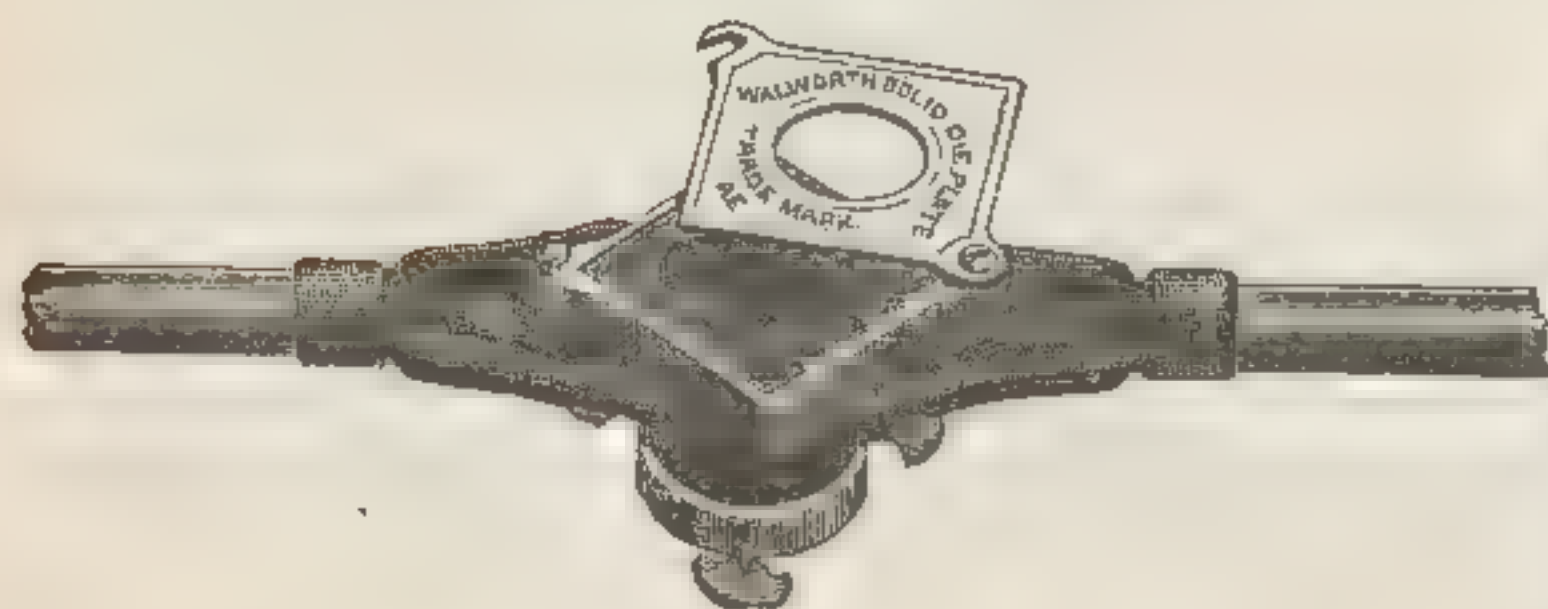

Remember that the Reece Screw Plates are guaranteed to give satisfaction.

	4/6	6/6	8/-	each

Customers are sometimes under the impression that the same set of Stocks and Dies will suit both pipe and bolts and nuts. So far there is nothing made, and it would require to be a very complicated machine; as pipe is measured in a different way, and has a different thread from that put on bolts and nuts, etc. Pipe is measured inside, whereas bolts, etc., are measured over all. Take, for instance, an inch Die to fit on 1 inch pipe, would fit on about an 1 $\frac{1}{4}$ piece of iron.

EVERYTHING SOLID VALUE

The Latest Pattern of Spanners

The "Gryp" Patent

The most versatile Spanner on the Market.

It is the only Practical Ratchet Spanner.

It is a fixed Spanner at any angle.

It tackles successfully the most awkwardly placed nuts.

No. 1 opens to $\frac{3}{4}$ inch	5/-
No. 2 opens to 1 inch	7/-
No. 3 opens to $1\frac{3}{4}$ inch ..	15/-

MR 466.

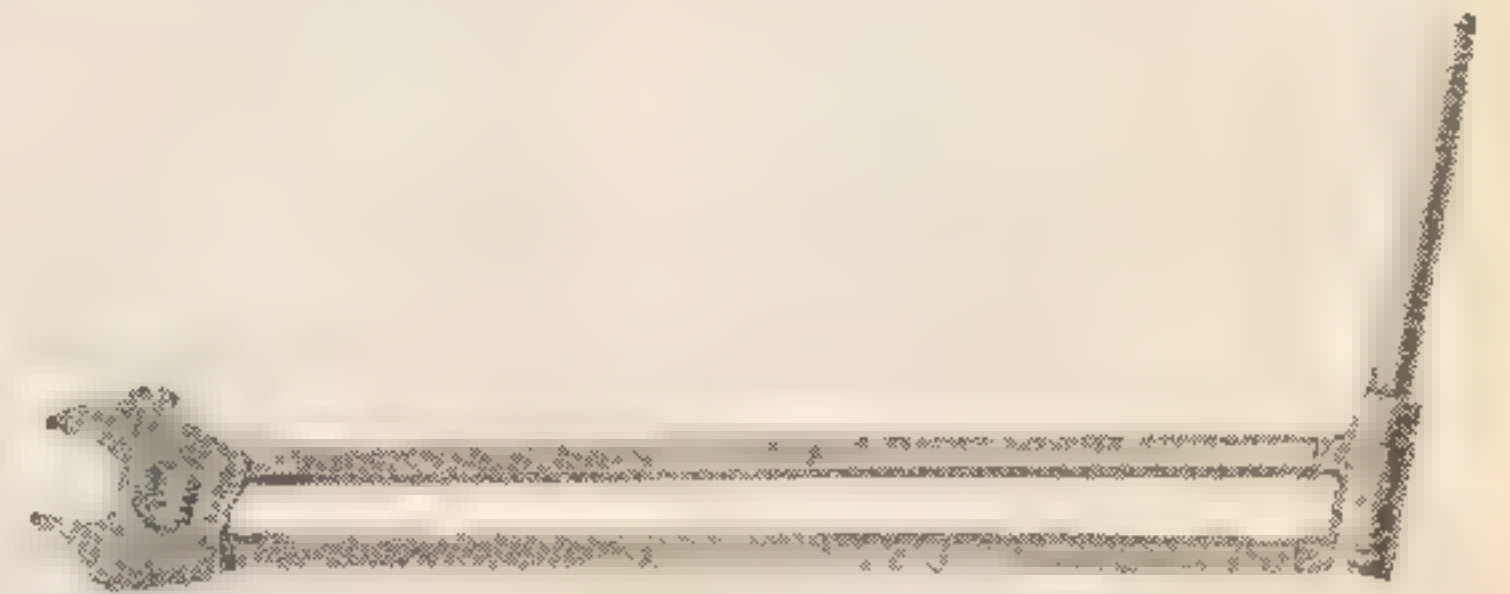

MODE OF USE.

The head is adjusted to fit the nut and engages it; then the handle is swung to whatever angle is desired and gripped firmly, and the teeth in handle becoming engaged, the whole forms an absolutely rigid Spanner. If desired, the handle may be oscillated far enough to allow the teeth to advance the distance of one tooth at a time—the head being by this means moved through an angle of about 45 degrees; whereas the end of the handle only moves through, say, 10 degrees of space. Thus, the Spanner becomes a Ratchet Spanner.

The "Newleva" Patent Spanner

Especially adapted for Motor and Marine work, for nuts in confined spaces.

Turns nuts impossible to work except by hammer and chisel.

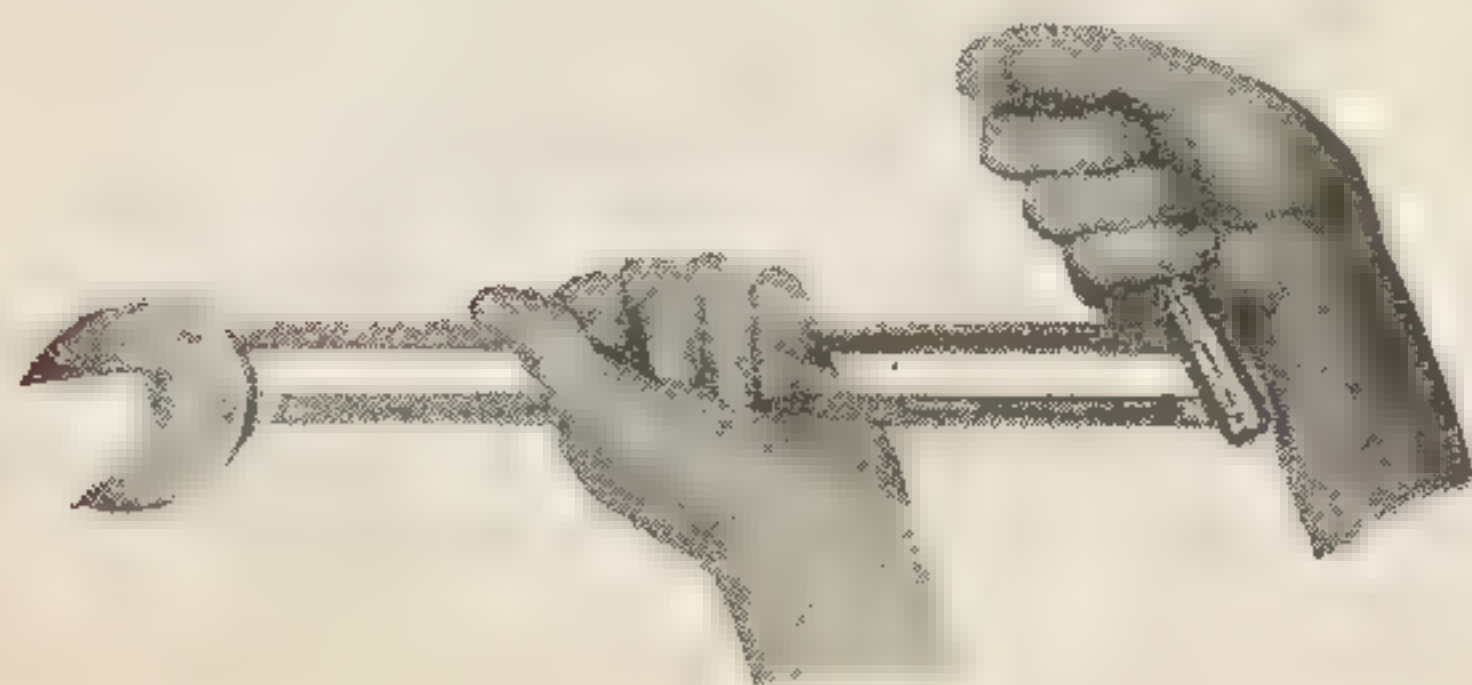

MR 467.

No. 1 opens to $\frac{3}{4}$ inch	5 -
No. 2 opens to 1 inch	7/-
No. 3 opens to $1\frac{3}{4}$ inch	15/-

Mode of Use.—This Spanner can be inserted, for example, between the spokes in the wheel of a Motor Car to adjust a nut on the chassis, which might otherwise entail crawling under the car to reach. Adjust the jaws to fit the nut, and engage same. Take hold loosely of the bars in the left hand, and the end lever in the right. Then pull towards you or push this lever away from you, according to whatever nut is to be tightened or loosened, keeping the left hand stationary, the result being both easier and more certain than with the ordinary spanner. Work the end lever only. Note.—Use as directed only.

Patent Pipe Wrench

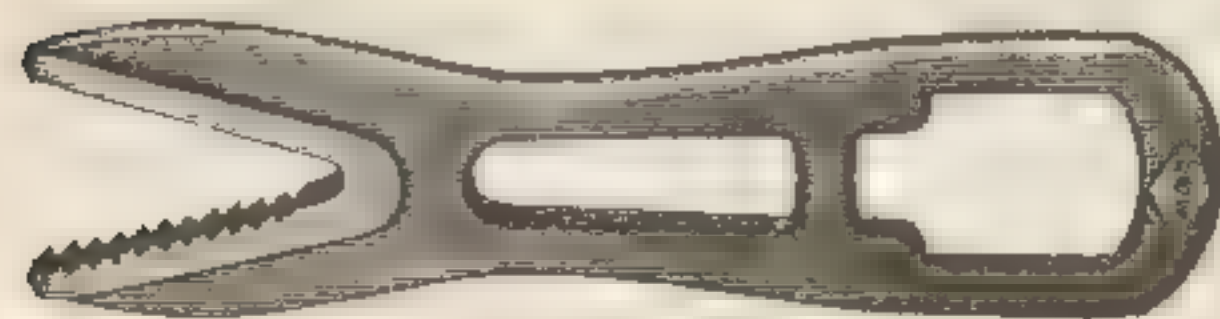

MR 465.

Size 1 will grip $\frac{3}{4}$ inch Pipe	5/-
Size 2 will grip 1 inch Pipe	6 -
Size 3 will grip $1\frac{1}{2}$ inch Pipe	10/-

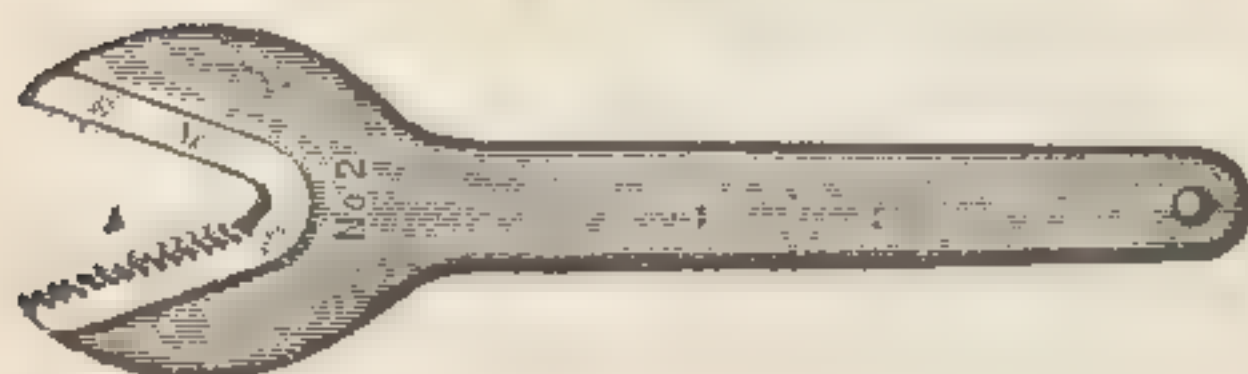

Directions for use same as for the Newleva.

UNIVERSAL PROVIDERS.

"BULL-DOG" WRENCHES.

- No. 1, 5 $\frac{3}{4}$ inches long, will hold pipe $\frac{1}{8}$ to $\frac{3}{8}$ inch; will hold round iron $\frac{1}{4}$ to $\frac{3}{4}$ inch..... 7d. each
 No. 2, 9 inches long, will hold pipe $\frac{3}{8}$ to $\frac{1}{2}$ inch; will hold round iron, $\frac{1}{2}$ to 1 inch 1/6 each
 No. 3, 16 inches long will hold pipe $\frac{1}{2}$ to 1 $\frac{1}{2}$ inch; will hold round iron $\frac{3}{4}$ to 1 $\frac{3}{8}$ inch 3/- each

MR 470.

STILSON WRENCH—

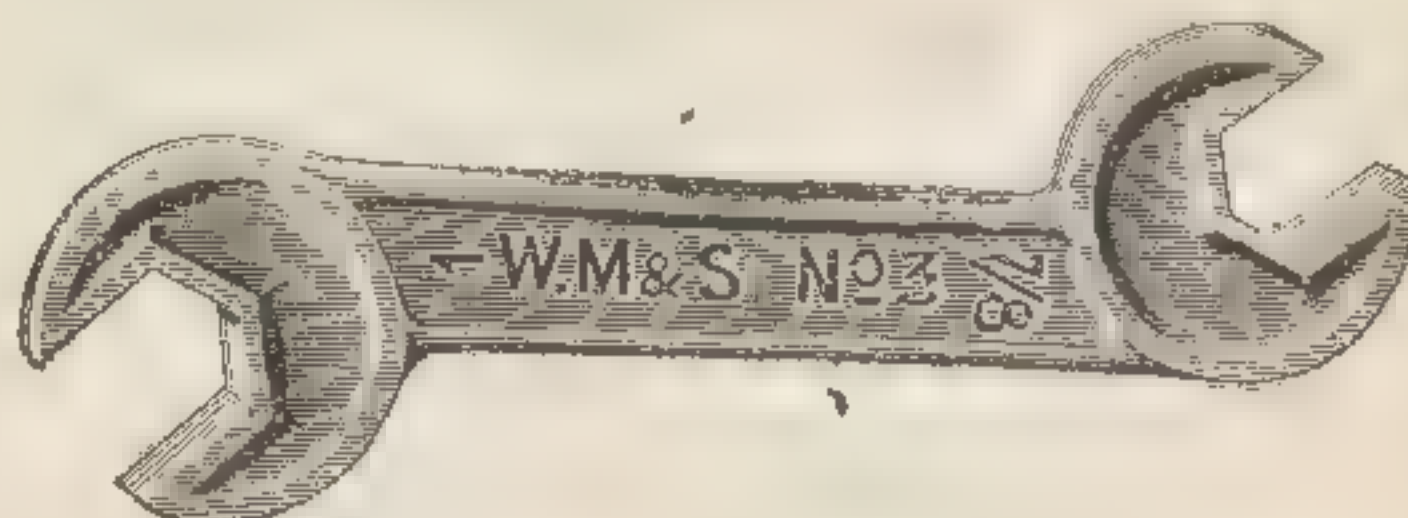

10 14 inch
4/3 5/3 each

MR 471.

TWIN—Always Positive, Always Ready, and Never Slips.

These Wrenches are forged solid in one piece, from a special grade of steel selected for that purpose. They have ratchet teeth, cut diagonally across one jaw, thus enabling them to bite with three teeth at once. A single wrench will hold many sizes of nuts or bolts without adjusting. They are invaluable to engineers, gas fitters, blacksmiths, and jobbers of all kinds, and for general household or farmers' use. Twin, 10 inches long, will hold pipe $\frac{1}{8}$ to $\frac{1}{2}$ inch; will hold round iron $\frac{1}{4}$ to 1 inch 1/9 each

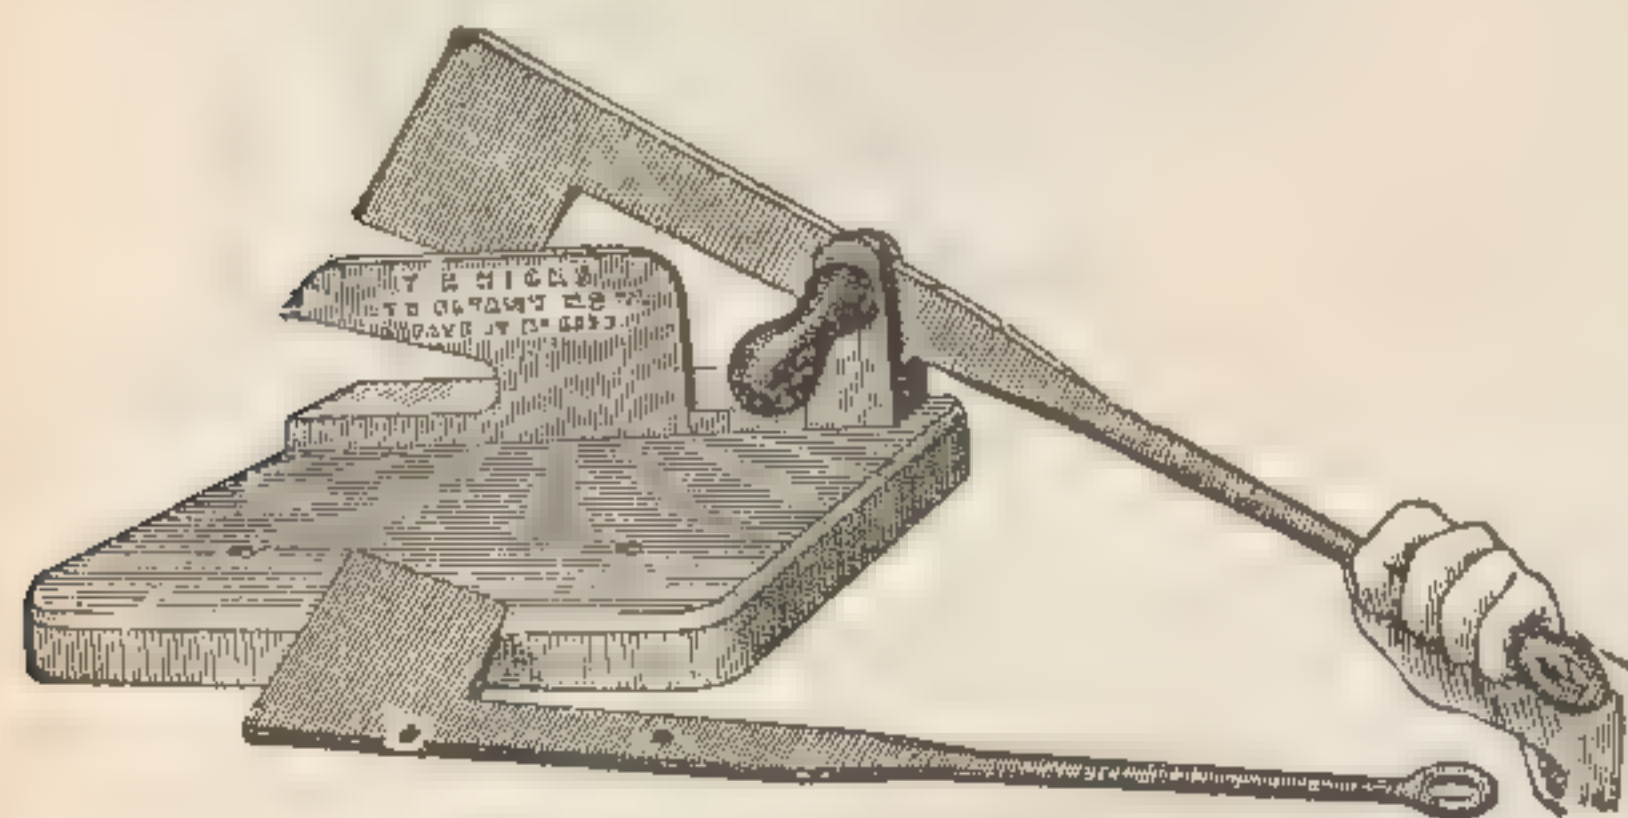

MR 472.

Directions for Working the Table Top Lamb Marker.

Bolt machine about 3ft. from left hand end of cutting rail.

Keep the irons red hot, either in an open fire or in a small furnace, the latter for preference as very little wood is then required.

See that the whole of the cutting edge of iron rests on the platform when the iron is down.

The irons should have a smooth cutting edge, and should not be too sharp.

When the irons become worn with constant usage, run a file over the cutting edges to keep them level.

Keep the platform on which the iron works free from loose wool and dirt.

Do not **chop** the lambs' tails off, but sear them off with a steady even pressure.

BROWN'S MODERN LAMB TAIL CUTTING AND SEARING MACHINE.

Has the following advantages—

1st. The Blades are always kept hot by a powerful lamp.

2nd. Tails are Seared at any desired uniform length.

3rd. Does not injure the private parts of a Ewe Lamb

4th. Its rapidity of work—500 Lambs per hour comfortably.

5th. It is simple in construction, light and easily carried about.

6th. No extra labour is entailed.

7th. Any ordinary hand can operate it.

DENYER'S IMPREGNATOR

Latest Improved American Model.

For Mares and Cows, Nickel-plated, with Fenestrated Glass Barrel, 30/- each.

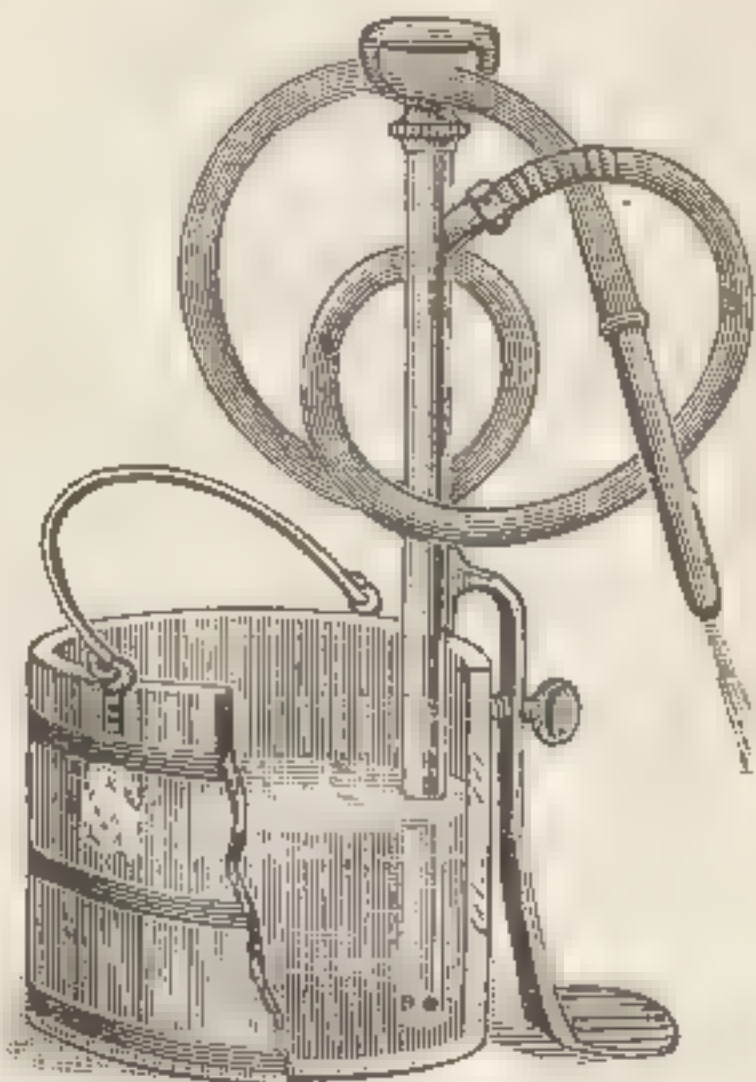

This Instrument pays for itself 50 times over in one season. By its aid valuable mares and cows are bred from that have never been bred from before. Full information given. Send for Instructions.

MR 485.
MR 478.—SPECIAL HORSE AND CATTLE SYRINGE

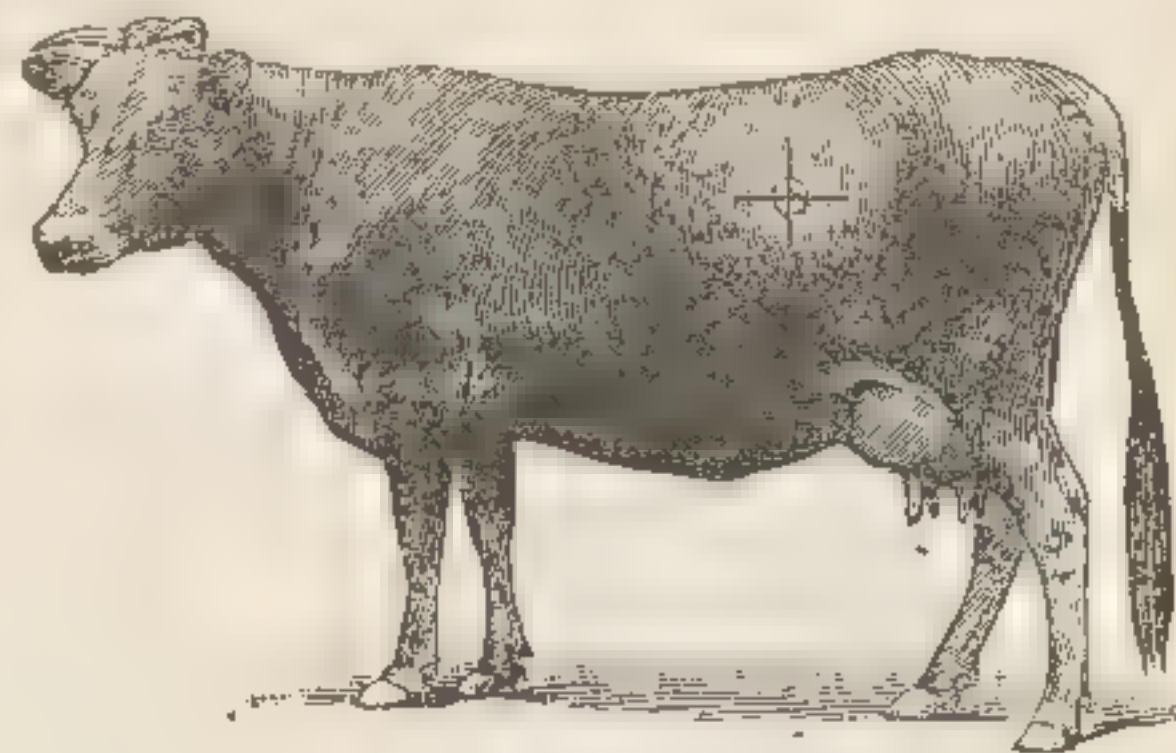

DENYER'S BLOAT OR HOVEN TROCARS

One of the most fatal ailments, unless quickly relieved. Treatment very easy.

A
Great
Necessity
About
Every
Farm or
Stable.

Will Last
a Lifetime
with Care.
Nothing
to get
Out of
Order.

MR 479.

Directions.—This Syringe has a continuous flow. Shave some Antiseptic Soap in a bucket, and then add the desired amount of warm water; when good suds appear, place the nozzle in the rectum of the horse or in the womb of the cow or mare, and move handle up and down very gently, as this instrument is very strong, and if used with too much force, one may break through some of the mucous membrane. It can be supplied with several nozzles, the larger one for horses and cows, the smaller one for colts, calves and dogs.

The Denyer Special Horse and Cattle Syringe is the best and most complete injection syringe on the market to day, and is especially recommended for colic and cases of indigestion, etc. The uses of this Syringe are too numerous to mention. Price, 30/-.

The above illustration shows a cow afflicted with Bloat, and shows where Trocar is inserted.

Acute indigestion or Bloat, sometimes called Hoven, is the result of excessive quantities of food of a musty or mouldy character, or any foods that have been cured improperly, also from drinking too much cold water. It is sometimes caused by over feeding of wet grass, or grass covered with dew, frost, or rain, especially clover.

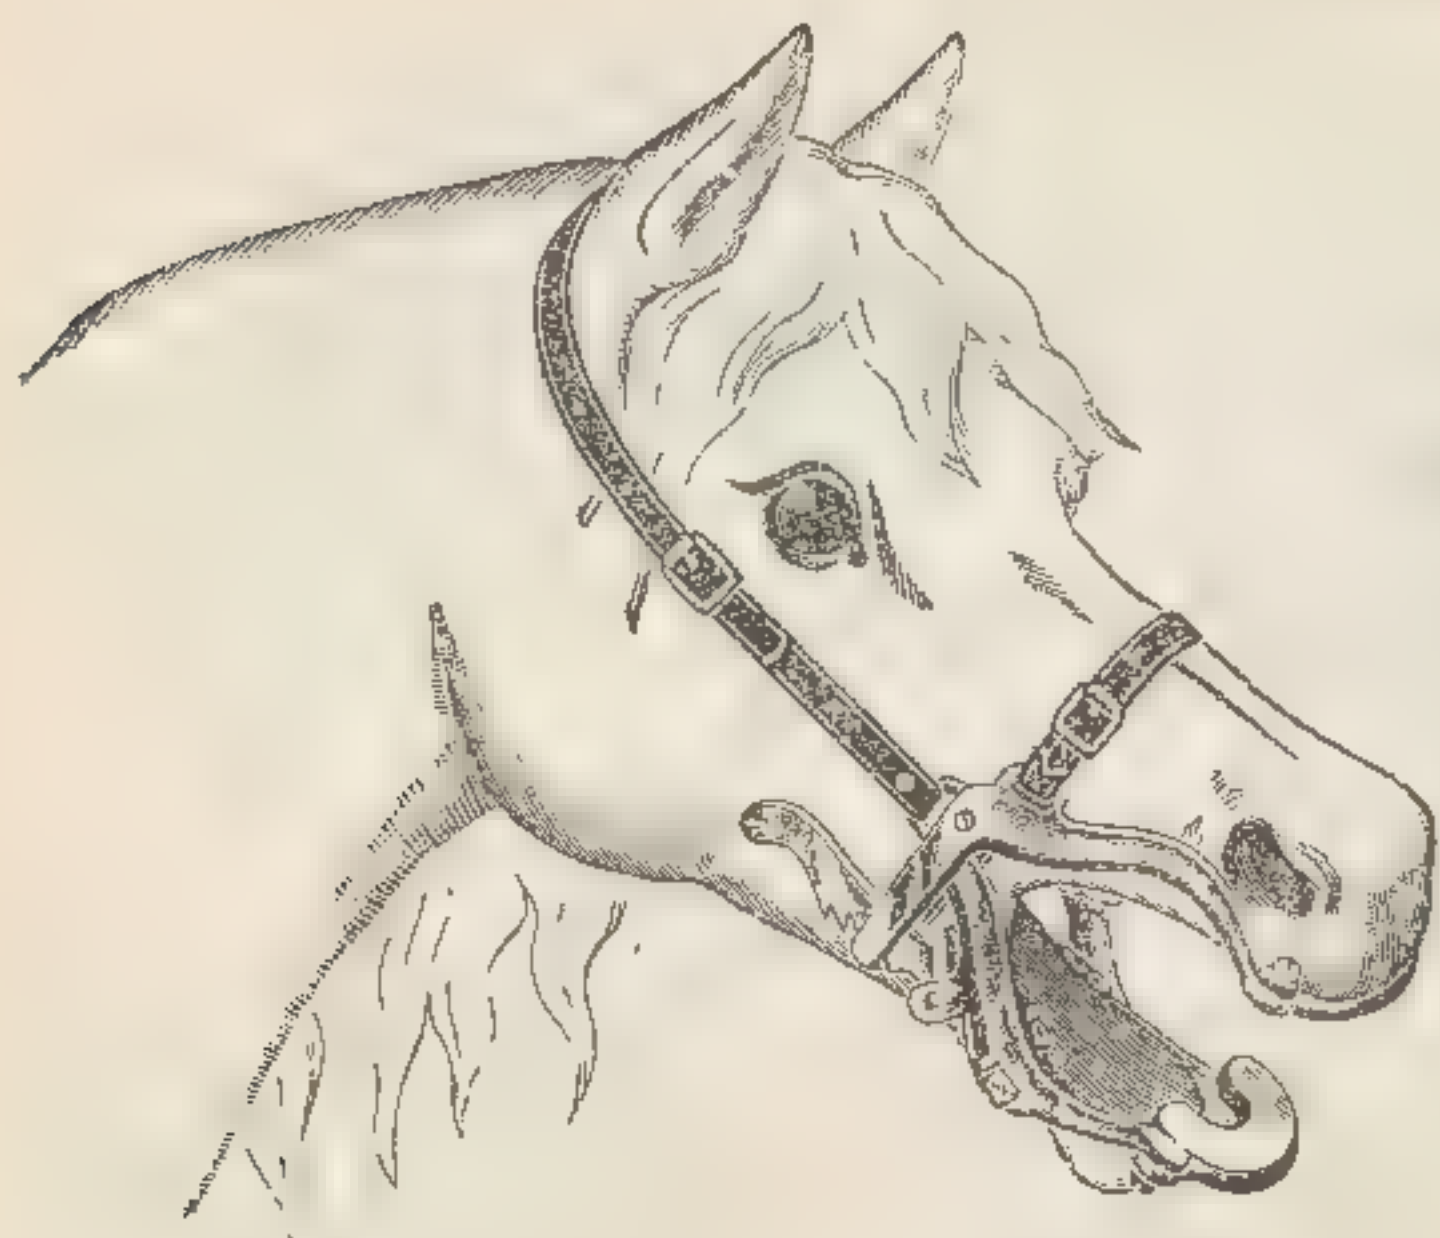

MR 480.—TROCARS, 3/3, 4/-, 4/9, 10/6, 12/6

"COME ALONG" WIRE STRAINERS (MR 491) 3/3 each

There has long existed the need of a simple and practical barbed wire stretcher, one that will do its work satisfactorily and cost the minimum price. The "Come Along" combines the merits of most other styles without their disadvantages. It is perfectly simple in construction and manner of using, requiring only the aid of a common wooden lever or hand-spike, and owing to its simplicity and compactness, is not liable to break or get out of order.

We also make many other patterns of Sheep and Cattle Plyers. There are occasions when you require two different pattern of marks for a sheep's ear. When this occurs, and the marks are not required too far apart, we can make one Plyer to cut the two marks at the same time. There is no saving as regards price. The only advantage is that it saves time and is, perhaps, more convenient; for instance, where we could supply two pairs of Plyers, each a different pattern, for 16/- for the two, one pair of Plyers to make the two marks (at the same time) would cost about 27/6.

MR 582.—EAR LABELS, Sheep, either Aluminium or Tinned Iron—
Aluminium per 100 10/6
Iron per 100 10/6
Pliers, for closing 6/-
Pliers, for punching hole in Ear 10/-
Same Pattern for Cattle only large size, per 100 14/-
When ordering labels state if you want them numbered, and if initials are required on them.

The New Aluminium Ear Tag or Label

For Cattle, Sheep, Pigs or Stock of any kind

CLOSED.
MR 583.

OPEN.
MR 584.

ADVANTAGES.

1. It is light, and can be put on Lambs almost as soon as born, without injury. One-fifth of the weight of other tags.
2. Being made of Aluminium, which is a non-corrosive metal, it will not rust and fester the ear, as iron ones frequently do.
3. It is durable, and cannot be torn out of the ear; being round, it revolves readily, and therefore will not catch in anything.
4. It is so good and the price is so low that no owner of stock can afford to do without it.
5. It is the simplest most easily applied, and best looking Ear Tag on the market.
6. Last, but by no means least—

When once fixed it cannot be removed without destroying the Ear or Tag, and rendering it useless. So it is not worth stealing, but is worth buying.

PRICE.

EAR TAGS, with Initials and Numbers, 16/6 per 100 1 PAIR PLYERS, for Adjusting and Punching, 13/6
DIRECTIONS.—Pierce the ear, place large size in hole, insert other half of Tag, and squeeze two halves together with the Closer. When putting the tag on, dip both parts of tag, also punch, in Phenyle before you insert them; it will assist the ear to heal.
When ordering Ear Labels (especially MR 583 and 584), you will want to allow us about a week to execute order.

If you want to Fence Cheaply use a "Ferris" Post Hole Digger

Simpler, Stronger and Quicker than any other Digging Tools.

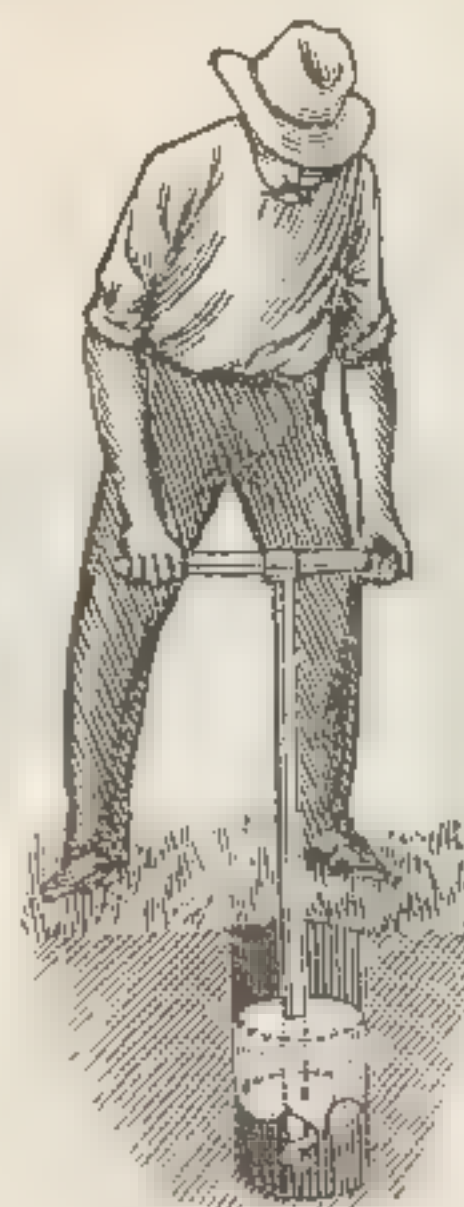

For Pastoralists, Farmers, Contractors, Railway and Telegraph companies, and others who have holes to dig. Orchardists and Nurserymen, etc., for Tree Planting—they are great labor savers.

With it one man can do four times the amount of work that can be done by any other means.

The blade and point are of malleable steel, the upright bar is of wrought-iron pipe, the handle wood.

Cuts a clean hole just large enough for the ordinary Posts, not so much ramming.

It leaves the hole level on the bottom, and brings up every bit of core.

MR 581.

Will stand plenty of rough usage.

By extending the pipe, a man can bore for water though wet or dry sand and clay.

Its simplicity ensures durability. There are not parts to get out of order, or need removal.

The edge can be sharpened by anyone.

One man can work any of the sizes, in wet or dry ground.

From blade to handle is 3ft. 4in., a convenient height for ordinary purposes, but if deeper holes are required, the handle has merely to be unscrewed and extended lengths attached. Any lengths can be supplied at nominal cost.

Gives unqualified satisfaction.

Sizes stocked 6 9 12 inches.

HAND BAIT-LAYER OF
Jam and Strychnine or Phosphorised Pollard.

Weight, 6lb.

30s.

Measurement, 3ft.

KIRBY'S LITTLE RABBIT TERROR.

Shape somewhat similar to a Brass Garden Syringe.

This is the Lightest, Strongest, and Most Effective Fumigator
on the market.

It weighs only 4lb. 6oz., is made of Brass, and when filled discharges 250 teaspoonfuls of Bisulphide of Carbon. One 5-gallon drum gives 8,000 discharges, which costs 30 - in Sydney F.O.B.

DIRECTIONS FOR USE.

Inject three charges into each burrow, fill up tightly with loose earth. In river banks inject 5 charges into each burrow, fill the same way. The larger the warrens the more effective the fumigating with this machine.

The work of using this Fumigator is very simple.

Should this Fumigator leak at issuing end, hold the end up, draw plunger once or twice, letting go sharply. Leakages are caused by grit or sediment getting in front of the plunger.

When Fumigator is empty and not in use, put a teaspoonful of oil into it, which will cause the plunger to work freely.

IMPORTANT NOTICE

When ordering Hose Unions, give the following particulars:—

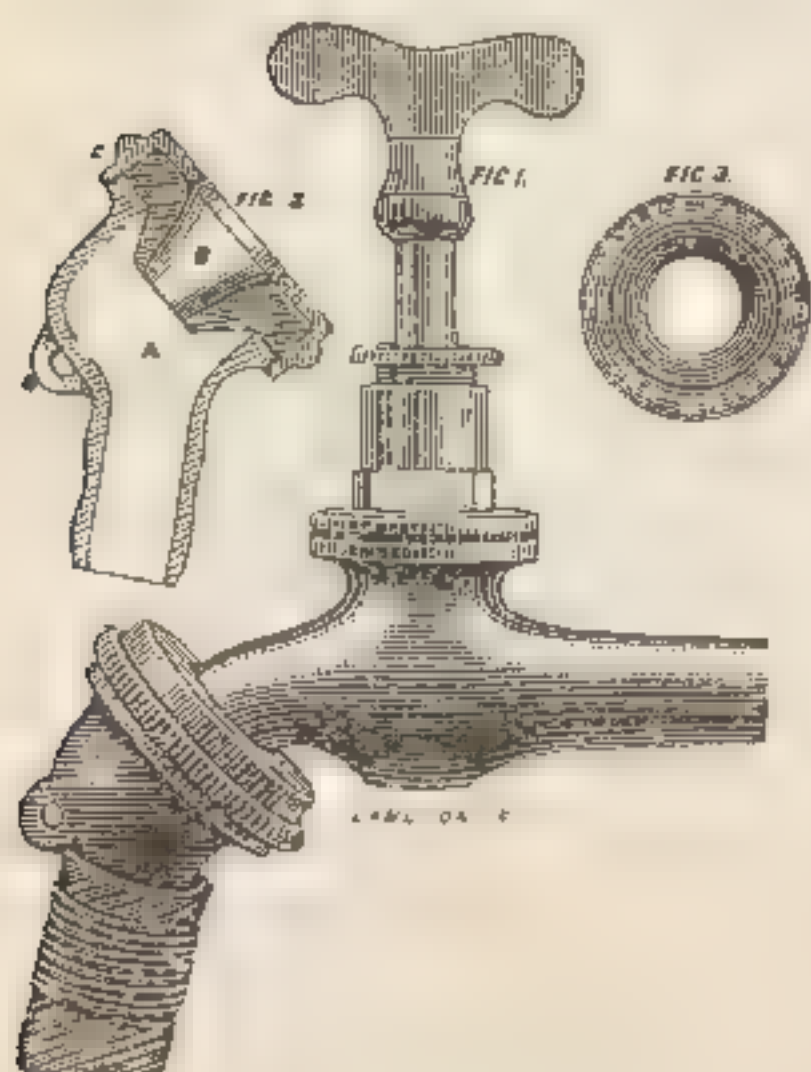

If the tap has a thread on the nose, to take a screw union, give the exact diameter, measuring carefully from outside to outside of thread. It is also necessary that we should know the size of thread, and, to give us this information, count the number of threads to the inch; be very careful, as one thread to the inch, more or less, will prevent the union fitting properly. Another way is to take a stiff bit of white paper (wax would be better, if you could forward it to us so that it would not get crushed) and press it hard on to the thread so that it leaves a clean impression on the paper. If the tap has a nose without the thread, quote the outside diameter, mentioning "Plain tap."

© CHEAPSIDE, SYDNEY. ©

UNIVERSAL PROVIDERS.

Hose Fittings

Tap Unions

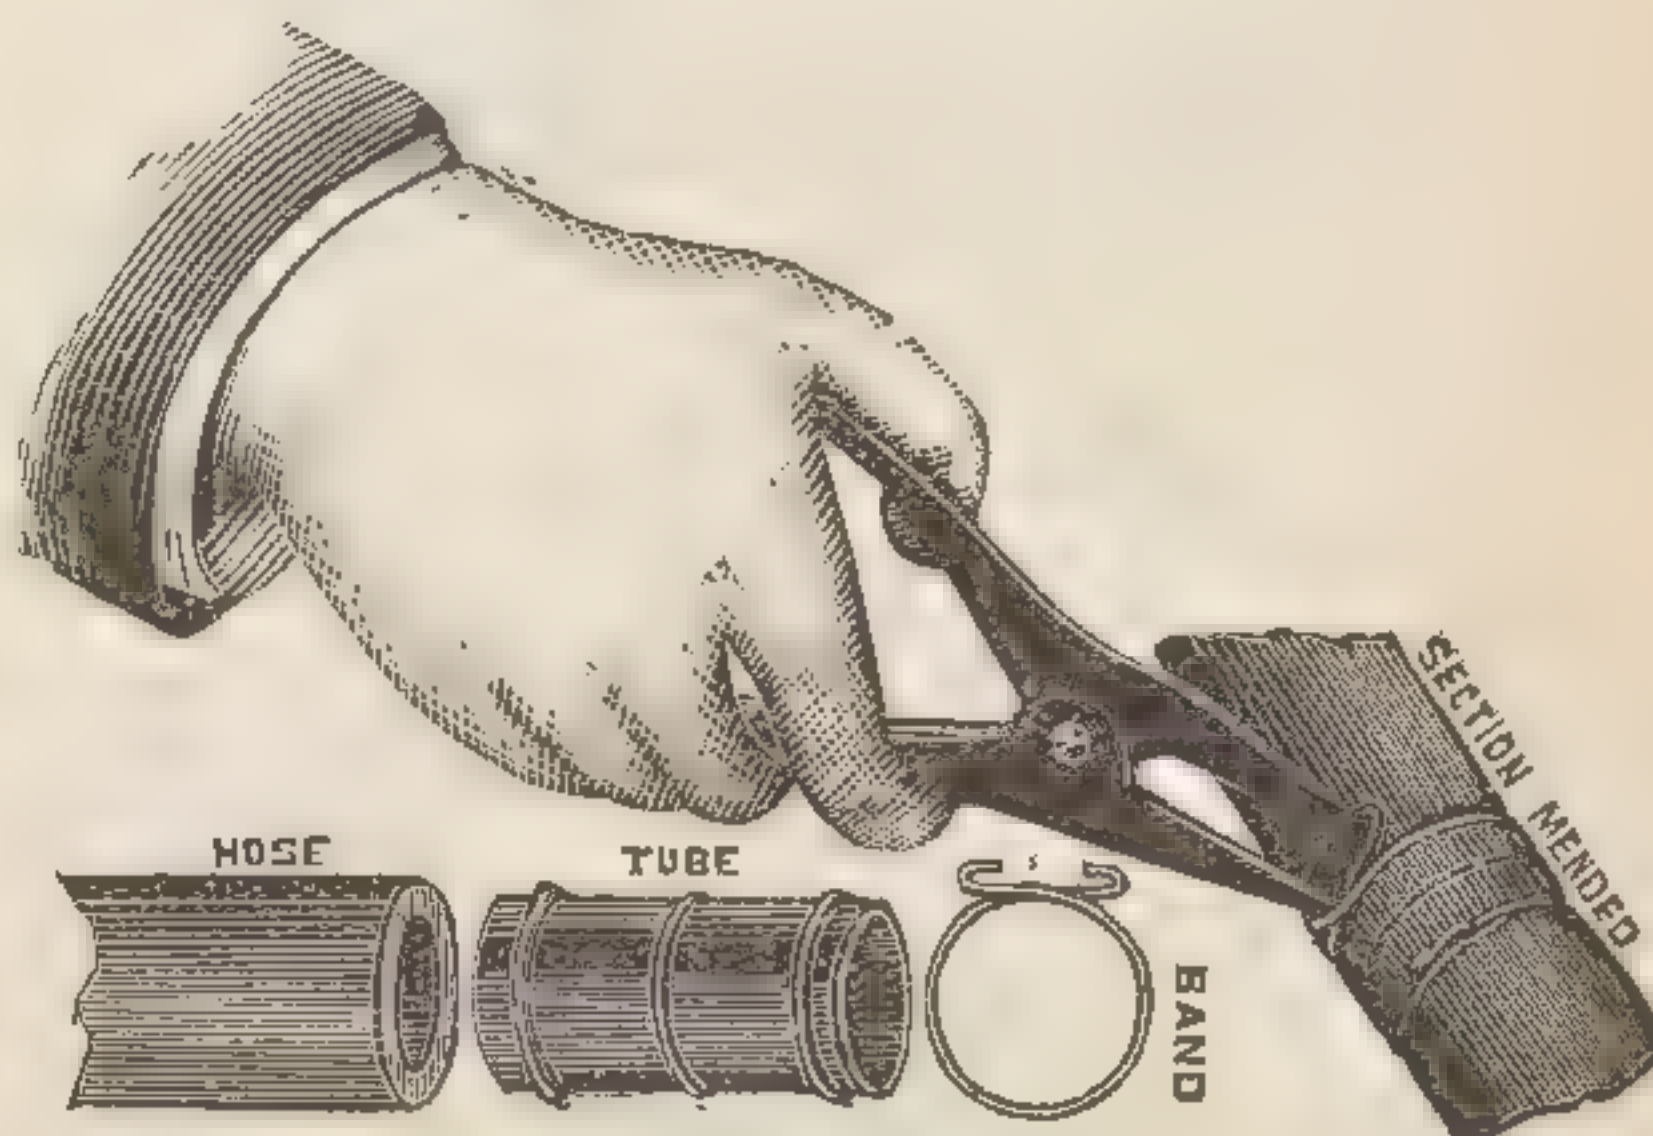

MS 100.

ROYLE'S PATENT TAP UNION (for Plain Taps).

A unique device for connecting Flexible Hose to Ordinary Domestic Water Taps, without requiring any screw or other preparation on the tap. Its advantage over the ordinary Union is obvious. To make the connection to the tap it is simply pushed on; the water pressure makes the joint, and its principle of action is such that the greater the pressure the tighter the joint becomes, and the more firmly it holds on to the tap. It cannot leak.

To suit Tap $\frac{1}{8}$ inch, 1,6 $\frac{3}{4}$ inch, 1,9 1 inch, 2,9
Extra Rubbers— $\frac{1}{8}$ and $\frac{3}{4}$ in., 4d. each; 1 in., 6d. each.

Garden Hose Menders

MS 101.—THE "HUDSON."

This device is put up in boxes, and is especially adapted for family use. It is made in three sizes, for $\frac{1}{2}$ -inch, $\frac{3}{4}$ -inch and 1-inch hose. Each box contains 1 pair Pliers, 6 Tubes and 20 Bands. The Pliers are made of refined iron, nicely japanned. The tubes are of sheet brass, and the bands of malleable brass wire. The device is SO SIMPLE A CHILD CAN USE IT. Hose can be mended or couplings fastened on more securely than with any other device. Screw menders will tear the lining from the hose; ours will not. Every person who uses hose should have one of these boxes. We furnish extra parts when wanted.

	$\frac{1}{2}$ inch	$\frac{3}{4}$ inch	1-inch

Lawn Sprinklers

THE “DAISY” SPRINKLER. The 3-inch Garden Spray is a perfect Gem, sending forth an even shower over a distance of 25 feet. Made Brass -
3 inch Spray 5/- each

MS 111.—IMPROVED “BUTTERFLY.”

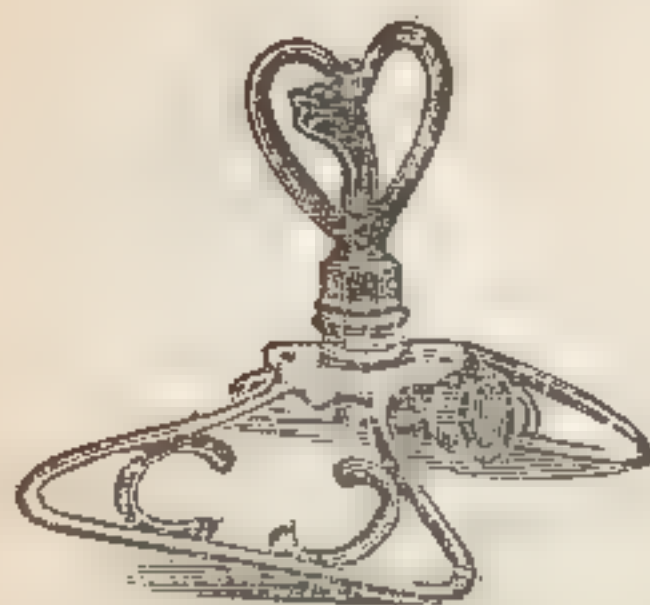

MS 111

It gives all the execution that a large and expensive lawn sprinkler does. It is so arranged that the spoon revolves, no matter at what angle the hose or sprinkler may be held. When used in connection with the “Neptune” Hose Holder, or attached to the end of hose and set in any position, the spoon revolves rapidly and freely, never gets out of order, and throws a spray as far as a great many sprinklers which cost five times as much.

Price, 1/6.

MS 112.—“DANDY.”

MS 112

This sprinkler consists of an Improved “Butterfly” Sprinkler attached to a sled in such a way that it can be unscrewed from the base, and used on the end of hose if necessary. It possesses varied advantage in that it distributes water freely and is not affected by sand or dirt in the water.

Price, as illustrated		5/6 each
Elevated with 1 ft. pipe and sled		6/- each
Fitted to 3 ft. standard as shown in 8-arm sprinkler		10/- each

MS 113.—“VORTEX.”

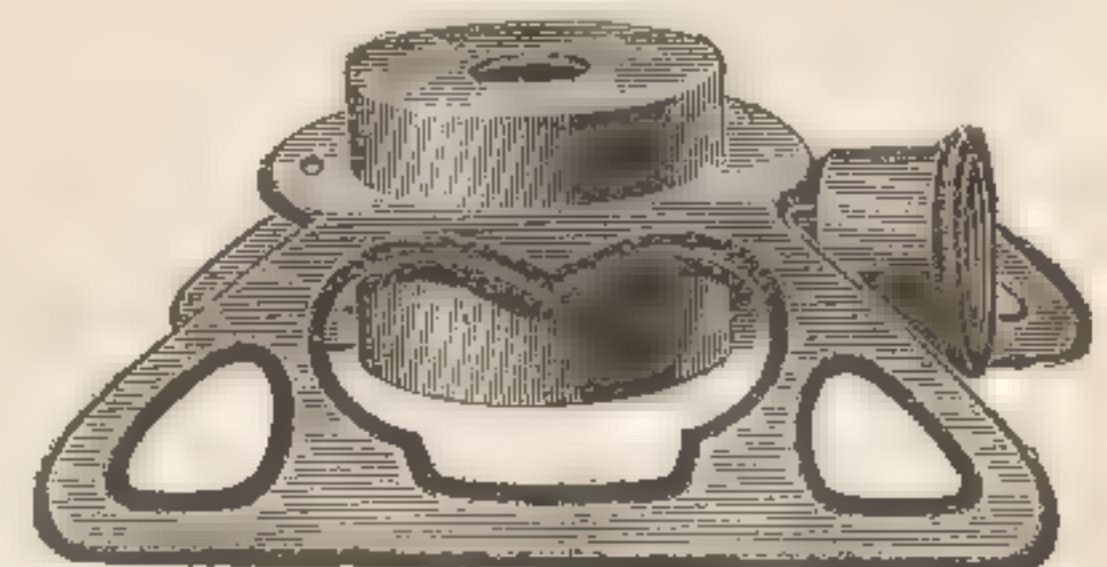

MS 113

The water is broken up into a coarse spray by means of an arrangement of the water way which causes the water to rush out in the form of a whirlpool or vortex.

Screwed for $\frac{1}{2}$ in. iron pipe		1/3 each
Fitted to sled, same as “Dandy”		3/9 each
Fitted to sled and elevated with 1ft. pipe	..	4/- each
Fitted to 3. ft. Standard as MS 116		8/6 each

MS 114.—“SIMPLEX.”

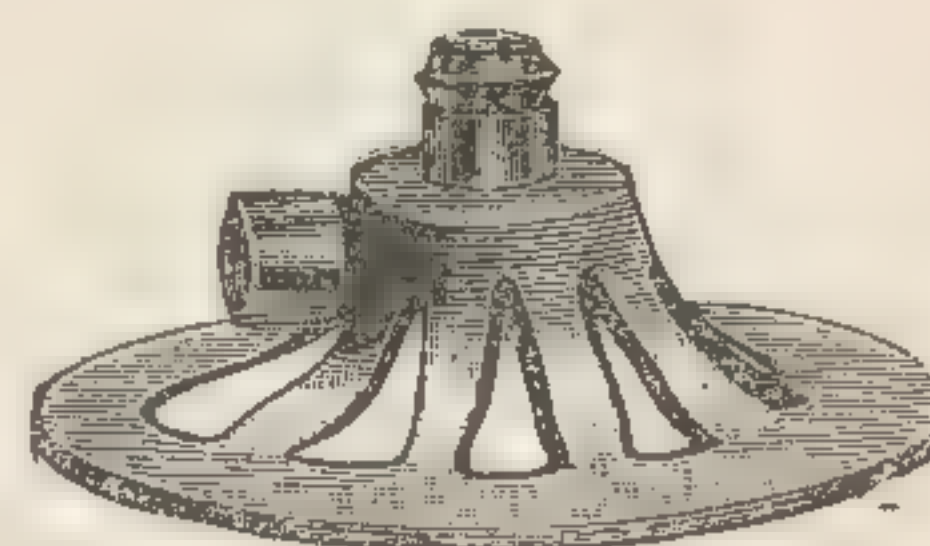

MS 114

It throws a more uniform stream than any other sprinkler we know of in its class.

It is attractively finished in vermilion enamel. Will cover a space from 30 to 40 feet in diameter.

Price, 2/6 each.

MS 115.—“REVERSIBLE.”

MS 115

This sprinkler is suitable for use with either high or low water pressure; the cap is reversible, and a high or low spray covering a wide area of ground may be secured by simply reversing the cap.

Price, 3 6 each.

UNIVERSAL PROVIDERS.

Lawn Sprinklers

MS 116.—"THE DELUGE"—4-Arm.

MS 116

Four Arms, height 24 inch, with Hose or Coupling,
8 6 each.

MS 117.—REVOLVING EIGHT-ARM LAWN SPRINKLERS.

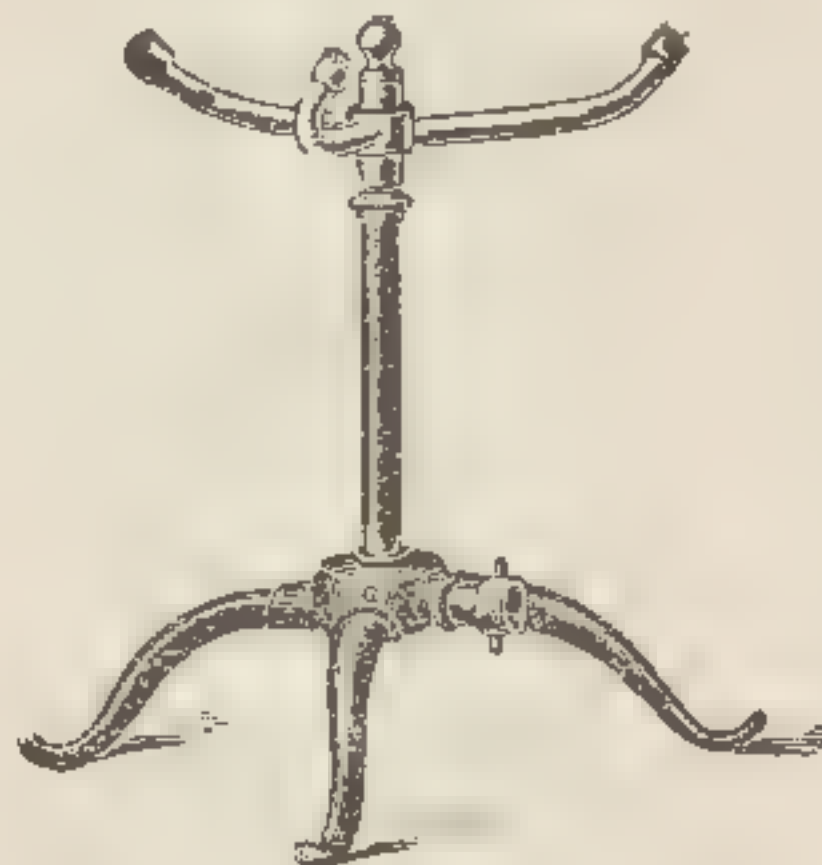

MS 117

These Lawn Sprinklers are both very useful and ornamental, and positively indispensable in dry weather. They are well finished and will work and wear well. Fitted with Union for Hose. A large area of lawn can be readily watered with them, and they are easily moved from place to place. The arms and head are nickel-plated to prevent rust. It makes a beautiful fountain.

Height, 3 feet.
Price, with coupling,
17/6 each.

MS 118.—"DELUGE"—3-Arm.

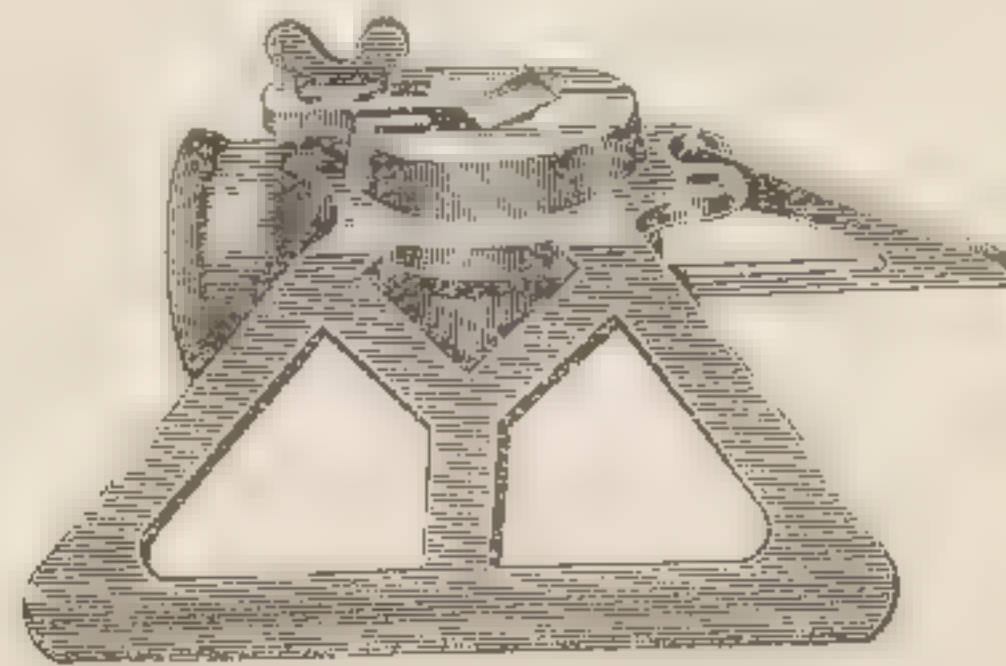

MS 118.

The "Deluge" Lawn Sprinkler, for price and utility, easily stands first. It is a great water economiser, and will cover a circle of from 20 to 60 ft. according to the pressure supplied.

Three Arms, height
12½ in., with Hose
Coupling,
6/- each.

MS 119.—THE COMBINATION SPRINKLER.

MS 119.

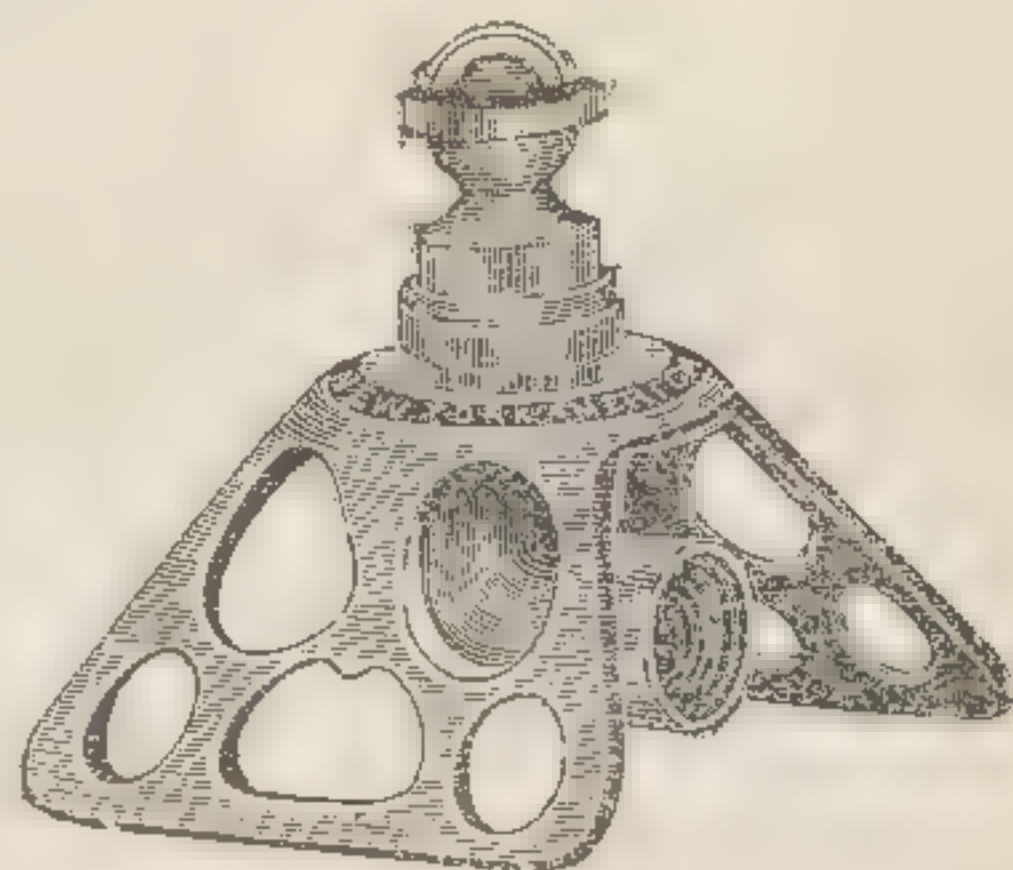

The Combination Sprinkler is of the Evanston type, but somewhat modified. It gives not only a full circle, the same as the Evanston, but by means of a cut-off, the spray can be regulated so as to cover a fraction of a circle only.

The operation of the Sprinkler is plainly shown in the cut. When the brass slide is pulled back, the usual full circle spray results; when it is pushed forward, a half circle spray is obtained.

This is particularly desirable, when it is desired to place the Sprinkler near the sidewalk, so the Sprinkler may operate and not wet the sidewalk.

Made in iron with brass slide and thumb nut nickel-plated throughout. It stands a trifle higher than the Evanston Sprinkler.

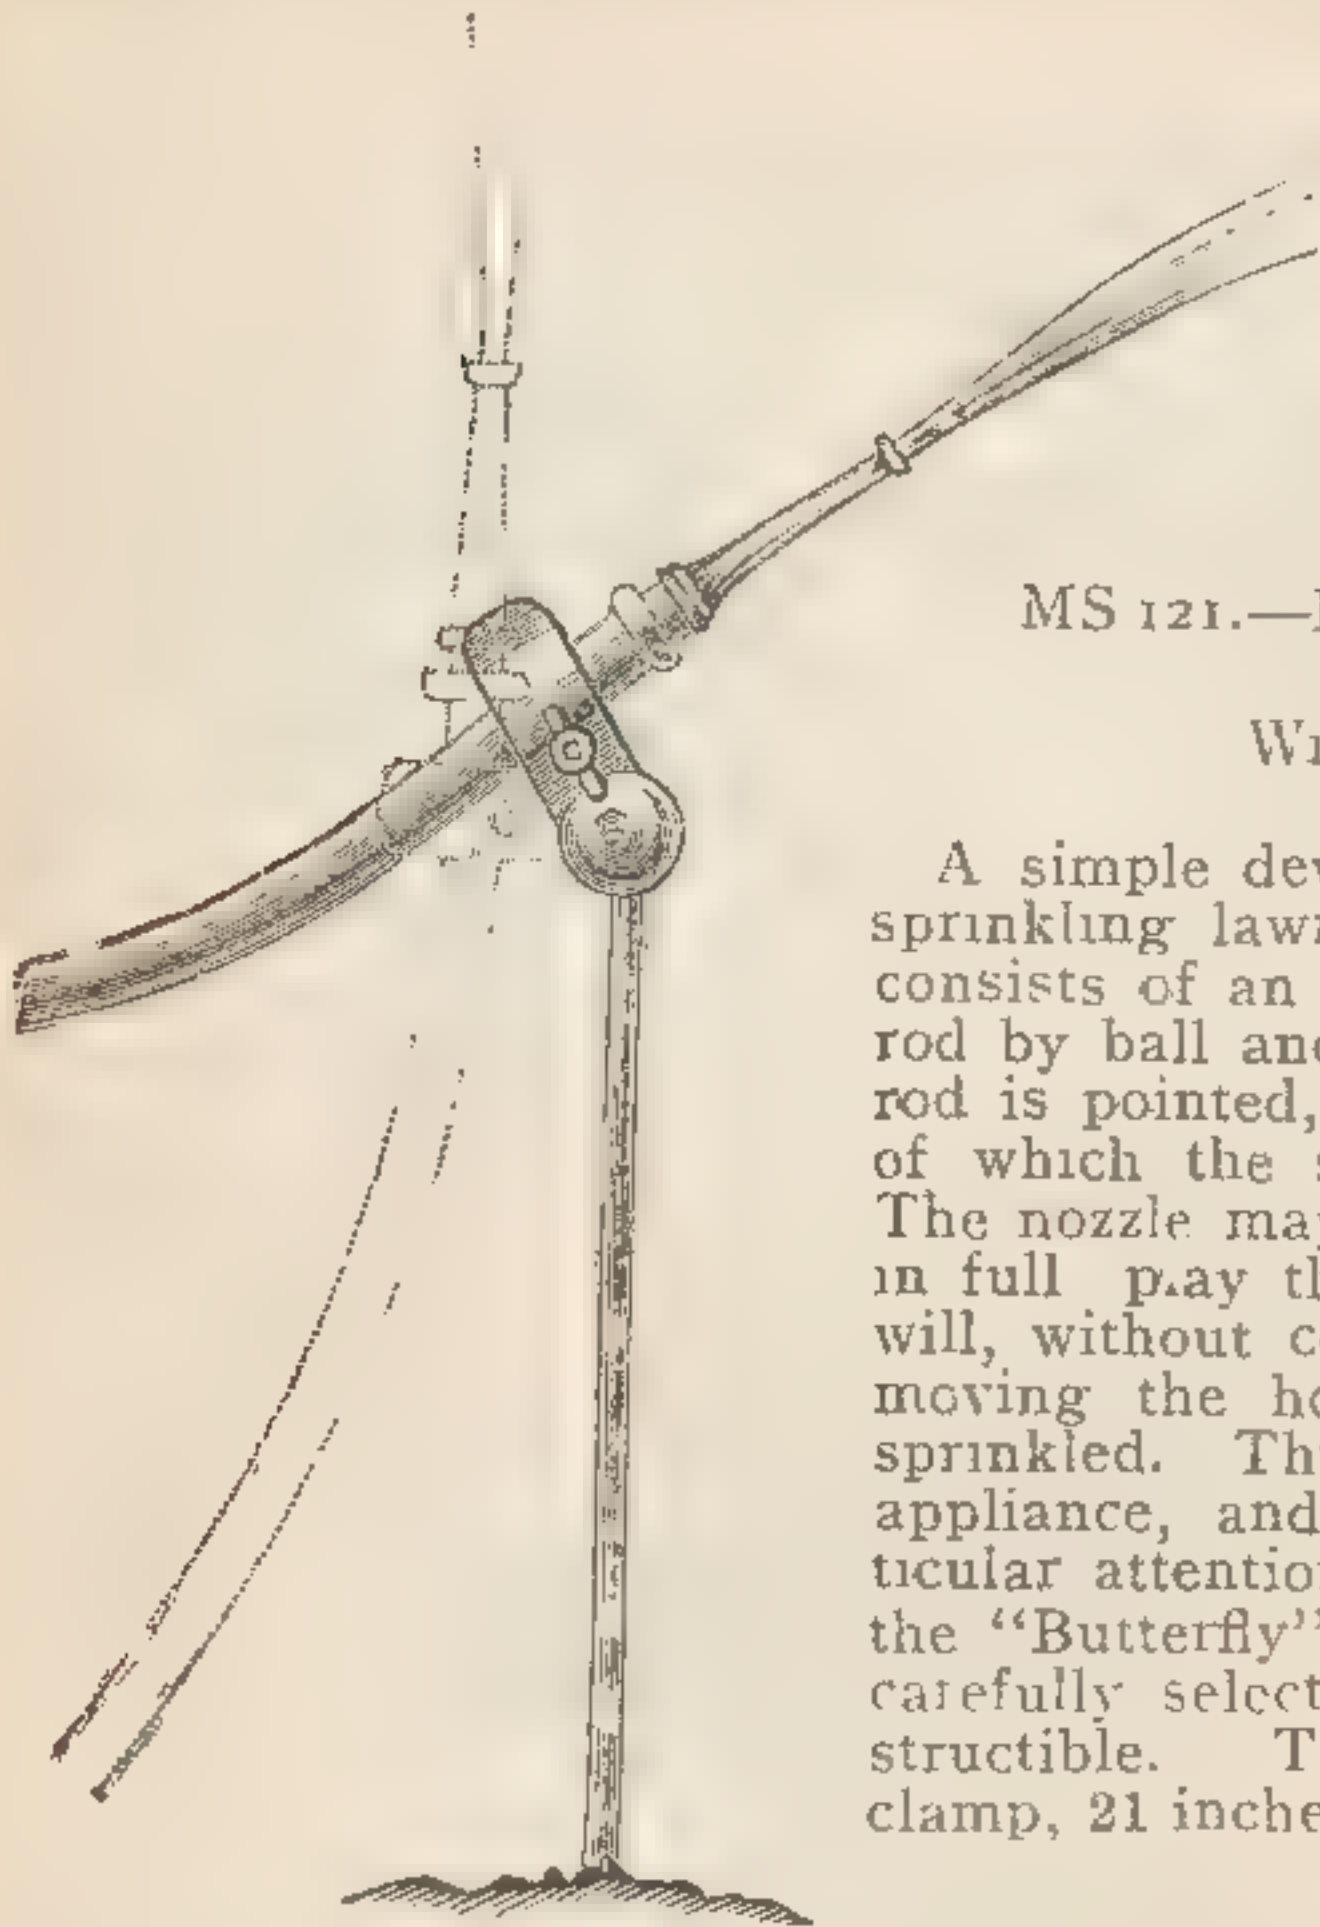

Price, 5 6 each.

MS 120.—THE "BALL NOZZLE" SPRINKLER.
6/- each.

EVERYTHING SOLID VALUE

Hose Holders

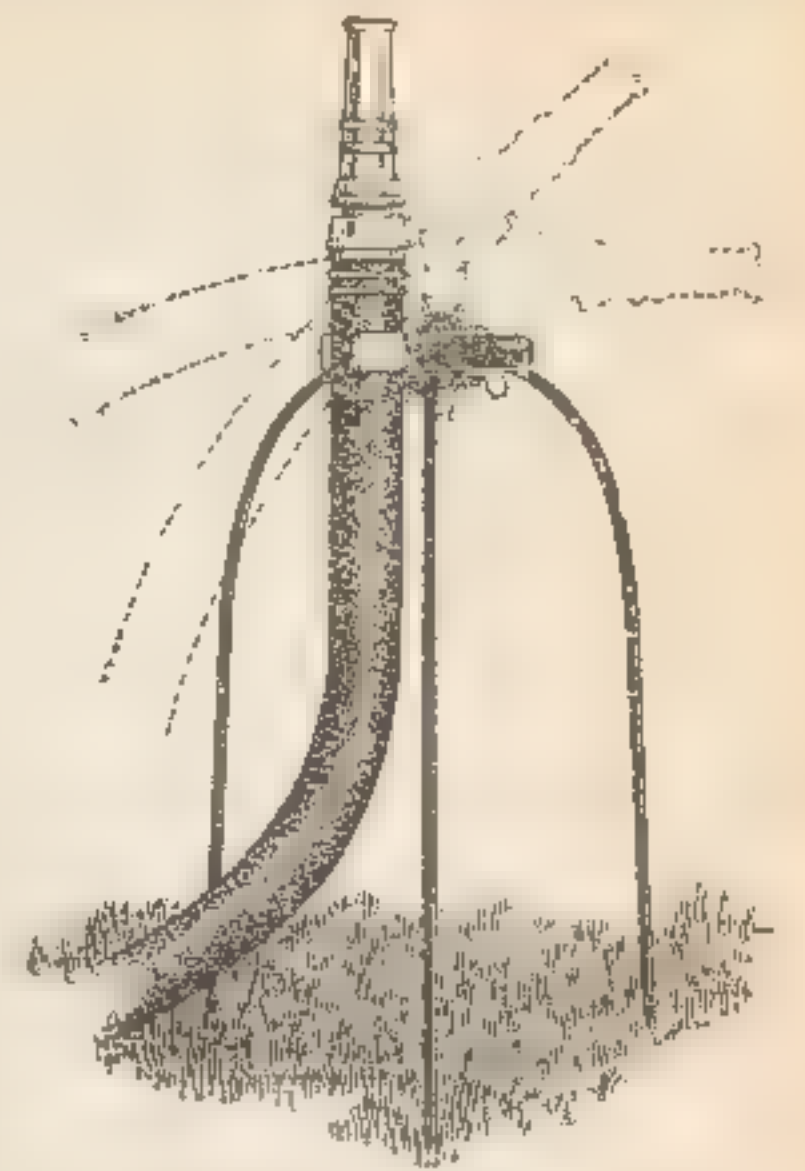

MS 121.—NEPTUNE NOZZLE HOLDER.

With Ball and Socket Joint.

A simple device for holding the hose nozzle when sprinkling lawns, trees, shrubbery, etc. The holder consists of an adjustable clamp connected to an iron rod by ball and socket joint. The lower end of the rod is pointed, and provided with a step by means of which the standard is easily set in the ground. The nozzle may be placed in any position, and while in full play the direction of the stream changed at will, without coming in contact with the water, by moving the hose at a point outside the area being sprinkled. This can be accomplished with no other appliance, and is a feature to which we call particular attention. Specially adapted for using with the "Butterfly" Sprinklers. The holder is made of carefully selected material, and is practically indestructible. Total length, 32 inches; from step to clamp, 21 inches; diameter of rod, 9 16th inch.

3/6 each.

MS 122 — "ATTWOOD"
HOSE HOLDER.

A very ingenious idea: has three legs, with swivel joint so that the stream may be changed to any direction.

Height overall, 15 inches

2/- each.

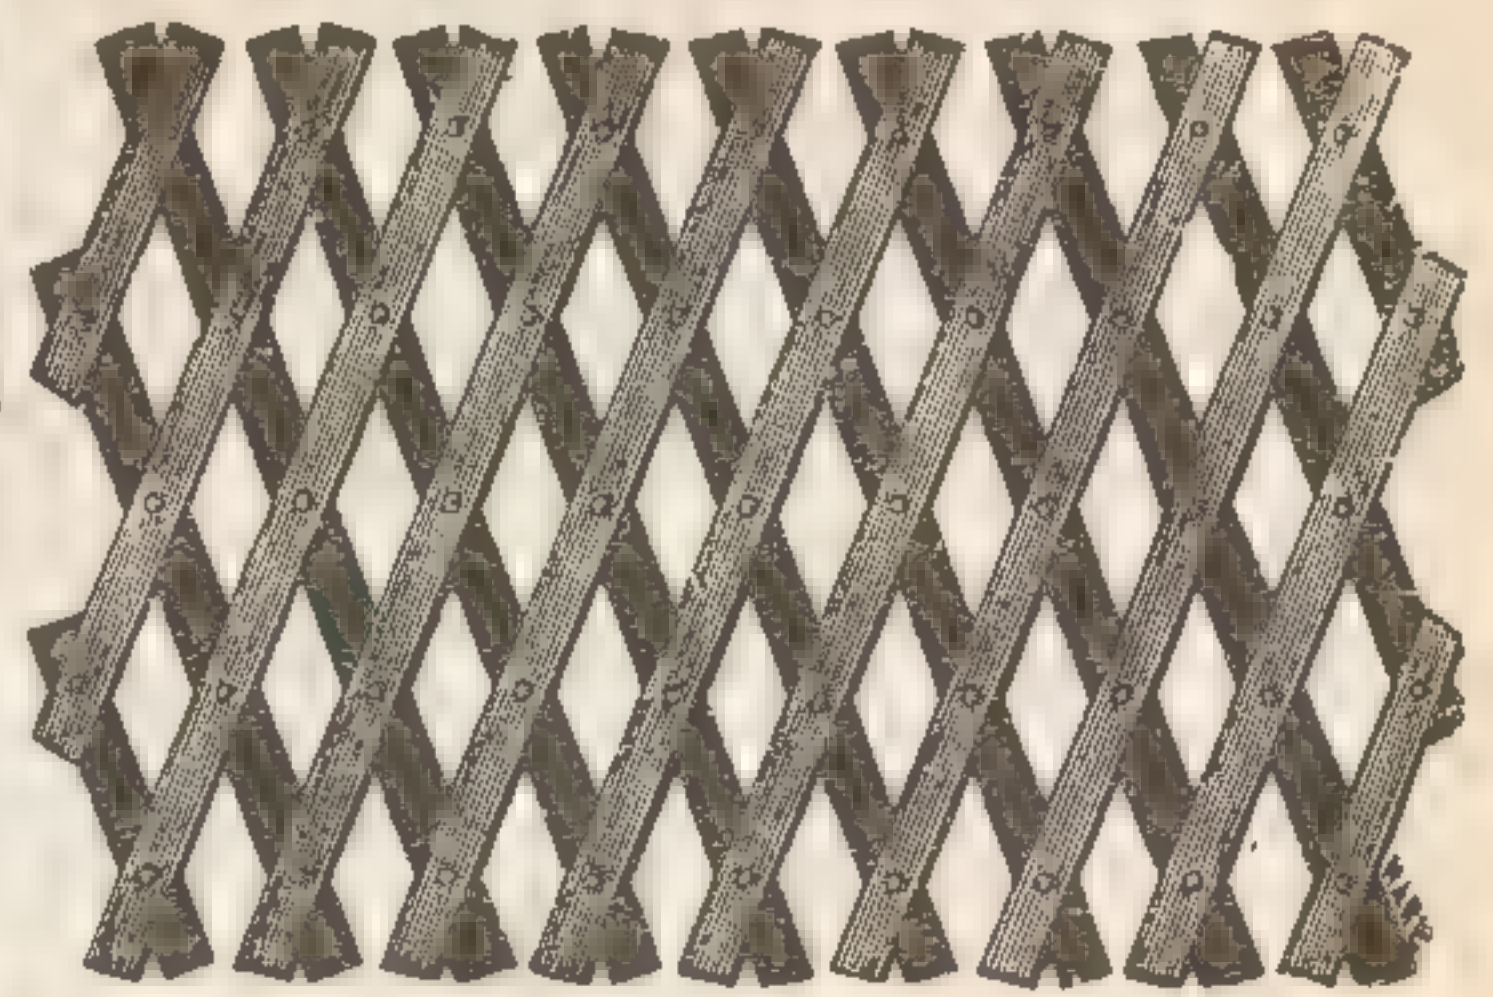

Best Imported Folding Wood Lattice, Smooth Finish.

Suitable for Garden Trellis, and a variety of Horticultural Purposes.

MS 123.—This illustration represents a New Folding Wood Lattice, most admirably adapted for a variety of ornamental and horticultural purposes for gardens, trellis, protection against frost, or for fowl-runs, &c. It is specially suitable for training peas, beans, &c.; will last for several seasons, is very portable when closed, and is easily stacked away for the winter. It is also very extensively used in conservatories, and it makes a capital croquet lawn or lawn tennis border, as it can be put to any height, from one foot to eight feet high, and patterns will be continuous.

Closed.

MS 123.

Open.

For sidewalks in either vegetable or flower gardens, for fruit trees, tomatoes, sweet peas, and other creepers it makes a first-class fence, and when stretched out, a long length makes capital garden arches.

3-inch mesh (placed). Size of laths, 1/4 inch by 1 inch.

Timber, Baltic, White Pine.

UNIVERSAL PROVIDERS.

Syringes

The New Triple Action Syringe

FOR GARDEN OR CONSERVATORY.

THE "TRIPLEX," WHITE'S PATENT.

MS 124.

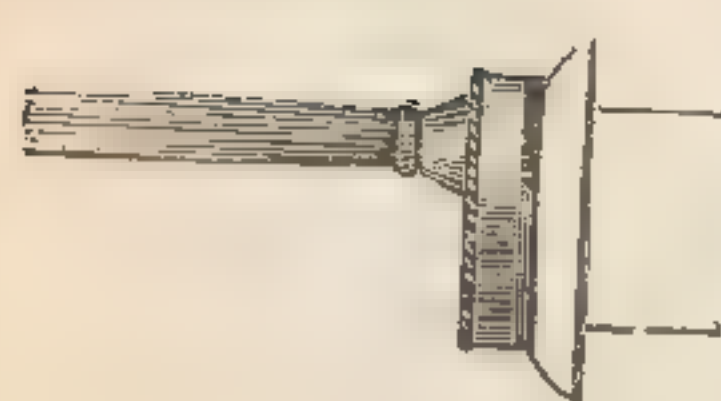

Fig. 1

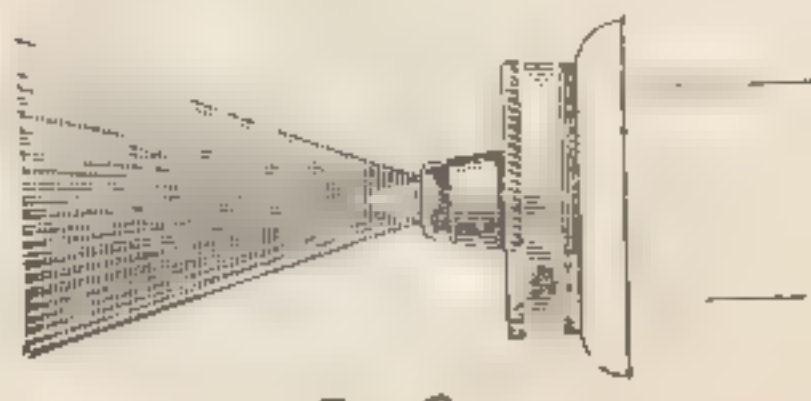

FIG 2

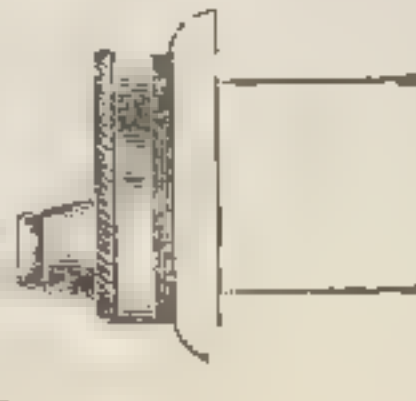

FIG 3

14 inch x 1 inch, 6/6 16 inch x 1 1/4 inch, 8/9 18 inch x 1 1/2 inch, 11/- 20 x 1 3/4 inch, 16/6.

This patent is the most perfect invention yet introduced for combining the requirements of a first-class garden syringe; the single jet stream, the coarse garden spray, and the hot-house vapour spray—without the complications of extra parts and extra weight.

All changes of roses or jets are avoided. The action can be altered instantaneously and automatically.

IT HAS NO FINE HOLES TO BECOME OBSTRUCTED WITH GRIT AND LEAVES.

By simply turning the syringe round in the hand a single stream jet (Fig. 1), a coarse spray (Fig. 2), or a very fine spray (Fig. 3) can be produced at will, without changing the nozzle.

"Will be found a boon by all horticulturists, and will speedily come into universal use."

—English Mechanic.

"Is destined to meet with much favor among gardeners."

—The Farmers' Gazette.

"Will soon occupy a high position in the estimation of gardeners. Is one of those things that gardeners have long sighed for. Cannot be too highly recommended."

—The Scottish Farmer

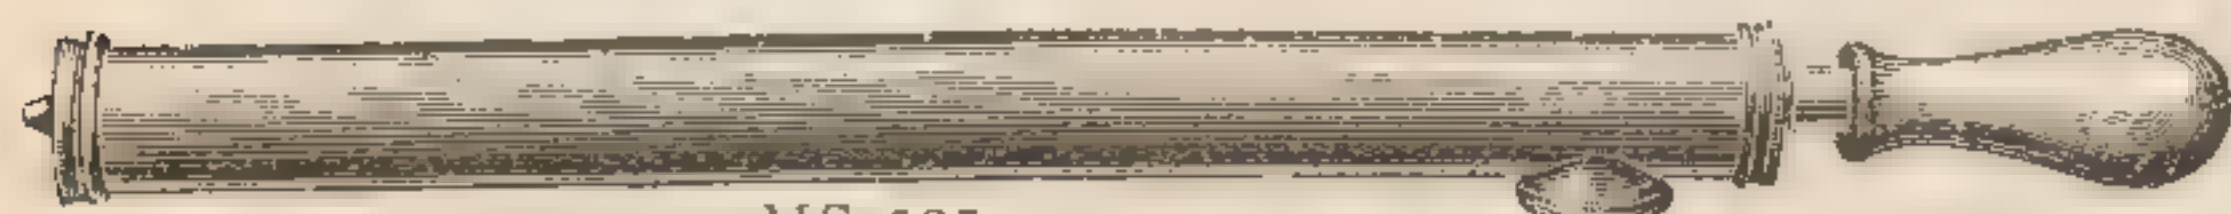

"An excellent invention, which cannot fail to be of the greatest use to gardeners."—The Lady.

"Seems very efficient. The simplicity of the arrangement should recommend it to gardeners generally."

—Gardening Illustrated.

Atomizers

SPECIALLY ADAPTED FOR GARDEN USE.

This is a recent application of an old and well-known principle to the use of spraying or vapourising plants with poisons for the extermination of insects, and is a decided improvement over the various powder guns in use for spraying potatoes, shrubbery, or any low-growing plants. For applying insecticides in poultry houses, on dairy cows or work horses, it is complete. Its household uses are too numerous to enumerate here, but for driving flies, ants and roaches; for dampening carpets before sweeping; for dampening starched articles in laundry; for destroying carpet moth or beetle it is a complete success. In fact, it is proving itself the most popular labour-saving, comfort-giving invention of recent years.

MS 127.

We have this implement both in solid brass and tin, but we decidedly recommend the brass.

Pruning Saw

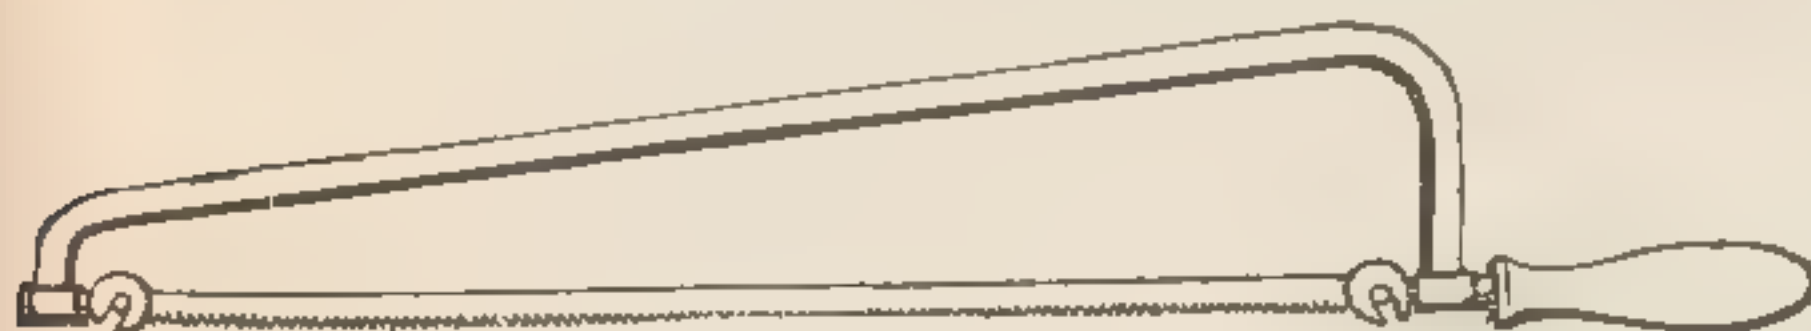

"DUPLEX."

MS 135.—Price 2 3 each.

"PACIFIC."

This Saw somewhat resembles that used by butchers, except that it is much narrower, $\frac{3}{8}$ -inches in width being about the best size for general work. The blade revolves on a swivel, so that it can be used

MS 136.

in any position required, and as the teeth are fine, it makes a very clean cut. Another advantage of this Saw is that, should you break a blade, you can fit in another in less than a minute.

Price, 5/6.

The "Standard" Tree Pruner

AND ITS ADVANTAGES.

MS 137.

During the past few years several inventions for pruning trees have been placed in the market, each being constructed differently, but none of them meeting the actual wants of the gardening public.

In the "Standard" Tree Pruner we claim to have overcome all the objections raised against previous inventions which have either been worked by a cord, spring, or other method.

The "Standard" Tree Pruner, as will be seen on reference to our engraving, is a very simple, yet ingenious invention, consisting of a pole, hook, metal rod, lever and blade. The peculiar construction of the hook will at once commend itself to a practical eye. It is of the best steel, and is made double, so that the knife works in the hood. The benefit thus gained is twofold, viz.: It affords the knife (which also is of best steel) a support on both sides, and likewise permits it to be made very thin, thereby reducing the resistance of the wood and making an easier and smoother cut than is possible by any other device. The knife being connected with and operated upon by a metal rod attached to the lever, it will readily be seen that the power afforded is immense, and infinitely greater than is possible to be obtained by an implement worked by cord or spring, whilst the branch, being encircled by the hook, is altogether under the control of the operator, and cannot escape until the portion to be removed is severed.

IMPROVED "FAIRY."

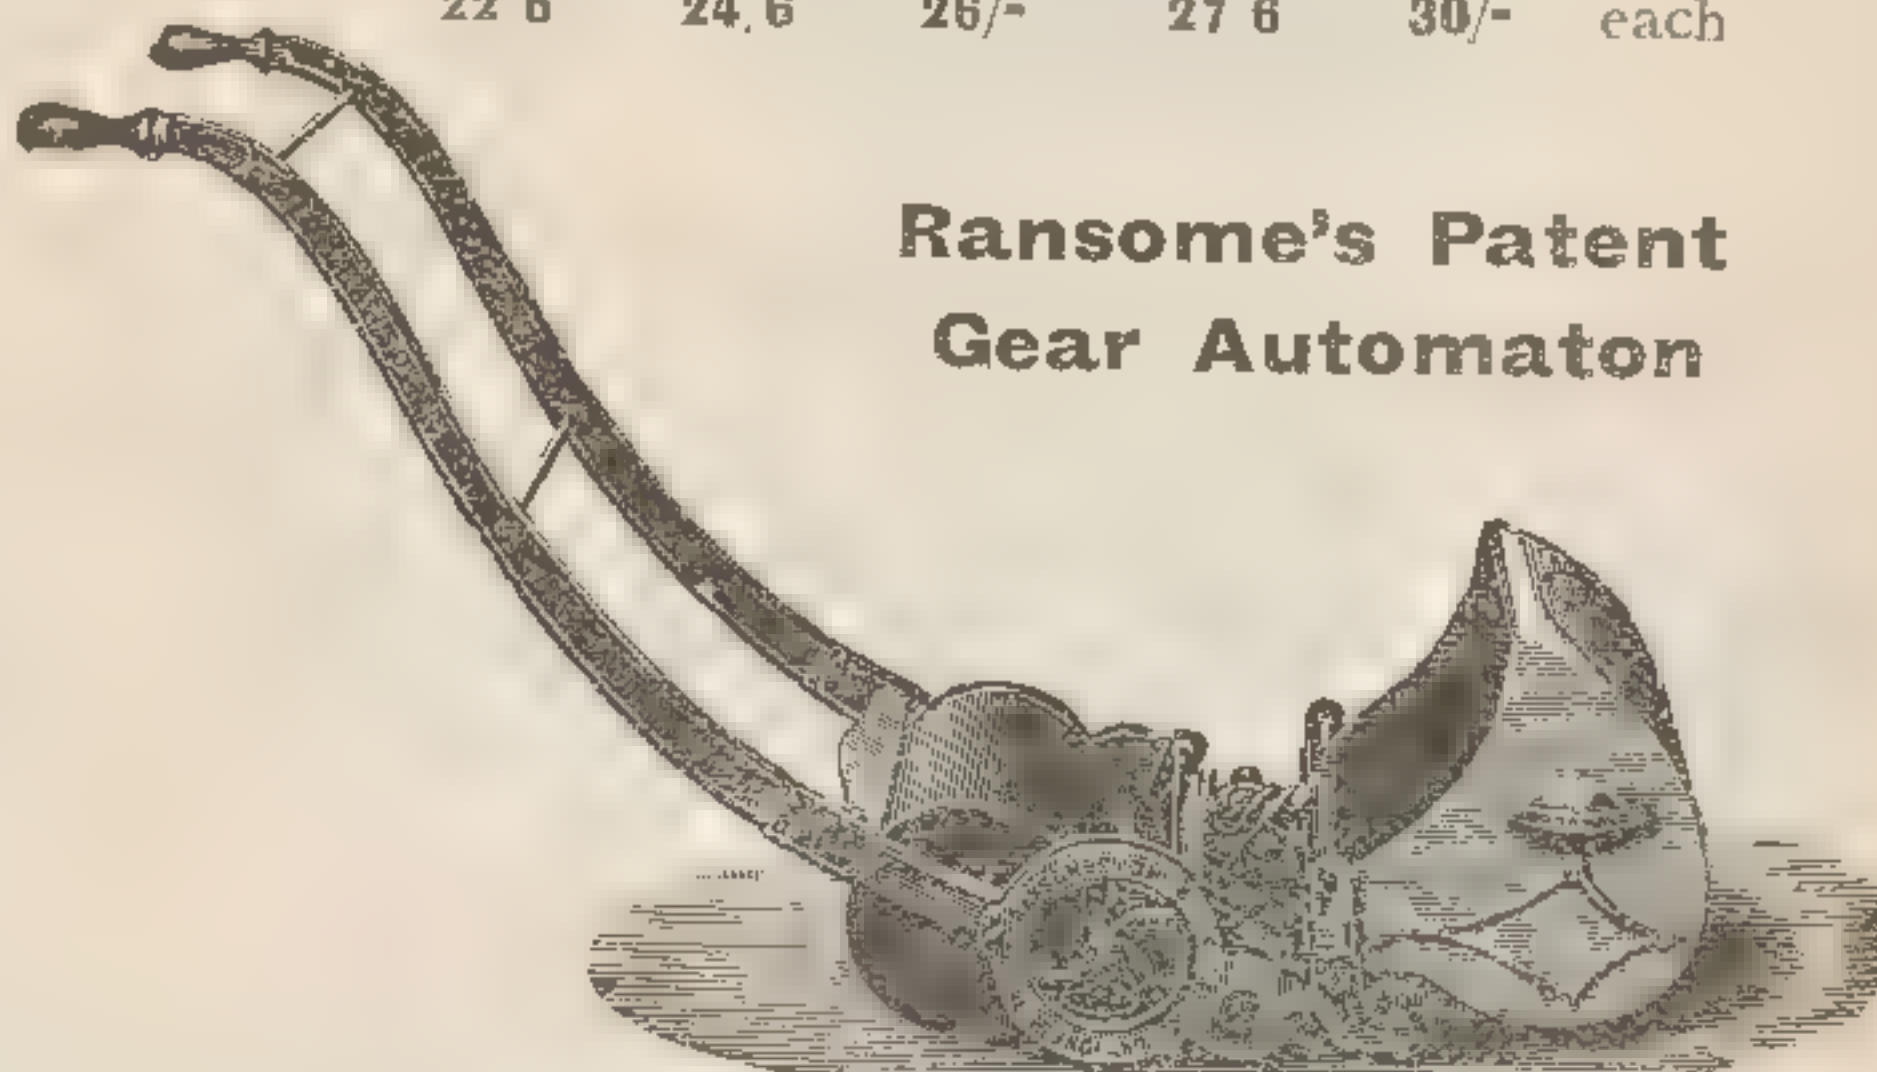

MS 162.

This Mower is made of the very best material throughout, and special pains have been taken to see that all parts are strong where strength is needed.

The tie rod and reel shaft are made from solid steel, and the reel and bed knives from special lawn mower steel. The reel shaft is set well forward, enabling the operator to cut close to a tree or bush. The reel shaft box is fitted with split metal bushings, and is so constructed that grass will not wind around reel. All parts of this Machine are turned and accurately fitted, and the pivoted bed knife makes it very easily adjusted. It is interchangeable throughout, and all gearing is encased to prevent dirt entering and interfering with the perfect working of the Machine.

Ransome's Patent Gear Automaton

MS 163.

Ransomes' Patent Gear Automaton is capable of dealing with grass of all kinds, leaving a fine and even surface; they embody all the most recent improvements, which consist of—

Patent Double Angle Cutting Barrel, to deliver cut grass into centre of the box. MS 164.

Patent Front Roller Adjustment, for regulating the length of the cut.

Patent Ribbed Rollers to prevent slipping. MS 166.

Patent Single Screw Adjustment, which makes setting machine very simple.

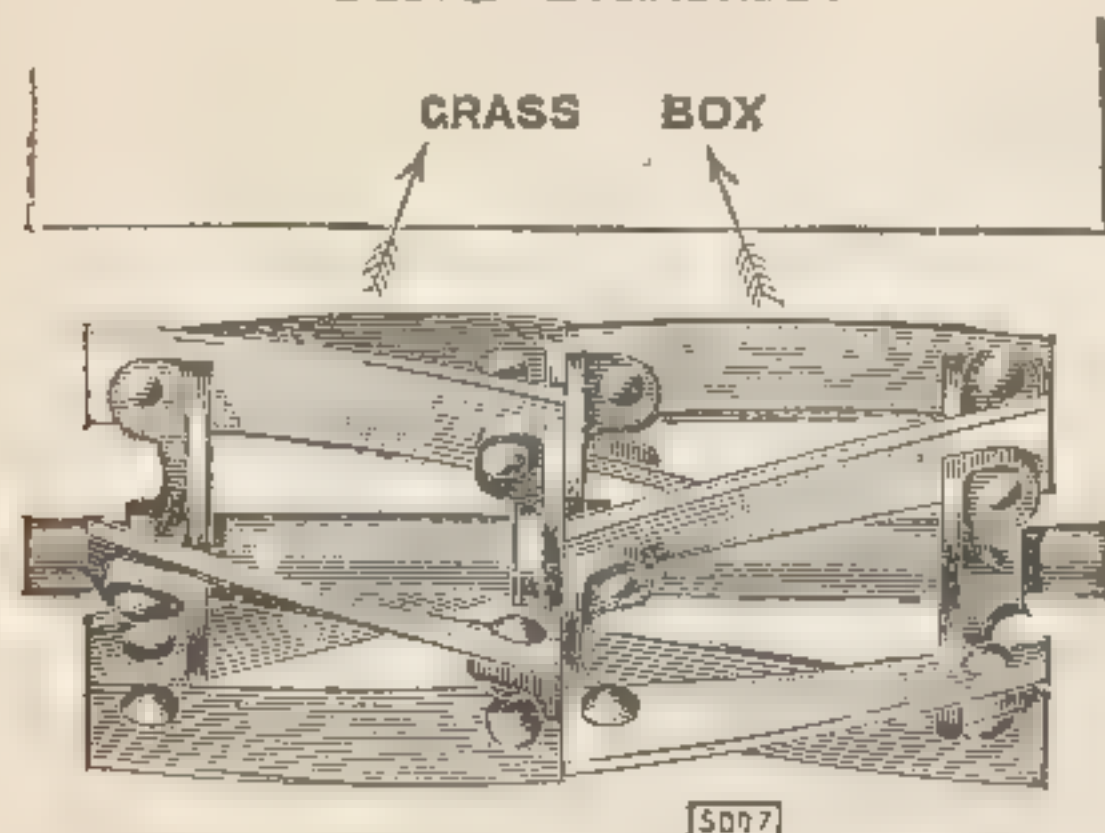

The Knives are made of best steel and iron rolled together, and are rivetted to the barrel by hydraulic pressure. The Gearing is all covered in. All the wearing parts are interchangeable.

EVERYTHING SOLID VALUE

© F. LASSETTER & CO., LIMITED ©

RANSOME'S PATENT DOUBLE ANGLE CUTTING BARREL.

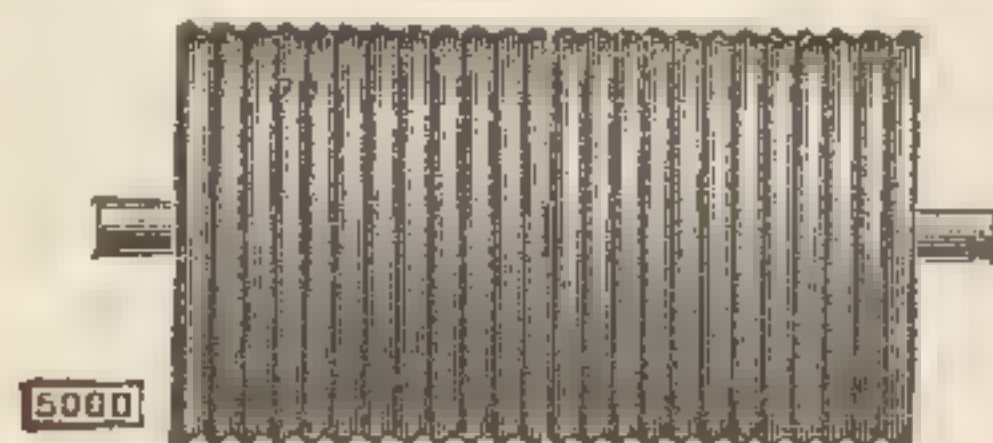

MS 164.

Fitted to the Gear Automaton only, without extra charge.

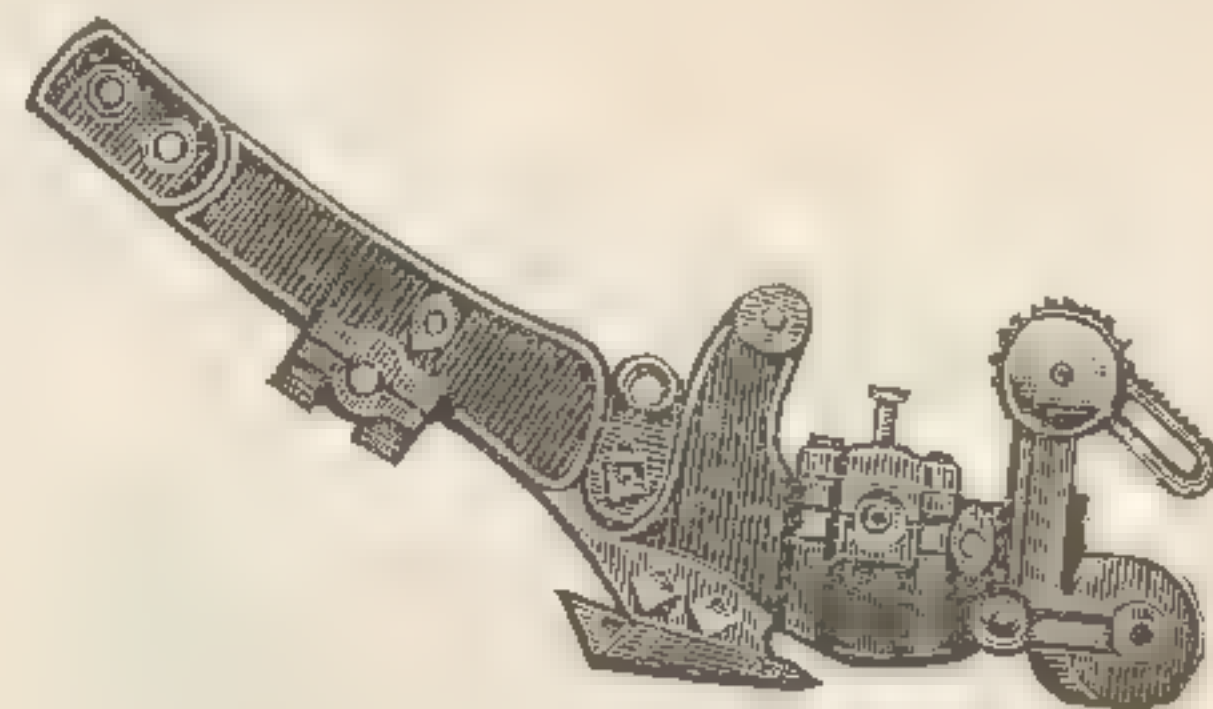

The Knives are made in two sections, and set at different angles to deliver the cut grass into the centre of the box.

The Knives are steel faced with tough wrought-iron backs, and being riveted to the barrel cannot get loose.

MS 166.

RANSOME'S PATENT SINGLE SCREW AND FRONT ROLLER ADJUSTMENTS.

MS 165.

The Single Screw Adjustment has a strong spring under the bearings on each side to support the cylinder. One set screw only is fixed above each of the cylinder bearings, forming the simplest and most effective means of adjustment ever brought out.

The Front Roller Adjustment is very simple, requiring no spanner. The rollers are carried by a crank lever which turns on a centre, and by unscrewing the small hand wheels and moving them along the segments, the adjustment is made on both sides in the tenth part of the time occupied by the old-fashioned and troublesome method of having to use spanners to unloose the nuts.

RANSOME'S PATENT RIBBED ROLLER.

MS 166.

The Patent Ribbed Rollers prevent a machine from slipping downwards on sloping ground, and skidding on dry or wet grass. They also give a better finish to the lawn.

BALL-BEARING LAWN MOWER.

In the Ball-Bearing Lawn Mower is realised the culmination of mechanical skill in lawn mower construction. No effort or expense has been spared to make this mower perfect in every respect.

The material is the best that money can buy. Where two parts are joined together in this mower, they are machined with the greatest care, so that they will fit together with mathematical exactness. As a result, there is no lost motion anywhere about the mower; it combines strength with lightness, and is noiseless in operation. The mower is graceful in appearance and is highly finished. Ball-Bearing Mowers have not been successful in the past, because of the difficulty of devising a means to take up wear in the bearings. We have mastered this difficulty by the

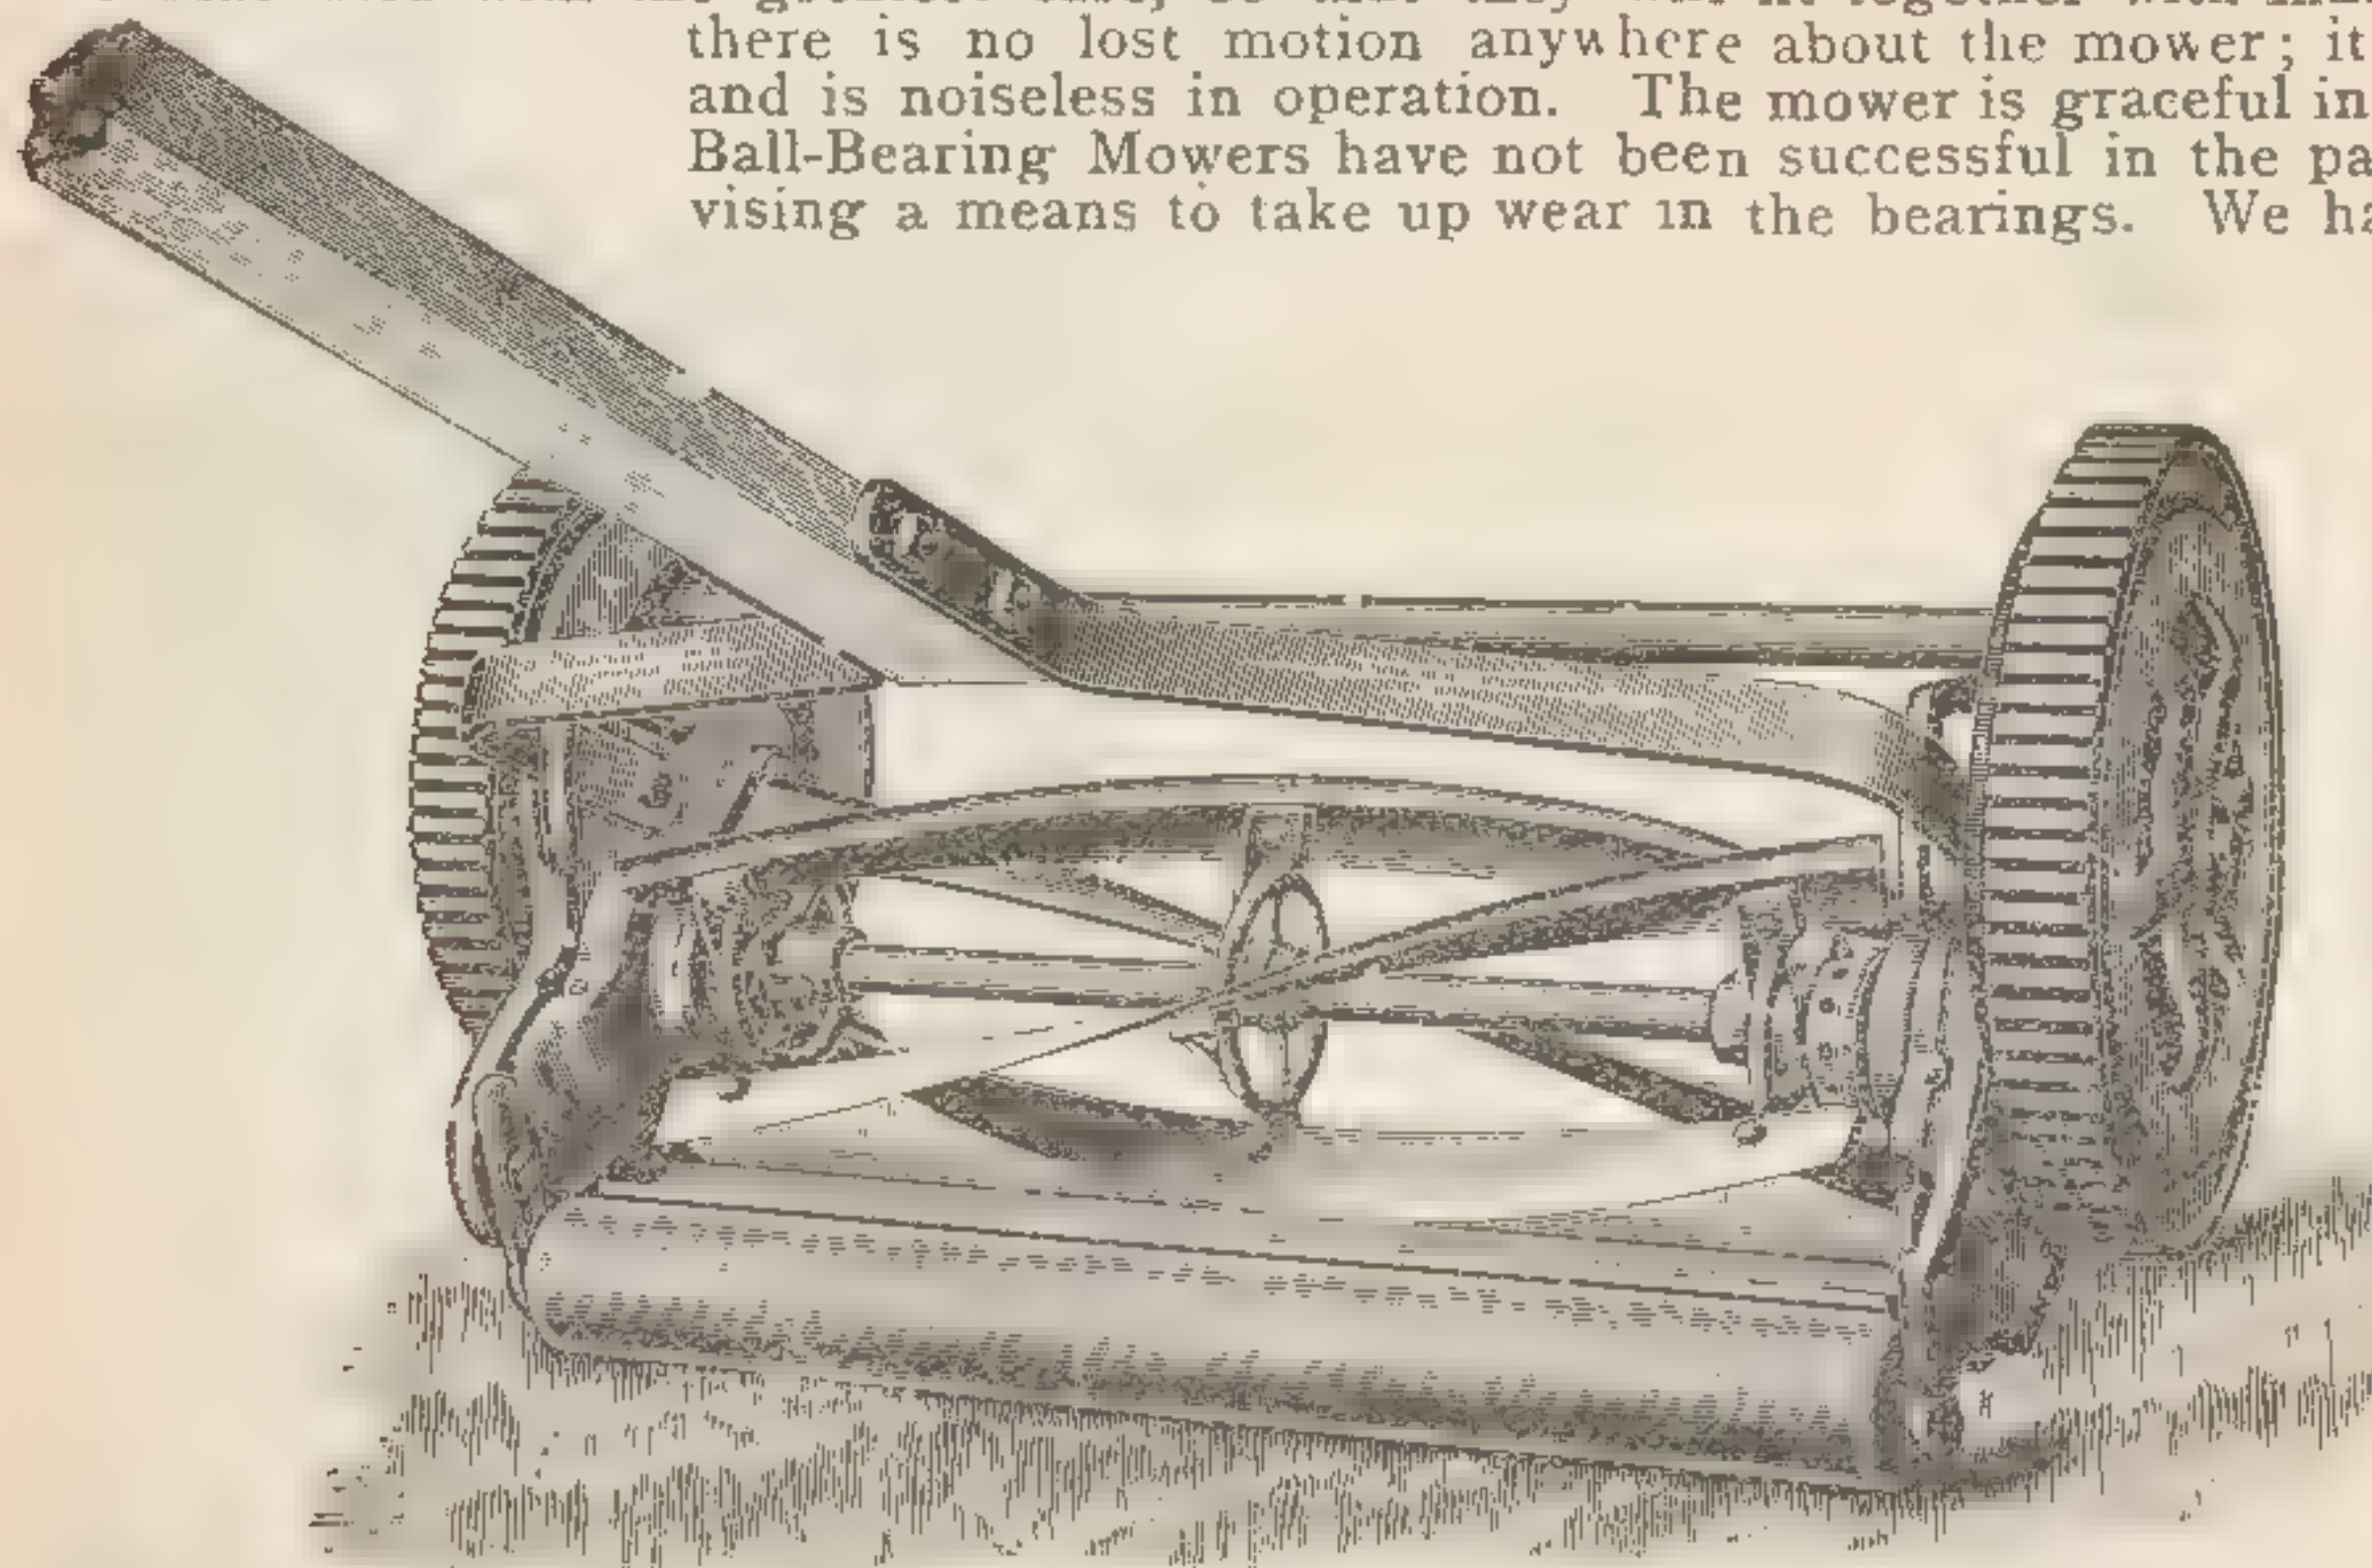

introduction of a most simple device (see direction sheet), which can be operated by any unskilled person.

The mower has a reel adjustment, and the cutter bar is therefore bolted solidly to the mower, which gives the additional advantage of holding all working parts in perfect position.

The revolving cutters, four in number, are spiral, and give a continuous shear cut.

All blades are of best crucible steel, tempered in oil.

This Mower is made in sizes of 12, 14 and 16 inches.

Rollers

MS 172.
BALLAST
ROLLER.

MS 172.

We beg to call special attention to these new Garden Rollers, which can be loaded with **water or sand**. A patent has been completed for making the cylinders of cast metal with rounded edges instead of wrought iron. This enables the manufacturers to reduce the prices considerably, while the efficiency of the Rollers is fully maintained. For keeping Lawns and Tennis Courts in perfect order these Rollers are invaluable. When the ground is soft they may be used empty, and in dry weather, when all others are useless, they can be filled and worked to advantage.

GAS FITTINGS

Incandescent Gas-Lighting Re- quirements

In the small space allotted in the catalogue to this section, we are only able to show but a tithe of the different styles that can be seen in our showrooms. It gives, however, a fair idea of what we stock, but as numerous alterations are always being effected in the designs of Gas Fittings, those in search of the latest and most up-to-date appliances for lighting should pay a visit to our spacious showrooms.

We stock all the requirements for Gas Fittings, and also everything necessary for Gas Lighting in Private Houses (both for the Mansion and the Cottage), Churches, and all kinds of Private and Public Buildings.

MI 120.—GAS BRACKET, Stiff. Steel Bronzed and Plain Tubing—

Surprise Pendant

This kind of pendant is specially recommended for Dining Rooms, Studies, Offices, etc. It may be drawn down, close over the centre of the table, so that the eyes may be in the shade while the table is brilliantly illuminated. Its construction enables it to be balanced in any position and to be moved with finger touch. All pendants fitted with Ball Joints, and prices quoted do not include Incandescent Burners or Shades unless specially mentioned. Full particulars of Incandescent Burners on page 782.

Portable Standards and Pillar Lights for Gas.

We illustrate here a few of our Designs of Portable Standards or Table Lights. If a light is required to be placed on a table for reading purposes, these can be connected by rubber tubing with a Gas Pendant.

We also show patterns of Pillar Lights, which are sometimes used as a Newel Light on a staircase. Estimates can be supplied for architects' designs of Newel Lights in Wrought Iron or Brass.

All prices quoted do not include Globes or Shades unless specially mentioned.

System for Domestic Hot Water Supply.

Instructions for Fixing:—

MI 285.

We show here a system of Hot water service to be used in connection with our Leamington Ranges. The sketch shows the system as applied to a three-storey house; but the same directions can be carried out in a cottage. We keep a special staff of experienced men to do this work; and would furnish approximate estimates if supplied with a rough sketch showing positions of bathroom, sinks, etc., with measurement of distances.

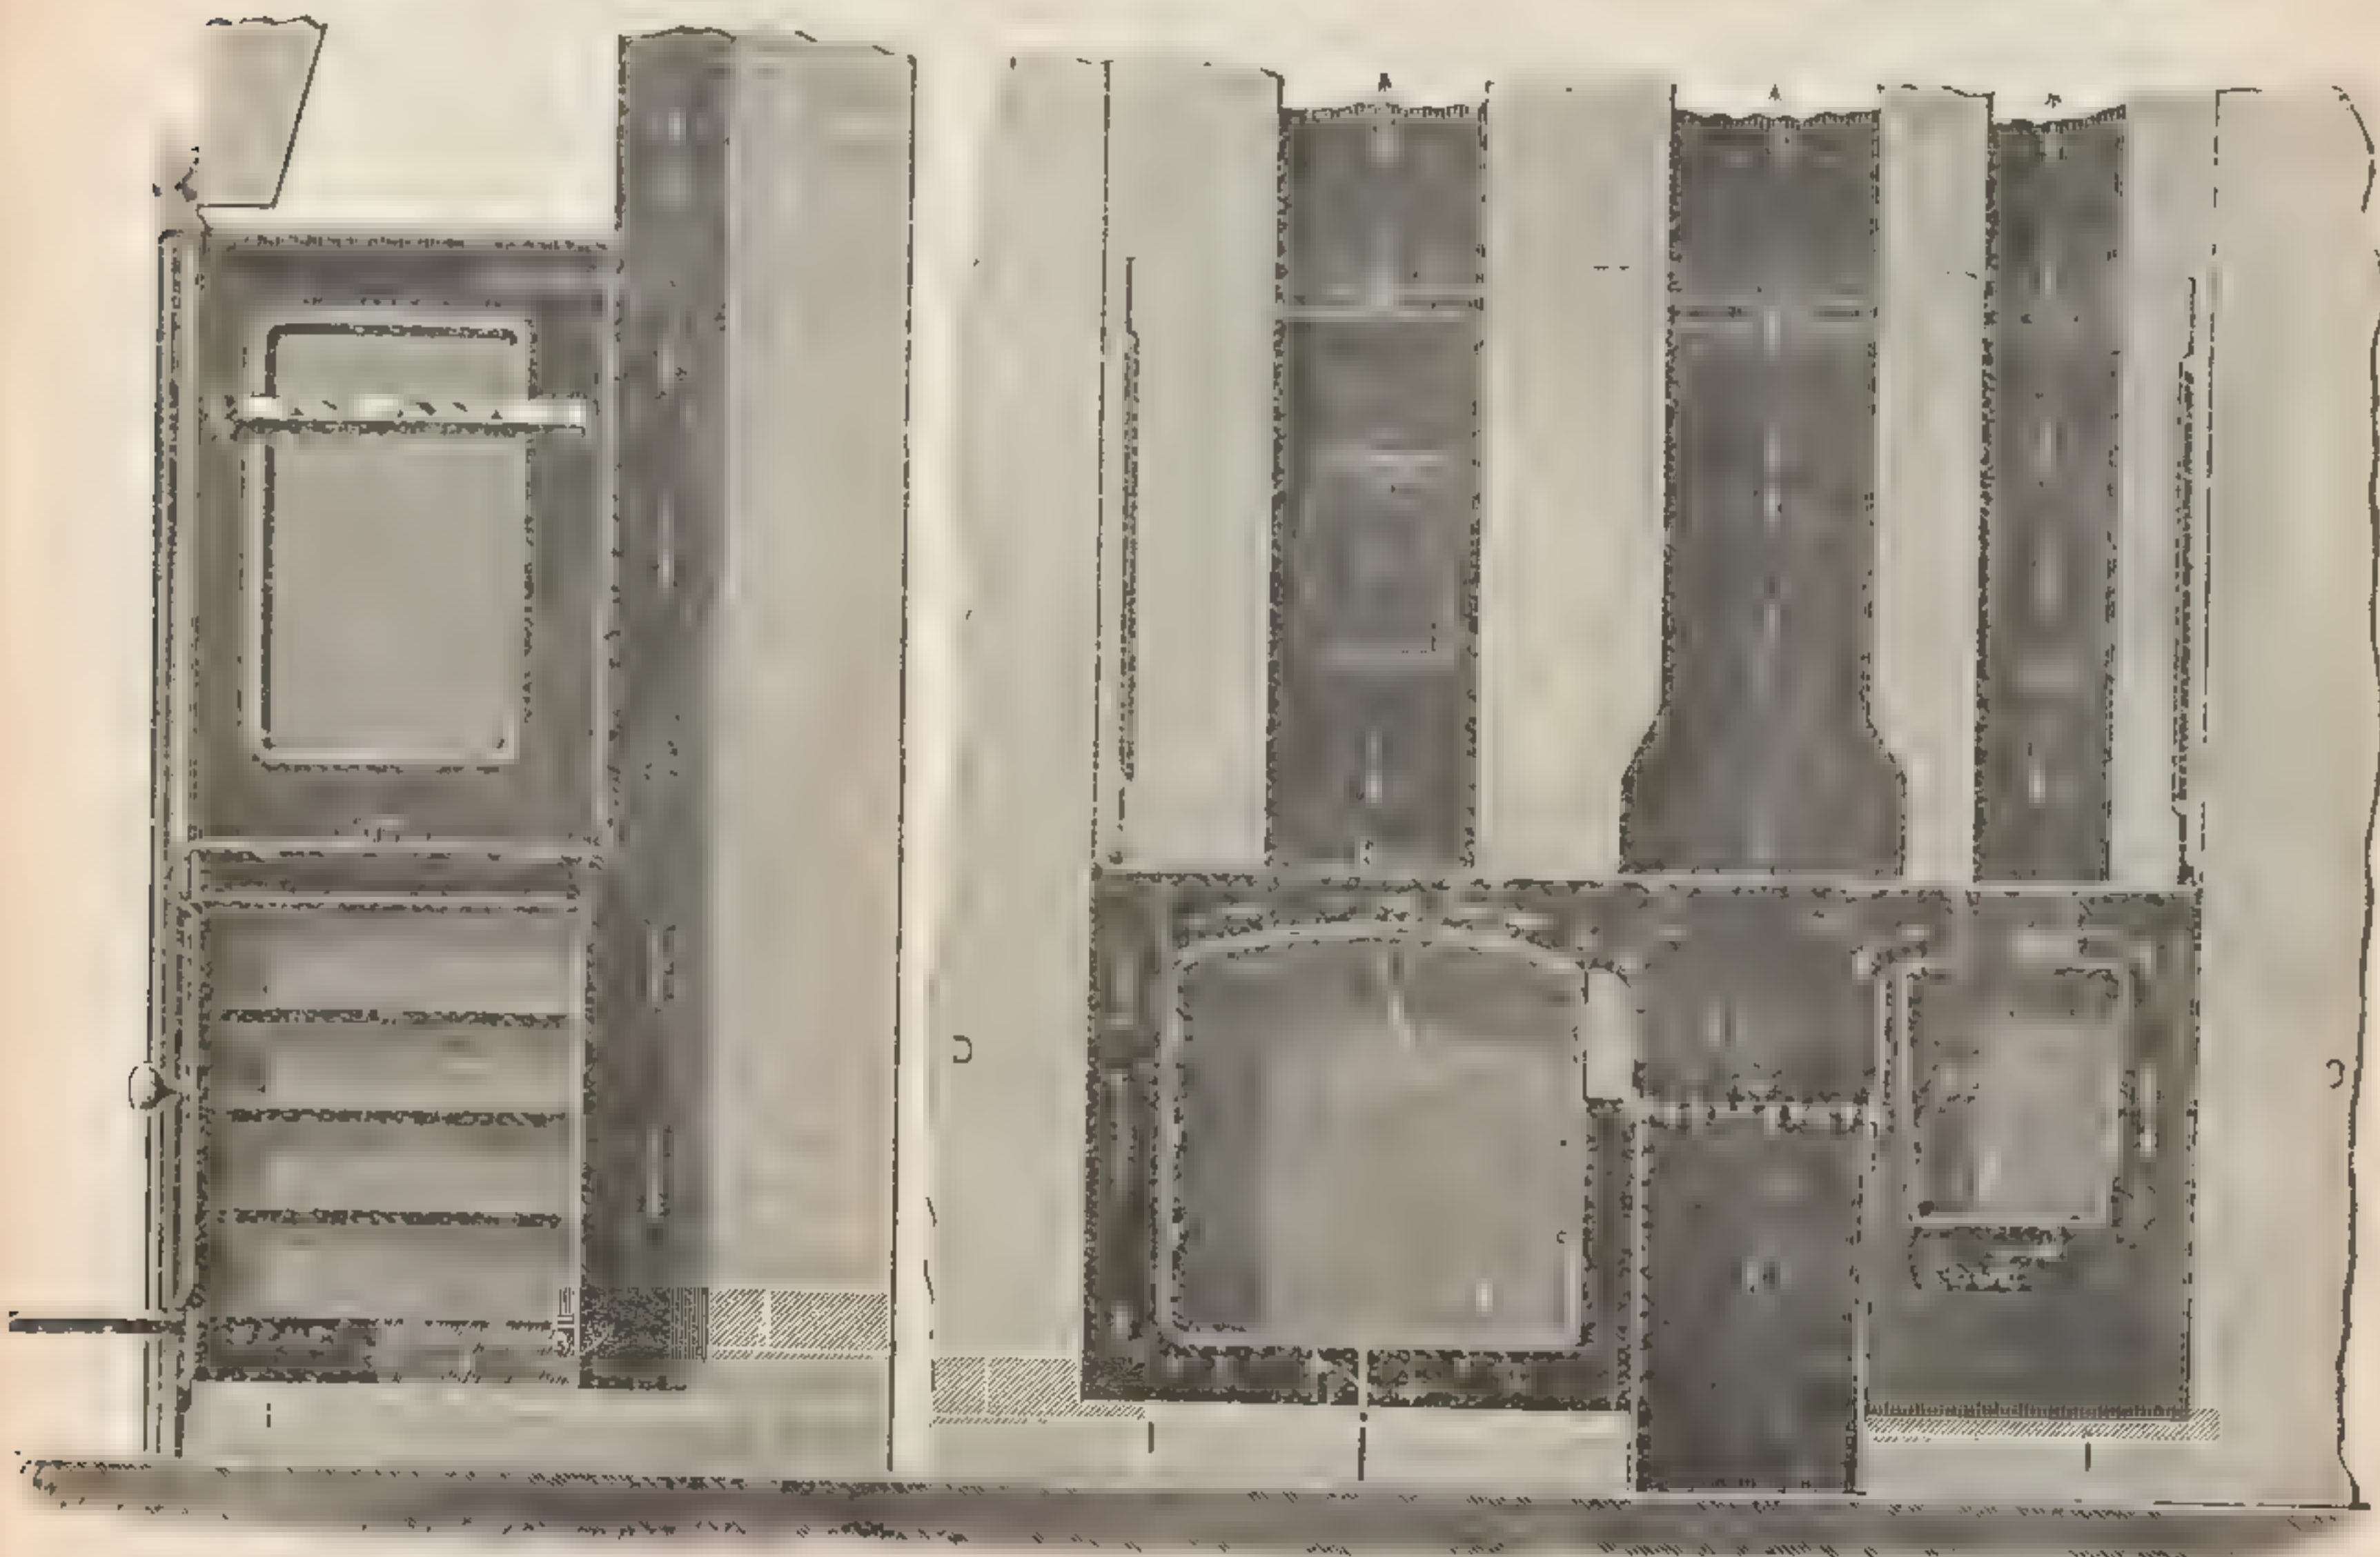

LASSETTERS'

**have an expert
staff of Sanitary
Engineers and
Plumbers.**

UNIVERSAL PROVIDERS.

Directions to assist in Setting Close Fire Leamington Ranges.

MI 286.

In setting Close Fire Ranges, care should be taken to prevent the air getting into the Flues, except through the Fire.

The whole of the bottom part under the Ovens (see Plan) should be built up solid nearly to the level of the soot or cleaning doors, which are placed in the Range Front under the Ovens.

The arrows in the sketches indicate the direction taken by the smoke and heated air on leaving the Fire. The Flue E is carried over the top, down the side, and under the bottom of the Oven, passing round a Check Plate F, and entering the bottom of the vertical or upright brick Flue H—behind the Oven—at the corner nearest the Fire. The Flue at this part should be carefully rounded off, and made sufficiently large to prevent the accumulation of soot.

It is necessary that for the Fire there be also a separate or distinct Flue, the damper of which should be shut when the Ovens are in use. It is also recommended that where this third Flue is adopted, the dampers of the Ovens be closed when not in use.

Special attention is requisite to the construction of the Flues, which, for Ranges 4 feet high, should have an area of not less than 36 inches for each Flue, or 6 inches, or 9 x 4 inches if more convenient. For Ranges above

4 feet, an area of at least 48 inches is required for each Flue, while for extra-sized Ovens a proportionate increase is necessary.

The foregoing principles are also applicable to the setting of Ranges with Oven and Necked or Nozzle Boiler.

If the Range be with raised Ashpan, and side Boiler without neck, the Flue can be brought round under the Ashpan, and along under the bottom of the Boiler, and up its outer side, or at the back.

The sliding Register Top Plate must be fixed, so that no air gets into the Chimney, except through the Flues. The door therein is used for cleaning the Chimney and for ventilation, when required.

The Dampers are built in, so as to be a complete check, when required.

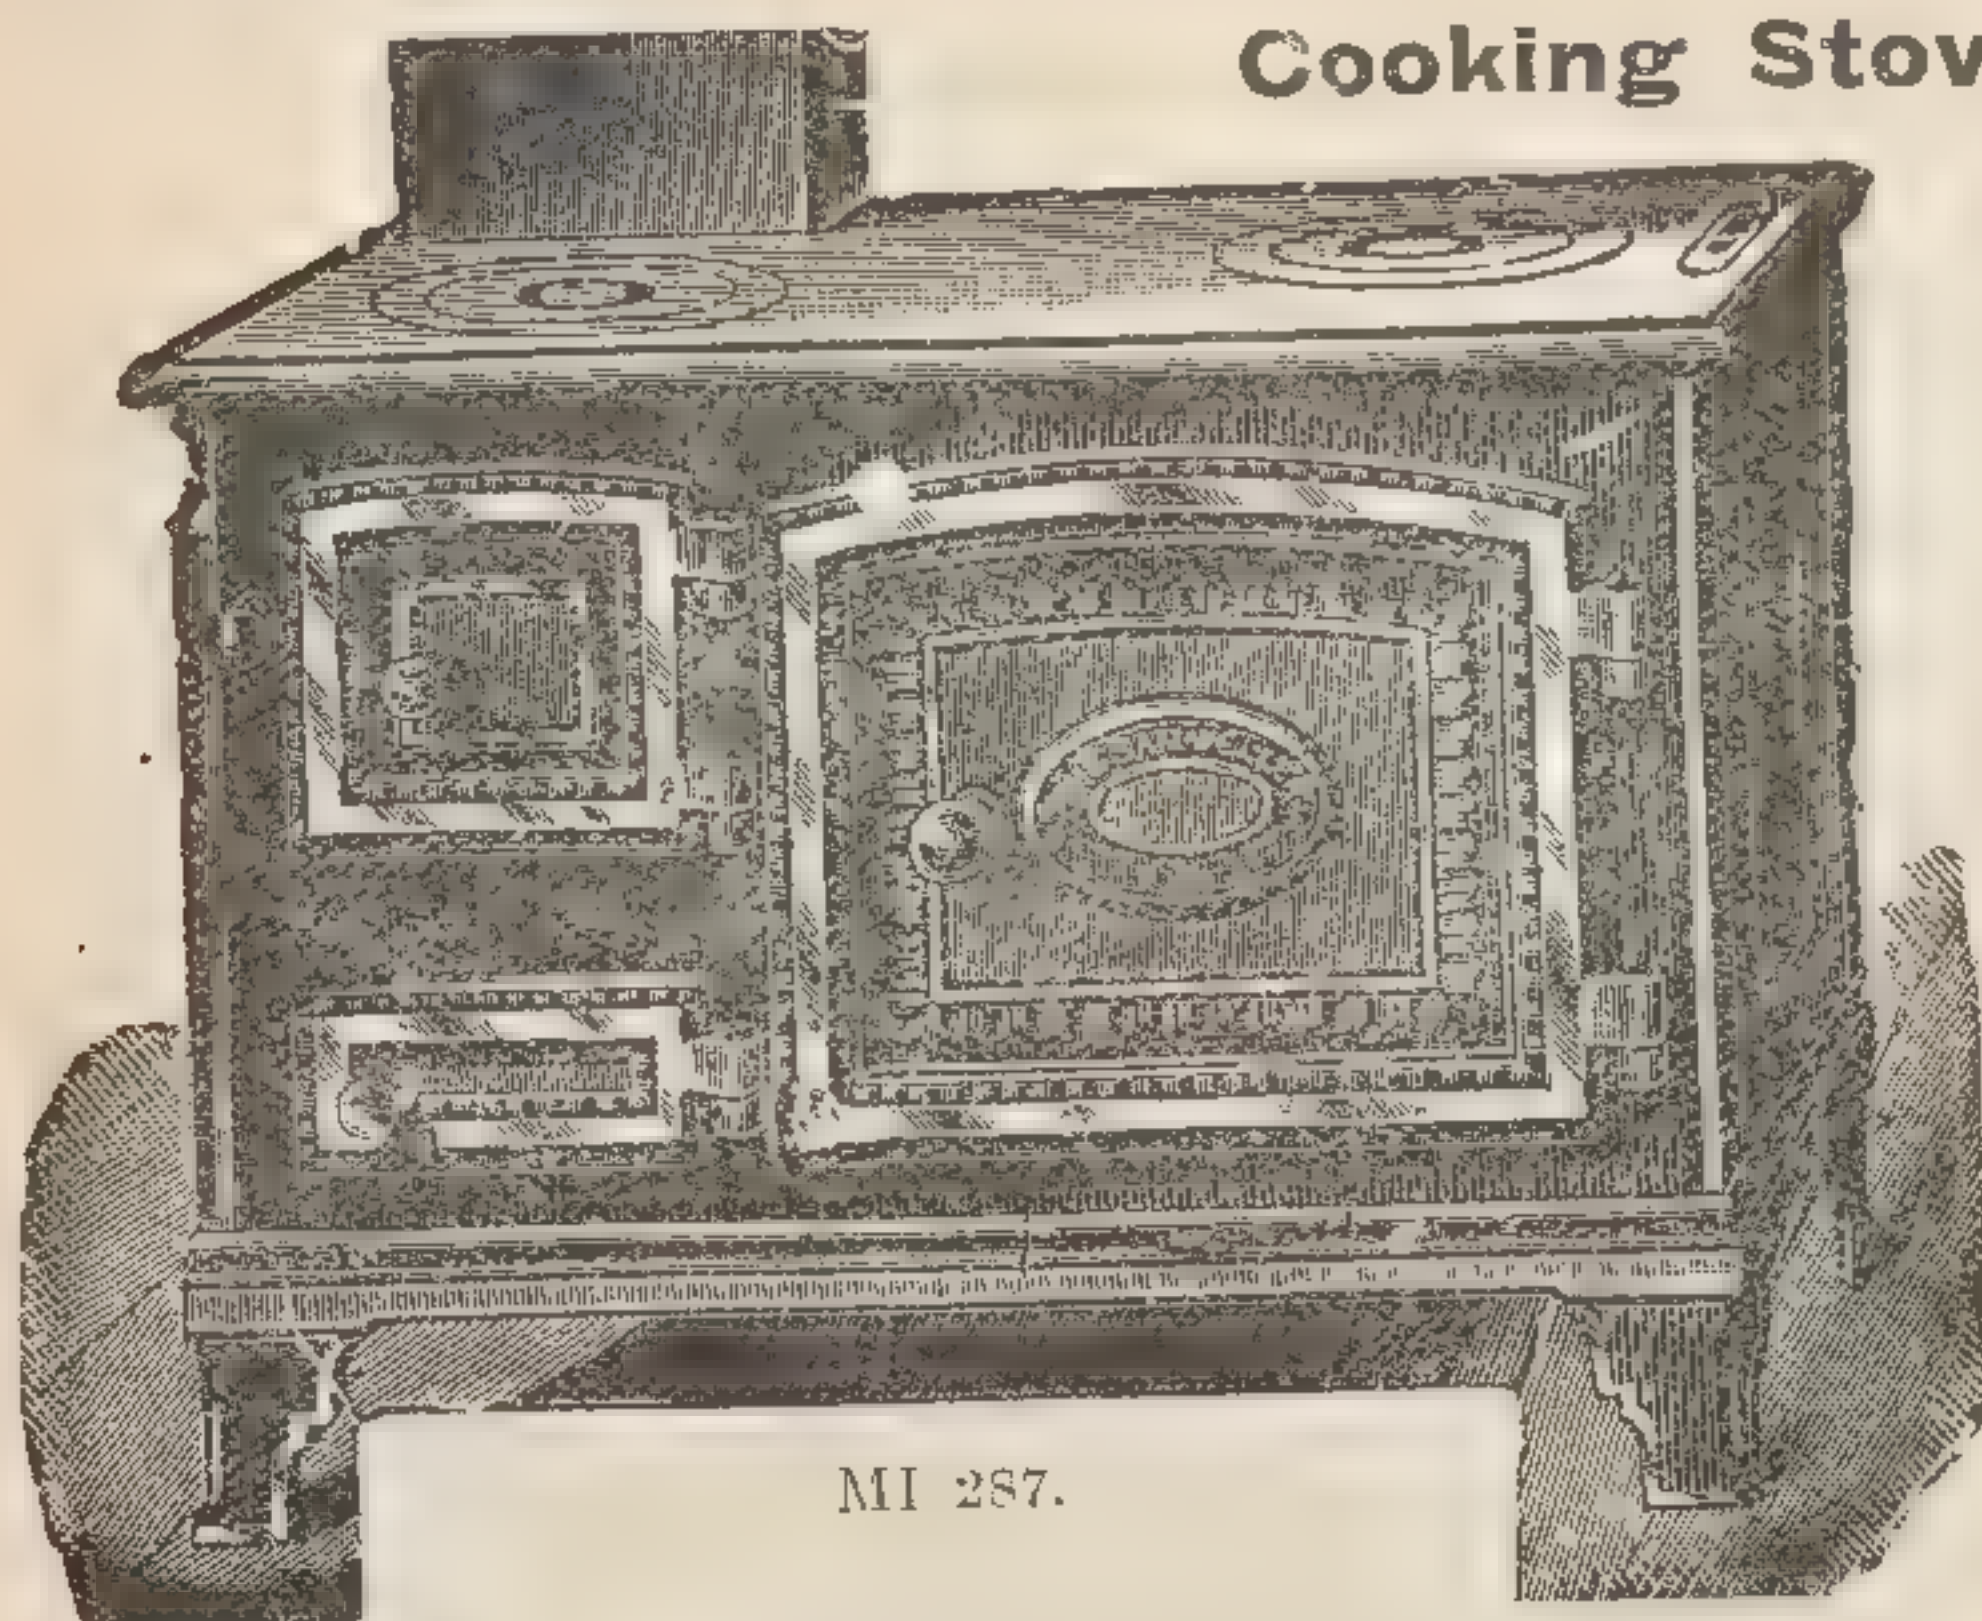

The Fireplace should be kept free from accumulation of Ashes, and the surfaces of Ovens and Boilers, also the Flues, free from soot, otherwise the efficient working of the Range will be impeded, and Fuel also unnecessarily expended.

We keep a special staff of competent Stove Fitters, which we can send to fix the Ranges, if desired.

PACKING STOVES FOR COUNTRY, 2 3 EACH EXTRA. "SAM WELLER" STOVES, FREE.

Stoves can be sent Unpacked at Consignees' risk.

When taking delivery of Stoves at the Railway Station or port of destination, Customers are particularly requested to examine carefully the case, if the Stove is packed, so that in the event of the Stove being damaged the Railway Authorities or Steamship Owners, who are alone responsible, may be notified.

Our responsibility ceases when we receive a receipt for the Goods in Sydney, as being in good order and condition.

EVERYTHING SOLID VALUE

F. LASSETTER & CO., LIMITED

The "Bonnybridge" Dover Stove.

MI 291.

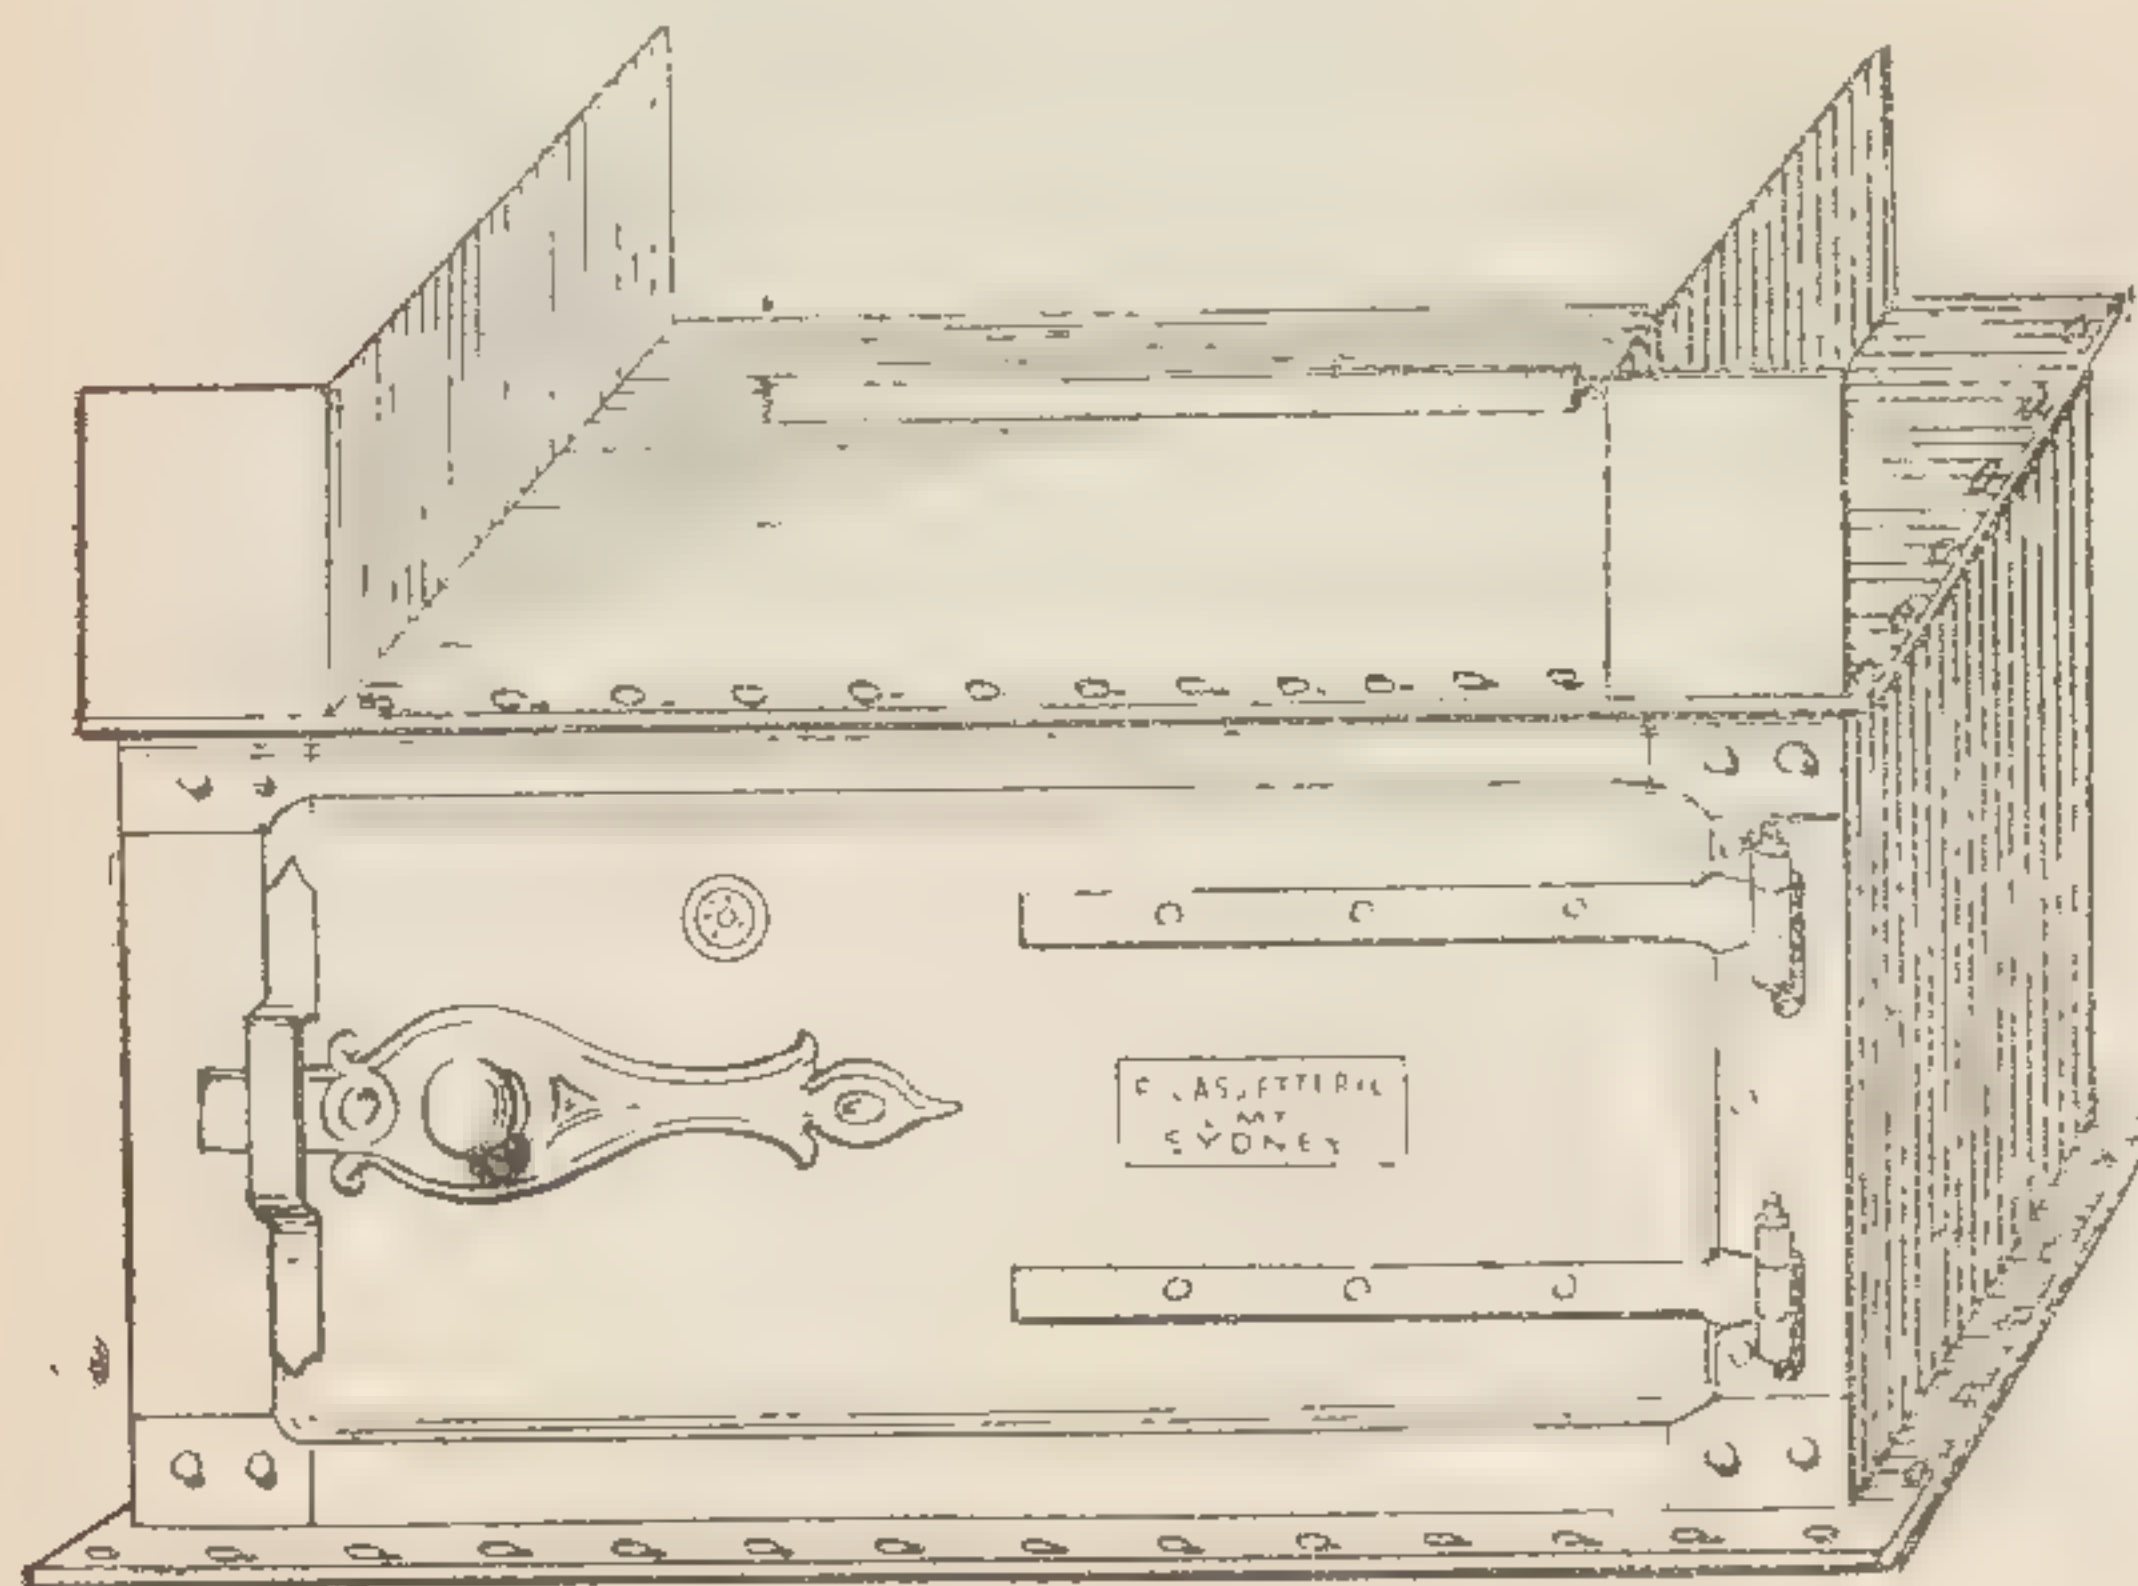

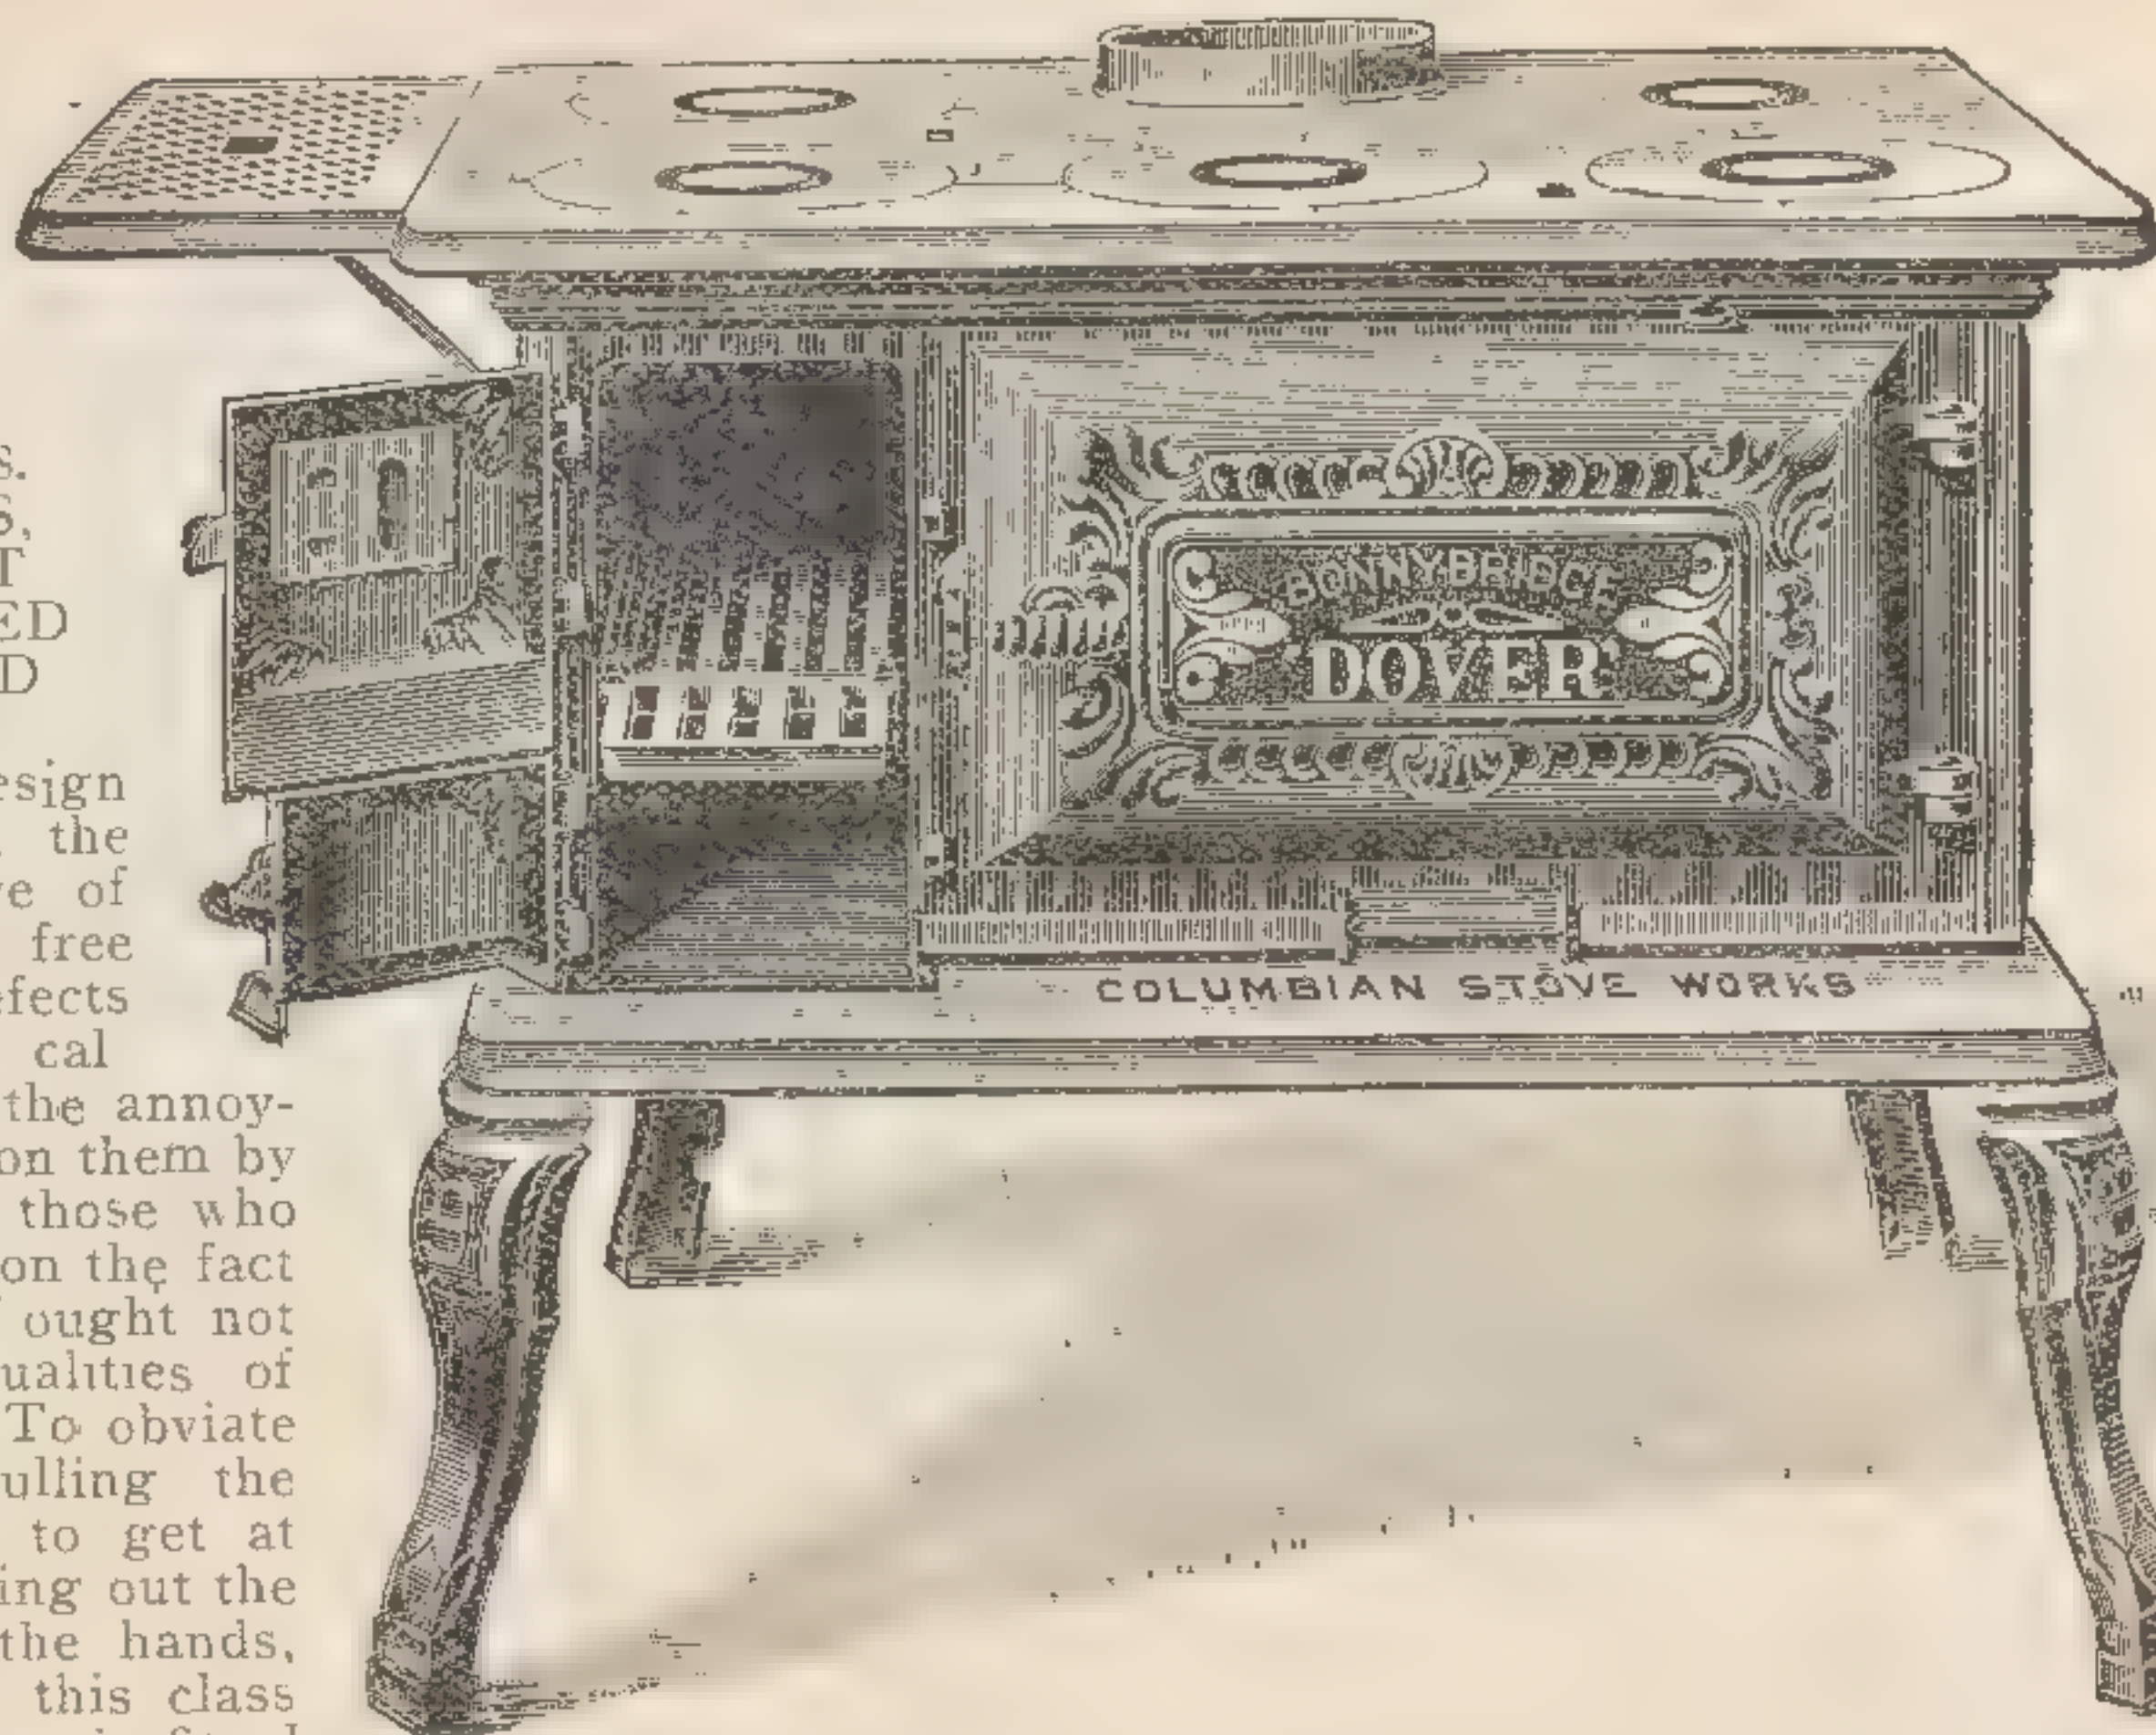

THREE SIZES—
No. 6, No. 7, and No. 8.
WITH IRON LININGS,
DROP-DOWN FRONT
BARS, AND EXTENDED
FIRE-BOX FOR WOOD
FUEL.

This splendid new Design has been got up to meet the demand for a cheap Stove of moderate capacity but free from the usual glaring defects of this class of Stove, and calculated to save the Public the annoyance and worry entailed upon them by continual complaints from those who do not take into consideration the fact that in a cheap Stove they ought not to expect all the good qualities of the more expensive sorts. To obviate the necessity of either pulling the Stove out of the fireplace to get at the side soot door, or scooping out the soot from the flues with the hands, both serious objections to this class of Stove generally, this Stove is fitted

with Patent Removable Combined Oven Bottom and Flue Divider, and Sliding Soot Door in front under Oven (not liable to be mislaid and lost like the lift off kind), whereby the flues of the "Bonnybridge Dover" are more easily and thoroughly cleared of soot with the ordinary Rake than those of even the most expensive Stoves.

The Fret Extension of Hot-Plate fits either end of the Range, the mouldings are deep and bold, and they, as well as the corners of projecting Hearth Plate, have strengthening webs cast on them to obviate as far as possible breakage in transit, whilst the bulged style of Oven Door in addition to its handsome and massive appearance makes the Oven actually larger than the last measurements indicate. The Fire Door and Oven Door Knobs and Name-plate are handsomely Nickel-plated.

MI 303

No. 0 as illustrated above has no "Plain" section.
No. 1 has three sections with doors, and one "Plain" section.
No. 2 has two "Plain" sections, and so on the distinguishing No. of the Stove being the quantity of "Plain" sections used.

A very simple and economical Laundry Stove of extra heavy construction, made in horizontal sections.

The bottom section rests upon a heavy cast iron base, and has a sliding door which enables the user to regulate the draught perfectly, and obtain the necessary heat with a minimum consumption of fuel.

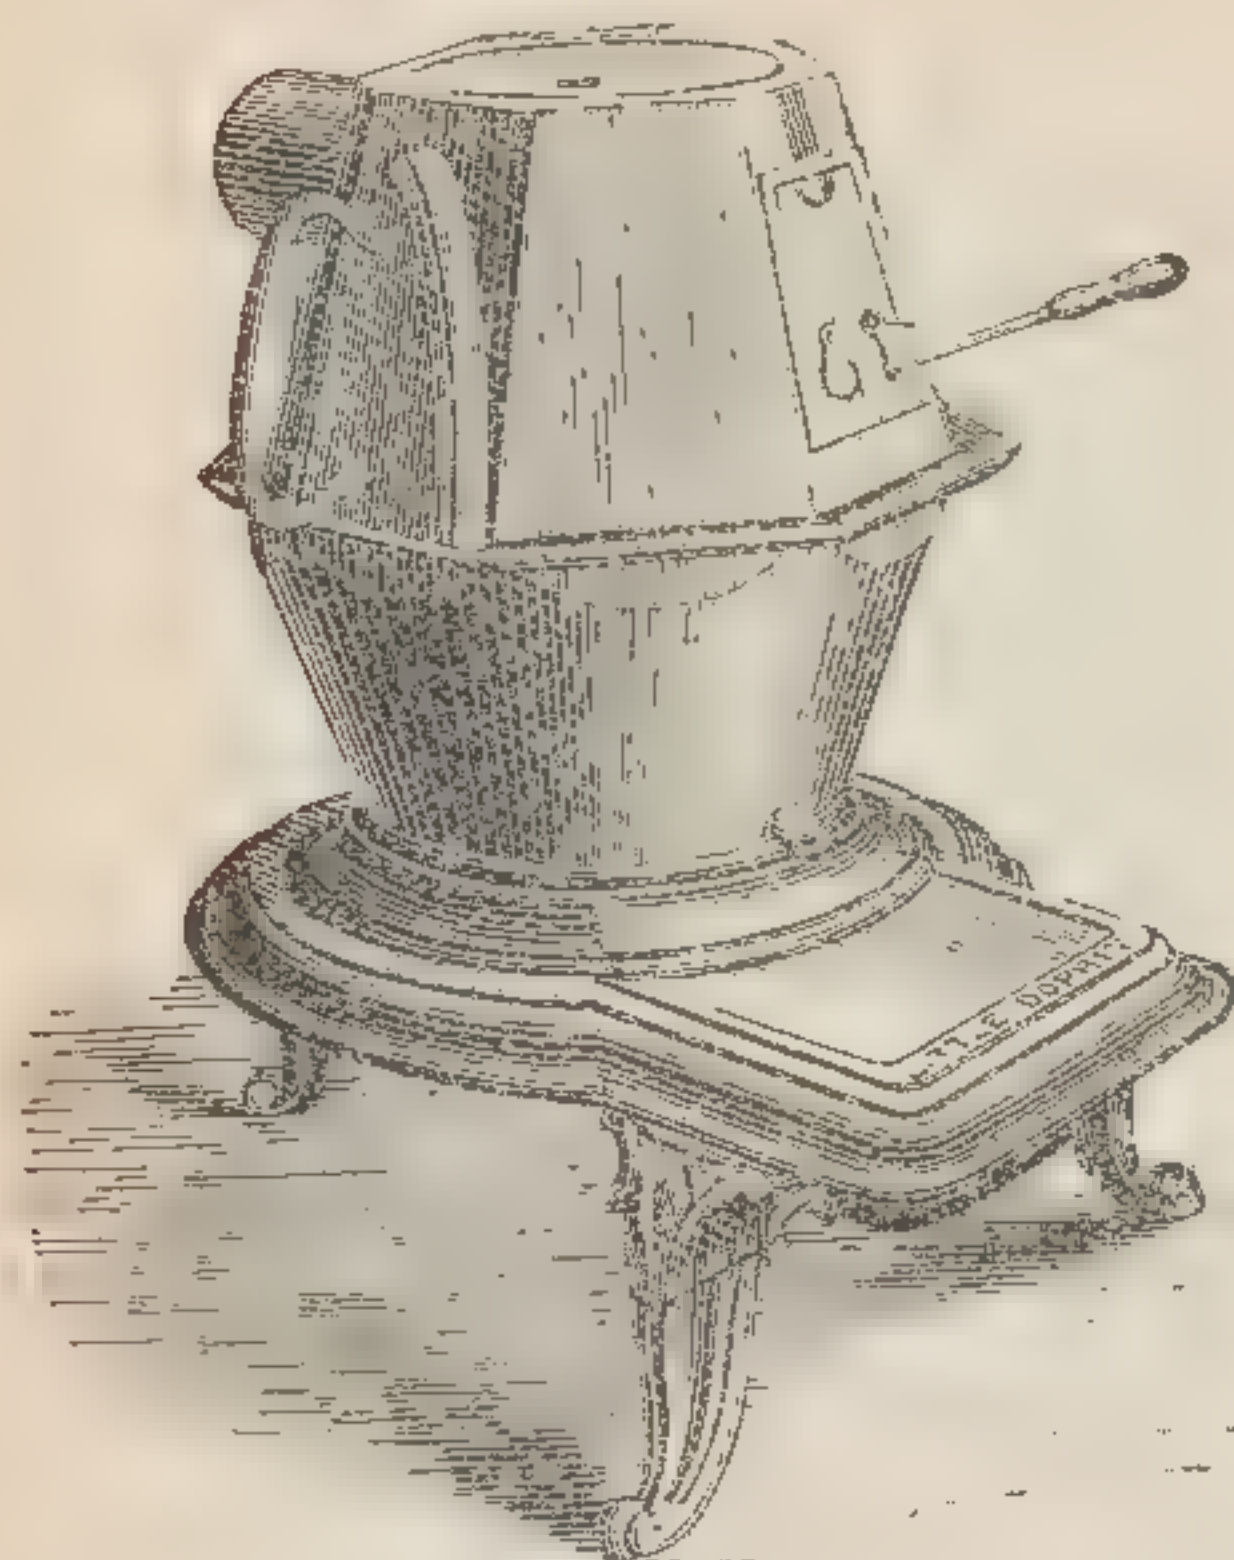

The second section contains the fire, fitted with loose furnace bars, and the right hand side is "Dished" to take two round-faced polishing irons, and fitted with a movable rest to hold them in position.

The top section has a feeding door, and is fitted with a damper in the flue nozzle for further regulating the draught.

The fire door and top section have holes to take Crimping Irons.

No. 0. Heating say 30 Irons	£4 7/6
No. 1. Heating say 40 Irons	£5 13/-
No. 2. Heating say 50 Irons	£6 12 6

MI 306.

Kerosene Cooking and Heating Stoves

MI 307.

THE "KEY" KEROSENE STOVE MI 306.
Burns Blue Flame. Tin Font, 5/6; Brass Font, 6/6 each.

KEROSENE BOILING STOVE, Iron & Base.

THE PRIMUS ATMOSPHERIC GAS STOVE.

THE MOST ECONOMICAL GAS STOVE.

KEROSENE CONSUMED IN GAS FORM.

Burns without Wick, without Fumes, Soot or Smoke. Explosion impossible. Does not soot the bottom of the Vessel. Economical and Durable. May when burning, be removed without danger.

4/- and 5/- each.

By means of the Triple Boiling Stand the flame is put to its fullest use in boiling. Most successful for Boiling or Simmering. A most useful Boiling Stand, capable of holding at one time three large saucepans with steamers.

Stand only, 3/-; Stove and Utensils, extra.

IRONING STAND.

To Hold Three Flat Irons, 1/6.

To hold Mrs. Potts' Irons, 1/3. Stove and Irons, extra.

GRILLER.

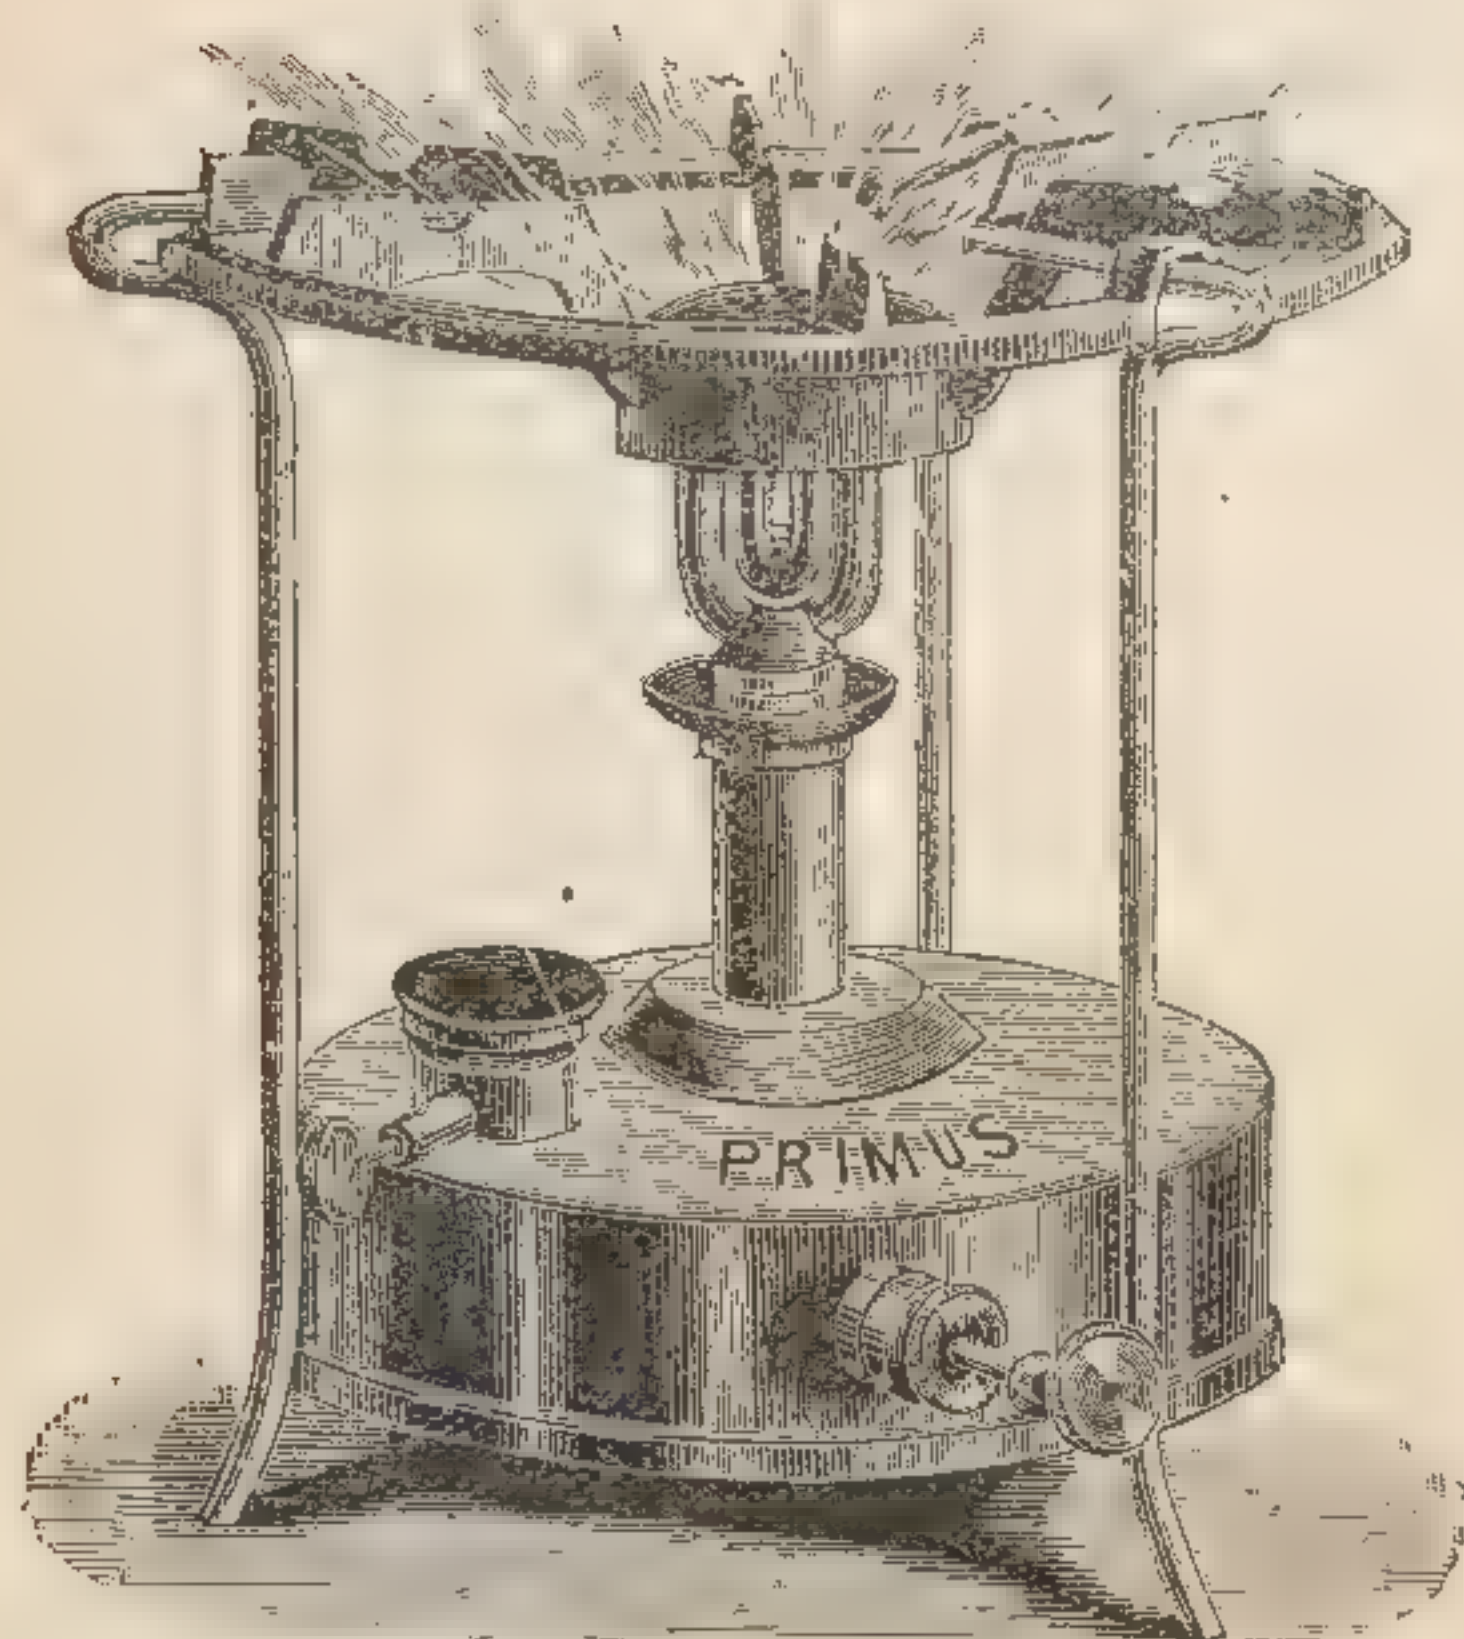

Will cook Steak or Chops in a few minutes to perfection. By putting on the lid of the Griller it is converted into a Boiler.

2/9 each.

"Primus" Cooking Stoves.

MI 308.

"PRIMUS" STOVE (MI 308).

Made entirely of well polished Brass. Equally useful summer or winter. Will boil one quart of water in three or four minutes.

Silent or Noisy, 11/- each.

MI 309.

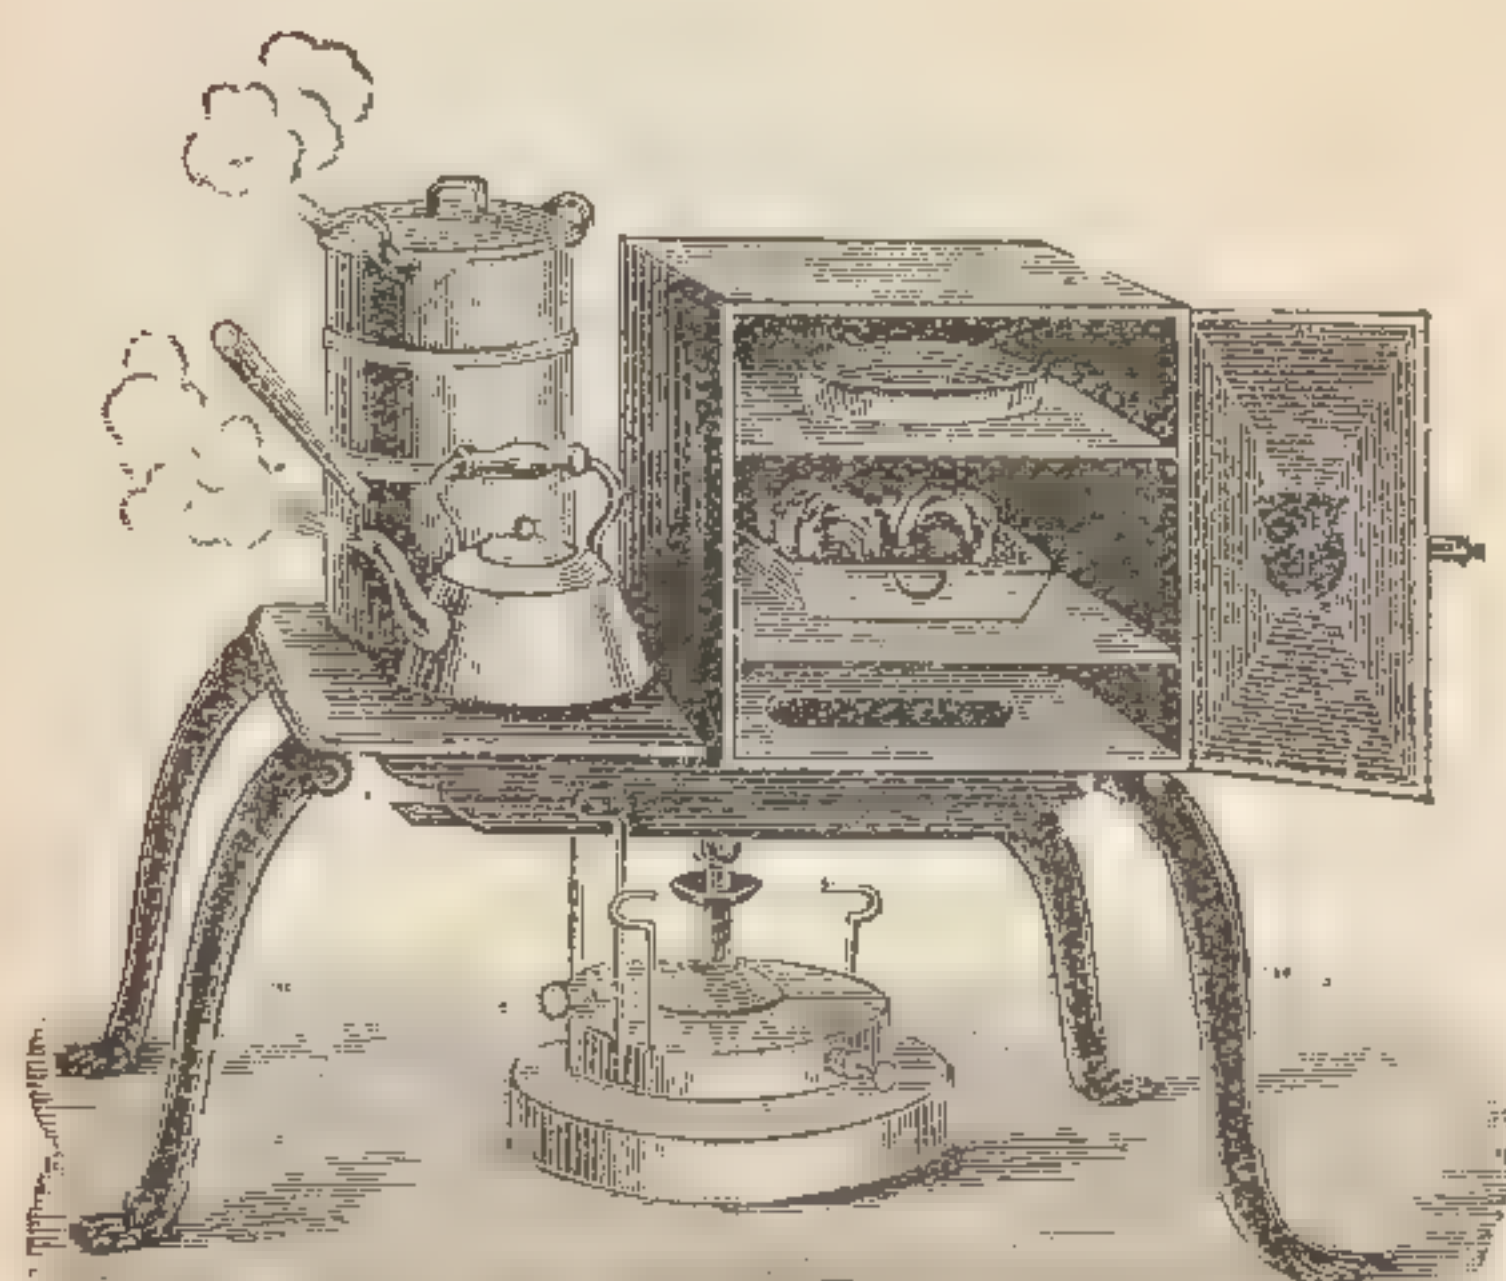

Strongly made in Ornamental Cast Iron. Boils and simmers at the same time.

Without Stove or Utensils, 11.6 each.

**The Useful and Economical Stove
on the Market.**

The No. 2 "Ruby" Cooking Apparatus.

MI 310.

MI 310.

No. 2 RUBY COOKING APPARATUS

Will bake an 8-lb. joint and a large pie, boil two vegetables, and steam two vegetables or puddings at one and the same time. Size of oven (outside), 14½ x 12½ in. x 12½ in.; size of boiling plate, 15 in. x 10 in.; extreme length, 26 in.; height, 24 in. Price, including "Primus" Stove, 47.6. Cooking Utensils, extra.

The "RUBY" Cooking Apparatus is strong and well-made, the hot plate is made of strong Cast Iron, the Oven of Black Sheet Steel, double cased: the whole being mounted on strong iron legs which permits a free circulation of air around the Stove, thus tending to keep the kerosene quite cool.

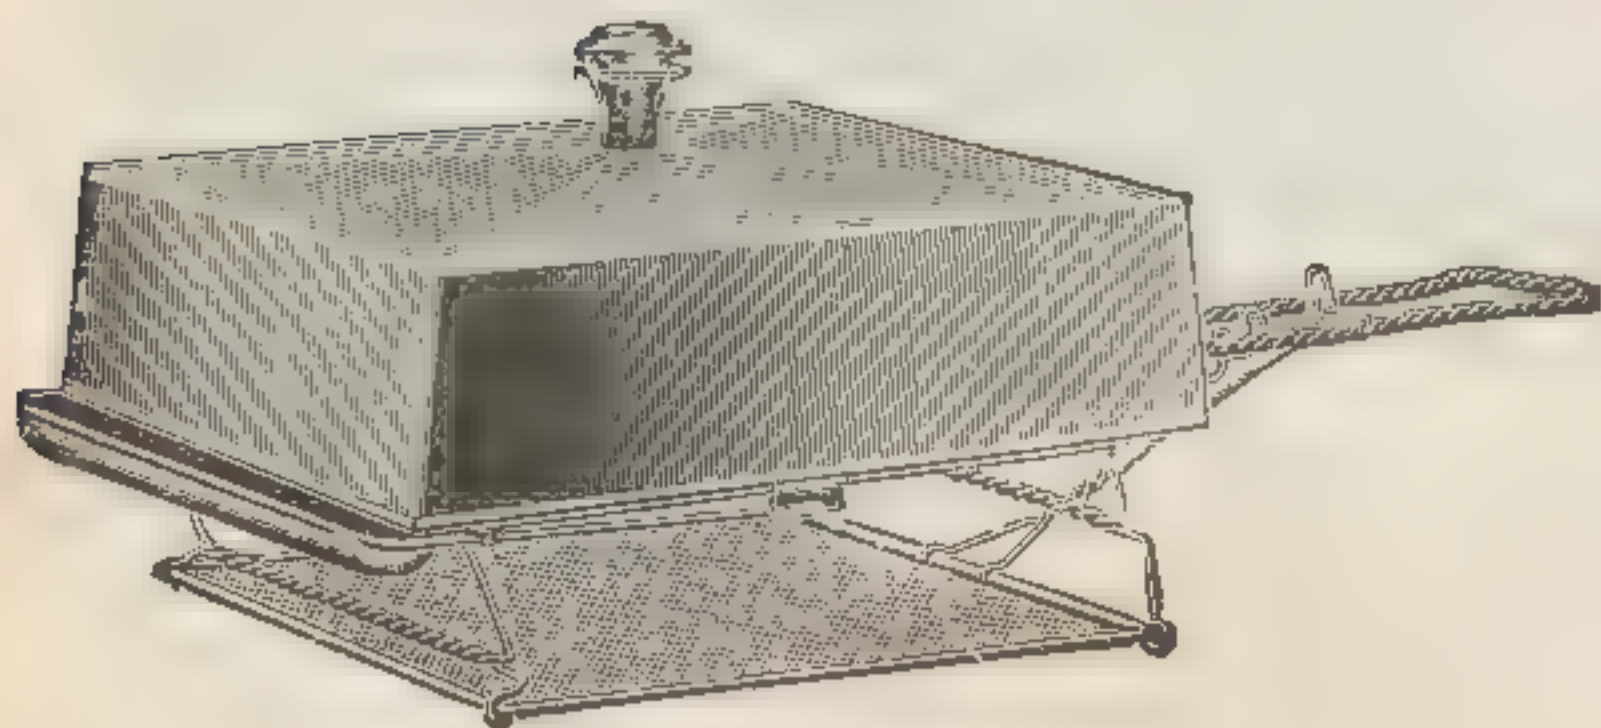

The heat from the Stove is here put to the fullest possible use, simultaneously, Boiling, Steaming, Stewing, Baking and Plate Warming, doing everything expeditiously and economically comparing most favorably with all ordinary stoves in its efficiency, and at one-third the outlay of Fuel.

GAS COOKERS.

The celebrated "MAIN" PRIZE-MEDAL GAS COOKERS (MI 318) have been in use all over the world for many years, and are renowned for excellent workmanship, durability, and economical working. Unsurpassed for Baking, Roasting, and Grilling.

SPECIAL ADVANTAGES OF THE "MAIN" GAS COOKER.

1. Griller and Toaster of exceptional power. Bread can be toasted, both sides, in one minute. Griller is divided, allowing one half only to be used when desired.
2. Oven Fittings removable which greatly facilitates cleaning.
3. Uniform heat in Oven; improved flue arrangement.
4. Requires comparatively little attention. Saves time, and time is money.

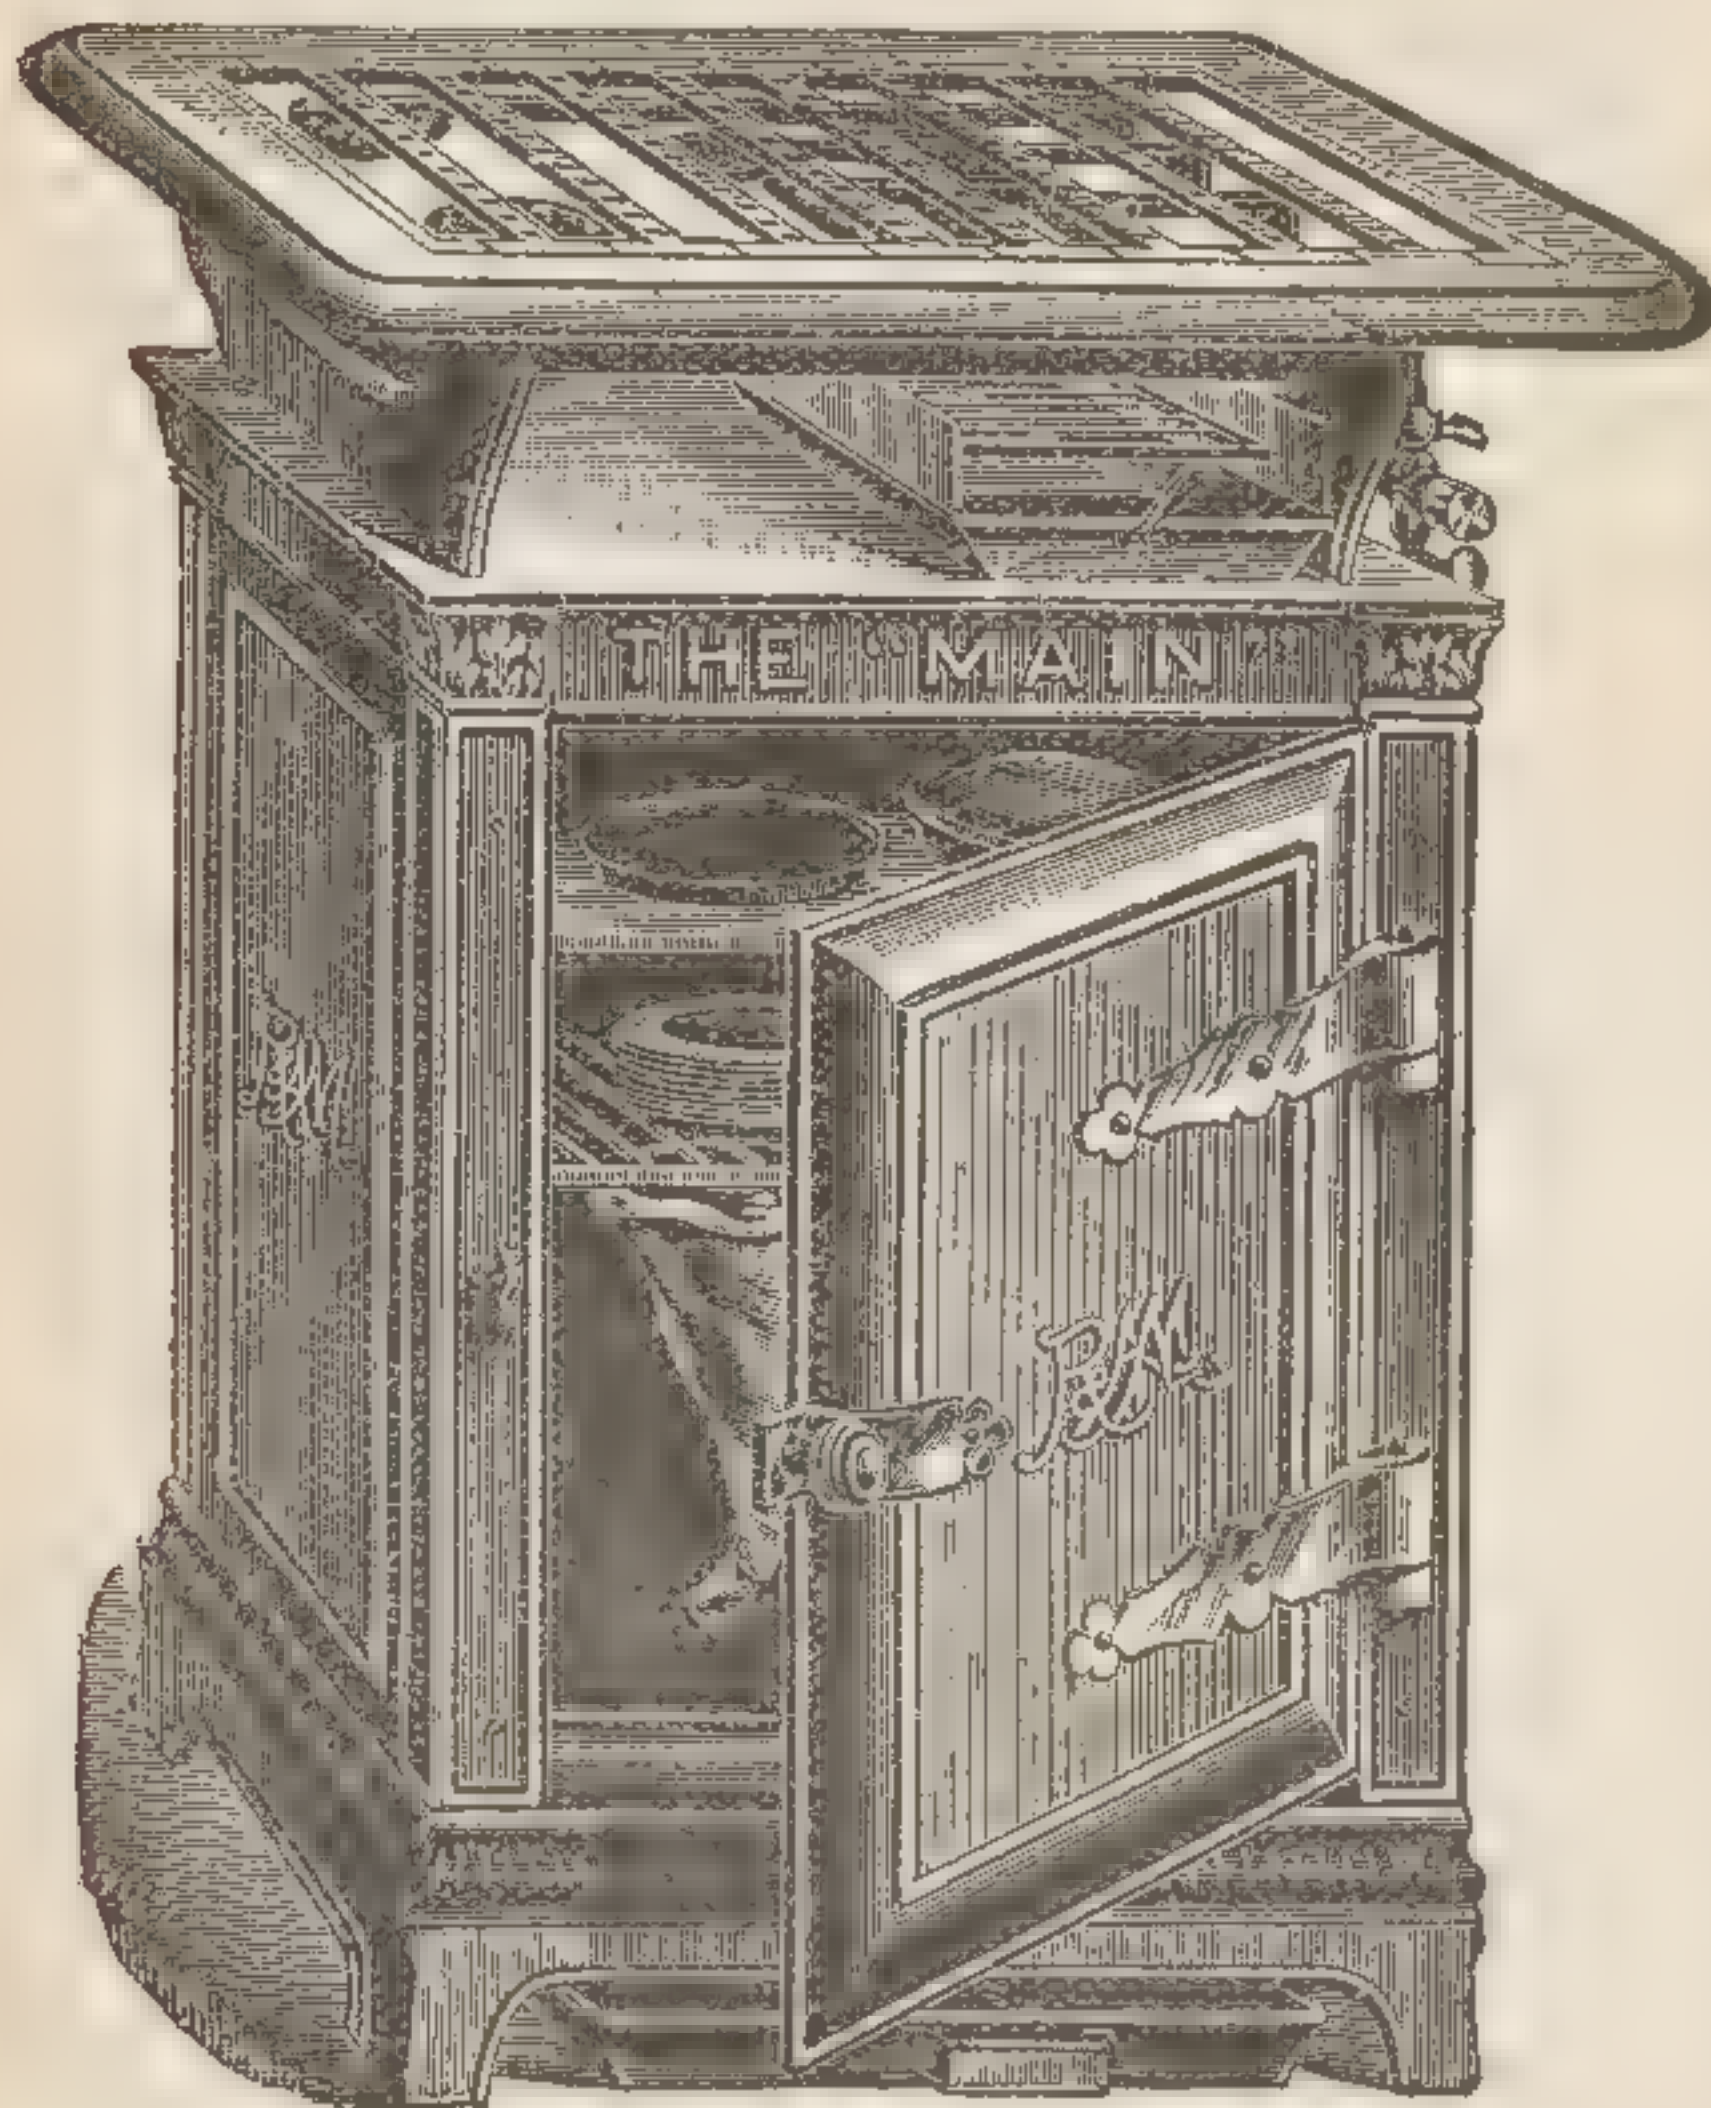

"MAIN" GAS STOVE.

Latest Pattern.

All Burners removable or fixed, as desired.

Easily Cleaned.

A Perfect Baker and Roaster.

UNIVERSAL PROVIDERS.

Sanitary Baths

The great advantage of Porcelain or Vitreous Enamelled Baths is beginning to be more generally recognised by the public. They are quite as beautiful as Solid Porcelain, while they are much lighter in weight. They rapidly acquire the temperature of the water in the bath, and never feel cold to the touch when filled with warm water. The amount of heat absorbed by them is infinitesimal.

LASSETTERS' KEEP THE LARGEST AND BEST-ASSORTED STOCK OF THESE BATHS.

MI 395.

VITREOUS ENAMELLED BATH (MI 395).

Complete with Nickel-plated Fittings. Vulcanite Plug; self-setting; does not require to be cased in with woodwork. Fitted with Ornamental Feet. Vitreous Enamel inside, Plain Painted outside. A useful Bath for any Bathroom.

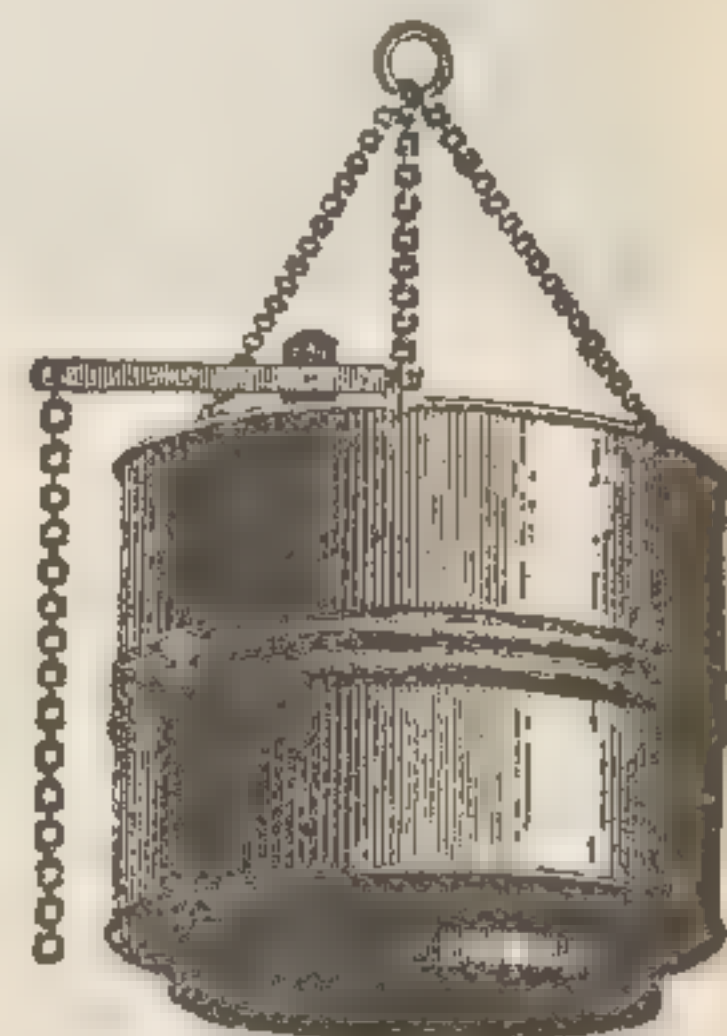

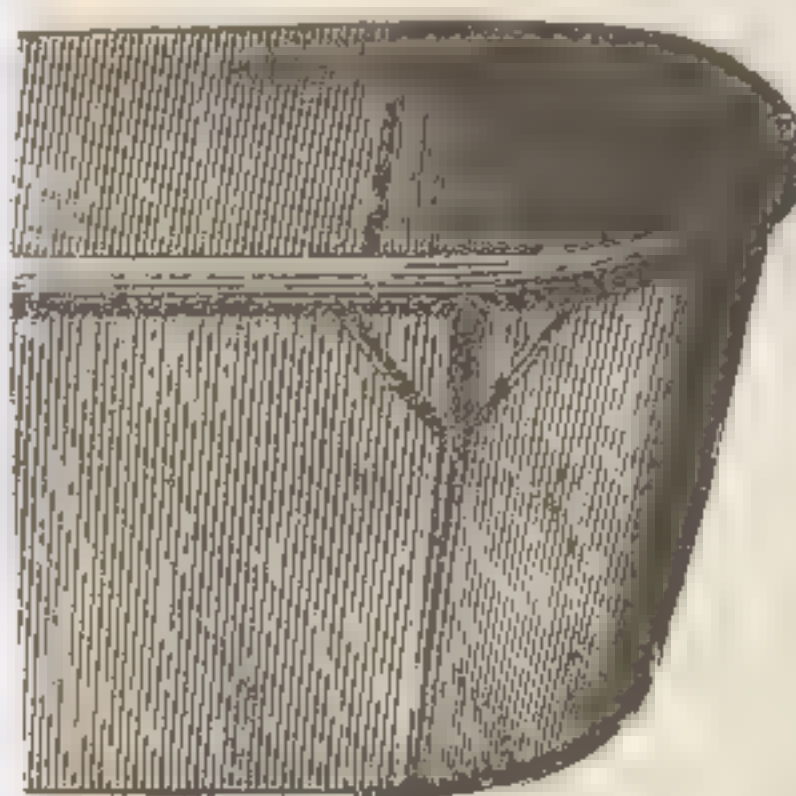

Measurements.	Length.	th.	Height	
No. 1	5ft. 6in.	2ft. 4in.	1ft. 10½in.	£5/5/- each
No. 2	6ft.	2ft. 4in.	1ft. 10½in.	£5/10/- each

VITREOUS ENAMEL, OUTSIDE AS WELL AS

LASSETTERS' ROLL RIM SELF-SETTING CAST-IRON BATH.

Similar in shape to Bath MI 395. This Bath is, without doubt, the best value in Baths ever offered. It is made specially to our own design. Self-setting does not require a wood casting, thereby considerably lessening the cost of fitting. White Silicate Enamel inside, Oak-Grained outside, with Fixed Feet. Complete with Brass Plug and Washer.

Pulley, Hook, Cord and Cleats for use with above Showers, 1/9 extra.

SOLID VALUE

Portable Shower Baths

A luxury as well as a necessity. A pleasant shower secured from the minimum quantity of water.

THE "BOSTON" SHOWER (MI 399).

Worked with a Semi-Rotary Pump. Requires only a bucket of water for a cool and refreshing shower.

Easily fixed. 40/- each.

FOLDING CABINET.

Rubber Lined.

20/- each.

(MI 398).

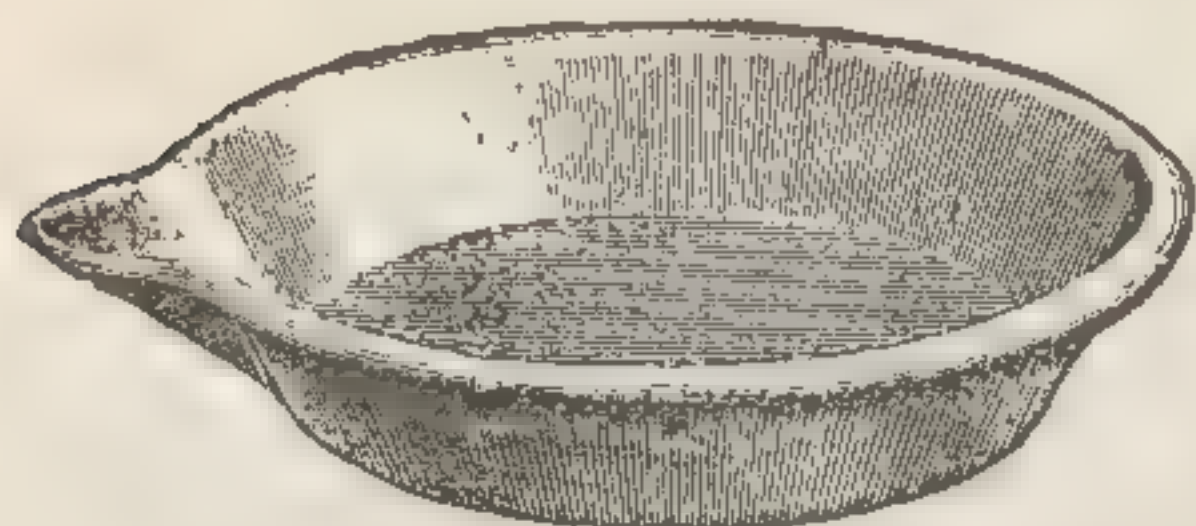

The Turkish Bath is quite a luxury, within the means of everyone, and is a blessing to every home. It keeps the body healthy and vigorous. Exhilarating to a degree undreamed of by those unacquainted with vapor-bathing. By its means you are enabled to enjoy in your own bedroom all the pleasures and enjoyment of the famous Hot Springs of New Zealand. Positively the best cure and preventive of Influenza, Rheumatism, etc.

Price, in best Varnished Pine, with Spirit Lamp,
£4/-/-.

CYCLONE

"N"

GATE

RABBIT NETTED.

MI 524.

MI 525.

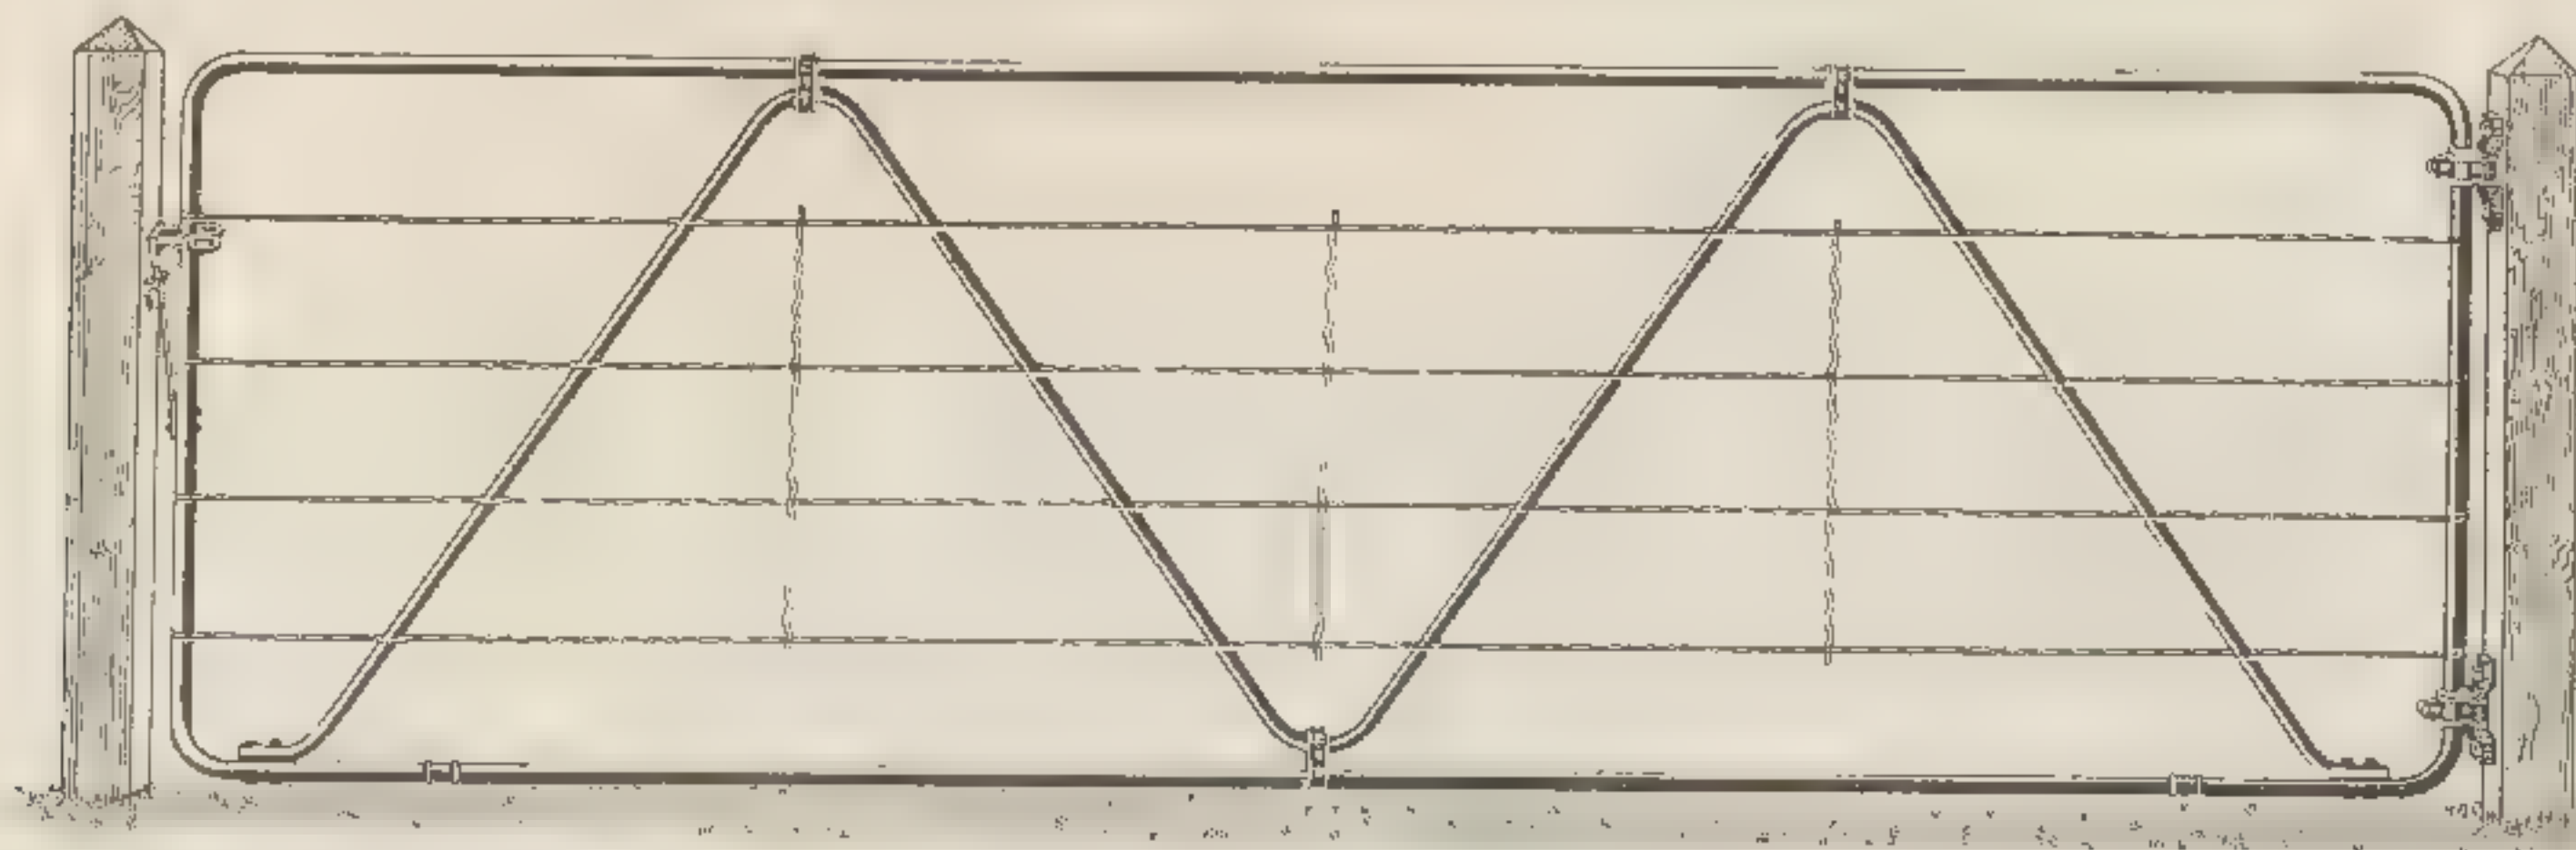

MI 525 represents the "Cyclone N" Gate, made rabbit proof by attaching galvanised wire netting, 36in. high, 1½in. mesh, 17 gauge wire. We recommend that all rabbit proof gates be hung on the sides of the posts, as this permits the gate to close hard up against the posts, and makes it absolutely rabbit-proof. Another advantage of hanging the gate in this way is that it is not liable to be damaged by a vehicle passing through.

Square Corners can be attached to the bottom bar at an extra cost of 1 6 per gate.

				Rabbit Netted.	Plain. Not Netted.
10ft. wide.	4ft. high.	77lbs. weight		26/6	22/6
11ft. wide.	4ft. high.	85lbs. weight		29/3	25/-
12ft. wide.	4ft. high.	92lbs. weight		32/-	27/6
13ft. wide.	4ft. high.	100lbs. weight		34/9	30/-

Prices are for Gates complete, with hinges and catch. Special Railway Gate Springs can be supplied at an extra cost of 3/6 per Gate.

CYCLONE "M" GATES

MI 526.

This design of Gate is only made in sizes 14 to 16ft. openings. These Gates are exactly the same construction as the N Gate, Fig. MI 525, but owing to the increased length, are fitted with an additional diagonal stay. Square Corners can be fitted on the bottom bar at an extra cost of 1s. 6d. per Gate. 15 and 16ft. Gates are supplied with an iron stay rod to support weight of Gate. An extra post must be erected behind the gate post on which the Gate is hung, to carry the rod; the rod has a tightening screw to provide for any movement in the gate post.

			Plain.	Rabbit Netted.	Do. Square Corners.
14ft. wide.	4ft. high	112lbs. weight	32/6	37/6	39 -
15ft. wide.	4ft. high.	130lbs. weight	45 -	50/3	51/9
16ft. wide.	4ft. high	138lbs. weight	47/6	53/-	54/6

Prices are for Gates complete with hinges and catch, and special stay rod described above with 15 and 16ft. Gates.

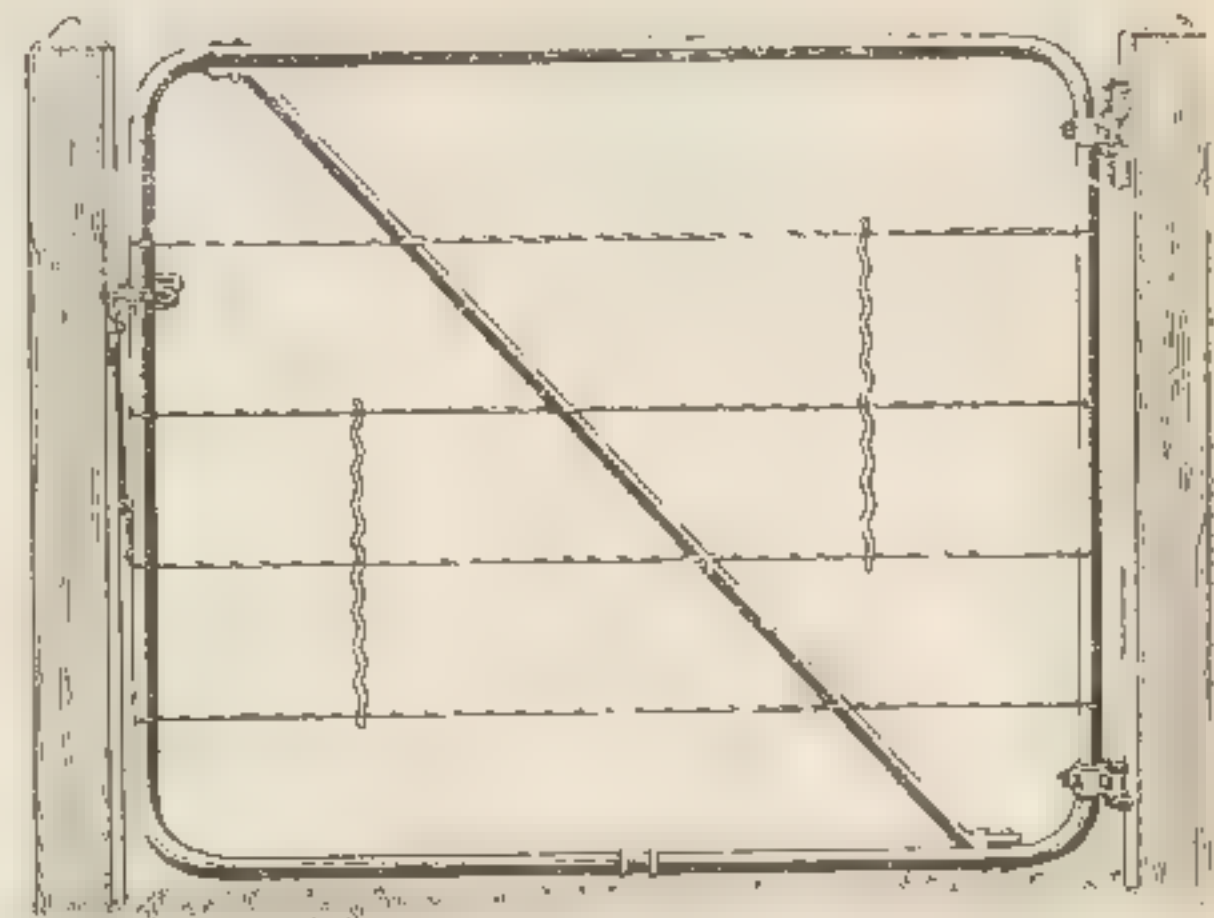

These Gates are made rabbit-proof by attaching 36 x 1½ x 17 gauge galvanised wire netting. See illustration, MI 525.

Always state distance between posts when ordering Gates.

"Cyclone"

Single and Double Stay Gates

The frames of these Gates are made of 1½ in. diameter steel tube, the stays 1½ in., the latter being secured at either end by two ½ in. bolts. The horizontals consist of two No. 9 galvanised wires tightly cabled together, with Cyclone Droppers attached in centre. Gates for openings of less than 5ft. are made without stay, but have four horizontal wires braced with No. 4 Cyclone Droppers. Single Stay Gates, are made in sizes 5 to 7ft., and Double Stay Gates, in 8 to 9ft. If required with square corners on the bottom bar, 1/6 extra per Gate.

MI 527.

SINGLE WALK GATES.

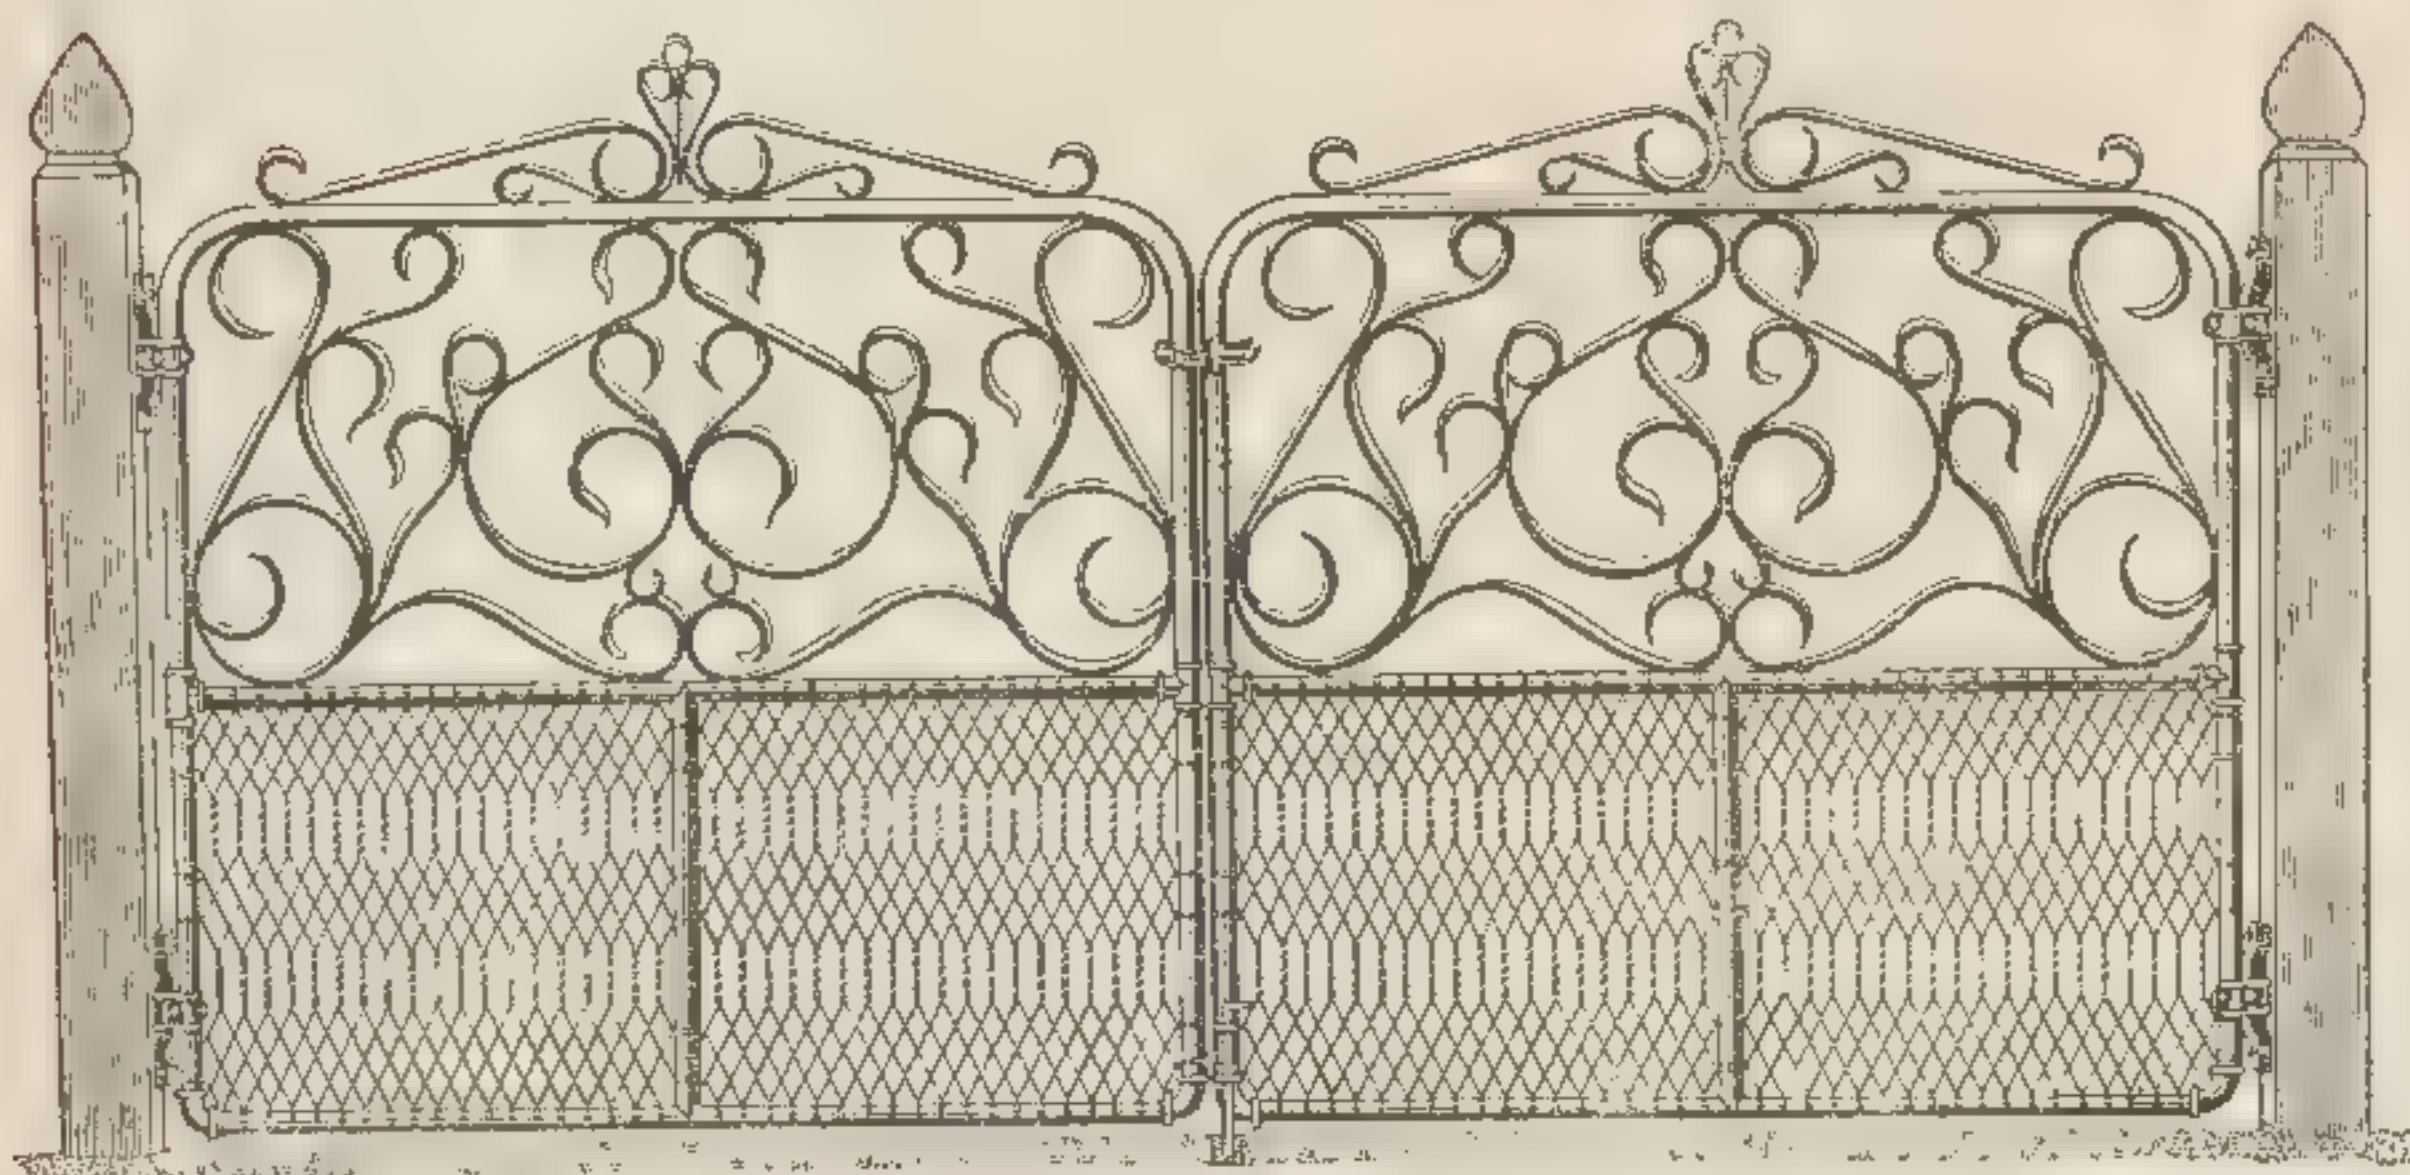

Ornamental Cyclone Gates

PRICE LIST.

				Plain.	Rabbit Netted.	Do., Square Corners.
3ft. wide	4ft. high	30lbs. weight		12/-		14/-
3½ft. wide	4ft. high	32lbs. weight		12/9		15/-
4ft. wide	4ft. high	36lbs. weight		13/6		16/-
5ft. wide	4ft. high	40lbs. weight		15/-		17/9
6ft. wide	4ft. high	44lbs. weight		16/6		19/6
7ft. wide	4ft. high	56lbs. weight		18/-		21/3
8ft. wide	4ft. high	58lbs. weight		19/6		23/-
9ft. wide	4ft. high	67lbs. weight		21/-		24/9

Prices are for Gates complete, with hinges and catch.

Always state distance between Posts when ordering Gates.

(MI 528)

Double Drive-way Gates

The frames of (MI 528) Gates are made of 1½ in. steel tube. The inside ornamental scroll work is 1½ in. flat iron. The bottom portion is woven wire, 14 gauge galvanised.

DOUBLE GATES.				SINGLE GATES.			
8ft. wide.	4ft. high		52/6	30in. wide.	4ft. high		20/-
9ft. wide.	4ft. high.		60/-	36in. wide.	4ft. high		22/6
10ft. wide.	4ft. high.		67/6	42in. wide.	4ft. high		26/-
11ft. wide.	4ft. high.		75/-	4ft. wide.	4ft. high.		27/6
12ft. wide.	4ft. high.		80/-	5ft. wide.	4ft. high.		35/-
				6ft. wide.	4ft. high.		37/6

These Gates are made in sizes as per list. They can be made in any size required, but intermediate sizes will be charged at the same price as the next size larger on the list; for instance, an 8ft. 6in. will cost same as a 9ft. Gate. Gates can be made higher by increasing the height of the woven space, and cost will be 1/3 per square ft. for added height.

All prices are for Gates complete, with hinges and catch. Always state distance between posts when ordering Gates. Special sizes can be made; price on application.

UNIVERSAL PROVIDERS.

STEEL DIAPERS.

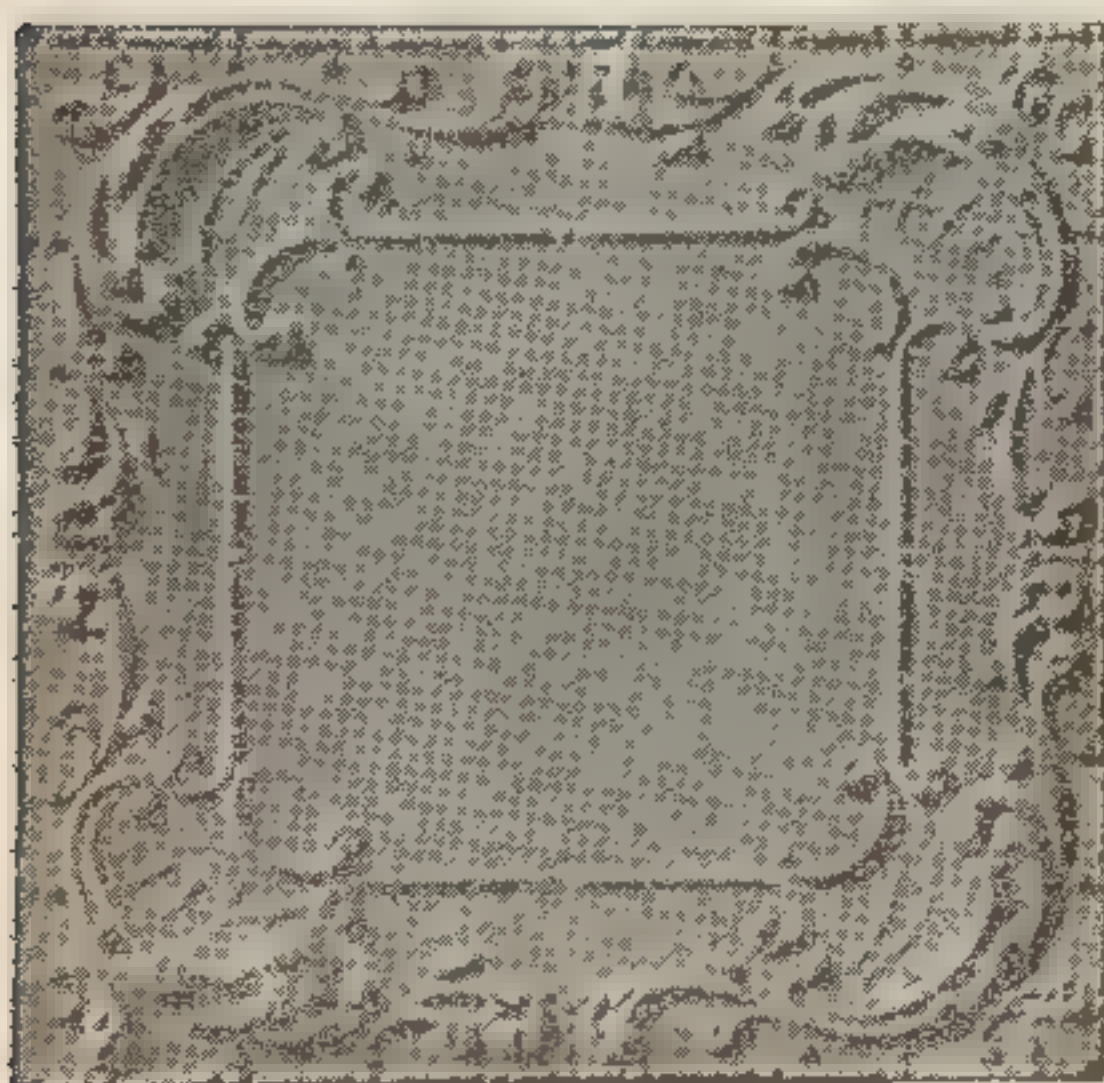

12in. Patterns.

Supplied in sheets 6ft. x 2ft.

These Diapers are suitable for large rooms. The patterns may be cut up to the cornice without spoiling their effect. Borders and Moulding, therefore, are not necessary.

MI 545.

MI 546.

**Sheets 6ft. x 2ft.,
2s. 6d. each.**

MI 545.

In Sheets

6ft. x 2ft.,

2s. 4d. each.

MI 547.

**Sheets 6ft. x 2ft.,
2s. 8d. each.**

These styles are mainly intended for large rooms, where the effect produced is that of the ceiling being specially designed for the particular room in which it is used. With ceilings of this kind a border and moulding will mostly have to be used. The measurements of the area covered by the ceiling itself must be factors of 12in. The inequalities in the sizes of the room can be made up in the border which may be moulding.

STEEL PANELLING.

Supplied in Sheets 6ft. x 2ft.

While the panelling shown on this page may be cut up to the cornice, and thus save the extra expense of a Border and Moulding, the employment of the latter is much preferable, as it gives a finished appearance to the room, and since the patterns would not then be cut, it would give the effect that the ceiling had been specially designed.

Plain Steel Cornices

(MI 552.)

Supplied in stock lengths of 8 feet. 5in. wide,
7in. girth 12

We stock Mitre Leaves for these Cornices (see Price List).
As the bottom flange of all our Cornices returns into the wall, an extra flange, supplied in a separate piece, should be ordered when the walls are also to be of metal.

MI 553.

Combination Cornice, Border and Moulding in Steel.

MI 553.

Supplied in lengths of 8 feet. 5in. wide, 7in. girth or 5in. on ceiling, and 1½ down wall 16
These pieces, or Border Finishes as they are called, form a very effective and economical method of finishing ceilings. They give the same effect as a cornice, border and moulding in three separate pieces. The ceiling patterns must be cut to suit irregularities in sizes of room, if any.

Steel Border Finish

12in. on Ceiling
6in. down Wall

8ft. Lengths,
34 each.
Mitre Leaves,
11 each.

MI 554.

With all border finishes we supply Steel Mitre Corners. These are manufactured with a flange on each side, up to which the border finish can be cut.

For border finishes shown on this page we supply mitre leaves for all angles.

These larger pieces produce very fine effects at a small extra expense, but the ceiling pattern must be cut to make up any irregularities in sizes of rooms.

All these Centre flowers are perforated and provide ample ventilation. They can be easily applied to wood as well as metal ceilings. If desired they can be purchased fixed in panels complete. (See page 843.)

MI 557.—Rough Cast in Galvanised Steel. Supplied in Sheets 6ft. x 3ft. 5/6 per sheet

MI 558.—FISH SCALE SHEETS IN GALVANISED STEEL OR ZINC. Supplied in Sheets 6ft. x 3ft. Covering capacity, 5ft. 10in. x 2ft. 8½in., zinc, 11/- per sheet. Galvanised Steel, 5/6.

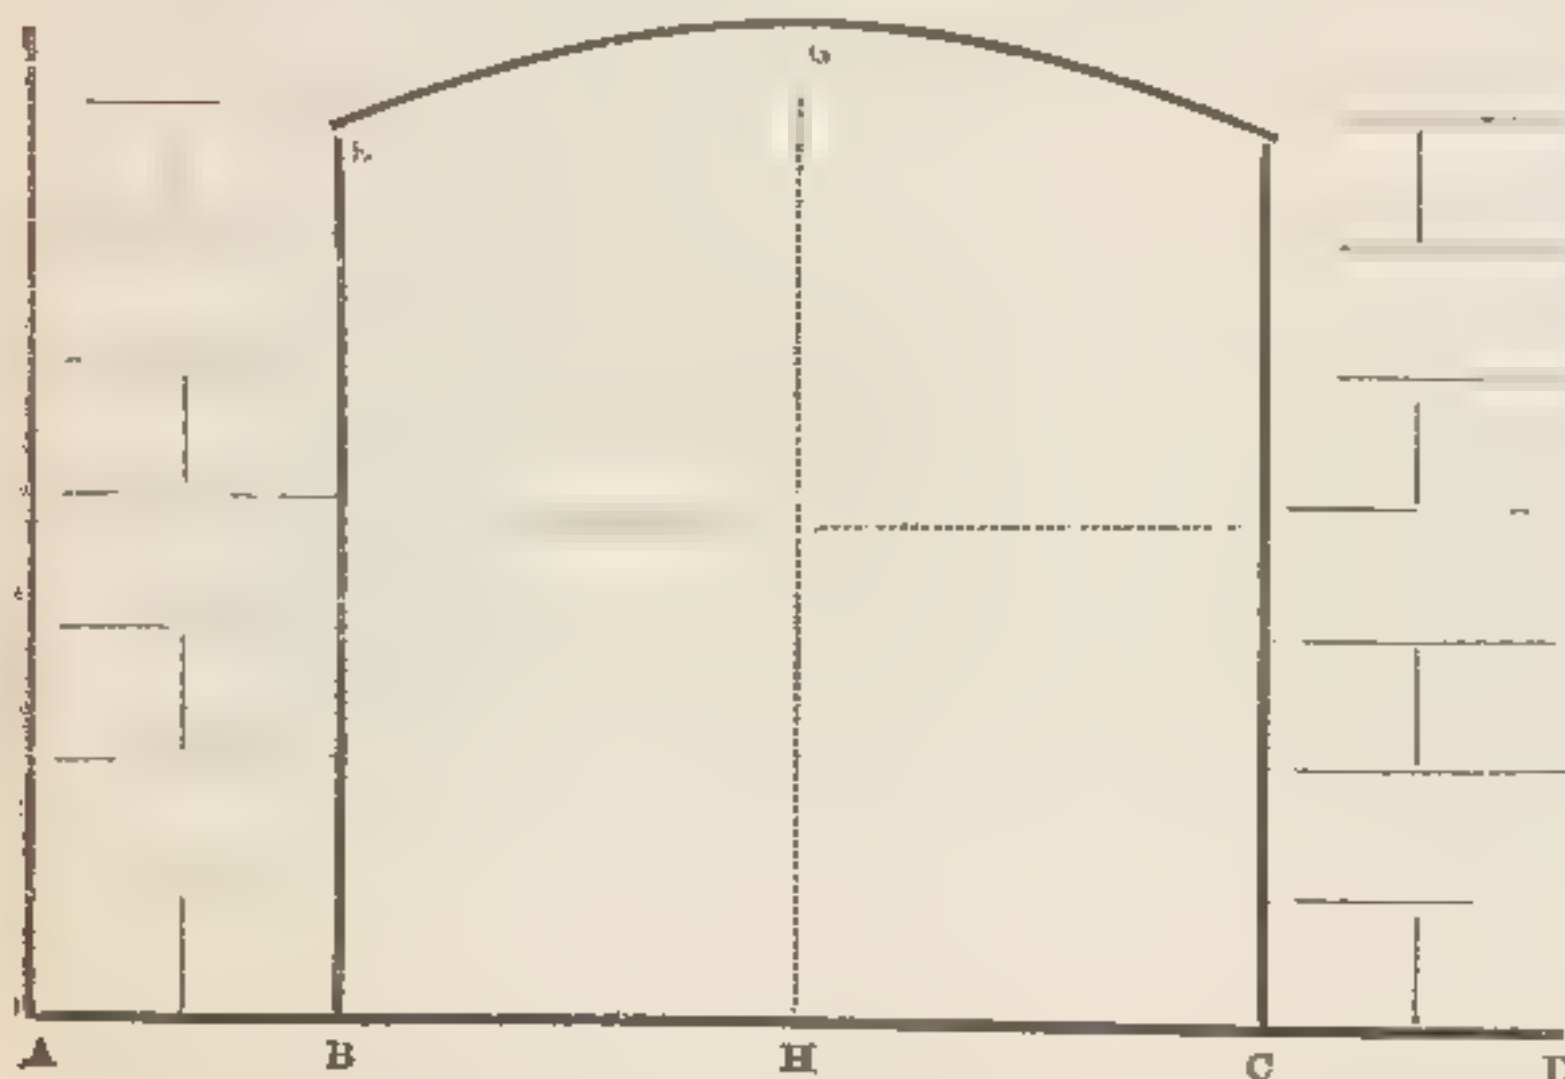

WOOD MANTEL PIECES

In Modern Houses Wood Mantelpieces are now very largely used. We keep a large stock of the latest and most modern designs from the plainest to the most elaborate, and the prices are the lowest. In wood mantelpieces the most essential thing is that the wood used should be dry and well seasoned. We make a special point that all our mantelpieces are made from well seasoned Timber.

Prior to fixing mantel, the back should be painted with a heavy coat of white lead and oil or any good paint. If this is done there should be no fear of our mantels warping or twisting. Should our clients require mantels and overmantels made up to their own designs or details, we shall be pleased to forward quotations.

In the prices given in this Catalogue PRIMED means painted with one coat white lead and oil, STAINING means stained either Walnut, Rosewood, Oak, Green, of various colors, and Cedar.

WHEN GIVING MEASUREMENTS OF FIREPLACE OPENING PLEASE GIVE SIZE AS PER DIAGRAM BELOW.

MI 559.

State also whether the Fireplace is an ordinary Breast or on the angle.

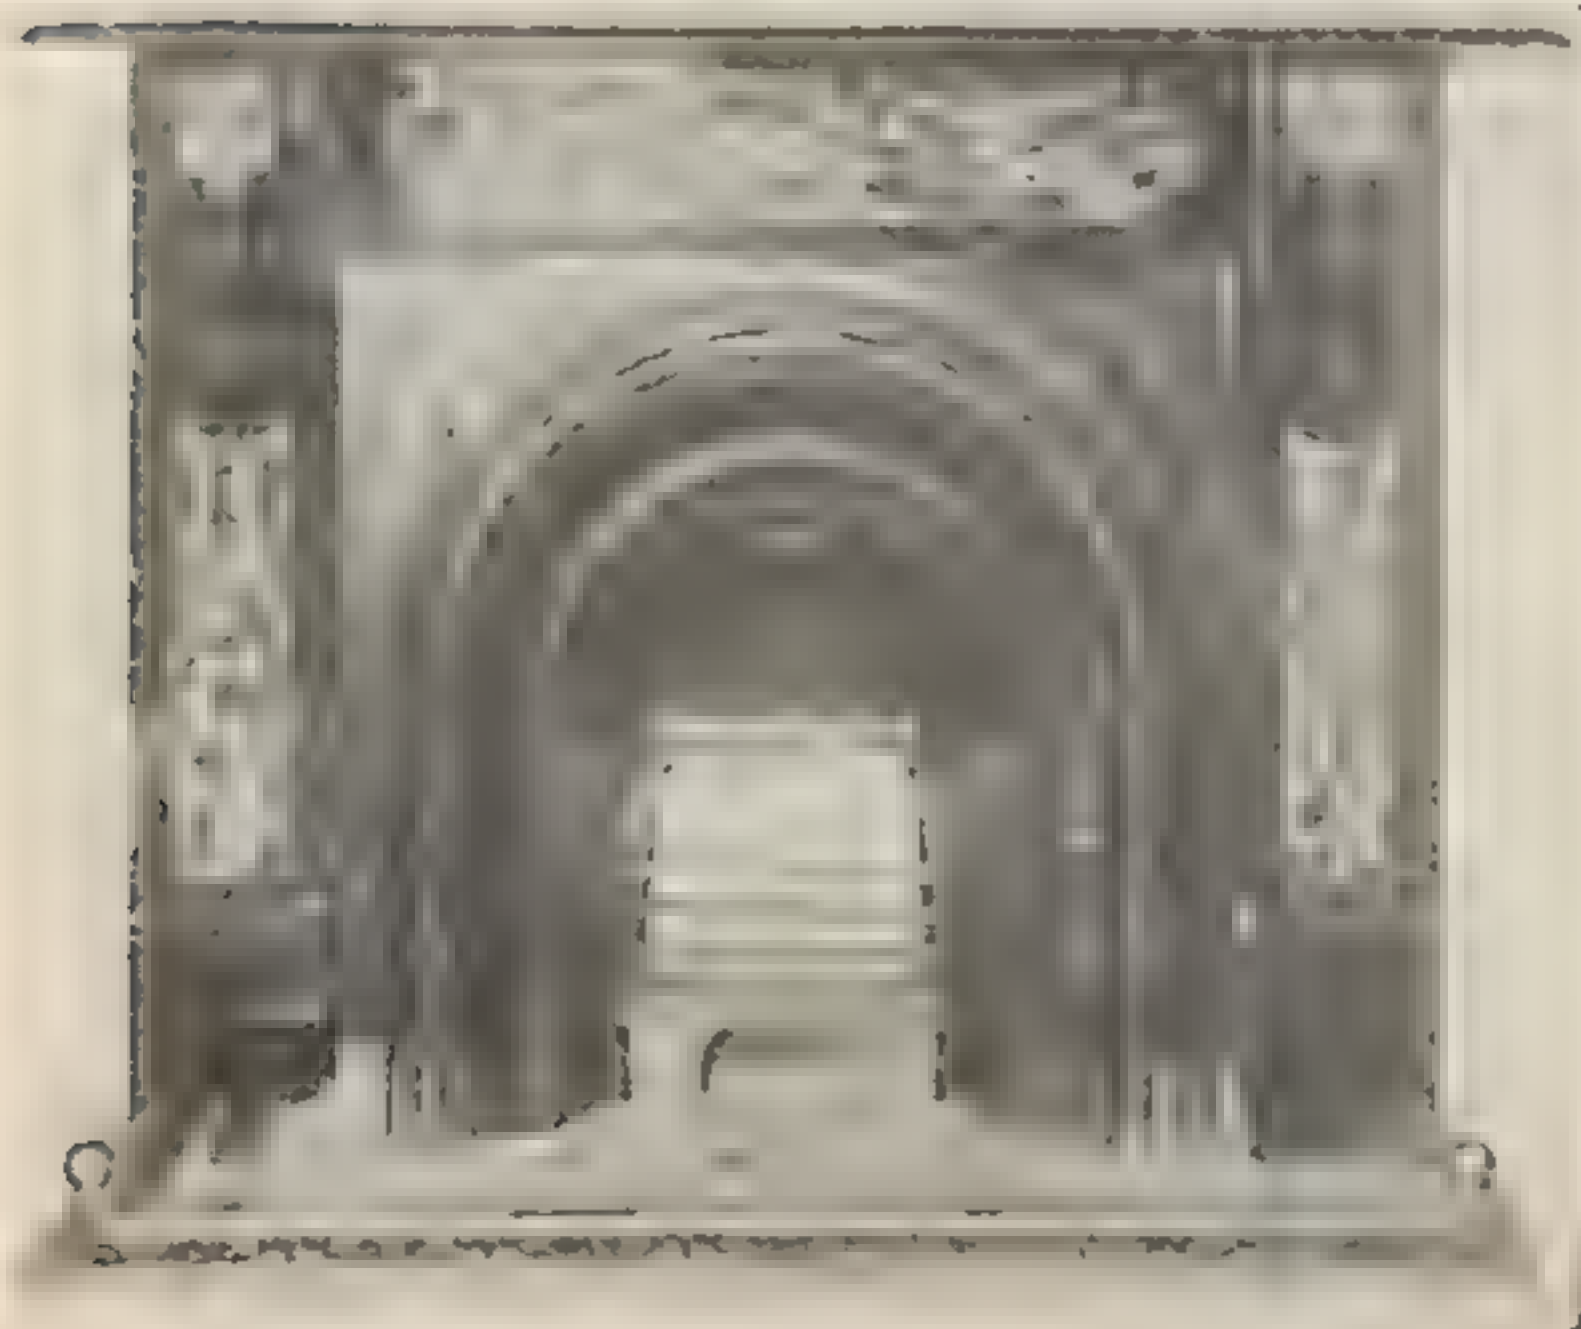

Measurements Required -

A to B, side of jamb; C to D, side of jamb; B to C, width of opening; B to E, heights of opening; G to H, height of opening over all.

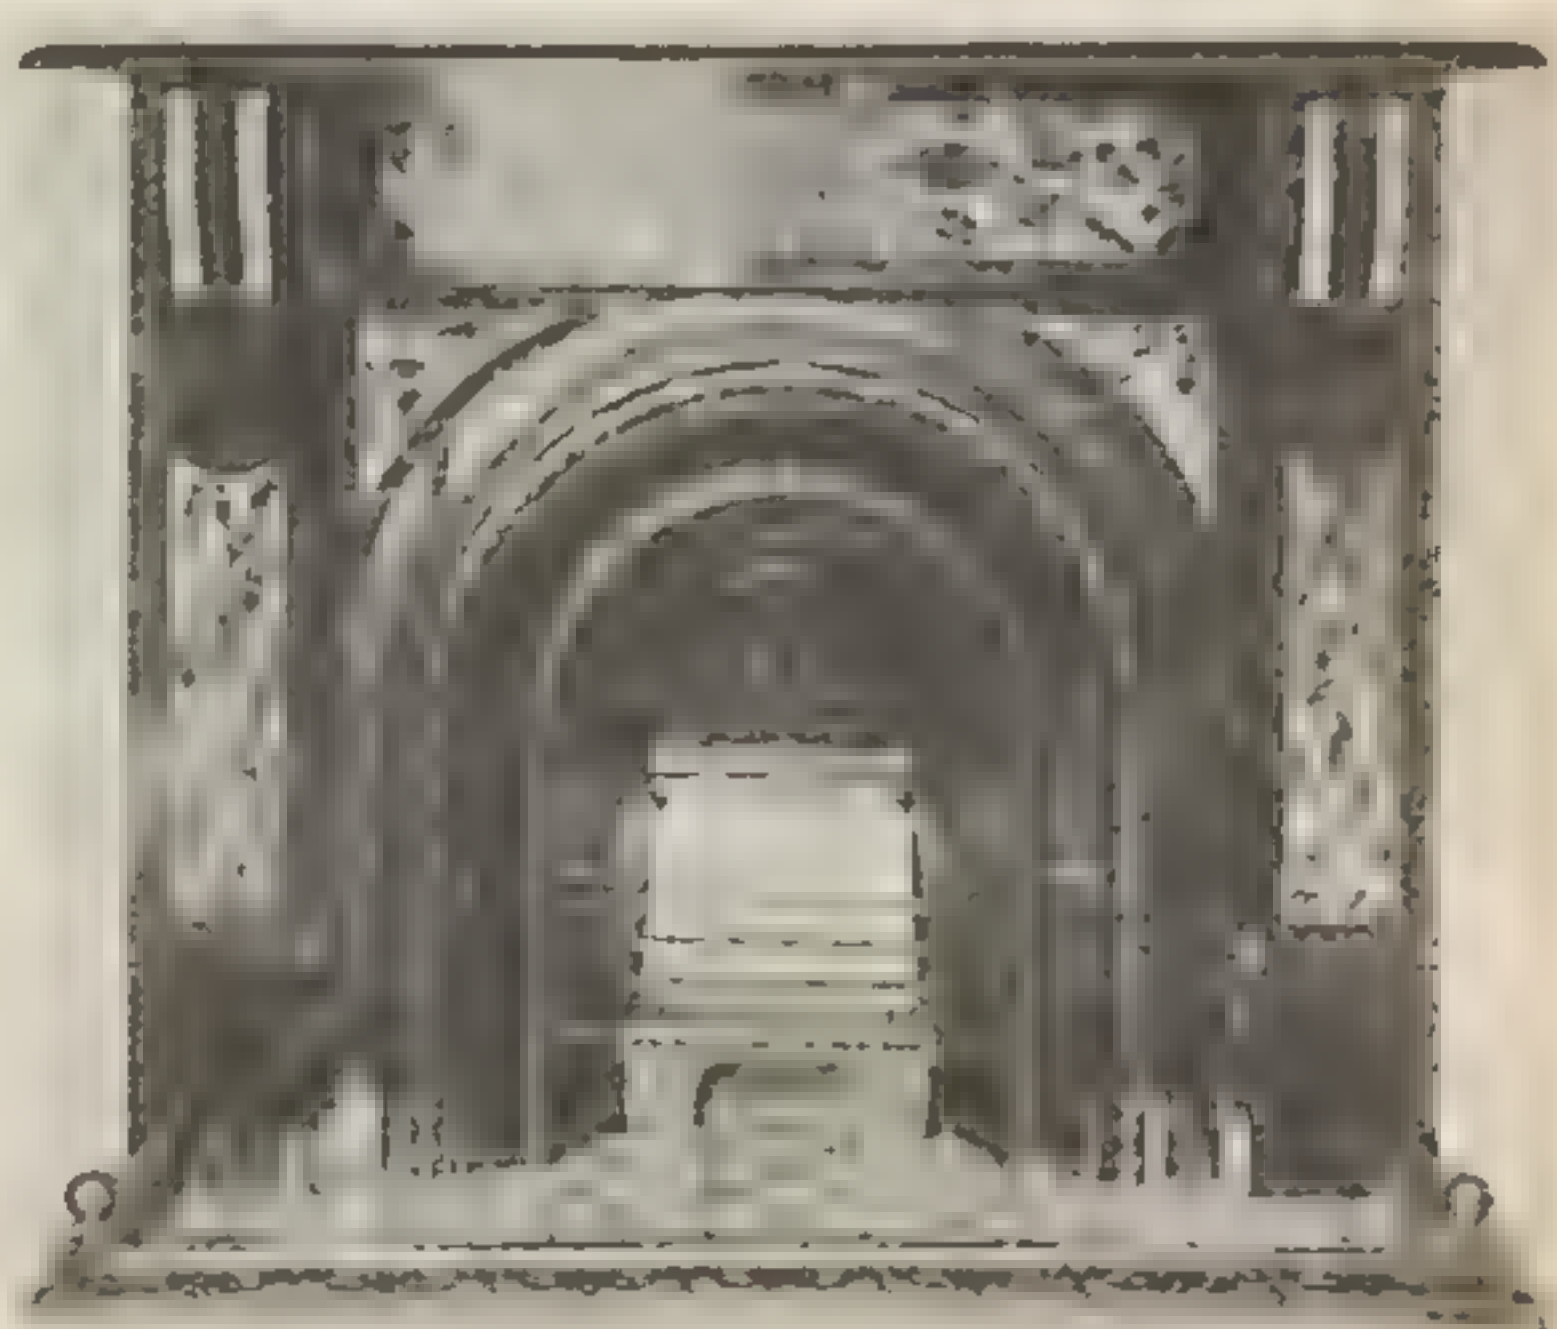

These Wood Mantels are usually made 36 inches wide by 36 inches high, to suit grates 36 inches by 36 inches or 38 inches by 38 inches; larger sizes can, however, be made at a slightly extra cost. When ordering please state height and width of opening. Mantels are finished either Stained Walnut or Enamelled Marble.

Marble Mantelpieces

Our stock of Marble Mantelpieces comprises the newest styles and patterns made. Having our own Marble Factory, and buying the Raw material direct from both the Continental and local quarries, we are enabled to produce Mantelpieces at the lowest possible price, and at the same time the quality of the work produced is the very best.

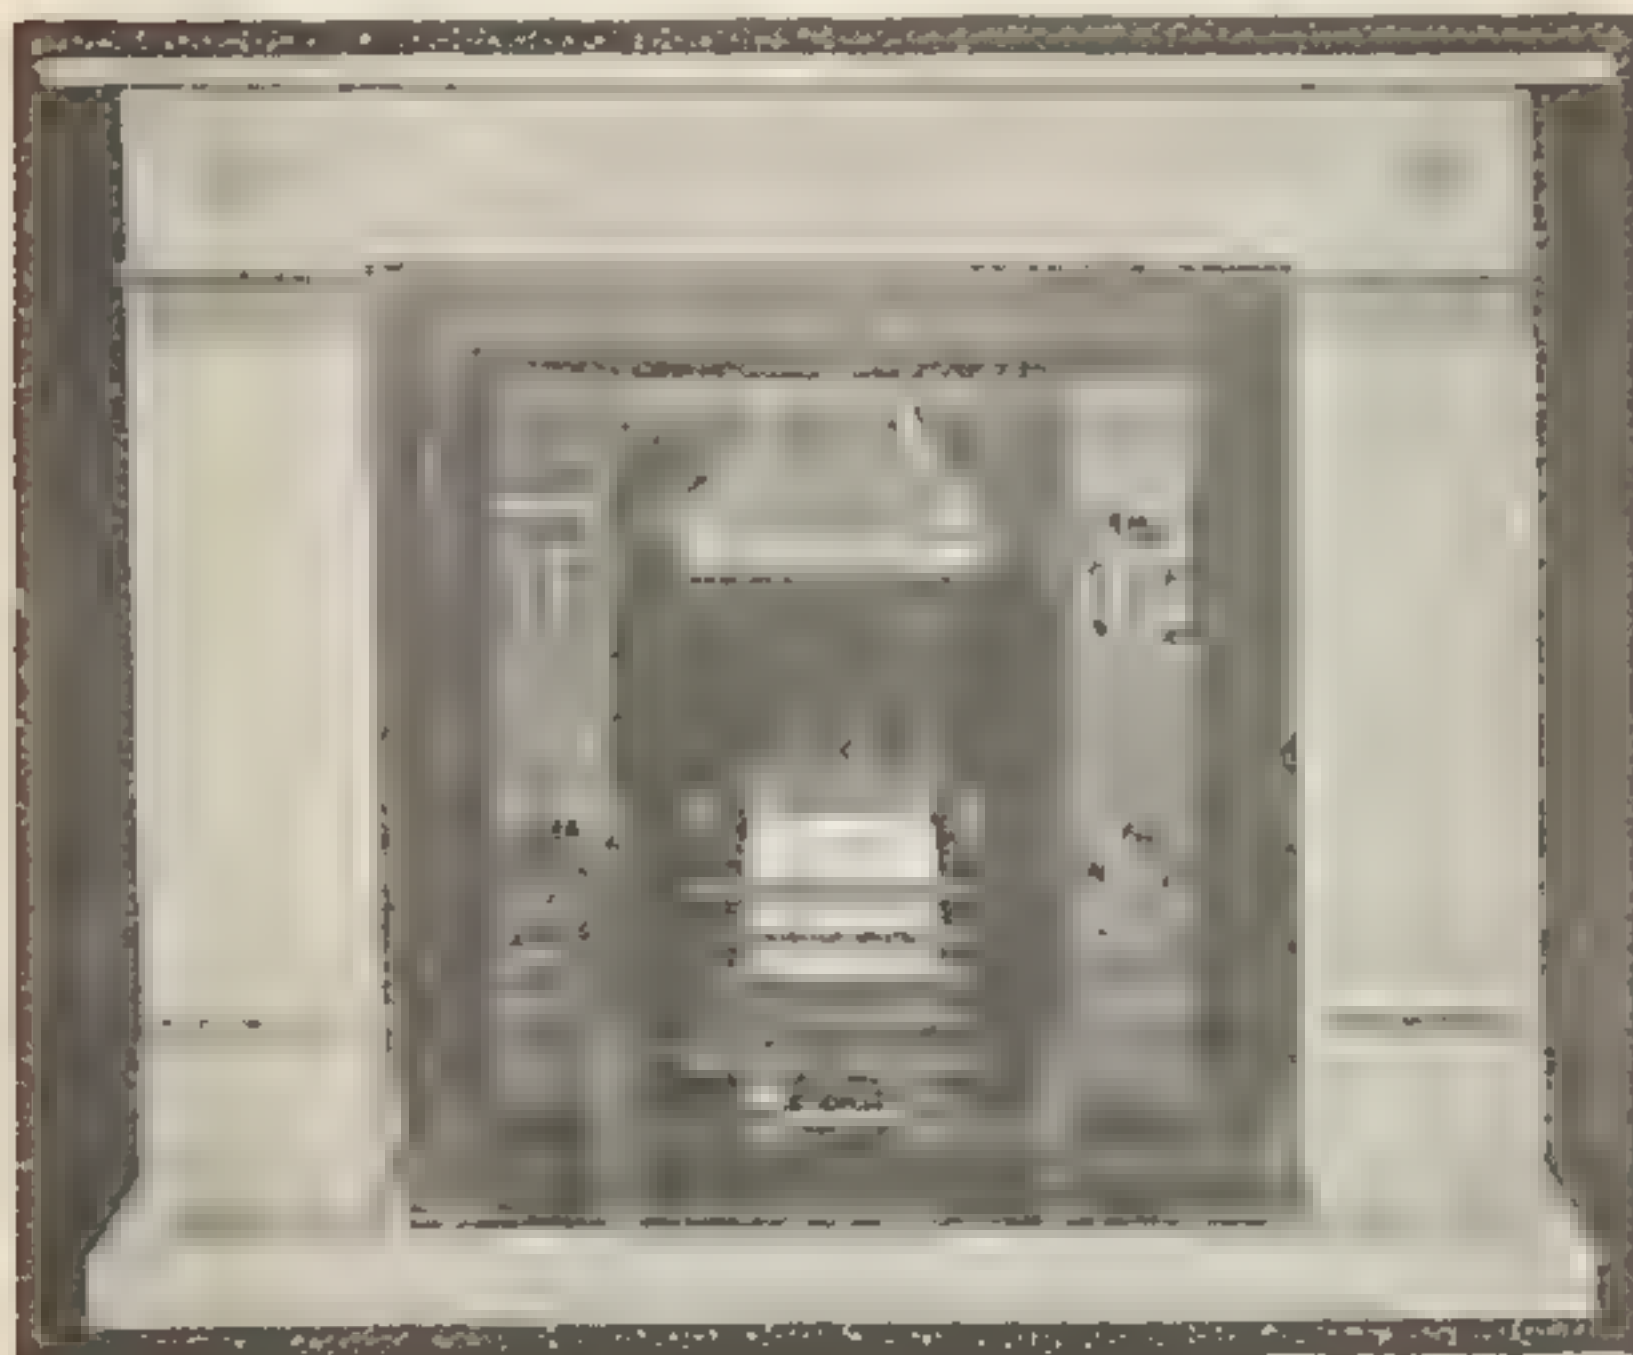

We hold large stocks of Sicilian, Rouge, St. Ann's, and also Colonial Marbles, Borenore, etc., and are able to quote for any special Marble work required, such as shop fronts, interior decorations, etc.

The openings of Marbles shown are to take grates up to 38 inches x 38 inches. Special sizes are made to order.

Marble Kerbs for Hearths

To properly finish a Tiled Hearth it is necessary to have a Kerb to match the color of Mantel-piece. In Kerbs, nothing looks as well, or is so serviceable, as Marble. The stock sizes of Kerbs, and for which prices are quoted, are 4ft. long and 12in. wide, inside measurements. When ordering, it is very essential that exact measurements should be sent so that the Kerbs can be cut to suit.

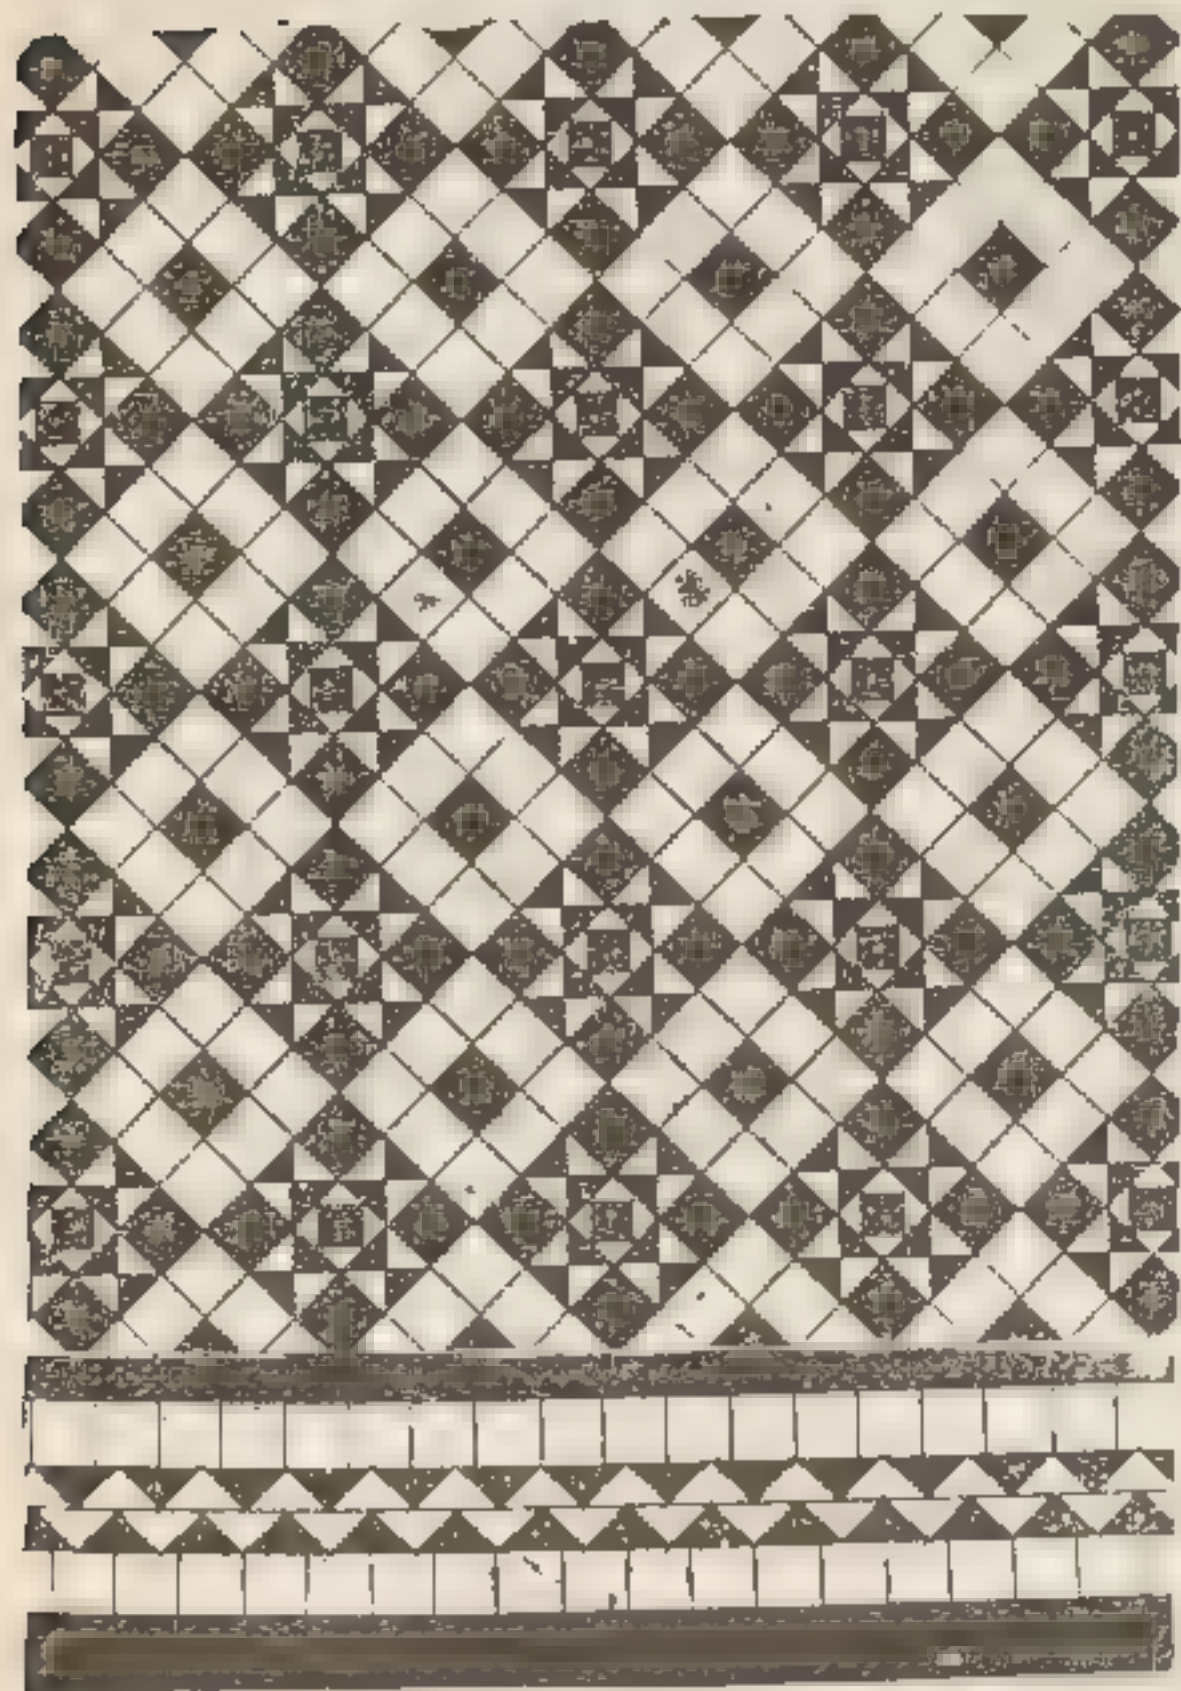

Can be supplied with Round Top or Chamfered. Round Top is always sent unless specially mentioned. Australian Marble—

Height 3in., width 1½in., Round Top	14.-
Height 3in., width 2in., ditto	18 6

Grates of Various Patterns

For the comfort of a house a good Grate is very necessary. There are Grates of various kinds the ordinary Register Grate, the Grate with Side Cheeks for Tiled Panels and the latest and most modern, the "Interior" Grate, the latter fixed with Tiles at each side. Our stock is replete with different patterns of the above Grates; and we also show the many various kinds of Grates in our illustrations of Mantels, as follows—

Register Grate, from	9/6
Tiled Grate	21/-
Interior Grates	25/-

Dwarf Interior Grates

MI 603.

MI 603.—LINTERIOR GRATE.

This Grate is specially adapted where there is a likelihood of the chimney smoking. The Grate is fitted with two Dampers; by opening the lower Damper, which is directly over and close to the fire, it forms a strong direct draught, which, as soon as it heats the flue, forms a rapid current of air, thus carrying off the dense smoke. When the fire is well under way, the lower Damper can be closed, the upper one remaining open,

This Grate has a very large Firebox, suitable for burning logs of wood, and it can be supplied in various handsomely finished designs.

The Grate has a front attached, which is removed when the fire is alight, but can remain fixed when Grate is not in use.

A large assortment ranging from 40 - up to 95/-.

MI 605.—DWARF INTERIOR, width 22 inch, Height 30 inch, Adjustable Canopy, Fine Cast 27/6

**Washing
Machines
in
Various
Sizes,
from
£5
to
£9 10s.**

Full Particulars on application!

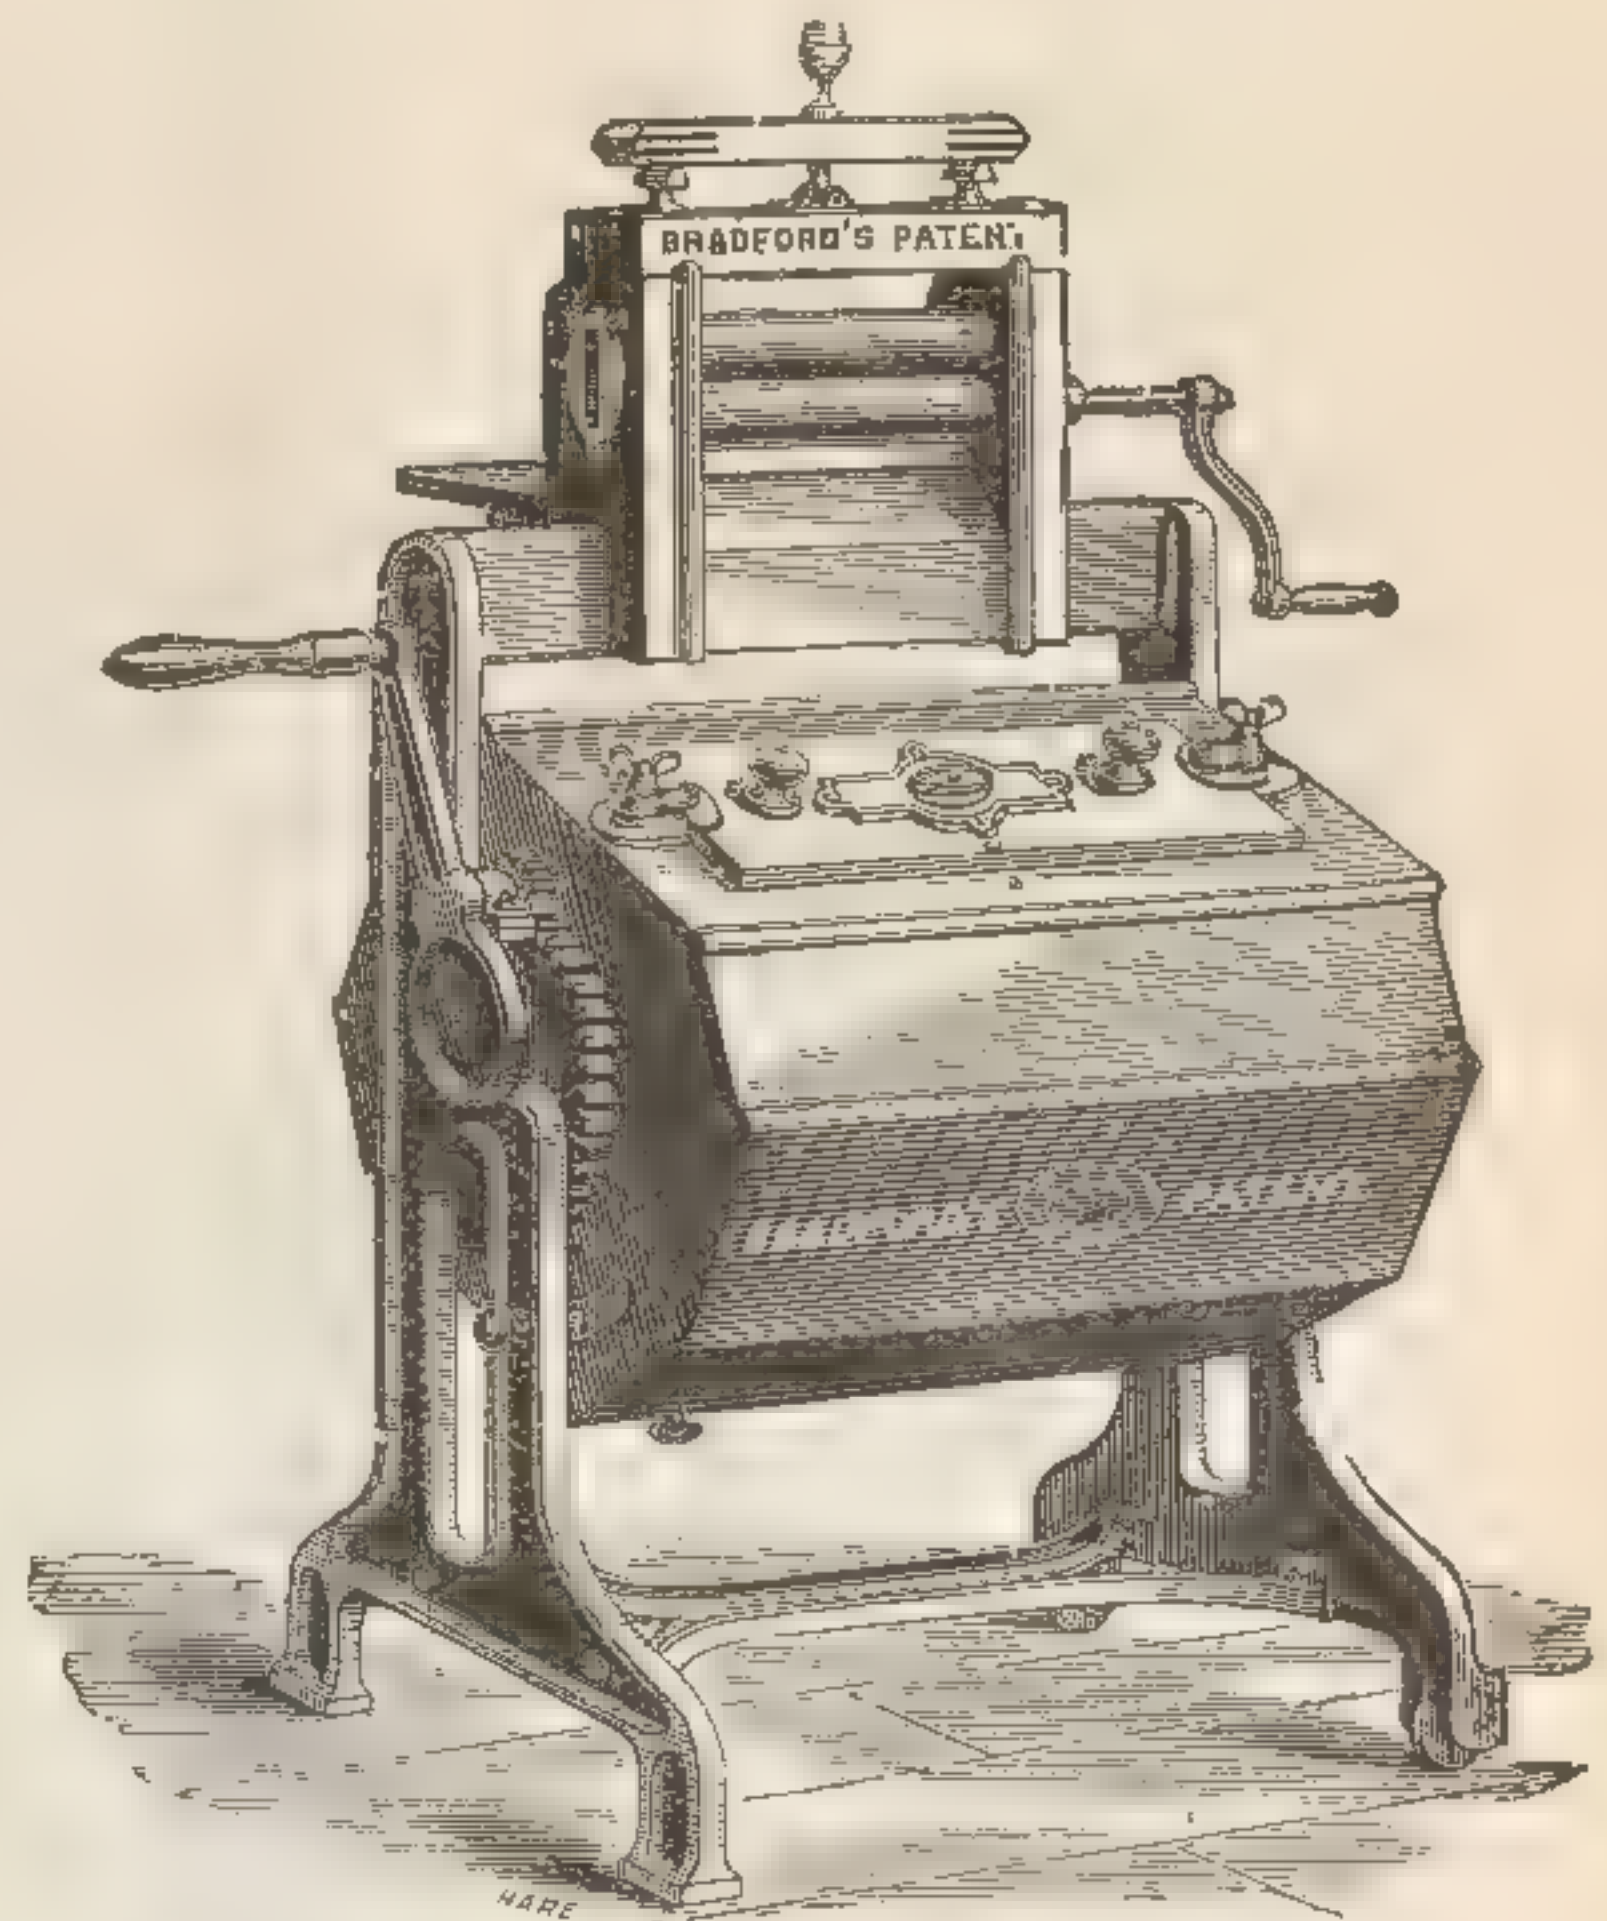

MI 624a.

THE "UNIVERSAL" (MI 622).

Wood Frame, Rubber Rollers, and metal parts Galvanised, fitted with Steel Spring and improved Guide Board—

10-in., 15/6; 12 in., 21/-; 14-in., 24/-.

MI 624.

Vowel A size is a favorite family machine. Its merits as a simple, compact, portable and efficient Washer are universally acknowledged. Twelve shirts can be easily washed in 15 minutes by this machine. Weight, 1 cwt. 2 qrs. 10 lbs.

Price, without Wringer, £6/6/-.

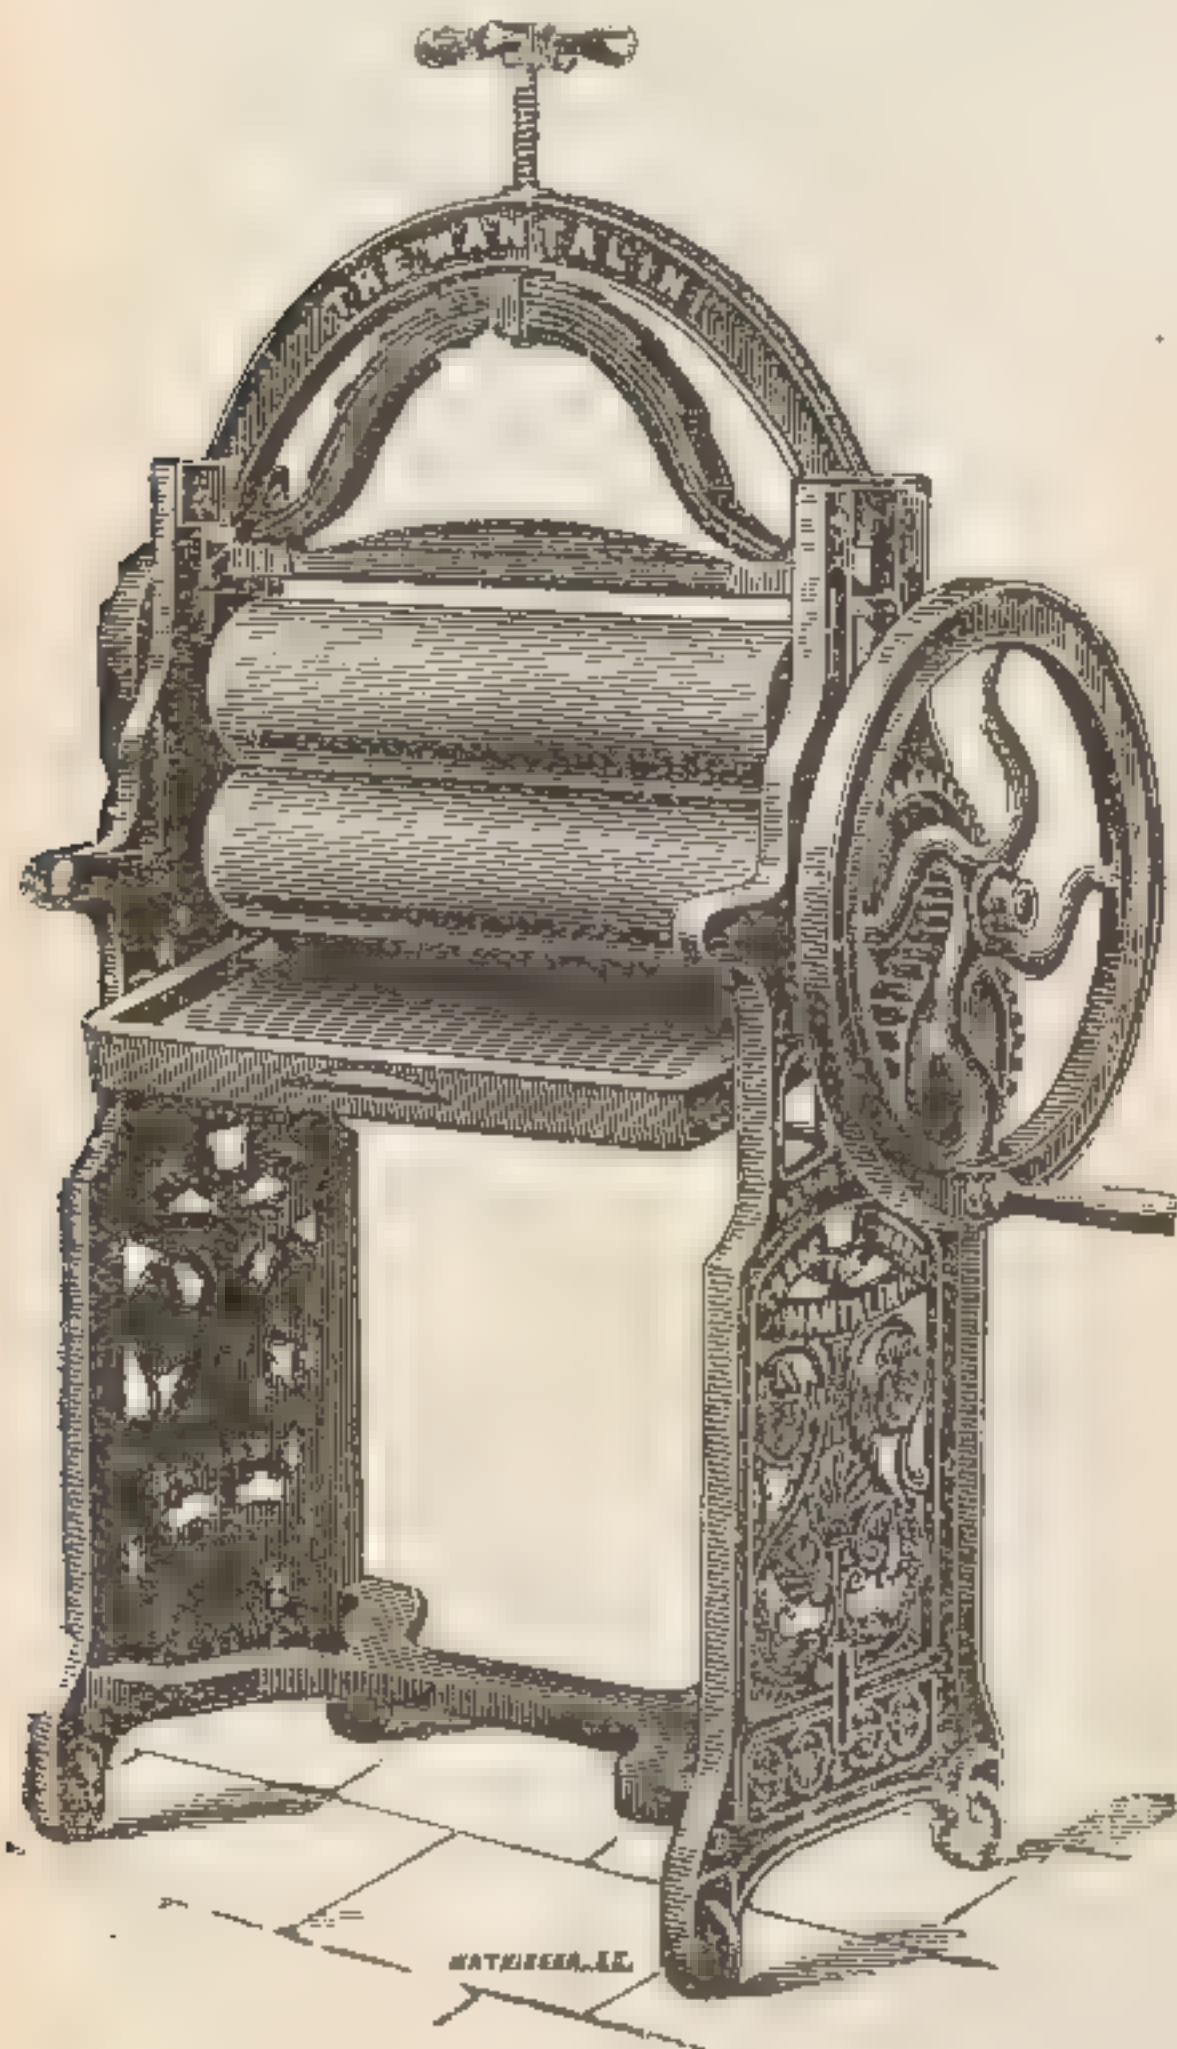

UNIVERSAL PROVIDERS.

Mangles

This is a Department we have spent some time and labor upon. We had a celebrated English maker here and described to him the very things we wanted. The result was that we produced together the "Crowning Glory" and "Mantalini" Mangles.

Badly-made Machines are dear at any price, and cost more than their original value in repairs. We have had no complaints, but frequently our customers speak of the great satisfaction the Mangles have given, and have recommended their friends to purchase.

Each Mangle is fitted with Patent Roller Bearings, which reduce the friction, making the Machine so easy that it is a positive luxury to use it.

THE "MANTALINI" MANGLE (MI 626).

This is a well-designed and handy machine. It is fitted with Patent Roller Bearings and improved Slides for holding Mangle Boards.

We keep a stock of every part, so that if a mishap occurs it may be rectified at once.

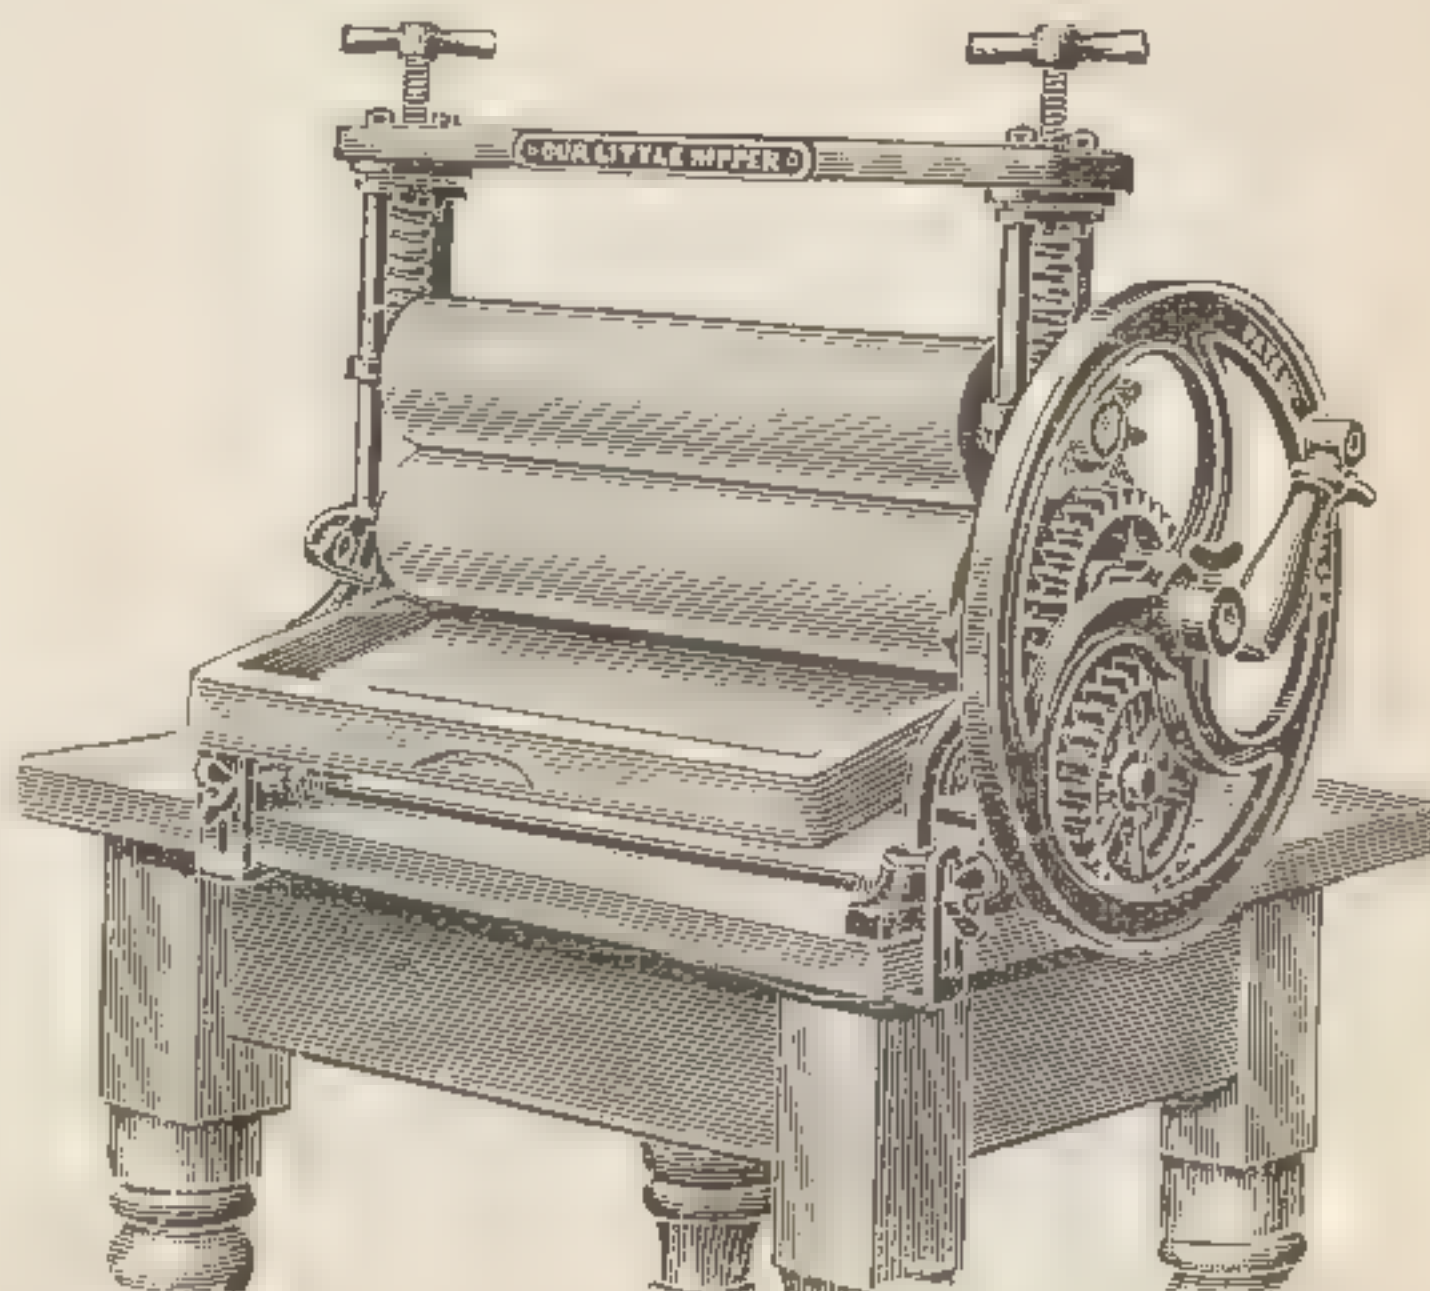

No. 250—21-in. Polished Rollers, weight 2 cwt. 0 qrs. 21 lbs. 62/6

No. 251.—24-in. Polished Rollers, weight 2 cwt. 1 qr. 10 lbs. 67 6

Owing to the demand for a Cheap, Good, Serviceable Mangle, we can supply a Mangle similar to the "Mantalini," called "The Crown," without Roller Bearings.

Length of Rollers, 22-in. 57/6

Length of Rollers, 24-in. 60/-

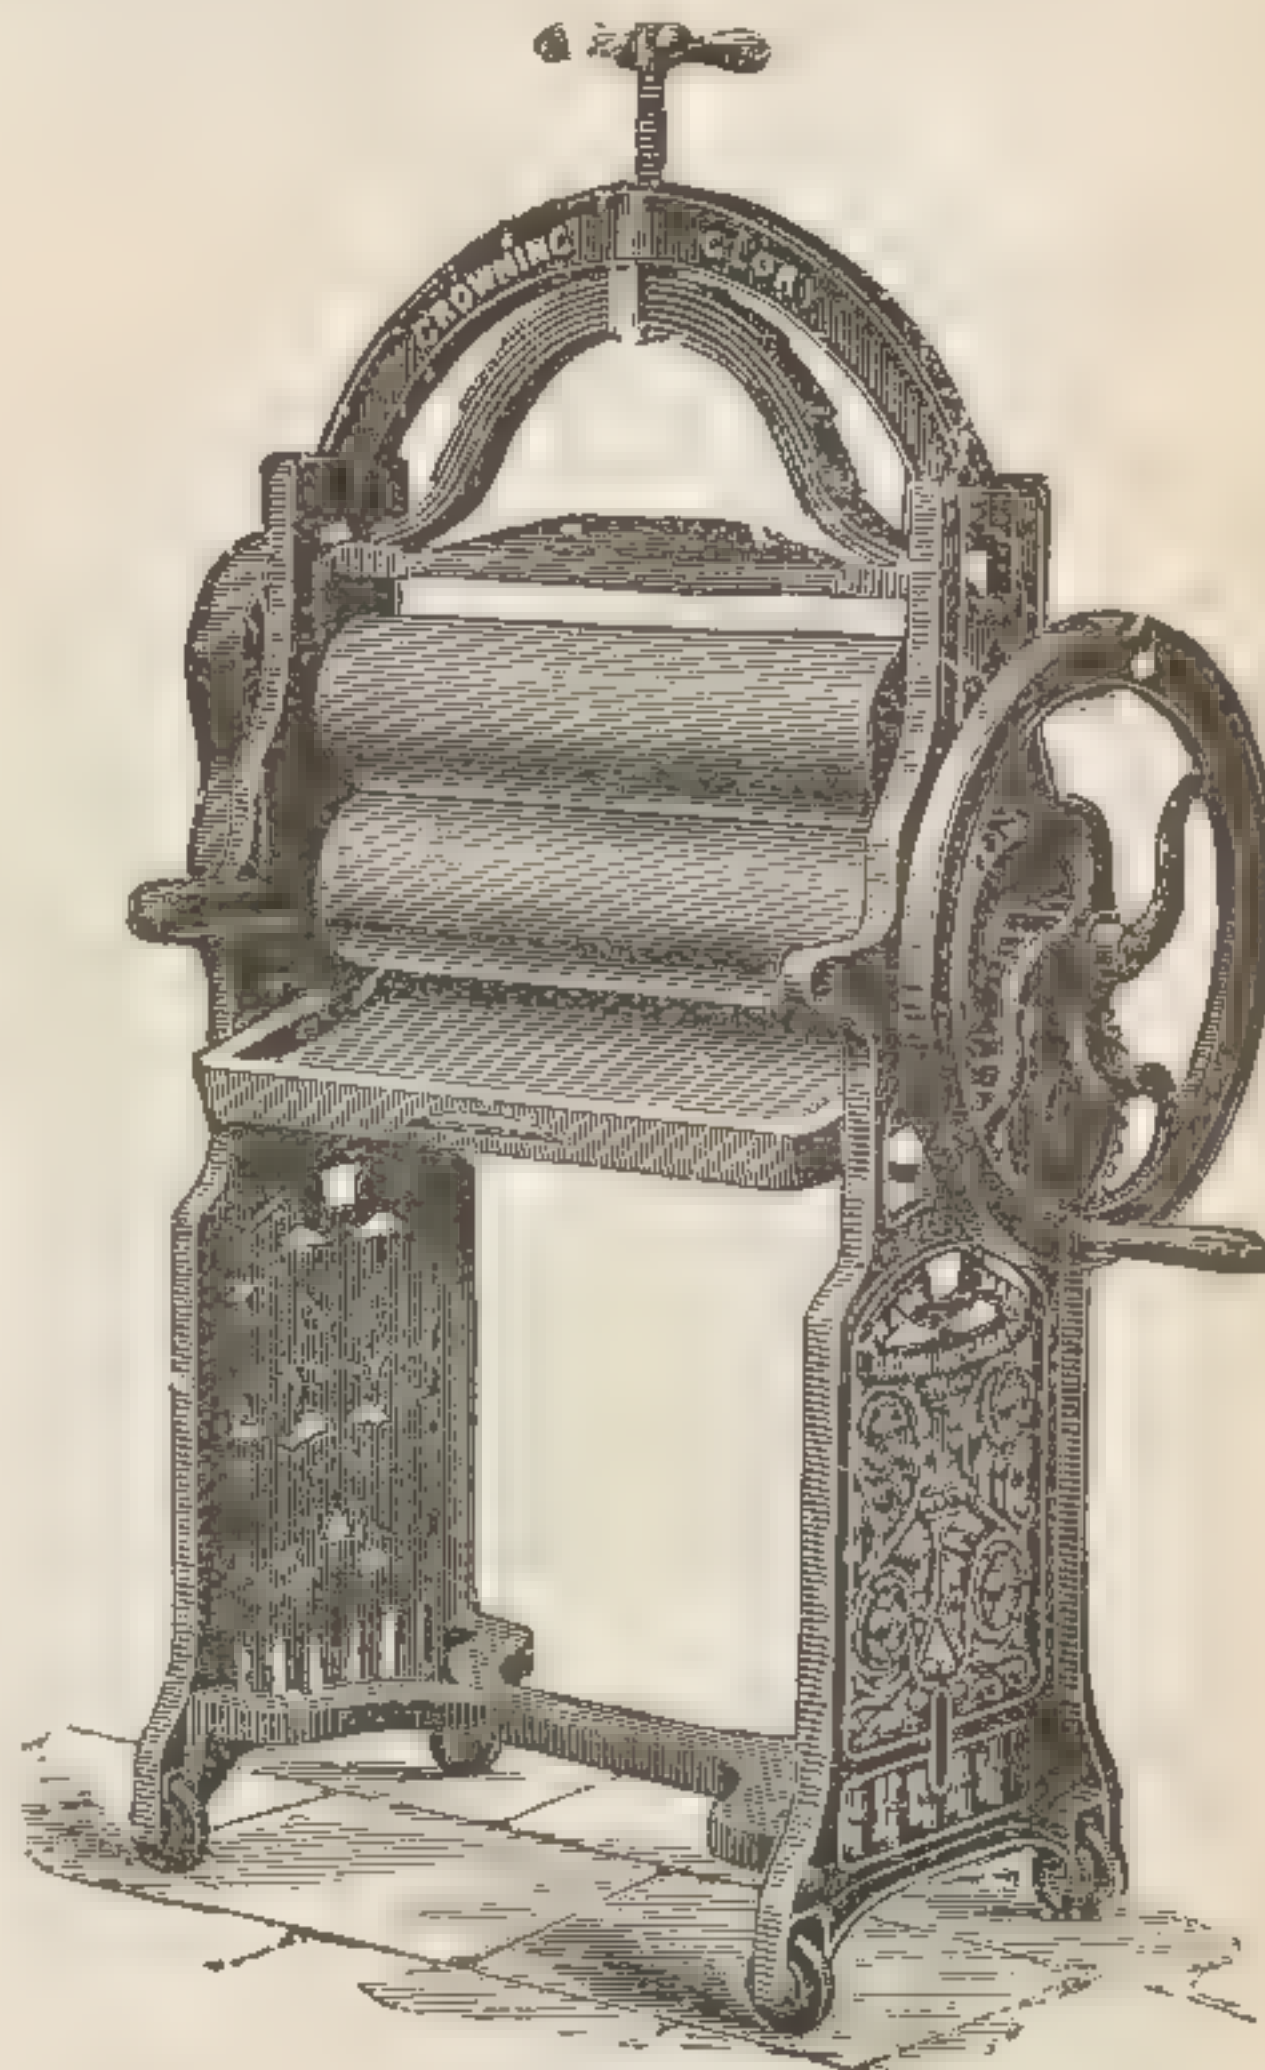

MI 625.—THE "LITTLE NIPPER" TABLE MANGLE, 20-in. Rollers, will fit on any table, 30/-
"HOUSEHOLD" TABLE MANGLE,
24 in. Rollers 30/-

The Crowning Glory Mangle.

(MI 627.)

(Registered.)

We recommend this machine with great confidence; it has been designed to meet the wishes of our numerous customers. The framework is exceptionally strong, with heavy Wood Rollers. It is also fitted with Patent Roller Bearings, which make it the easiest working Mangle in the market.

THE "CROWNING GLORY" MANGLE (MI 627).

No. 252.—24-in. Polished Rollers, weight 2 cwt. 1 qr. 20 lbs. £4

No. 253.—27in. Polished Rollers, weight 2 cwt. 2 qrs. 21 lbs. £4/10/-

No. 254.—30-in. Rollers, weight 3 cwt. £5

Duplicate parts can always be had.

RE-PLATING ELECTRO-PLATED GOODS

We can make all your old and worn-out Silver Goods equal to new at a very small cost. The cost depends entirely on the amount of silver deposited. We quote two qualities below; A quality we guarantee, with proper care, to last ten years; B quality, six. For heavier deposits of silver we will be pleased to quote a special price on application.

D.M.L. Tyre Bending Machines

MT 25.—No. 5A Machine: Capacity, 4 x 1 inch Tyre; Approximate Weight, 1 $\frac{3}{4}$ cwt. £8 10s. each

MT 26.—No. 6A Machine: Capacity, 6 x 1 $\frac{1}{2}$ inch Tyres; Approximate Weight, 3 $\frac{3}{4}$ cwt. £12/- each

These Machines are recommended as being more durable and efficient than any other Machine of the kind. The Machines have solid cast iron frames and very powerful gearing. The cylinders are **Wrought Iron**, case hardened. The two outside cylinders are fluted, pressure being effected by set screw underneath. A Welded Tyre can be replaced in the Machine for finishing off by simply drawing out spindle of the top cylinder. The larger Machine has extra gearing and either Machine requires little power to work it. Warranted to bend a bar of iron to any desired compass.

"Green River" Tyre Welding and Upsetting Machines

(Horizontal)

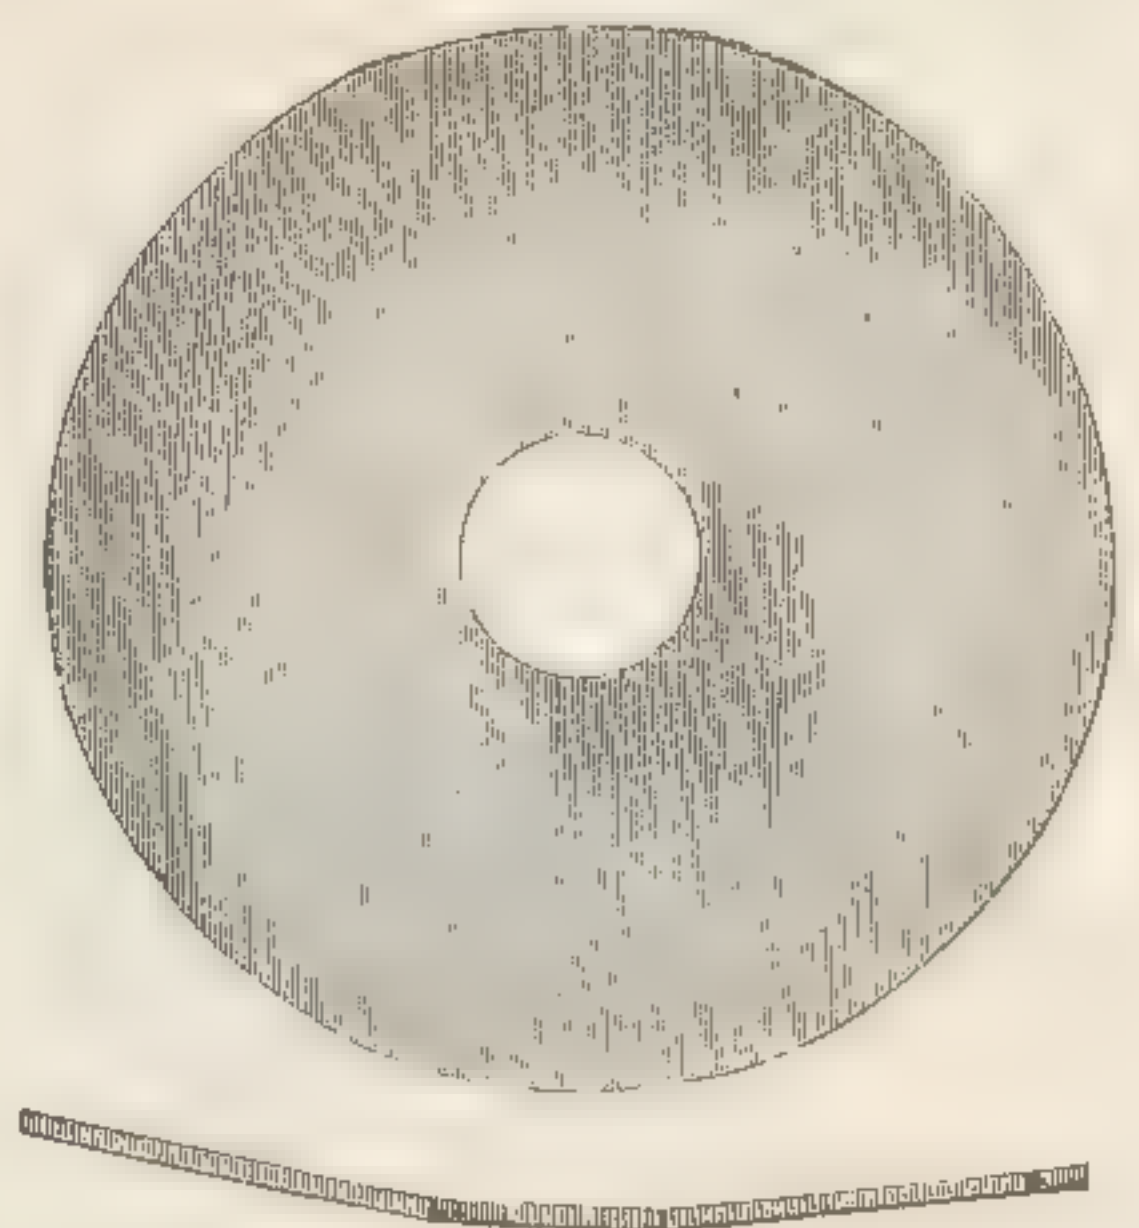

MT 27.

No. 1 Machine: Capacity, 3 inch Tyre; Approximate Weight, 1 $\frac{3}{4}$ cwt. £5/5- each

No. 1 $\frac{1}{2}$ Machine: Capacity, 4 inch Tyre; Approximate Weight, 2 $\frac{1}{4}$ cwt. £6/- each

These Machines are managed by one man with perfect ease, and work well within their capacity. The gripping cams standing open are instantly adjusted to the Tyre, and are readily withdrawn to release it after upsetting. The handles may be taken out of the socket when not in use

Cast Iron Tying Plates

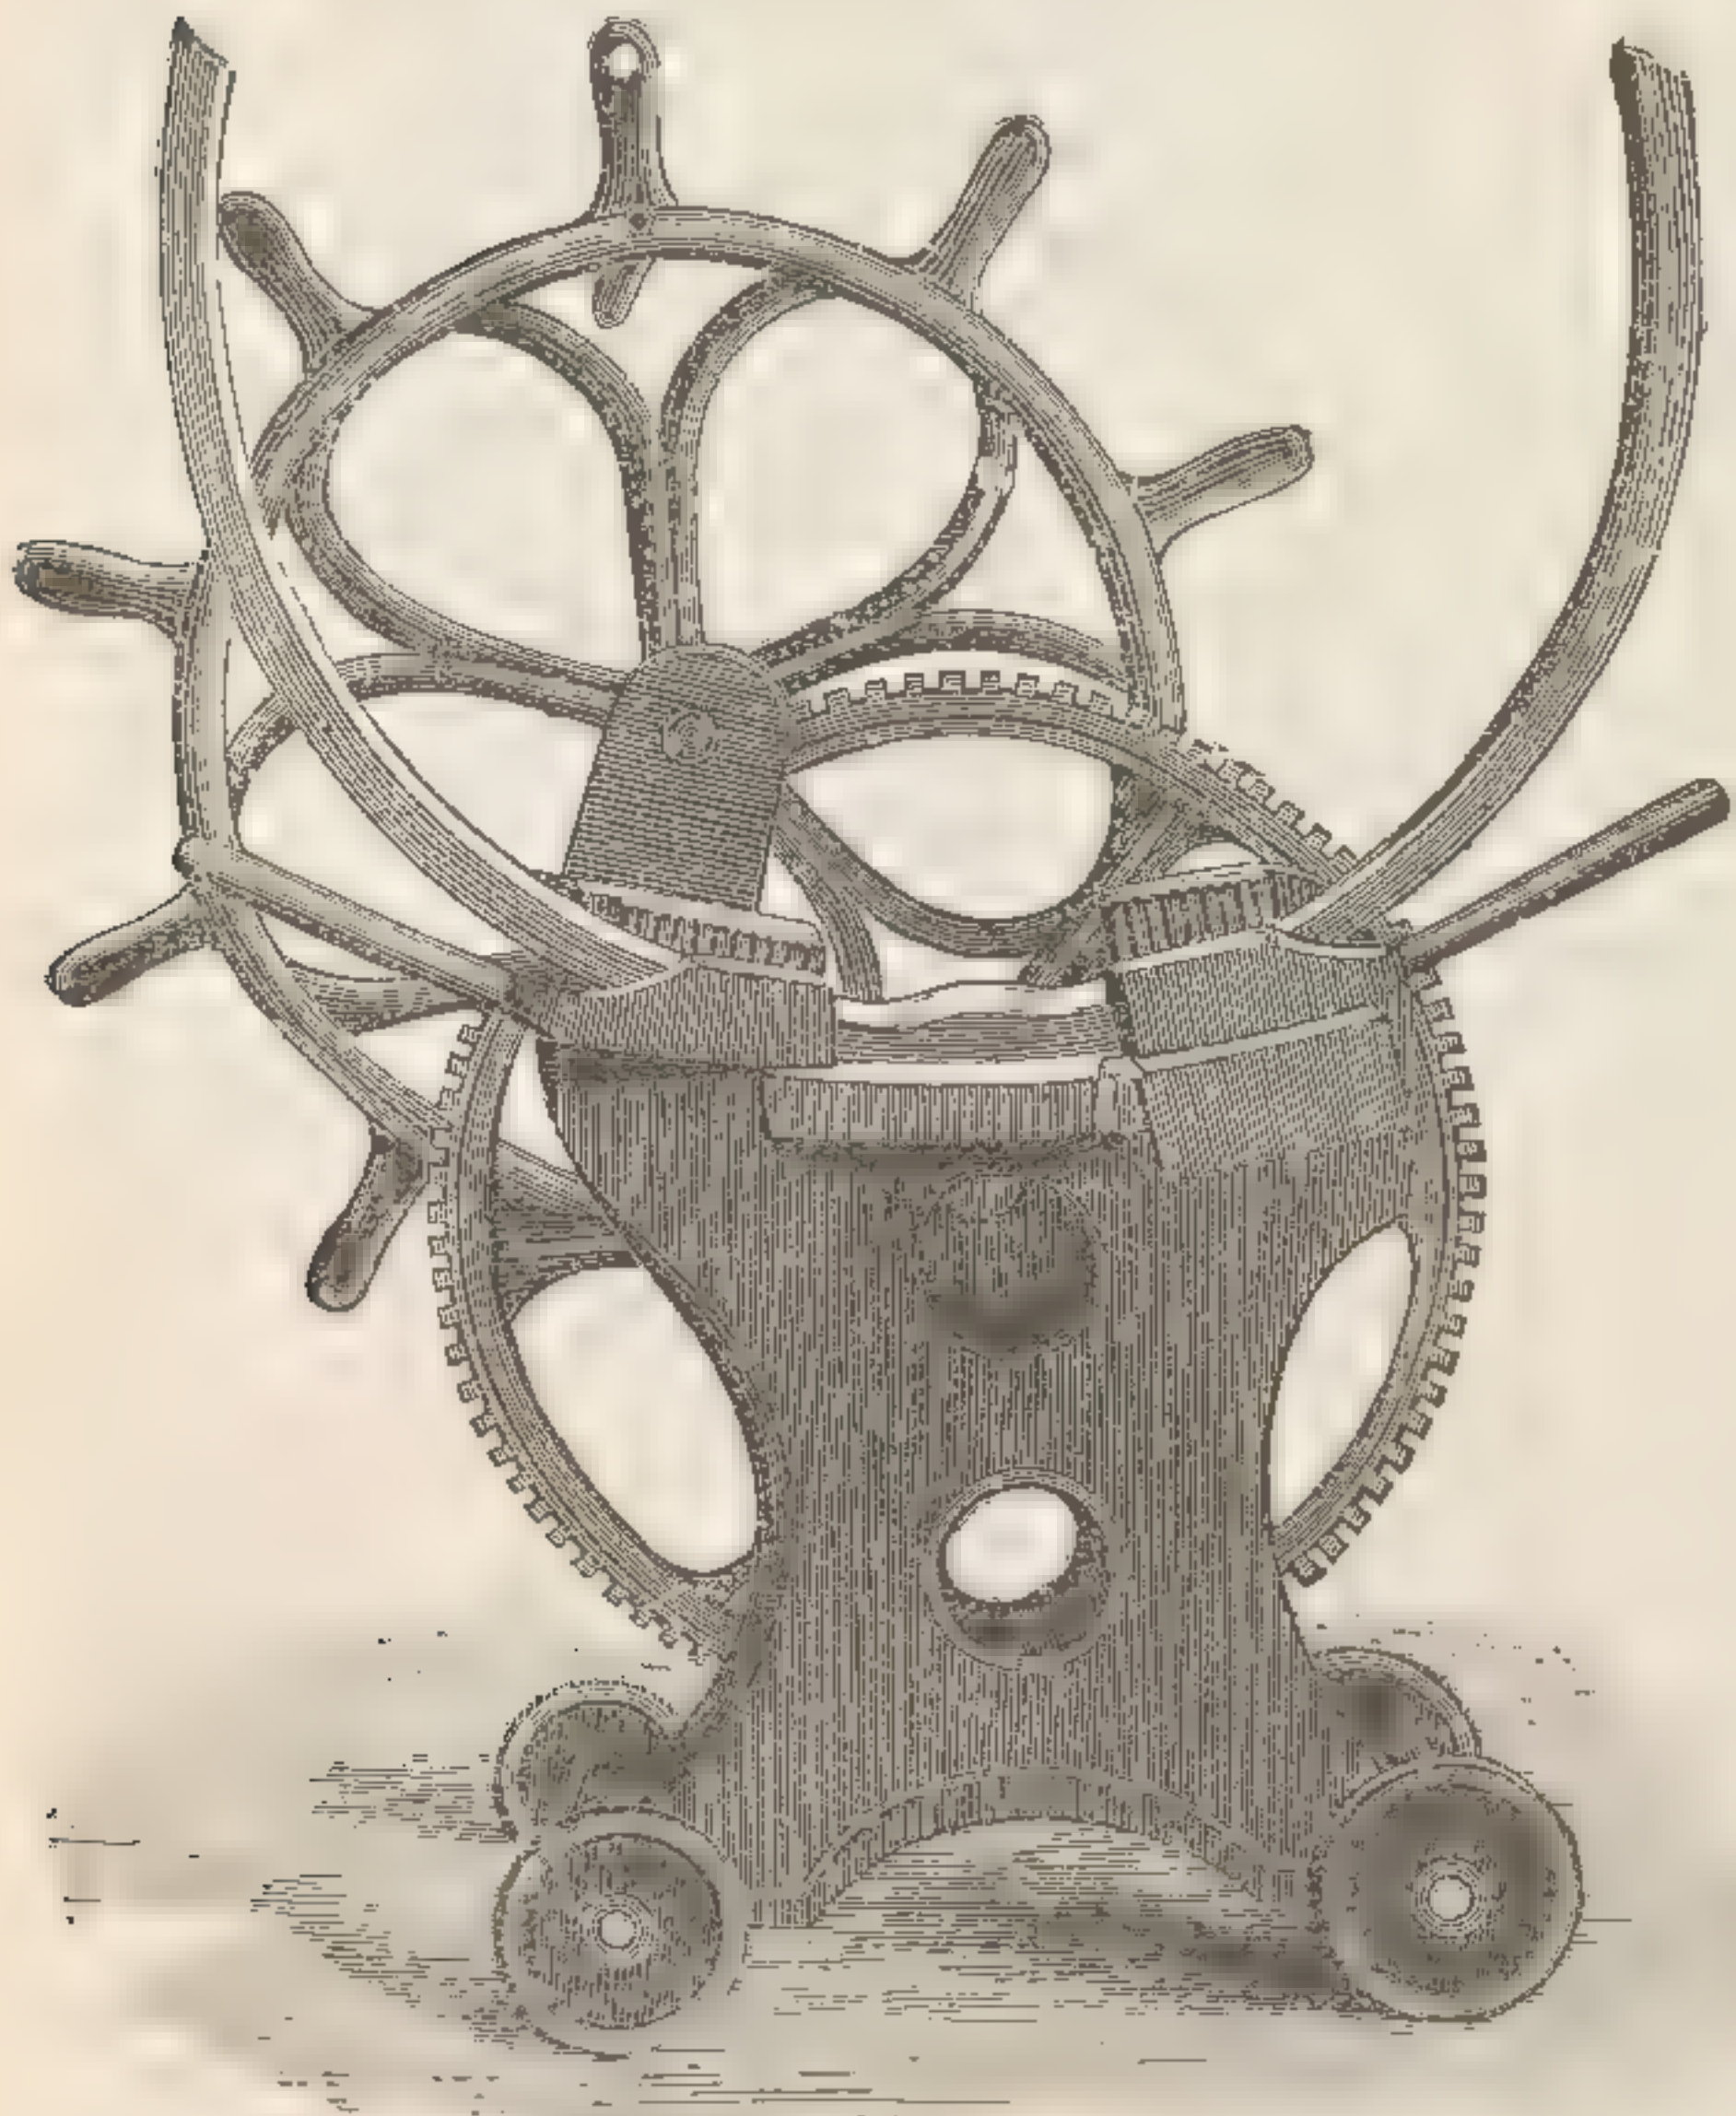

MT 28.

1 $\frac{1}{2}$ inch Thick, 1 $\frac{1}{2}$ inch Dish, 20 inch Hole.
5 feet 8 inch, 12 cwt., £9; 6 feet, 14 $\frac{1}{2}$ cwt., £11;
7 feet, 18 cwt., £16.

MT 29.

Weldarine.

Before Welding.

WELDARINE is guaranteed to Weld Cast Iron—

Large set, complete 25 6
Small set, complete 15 -

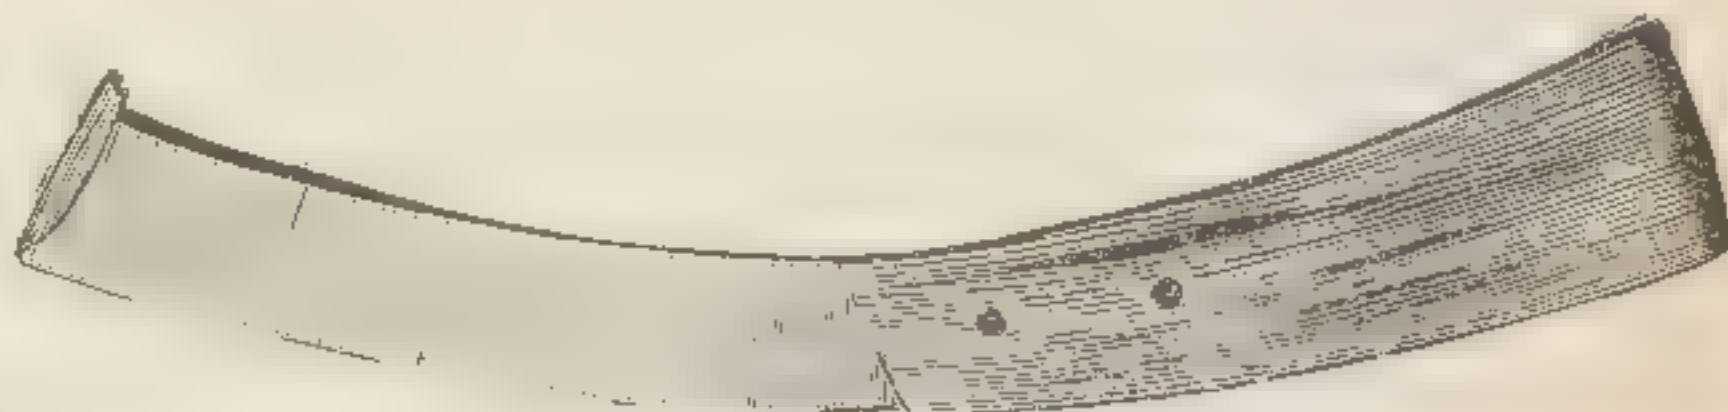

Full instructions with every set.

INSURE AGAINST SERIOUS LOSS THROUGH A BREAKDOWN!

Everybody who uses Tools or Machinery has something broken occasionally. The Farmer in the midst of his harvest loses a part of his crop because he has to wait for repairs; the Manufacturer loses hundreds of pounds, while machinery lies idle, for a part that costs only a few shillings to repair.

Weldarine is Quite Easy to Use.
Every Set is Complete.

After Welding.

MT 20.

No. 1 Machine: Capacity, 4 inch Tyre; approximate weight, 5½ cwt.—

£13/10/- each

No. 2 Machine: Capacity, 5 inch tyre, approximate weight, 6½ cwt.—

£15 each

No. 3 Machine: Capacity 5¾ inch tyre, approximate weight, 8¼ cwt.—

£16/10 - each

These machines save all cutting and welding of tyres. They are easily worked, durable, and economical, and meet with universal approval. The cams which grip the tyre are readily set and can be instantly withdrawn from the finished tyre by means of the levers. Axles can be shut up and lengthened or shortened in this machine.

Blacksmiths' Materials

BAR IRON.

For Wheelwrights' and general Smithing purposes, we stock Netherton Bar Iron, which many years' experience has proved to be uniform in quality and most suitable for the above purposes, and which we can thoroughly recommend.

For Horse Shoeing we keep "Rivet" brand, and, after making exhaustive tests, can confidently recommend this brand to Farriers. The "Rivet" was selected, from a large number of others, by the Sydney Tramway and Omnibus Company, and has been used by that Company and other leading Farriers for years past with most satisfactory results.

Ordinary sizes. £10/15/- per ton, 11/- per cwt., subject to usual list of extras.

Shoeing, £11/15/- per ton; 12/- per cwt.

Price, 28/- For 5 cwt. or over, 1/- per cwt. less.			

You cannot expect to get good work out of your horse unless he is well fed, well sheltered, and, above all, well shod. You want a shoe that fits and is adapted to the horse's work. This we can supply in the A1 Crown Horse Shoe.

We use only the best material in our Horse Shoes, as it is impossible to make a good Shoe out of poor iron. Supplied with the best material, and employing only the most experienced workmen, we turn out Shoes superior in shape, fitting, and finish to the best imported Shoes, and at a much cheaper rate, as they are entirely free of duty.

We stock many shapes and styles, but only one quality—the best. We feel confident that we can supply the wants of consumers, wherever situated. The quality, finish, and standard of our Shoes cannot be improved upon, and we will gladly furnish samples of any pattern on request.

EVERYTHING SOLID VALUE

A1 Crown Galvanised Iron

CORRUGATED, 26-gauge.

Best quality, 3-in (Ordinary) and 1-in. Corrugations.
Length 5 6 7 8 9 10ft.
Sheets per case, about
10 cwt. 115 96 82 72 64 57

CORRUGATED, 24-gauge.

Best quality, 3 in. Corrugations.

Length .. . 5 6 7 8 9 11 ft.
Sheets per case about
10 cwt. 83 70 60 52 47 42

PLAIN.

In all gauges from 16 to 28 gauge; sheets 6ft. long,
2ft., 2ft. 6in., and 3ft. wide.

All our Plain Sheets are Patent Flattened.

Quantities of $\frac{1}{2}$ ton or over are charged at ton rates, and packed free; smaller lots, 6d. per cwt. extra; and packing cases to 8ft., 2/-; 9ft., 2 6; 10ft., 3 - extra.

The A1 Crown Galvanised Iron is made from the best quality Tinned Iron, and each sheet is examined before packing. It is equal in every respect to the best Iron imported, and in point of finish is superior to any. It is packed in felt-lined cases containing about $\frac{1}{2}$ ton.

PRICES.—We are unable to catalogue prices, as the Galvanised Iron Market is subject to frequent and sudden alterations, but we shall be happy to quote on application.

Curving Iron

For Verandahs, Tanks, &c.

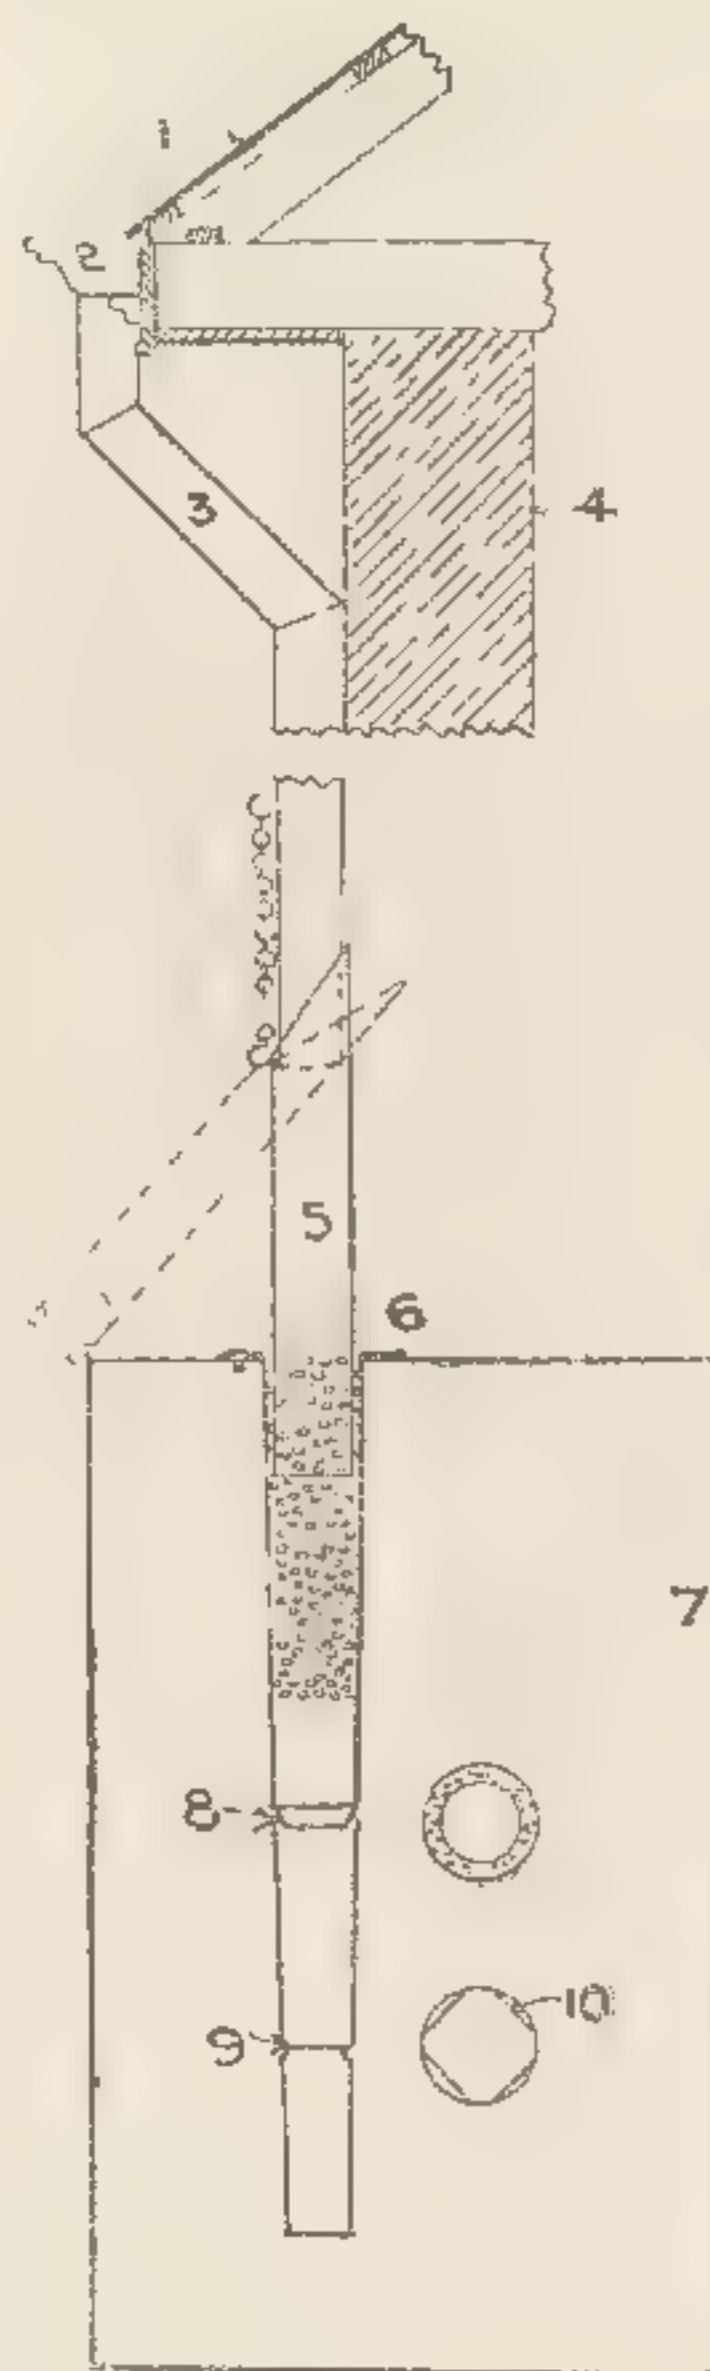

Ordinary Verandah, 2 $\frac{1}{2}$ d.; Bull Nose, 3 $\frac{1}{2}$ d.; Dome, 5d.
per sheet.

We also curve to half circle and circle for tank making, and supply all necessities.

Carpenter's Patent

Roof Water Strainer

Admittedly the most simple, Practical, Useful and Economical Strainer yet introduced, no tank should be without one. Water taken from tap in bottom of tank is perfectly clear.

EXPLANATORY NOTES

1. Roof.
2. Guttering.
3. Down Rain Water Pipe.
4. Wall of Building.
5. *Connection or Division Pipe.
6. Strainer, which simply requires to be emptied after rain and replaced.
7. Tank.
8.) Dirt Traps.
9.)
10. Space for small particles of dirt to fall through and remain undisturbed.

*For use in either filling tank or allowing dirty water to run to waste when cleaning guttering.

MT 52.

The necessity for preventing the pollution of drinking water must be apparent to everyone; here is a remedy for 15/- which is within the reach of all. Orders sent to us will receive prompt attention.

You save 37½ per cent. in Money by Purchasing LASSETTERS' "SCRUTCH" BARBED WIRE.

LASSETTERS'

"PATENT SCRUTCH"

GALVD. BARBED

WIRE.

MT 63.

Our present price for 12g. is £20, for 14g. £21/10/- per ton.

READ THE FOLLOWING CAREFULLY.

The consumer is more interested in the cost per mile than the price per ton. The "Patent Scrutch" and Ordinary Barb Wire are constructed of Two-Strand Galvanised Steel Wire, with Four-Point Barbs 3 inches apart. The following comparative statements show the advantage of using "Patent Scrutch" Barb Wire:—

1 Cwt. 14 gauge Patent "Scrutch"	Measures about 810 yards
1 Cwt. 12 gauge Patent "Scrutch"	610 yards
1 Cwt. 12 gauge "Ordinary"	only 450 yards

1 Mile 14 gauge Patent "Scrutch" ..	2cwt. 0qr. 19lb.
1 Mile 12 gauge Patent "Scrutch" ..	2cwt. 3qr. 15lb.
1 Mile 12 gauge "Ordinary"	3cwt. 3qr. 18lb.

1 Ton 14 gauge Patent "Scrutch" ..	9 miles 360yds.
1 Ton 12 gauge Patent "Scrutch" ..	6 miles 1640yds.
1 Ton 12 gauge "Ordinary" ..	only 5 miles 200yds.

Saving of 17/10 per mile for each Wire.

Saving of £1/15 8 per mile for Two Wires.

Saving of £2/13/6 per mile for Three Wires.

Saving of £3 11/4 per mile for Four Wires.

Samples of our "Patent Scrutch" posted free on application.

Our "Patent Scrutch" Barbed Fencing is made from Steel Wire, galvanised by an exclusive patent process, securing the greatest tensile strength and imperishableness. It is the most effective Fencing in use. A single strand of Barbed Fencing will greatly increase the effectiveness of all styles of old Fencing. Steel Barbed Fence saves all waste of soil from occupancy and shade. For close enclosures of

Thus 1 mile of Ordinary Barb Wire at £16/10, per ton costs £3 4/6 per mile; 1 mile of 14-g. "Patent Scrutch" at £21/10/- per ton costs £2/6/8.

SAVING 17/10 PER MILE.

And also 45 per cent. of freight and team charges.

So that you get 7 miles of our "Patent Scrutch" Barbed Wire for what you would have to pay for 5 miles of Ordinary, and a much superior article in every way, besides the 45 per cent. saved on the carriage.

But this is no all. Our "Scrutch" takes the strain equally on both wires, whilst the ordinary Barb Wire takes the strain on one wire only, which will snap before any strain comes on the second wire. Thus our 14-g. "Scrutch" is stronger than Ordinary 12 g., and only half the weight per mile.

gardens and choice fruit, Steel Barbed Fence forms a barrier impregnable to all trespassers. The double twisted wires of the Steel Barbed Fence respond to all change of temperature without changes of length. It is a steel thorn hedge, instantly available, instead of the tardily-grown, vermin-haunted live hedge, with its great waste of soil by its occupancy and by its shade. It can be constructed dog and dingo proof. As a pig tight fence it checks the most troublesome swine. The petty thief observes it with "marked" respect.

Our "Patent Scrutch" Barbed Wire has a new style of barb, which is a decided improvement on the ordinary brands. It will prick just as keenly as the old patterns; at the same time, it cannot tear or damage the animals, the latter feature being a valuable consideration where blood stock are concerned.

"Patent Scrutch" Barbed Wire is cheaper and better than any other.

Under all circumstances, Steel Barbed Fence has shown all the best qualities of the perfect fence. It is easily erected. The material is easily handled. Three men can build half a mile of fence in one day—posts already set. Only a few simple tools are required, and no more mechanical skill is called for than is found on every farm. It can be kept tight—does not yield to changes of temperature. It will not snap when cold, nor sag and grow loose in heat. It will not blow down, burn down, nor tumble down. It is staunch. It cannot be thrown down by the careless or mischievous trespasser, and in place it is permanent and indestructible. Cattle and stock let it alone. We find sales easiest in neighborhoods where Barbed Fence has been well tested.

F. LASSETTER & CO., LIMITED

Best Drawn Fencing Wire.

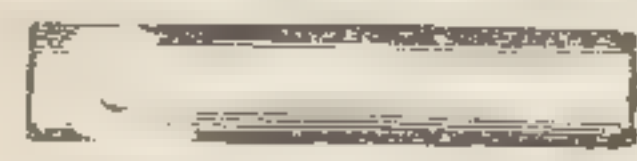

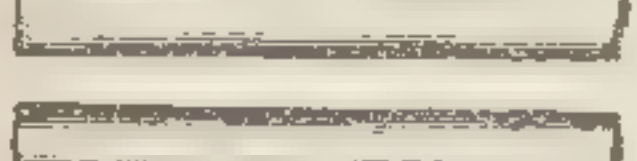

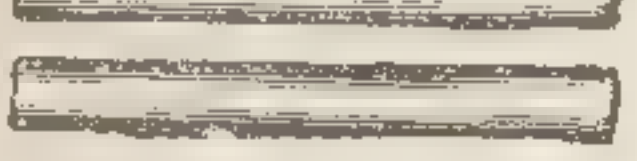

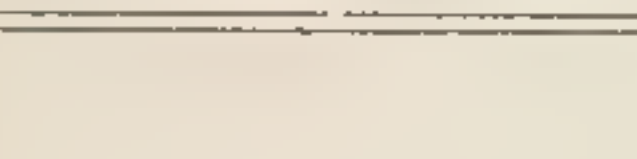

A1

For the convenience of our customers and buyers generally, we have carefully and accurately compiled (as shown hereunder) a scale showing weights, lengths, and breaking strain of our well-known "A1 Crown Best Round Steel Wire," which will be of assistance to those working up estimates of Wire Fencing.

The information given below is intended to assist those who contemplate using "A1 Crown" brand of Fencing Wire.

The above Trade Mark (the property of the undersigned) is Registered, and stringent measures will be adopted to prevent any infringement or piracy.

MACHINERY DEPARTMENT.

WE HAVE PLEASURE in drawing your special attention to our Machinery Section in this Catalogue. Our experiences of nearly a century have enabled us to design and complete a class of implements to suit the requirements of all settlers on the land. Our tillage implements have been built and designed after trials in all conditions of soils, and we can supply Plows and Cultivators to suit either sandy, black or any soil.

PUMPING MACHINERY.—When making enquiries with regard to Pumping Machinery, we would suggest you inform us the quantity of water you require per hour or per day, the distance and elevation (if any) the water has to be forced; if pumping from a well, kindly state depth and distance you require the water forced, and whether you require it to be worked by horse, hand, wind or steam power.

HARVESTING MACHINERY. This is one of our specialities, the Mowers are specially built to suit all conditions of crops, and we were the people to break up the "Binder Ring," which existed to keep up the high price of machinery some years ago, and the low prices of Reapers and Binders to-day is due to our effort. We do not appoint agents or employ a number of travellers or touts, as by this means we are in a position to sell to the Farmers at much lower prices than other Importers, and by dealing with us you save the middleman's profit.

WEARING PARTS OR SPARES.—We have an exceptionally large stock of Spares or Wearing Parts, and when ordering will you kindly inform us the Maker of your machine, about the date of purchase, and the casting number on the old parts. Should you forward any old parts for repairs, please attach your name and address to the label, as this enables us to trace whom the parts are from.

UNIVERSAL PROVIDERS.

AMERICAN PLOUGHS.

Lassetters' Daisy Clipper Ploughs.

(Late Bluebeard.)

MU 1.

These Ploughs combine all the advantages for work, and in addition are fitted with a wrought frog or foot, which makes them as strong again as their predecessors.

When ordering shares, please state letter and number stamped on same.

We can supply the above with Long or Short Handles.

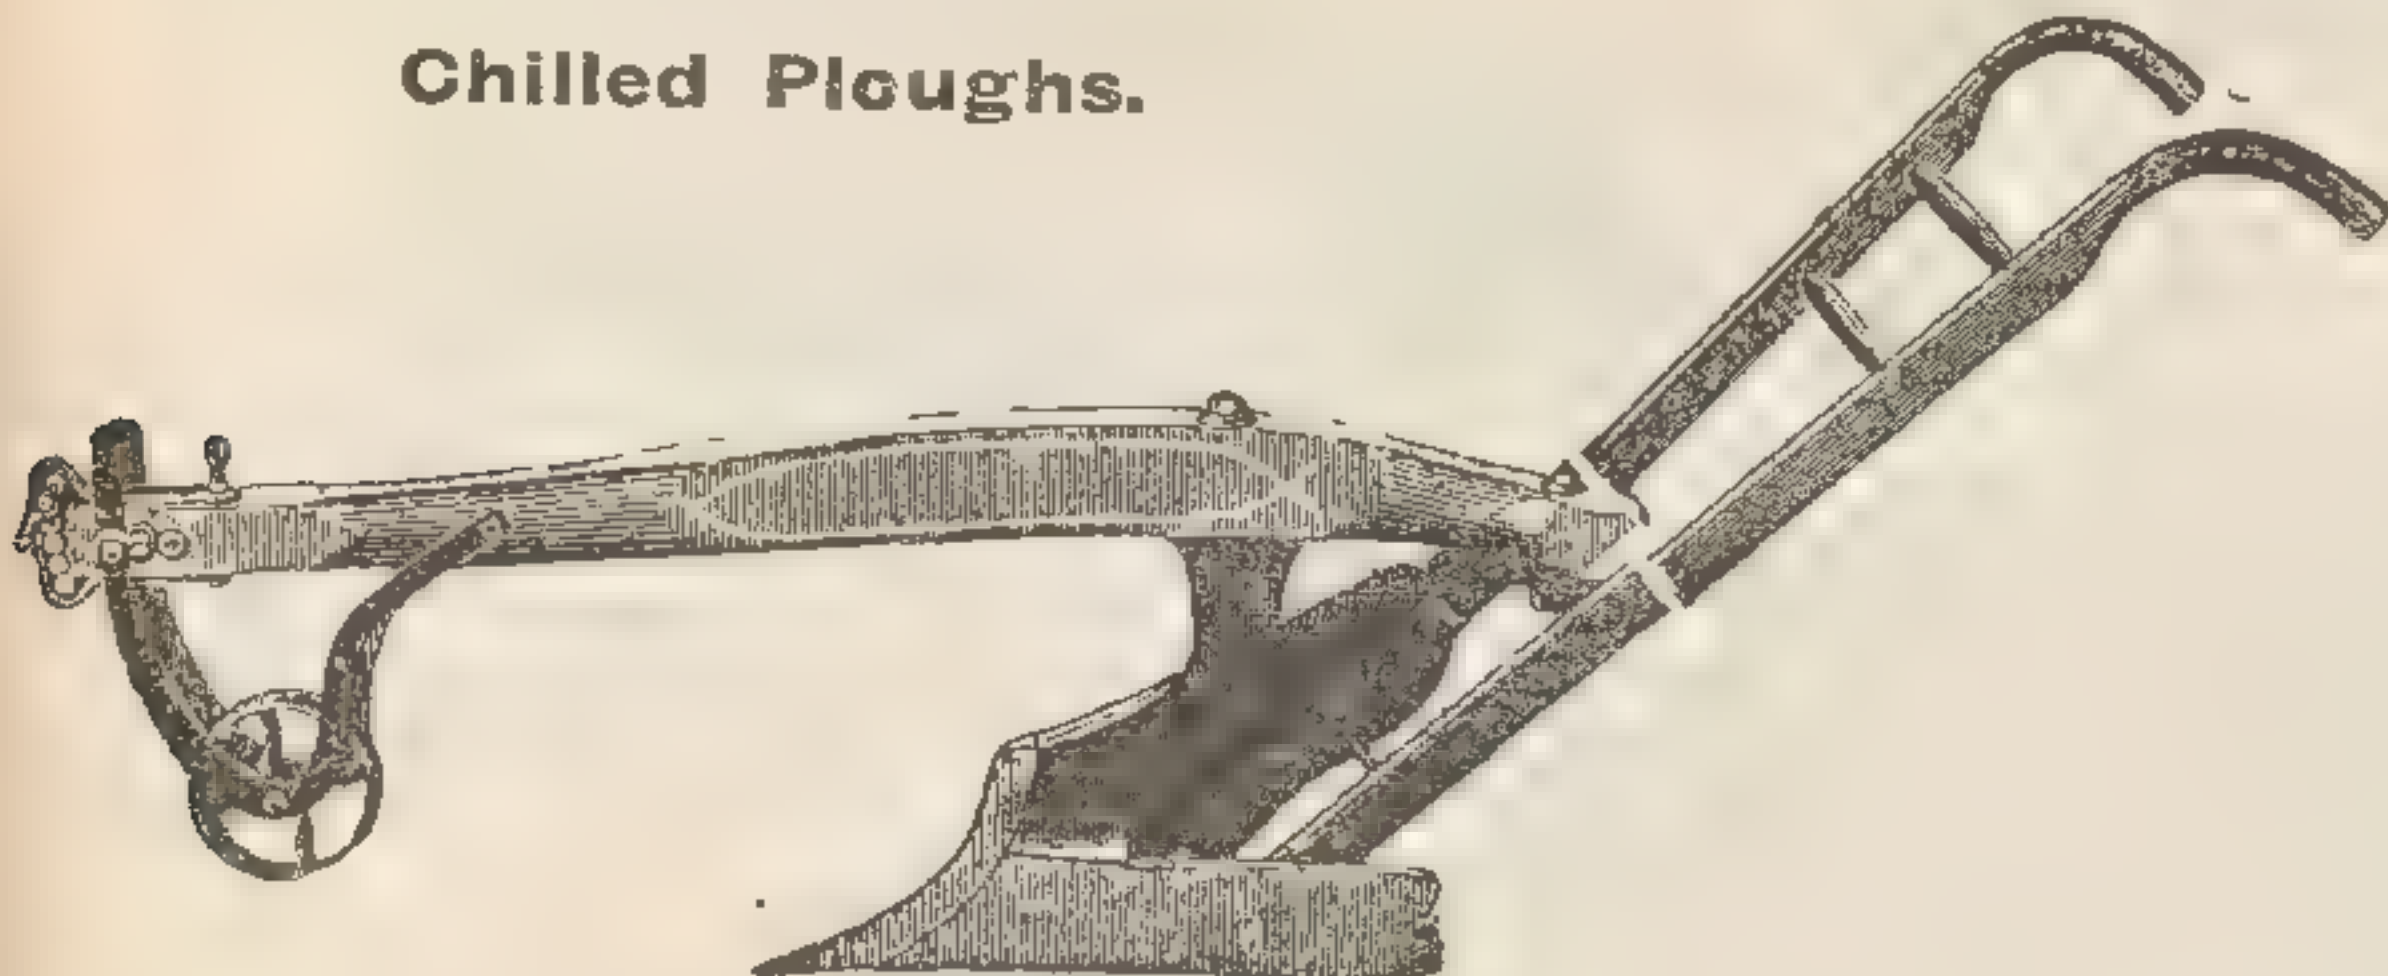

"The Magnolia."

(MU 2)

This is a small chilled plough. It has advantages over any now manufactured. The mould-board, land-side and share are removable, they being separate from the standard. It is constructed similar to our regular chilled ploughs. We quote a low price on this plough. It is considered to be the best of its class on the market. It is made in RIGHT HAND ONLY.

Price, 22/6.

Chilled Ploughs.

MU 3.

O 8, 74 lbs. Price, £2,10/- each.

The above Plough is specially adapted for Orchard or Garden work, where the ground is free from stumps or stones, and may be used for hilling among potatoes.

With Wrought Iron Frog, Iron Handles, and Extra Steel Share.

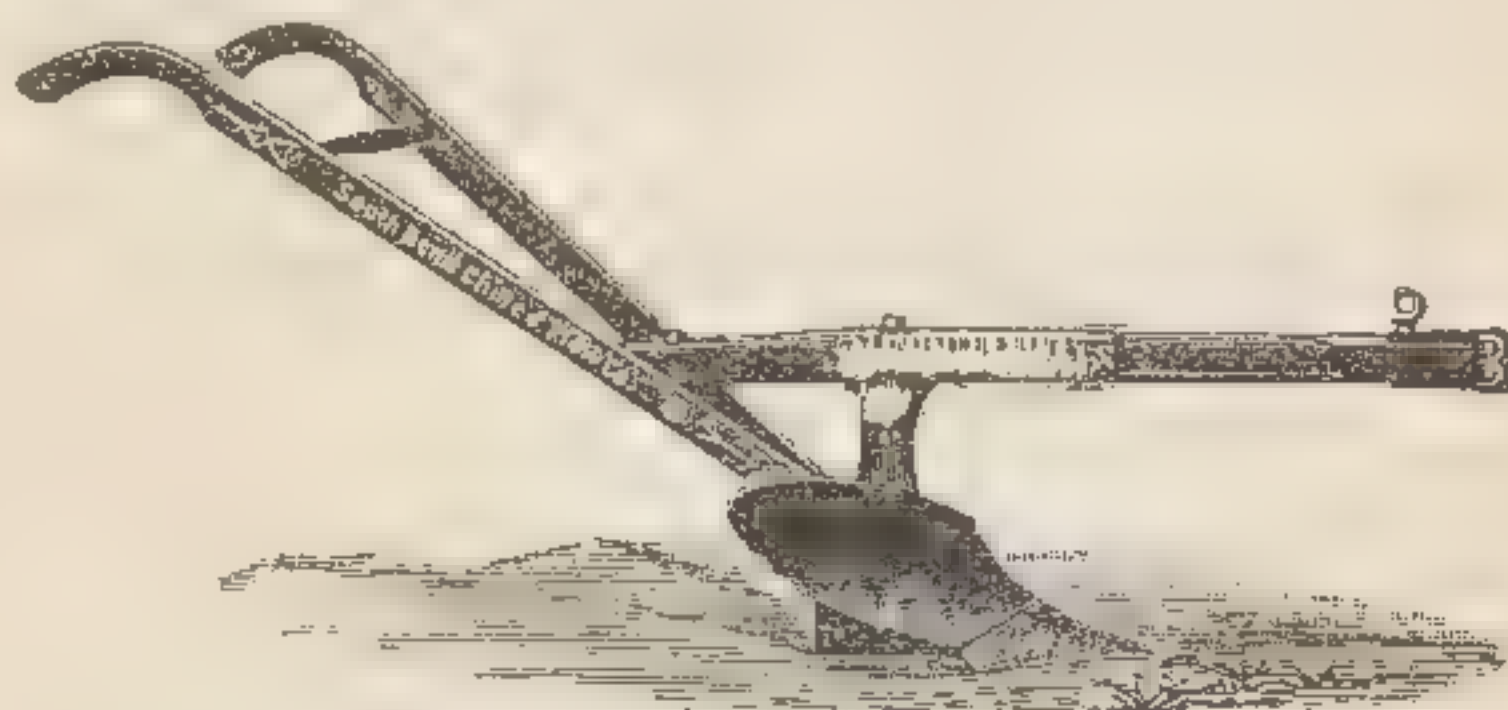

A large stock of Duplicate Shares, etc., always on hand. Knife Coulters and Clips, complete, 5/- each extra.

Disc Coulters and Clips, complete, £1 extra.

Land Wheels and Clips, complete, 5/- extra.

Cut		Weight, with extra Share and Spanner		Price, with extra Share
7 inch	..	70lbs.	..	£3 3 0
9 inch	..	98lbs.	..	£3 10 0
10 inch	..	110lbs.	..	£4 7 6
12 inch	..	115lbs.	..	£4 17 6

Can be supplied with long or short handles to suit purchaser. Beware of imitations, as there are many ploughs with misleading names to sell them, but they are inferior in shape, finish, and quality to our Daisy Clipper, late Bluebeard Ploughs.

MU 2.

MU 3.

With Land Wheel and Knife Coulter and 1 extra Cast Share.

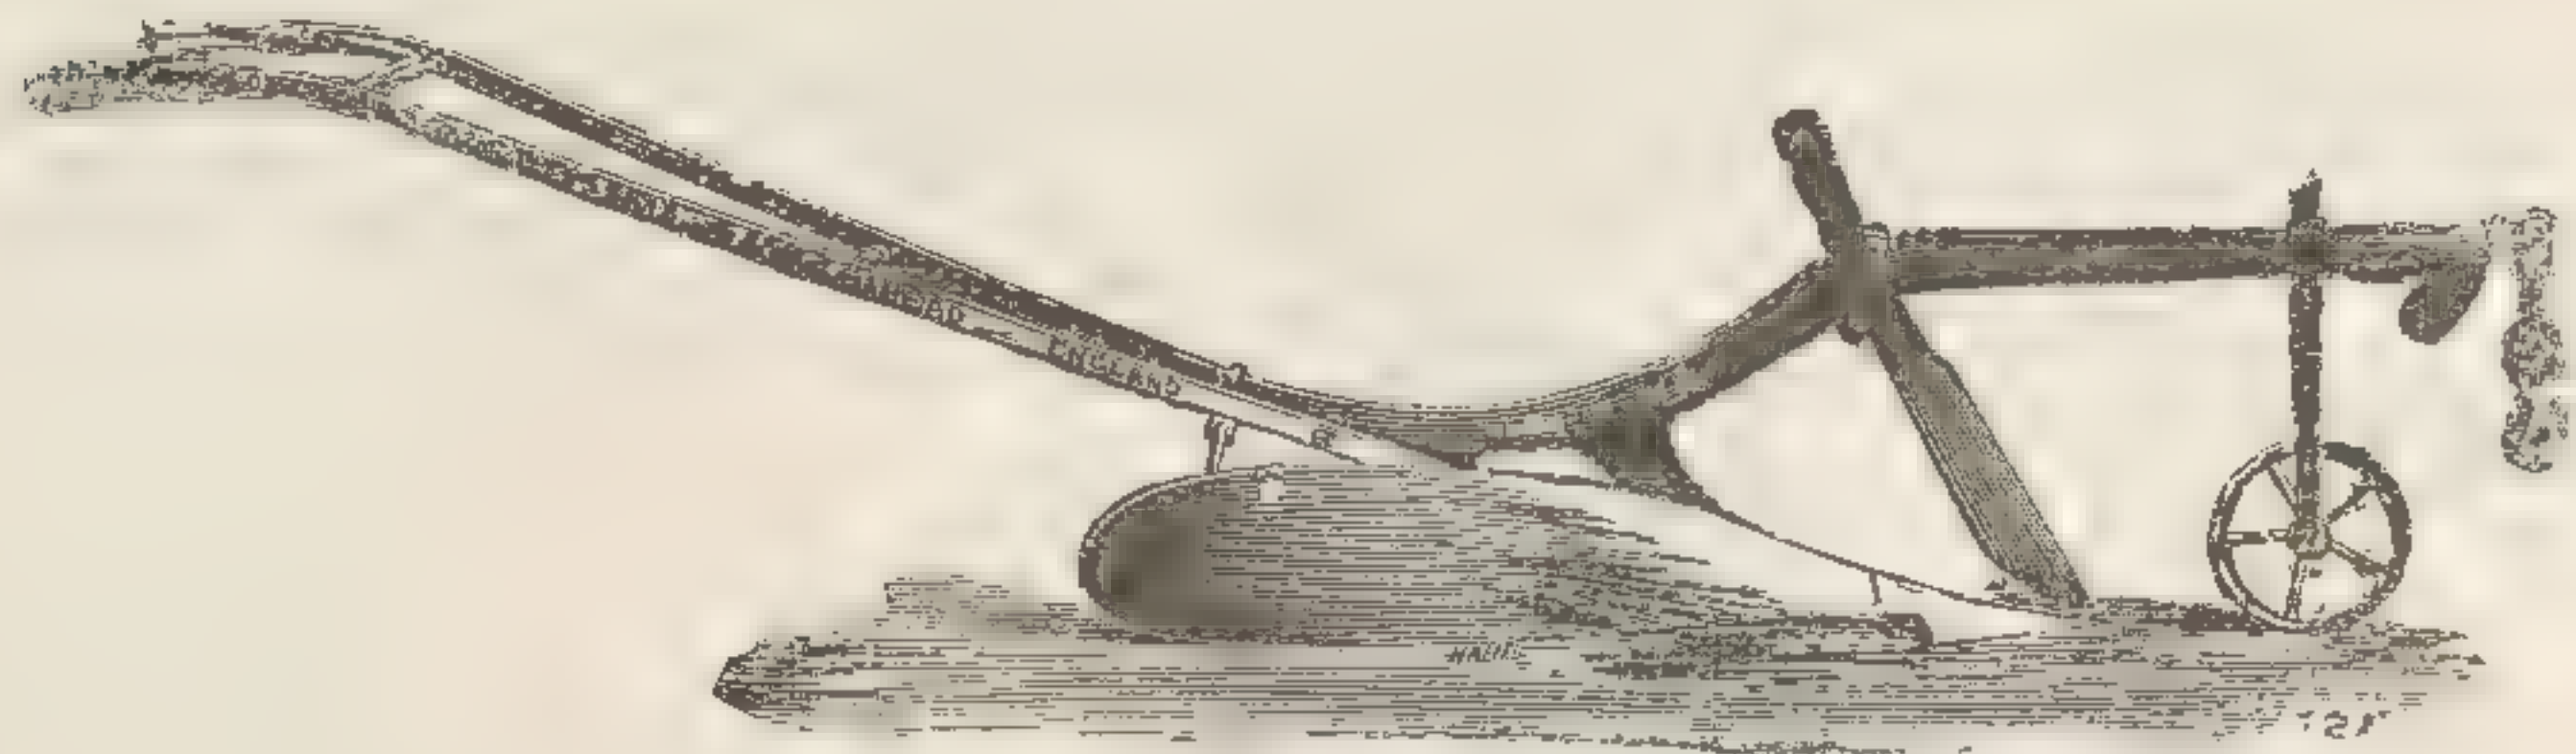

Chilled Ploughs are thoroughly reliable, and in all respects possess many features of merit, partaking in every particular of the general excellence which for so many years has characterised the Ploughs of this make.

Ransome's Extra Strong Colonial D.A.M.H. Ploughs

The "Monarch"

MU 5.

These ploughs are specially adapted for dam and road making, ploughing among large roots and stumps, trenching, draining, etc. They are fitted with a wrought iron frame, steel breast, and special bar share of wrought steel. They are suitable for from 4 to 8 horses when doing ordinary ploughing, but are strong enough to withstand almost any strain that may be put upon them when ploughing on stony or rocky soils.

The shares take the same marks as the ploughs.

Mark.		Size of Furrow in inches.	Average Weight.	Draught.	Price.
D.A.M.H.1		4 to 8 deep x 9 to 12 wide	420lbs.	4 to 8 horses or oxen	£20
D.A.M.H.2		5 to 9 deep x 9 to 12 wide	500lbs.	4 to 10 horses or oxen	£21
D.A.M.H.3		5 to 10 deep x 9 to 12 wide	615lbs.	6 to 12 horses or oxen	£23

Ransome's Patent Trussed Beam Plough, Y.O.H.

Skim Coulter and Furrow Wheel extra.

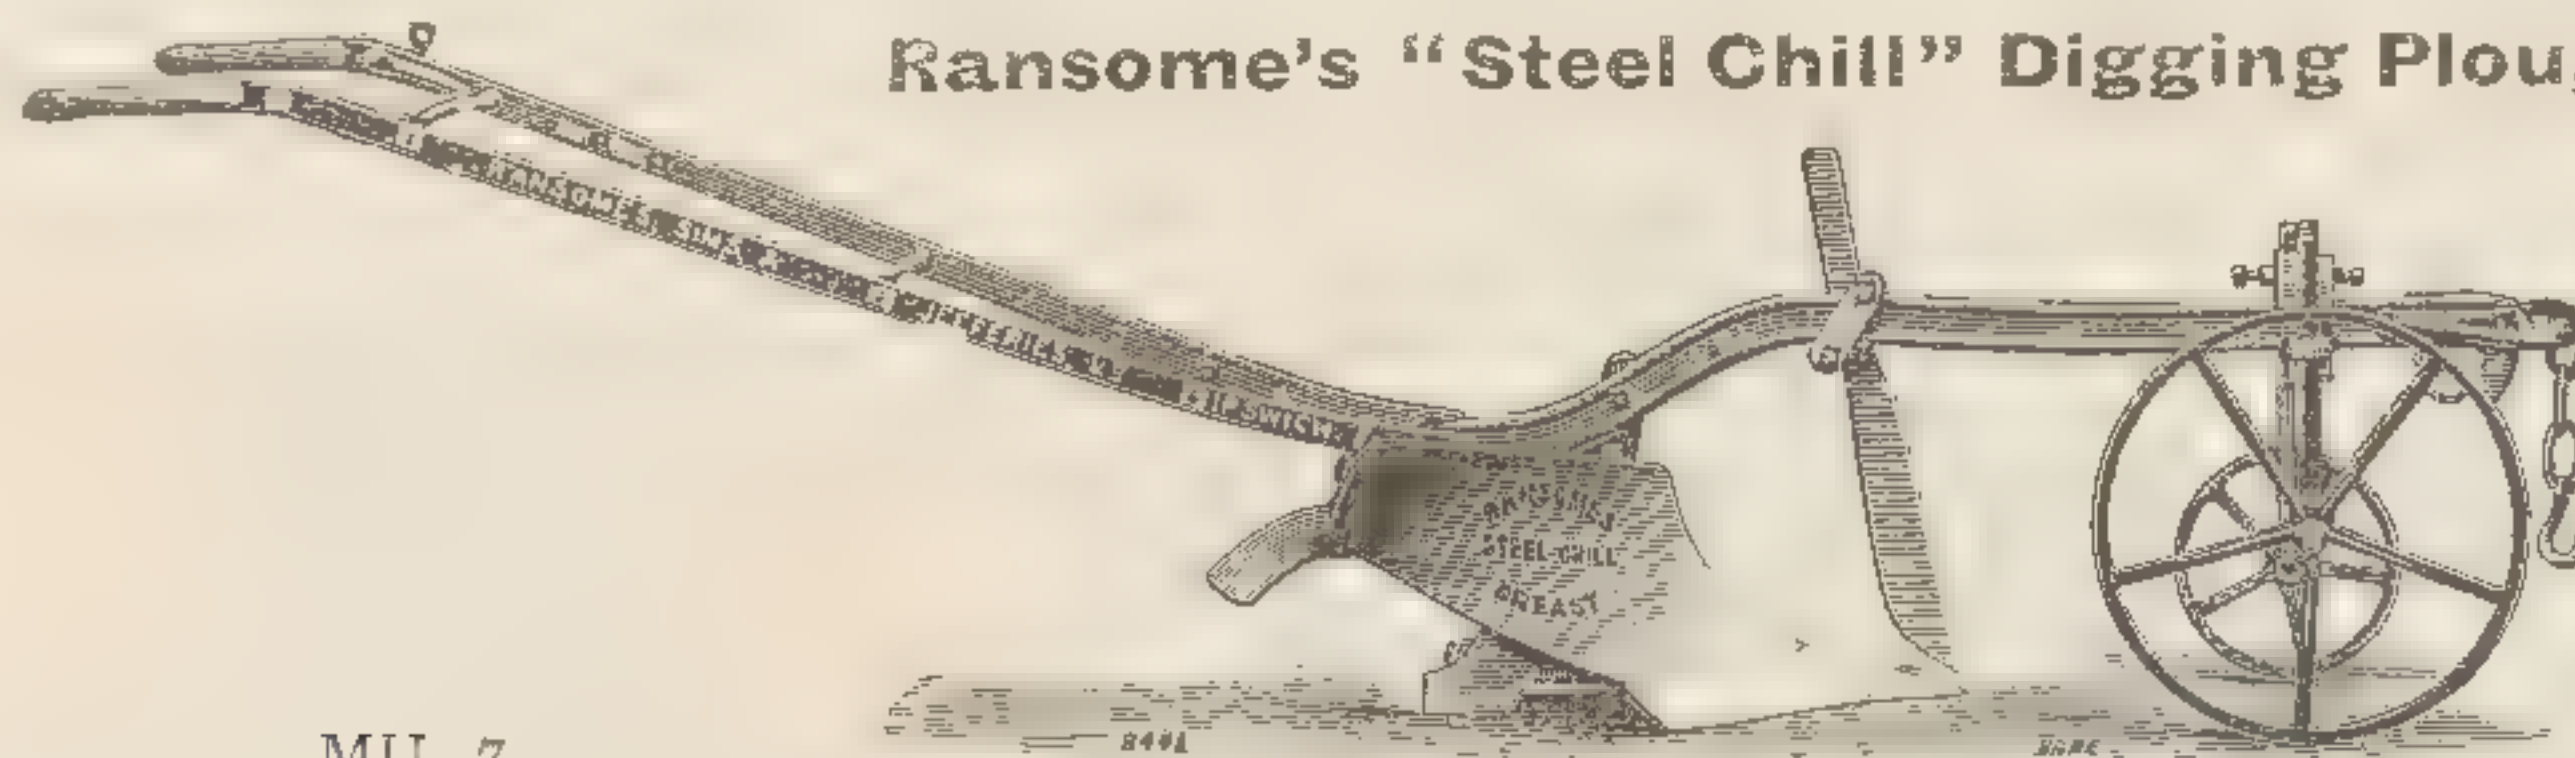

MU 6.

These are simple, light, and strong wrought iron Ploughs, and enjoy a very high reputation throughout Australia. They were the first Ploughs used in the Colonies, and continue to be preferred by many to all others. They have patent trussed beams, and are fitted with one or two wheels, and with wrought or cast shares, and steel or cast mould-boards, as ordered. The mould-boards are short, and turn a broken rectangular furrow.

They are simple in construction, low in price, and are useful for general purpose Ploughs, suitable for light or mixed soils. Many thousands are in use in all parts of New South Wales.

Mark	Size of Furrow in inches	Average Weight	Draught
Y.O.H.	4 to 7 deep x 8 to 10 wide	196lb.	2 horses
Price, £6 5/- each. Skim Coulter, 7/6 each Furrow Wheel, 15/- each extra.			

Ransome's "Steel Chill" Digging Plough, G.D.L.

MU 7.

These Digging Ploughs will plough a greater depth and width than any ordinary Plough, and with less draught, breaking the furrow slice to the bottom. All the wearing parts are made of chilled cast iron, which is harder than steel, and the breast is so thoroughly glazed that no soil will stick to it. They have a knife tailpiece, and leave the soil thoroughly broken and pulverised and fit for sowing immediately. Complete with Knife Coulter.

With these Ploughs a man can easily plough upwards of an acre of land in a day of eight or nine hours.

Mark	Size of Furrow in inches	Average Weight	Draught
G.D.L.	4 to 8 deep x 12 wide	220lbs.	2 horses
Price, £7.			

Ransome's "Steel Chill" Digging Ploughs

With Patent Divided Shares.

MU 8.

These Ploughs are similar in design and construction to the I.R.C.P. Plough, but the share is made in parts. The wing and point, being separate, are renewable at a small cost, and the chilled cutter, which takes the place of the ordinary coulter, forms part of the Plough body, and is also renewable.

Mark	Size of Furrow in inches	Average Weight	Comparative Draught

The "NEW DEAL" Double Furrow Gang Plough is more desirable for all general purposes than the Single Furrow, one extra horse only being required, and will plough 3 to 4 acres per day, and is the most economical Plough that a farmer can use.

Cut 10in. each Furrow.
Approximate weight 489 lbs.
Price, £10/-, with Knife Coulter.
Disc Coulters, 20/- each extra.
Subsoil Attachment, £2.
Seat Attachment, £2/10/-.

To Messrs. F. Lassetter and Co., Ltd., Sydney.

Dear Sirs,—I have much pleasure in stating that the John Deere's "New Deal" Double Furrow Plough, which I purchased from you some three years ago, has given every satisfaction. My man ploughs some three acres a day with it, and yet finds time to milk eight cows morning and evening. It is the simplest and most ingenious labour-saving machine that I have ever handled. The plough has been in constant use during three years, and has cost nothing for repairs, with the exception of relaying the shares, which our local smith can do.—Yours faithfully,

Penrith.

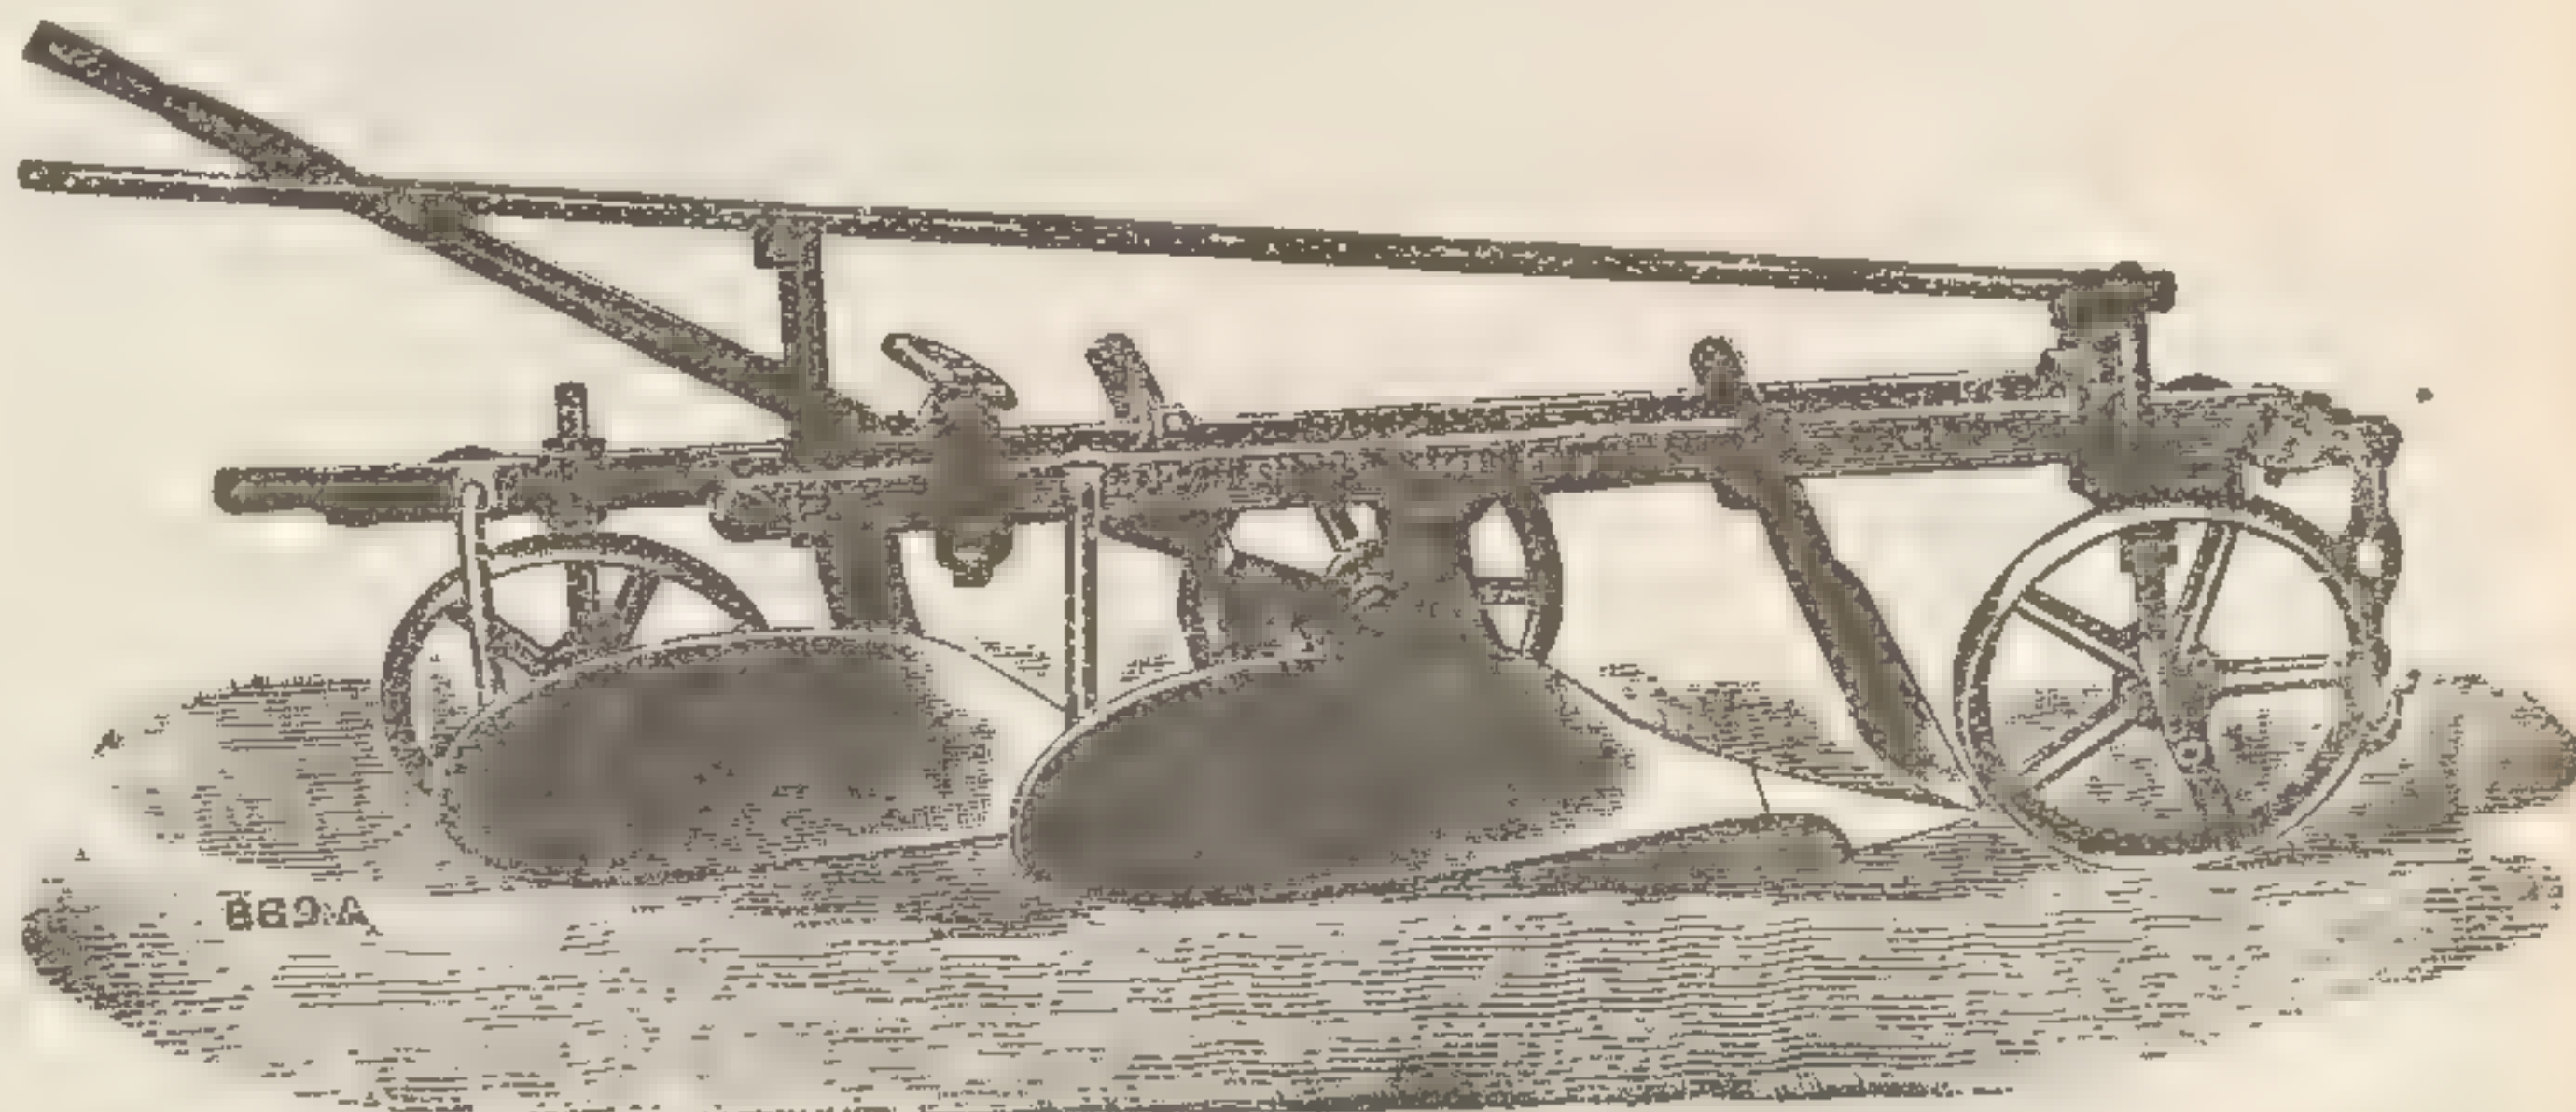

Messrs. F. Lassetter and Co., Ltd., Sydney.

Dear Sirs,—The Plough is doing splendid work. I had it ploughing in ground so hard that the bullocks bent the draw bar but still the plough stopped in the ground.—Yours faithfully,

Emu Creek, Walcha.

© UNIVERSAL PROVIDERS. ©

Ransome's Double-Furrow Steel Plough.

MU 17.

This Double Furrow Plough, which is made entirely of best steel, has great clearance under the beams, to ensure perfect freedom from choking when ploughing in tall weeds, mealie stalks, etc.

The Shares and Breasts are made of high class steel of great durability, and the latter are of good turning capacity. The leverage for putting the plough in and out of work and regulating the depth of ploughing, is simple, easy and effective, and the depth of the work can be varied by the lever whilst the plough is in motion.

The wheels, which have renewable centres, are practically dust proof.

A carrying wheel is sent with the plough, which should be attached as shown in illustration when transporting the Plough from one place to another, to prevent wear on the slade.

A simple steerage, by which the draught can be moved to the right or left and rigidly held in any position, can be supplied for hillside work at a slight extra cost.

Price, £9/-/-.

if required.

These Ploughs are adapted for the strongest work on stony soil. They are made entirely of wrought iron, are fitted with friction wheel to reduce the draught, and with large land and furrow wheels. The land wheel has a long lever for regulating the depth and raising the Plough out of work, and the furrow wheel is furnished with a steerage lever. They can be fitted with ordinary coulters, or, when required for ploughing grass or soil with much herbage, with

wheel or disc coulters as shown. The furrows can be adjusted to different widths, viz., from 9 to 14 in. wide and 4 to 6 in. deep. A special colonial steering apparatus, when desired, is attached to these Ploughs, which ensures the straightness and uniformity of the furrows and enables the ploughman to take out any short bends or other irregularities in the work with greater ease than by the handles.

© EVERYTHING SOLID VALUE ©

MU 19.

On the large wheat farms of the North-west and of the Pacific Slope, there is a demand for a Plough that will turn more land than the ordinary single or double furrow Plough. The principles upon which the New Deal is constructed are applicable to a gang of almost any number of Ploughs. These Ploughs have attained unqualified success, and are the leading large Gang Ploughs of the trade. It requires but little more labour to handle them than it does to handle the two-furrow Plough. Each of these Ploughs, in addition to the regular equipment of the New Deal, is provided with a landing device by means of which the clevis can be changed, and the landing of the Plough

changed accordingly, while the team is in motion. The Ploughs are handled by a single lever. There is little chance of comparison between these Ploughs and similar Ploughs of other makes, for our New Deals are so much lighter in weight and draught, and so much more easily handled, that comparison is not necessary.

The "New Deal" Three-Furrow is fitted with Steel Beam, Steel Breast and Shares, and the price, £13/10/-, includes Knife Coulters, Disc Coulters (20/- each extra if required). This Plough can be fitted with a Seat attachment, £2 10/- extra.

UNIVERSAL PROVIDERS.

Disc Ploughs, Built to Our Special Order.

MU 21.

2, 3, and 4-Furrow Disc Ploughs.

We have pleasure in drawing your attention to the new Disc Ploughs which we have had specially designed and built to our own order by Messrs. Ransomes, Sims, and Jefferies.

These Ploughs are manufactured throughout from the very best materials, the best steel only being used for the beams and other parts subjected to great strain, thus combining the qualities of great strength, light weight and easy draught.

Two special features are the set of Discs and the general construction of the plough, which enables it to penetrate any land.

The steering gear is of the most perfect character. The furrow and hind wheels are coupled by connecting rods and both wheels are controlled by a lever which enables the driver to steer the Plough quickly in either direction or hold both the wheels rigid in work.

By this arrangement the Plough can also be turned at the ends to the right or left hand, but it should always be turned to the left if possible.

The width of the furrows can be adjusted by sliding the Disc bodies on the beams, and moving the furrow wheel in or out to correspond. No bolts have to be removed to effect this operation. Prices as follow:—

Two-Furrow Disc Ploughs, with 4 flat steel beams, main beams and stay 3 x 1½, arms for carrying disc bodies, 4 flat steel 3 x 1½, bodies adjustable by staple from 8 to 10in. cut. The Tyres of wheels are 2½in. wide, with approximate weight:—

			cwt.	qr.	lb.
2 Disc.....	£25	10	0	11	2 21
3 Disc	£31	0	0	13	1 7
4 Disc	£35	0	0	15	1 7

The Pines, Warrumbungle,
1st August, 1908

Dear Sirs,—The Ransomes, Sims and Jefferies three-furrow Disc Plough, which I got from you this season, has proved satisfactory so far, and I am well pleased with it; it does excellent work, so far as I know about the working of Disc Ploughs. I am well satisfied that they are the plough we want to work the soil. I must tell you that I have no trouble in starting the Plough, and I also wish to say that I am very pleased that I gave you the order for one of these Ploughs.

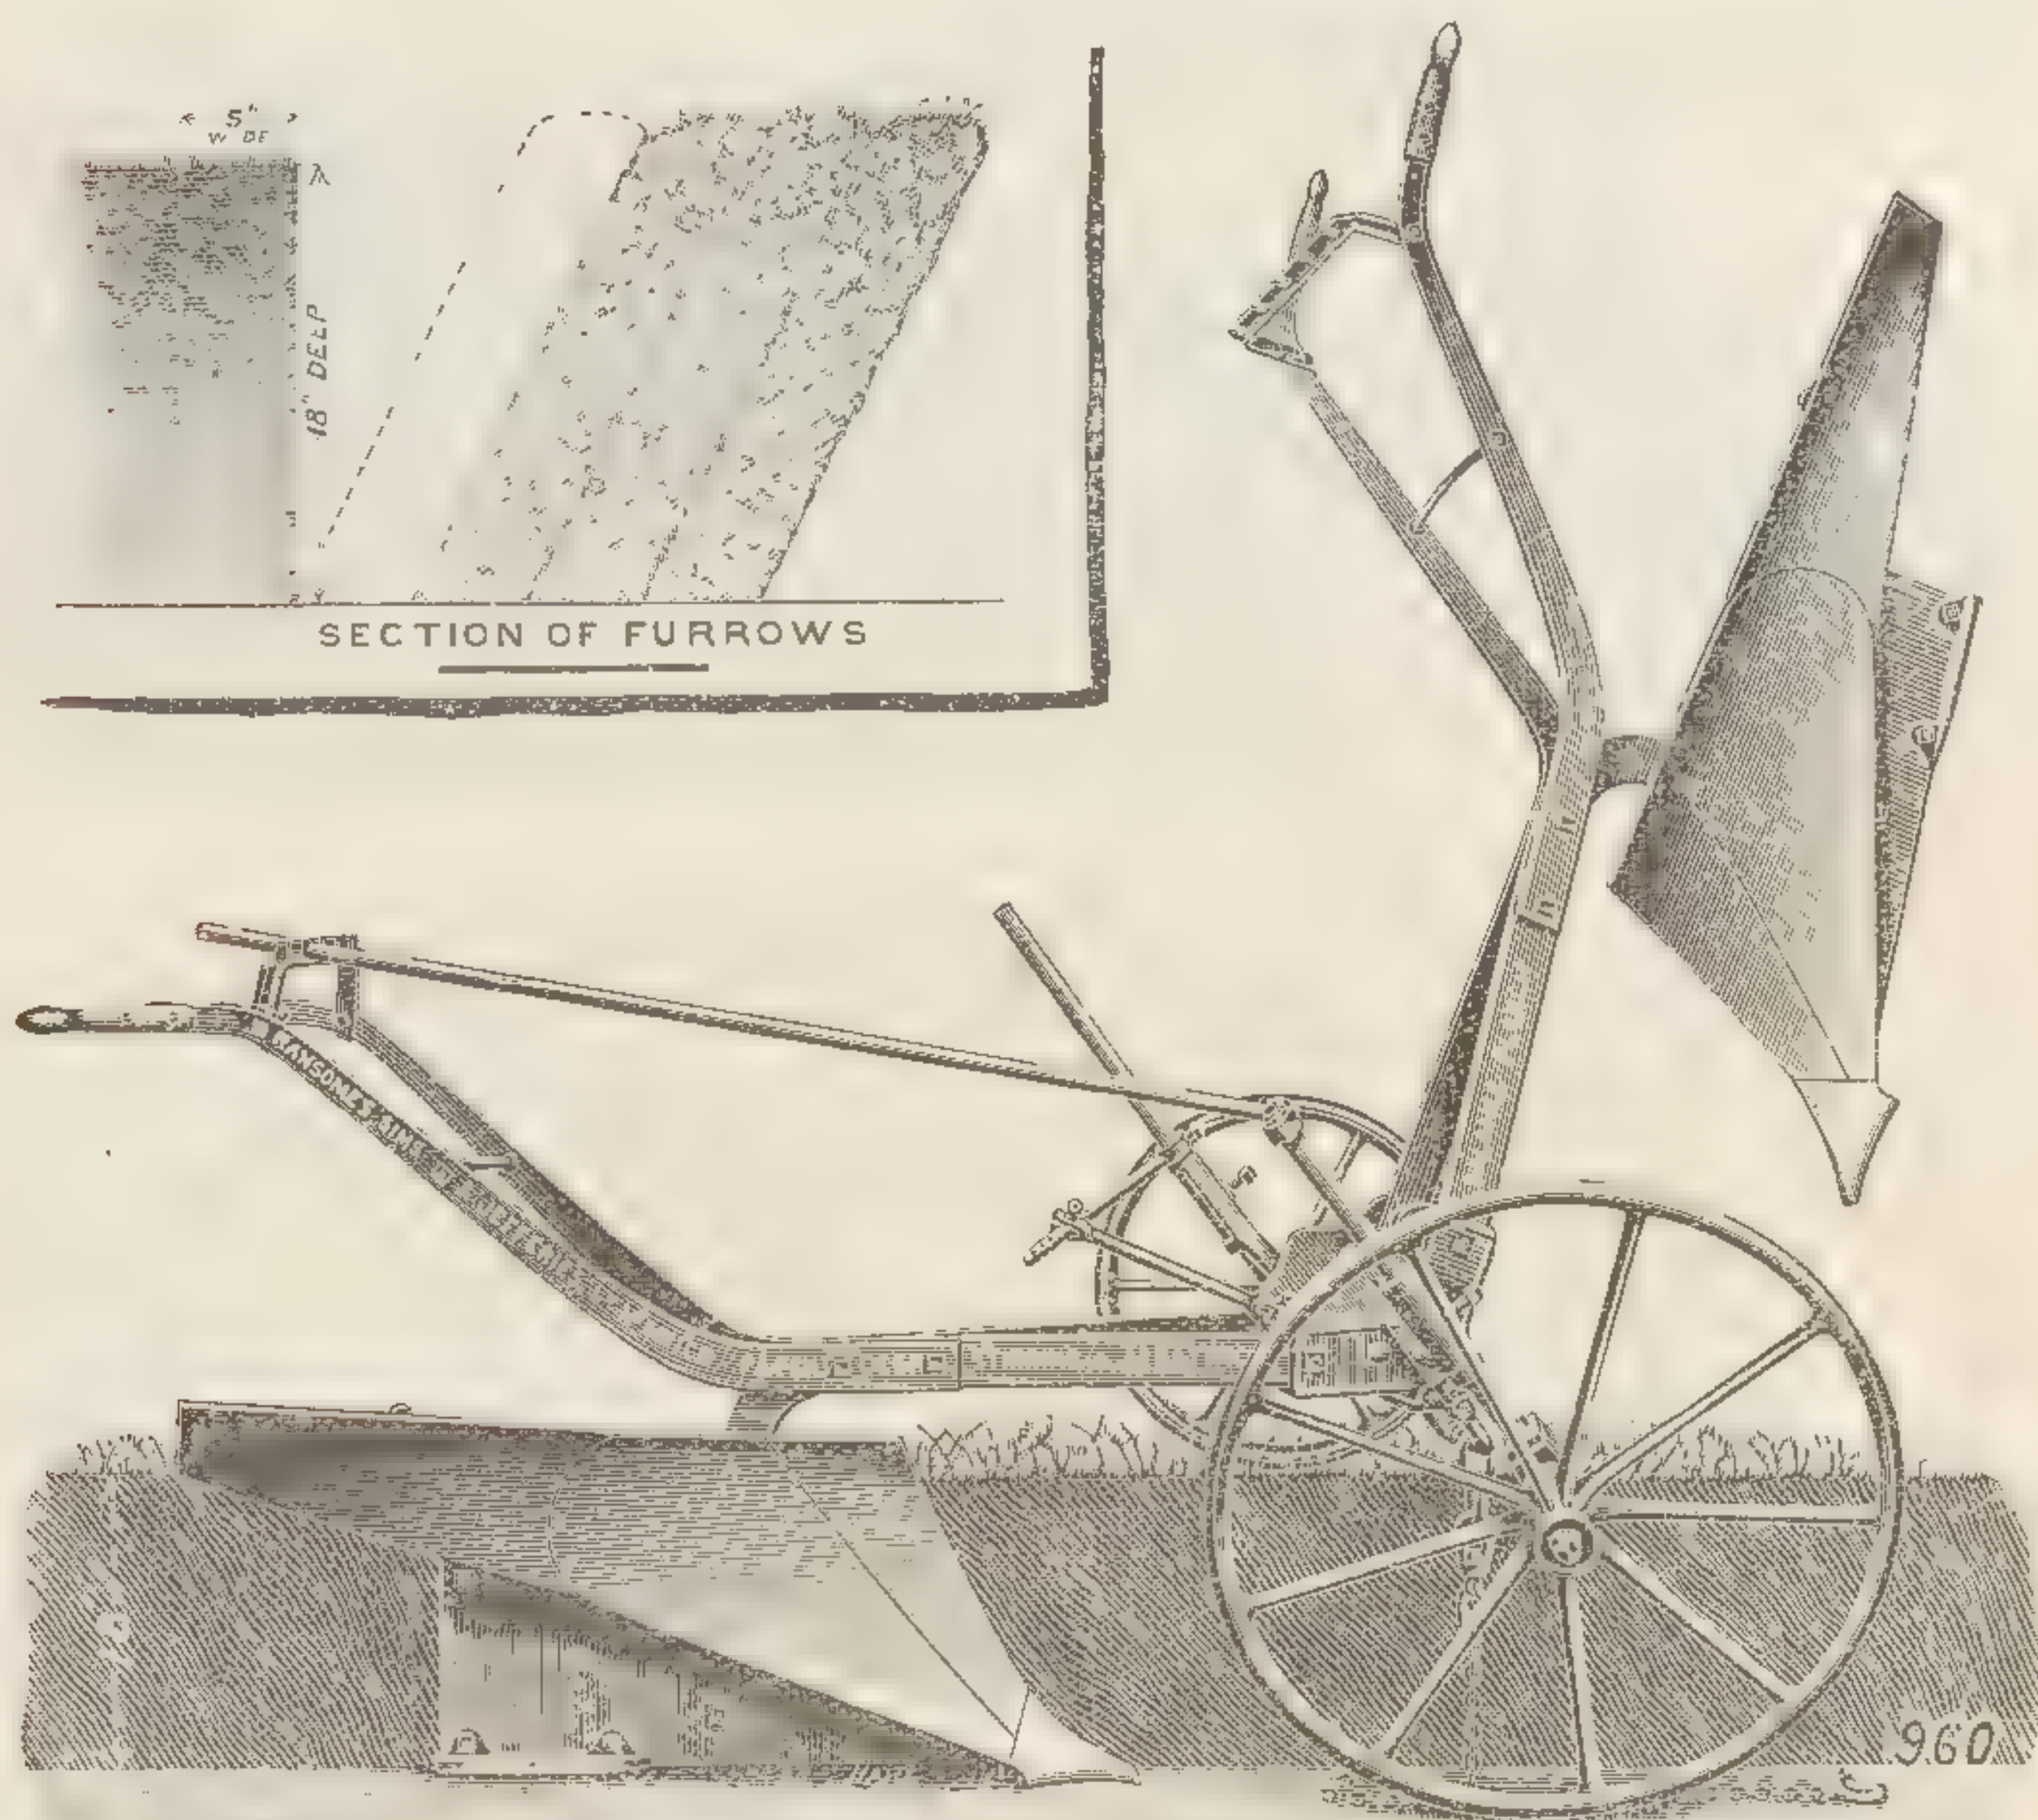

Yours faithfully,
A. J. BALDERSTON.

Patent Deep Cultivating and Aerating Balance Plough.

MU 22.

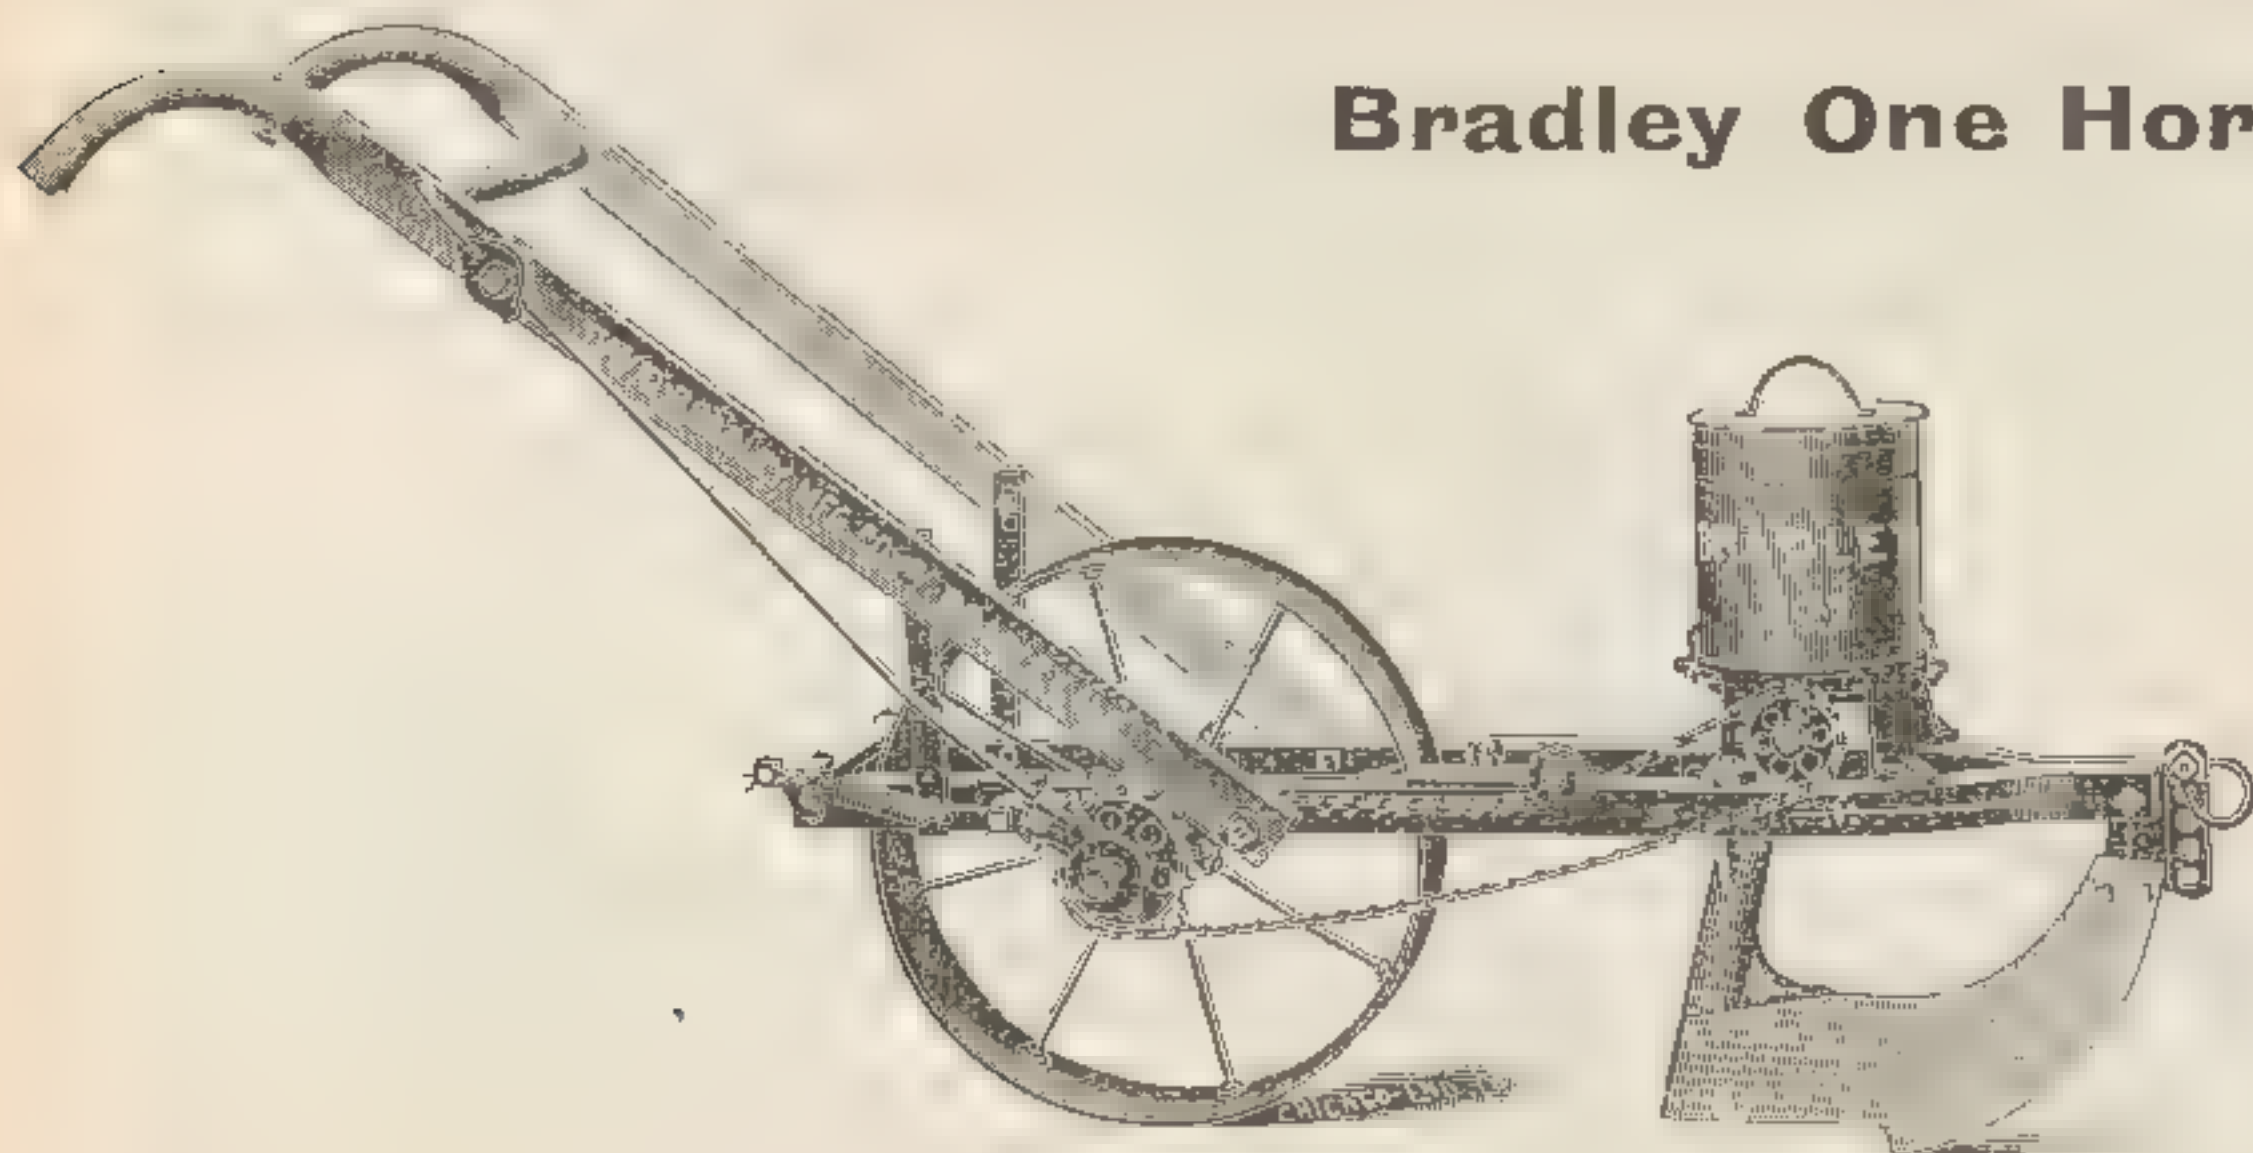

Price, £12, 10 -.

There can be no doubt whatever that a loosening of the soil and admission of air to every particle is one of the best if not the very best method of enriching and fertilising the ground. Of course, the value of this process depends to a great extent on the nature of the soil and subsoil, but that a good depth of workable soil is an unquestionable advantage in the production of large and luxuriant crops is amply shown by the double trenching of our gardens.

Bradley One Horse Corn Drills.

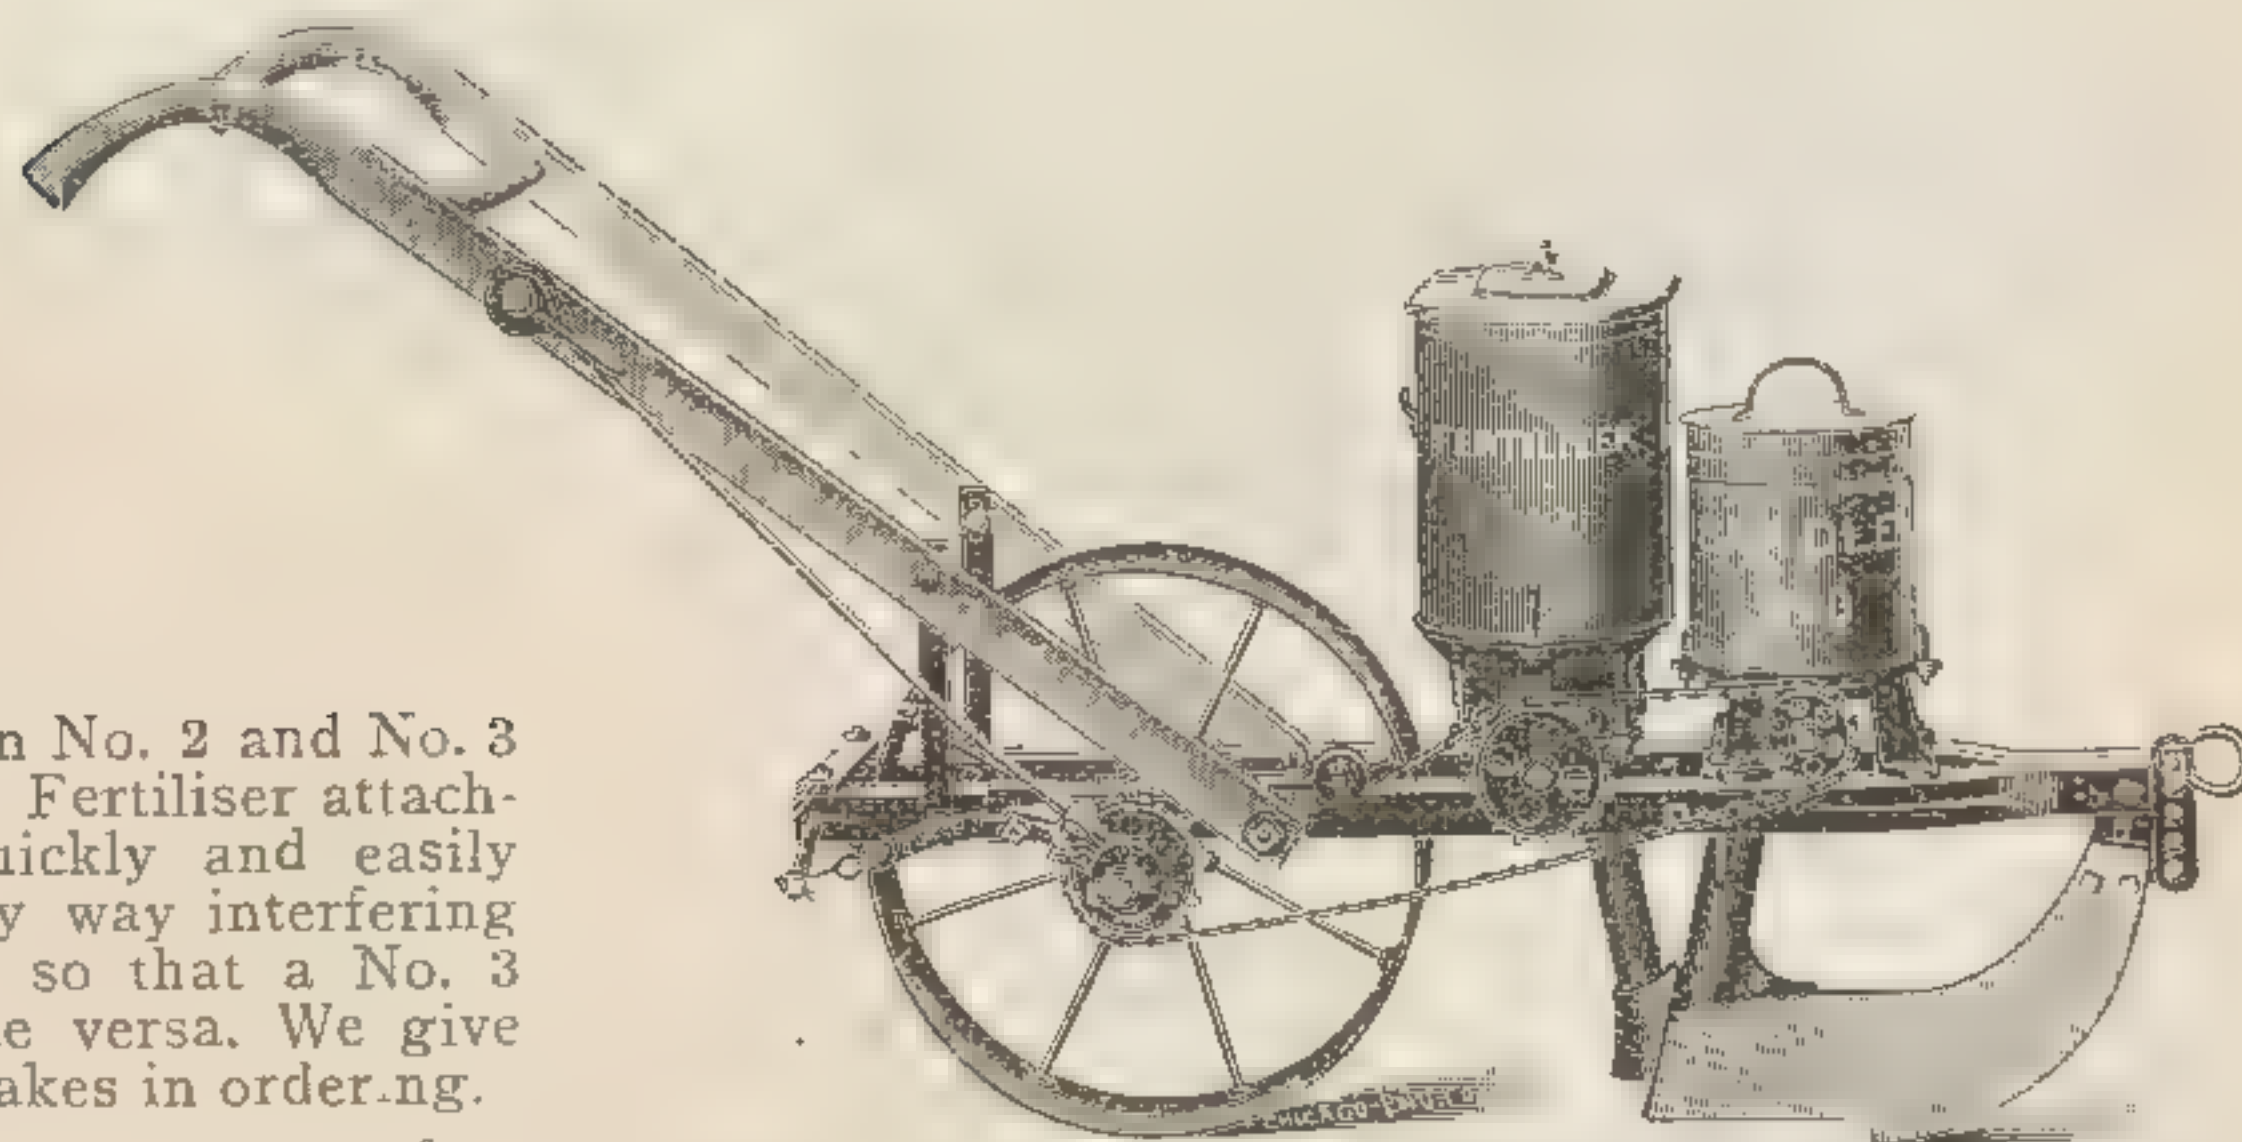

MU 23.

PRESSER-WHEEL ONE-HORSE CORN DRILL,
No. 2 £5/10 -

The Bradley Presser-Wheel One Horse Corn Drill, No. 3.

Price, £6/10/-.

MU 24.

The distinction above made between No. 2 and No. 3 consists in having or not having the Fertiliser attachment. This attachment can be quickly and easily taken off or put on, without in any way interfering with the seed planting mechanism, so that a No. 3 can be changed to a No. 2 or vice versa. We give them these numbers to prevent mistakes in ordering.

They have an opening runner. It opens a furrow into which the corn and fertilizer are deposited and then covered by a presser-wheel.

Four seed-plates are furnished—one drops the corn 11 inches, another 14 inches, and a third one 17 inches apart. The fourth plate is a blank, which can be drilled to plant peas, beans, Kaffir corn, cane seed, etc.

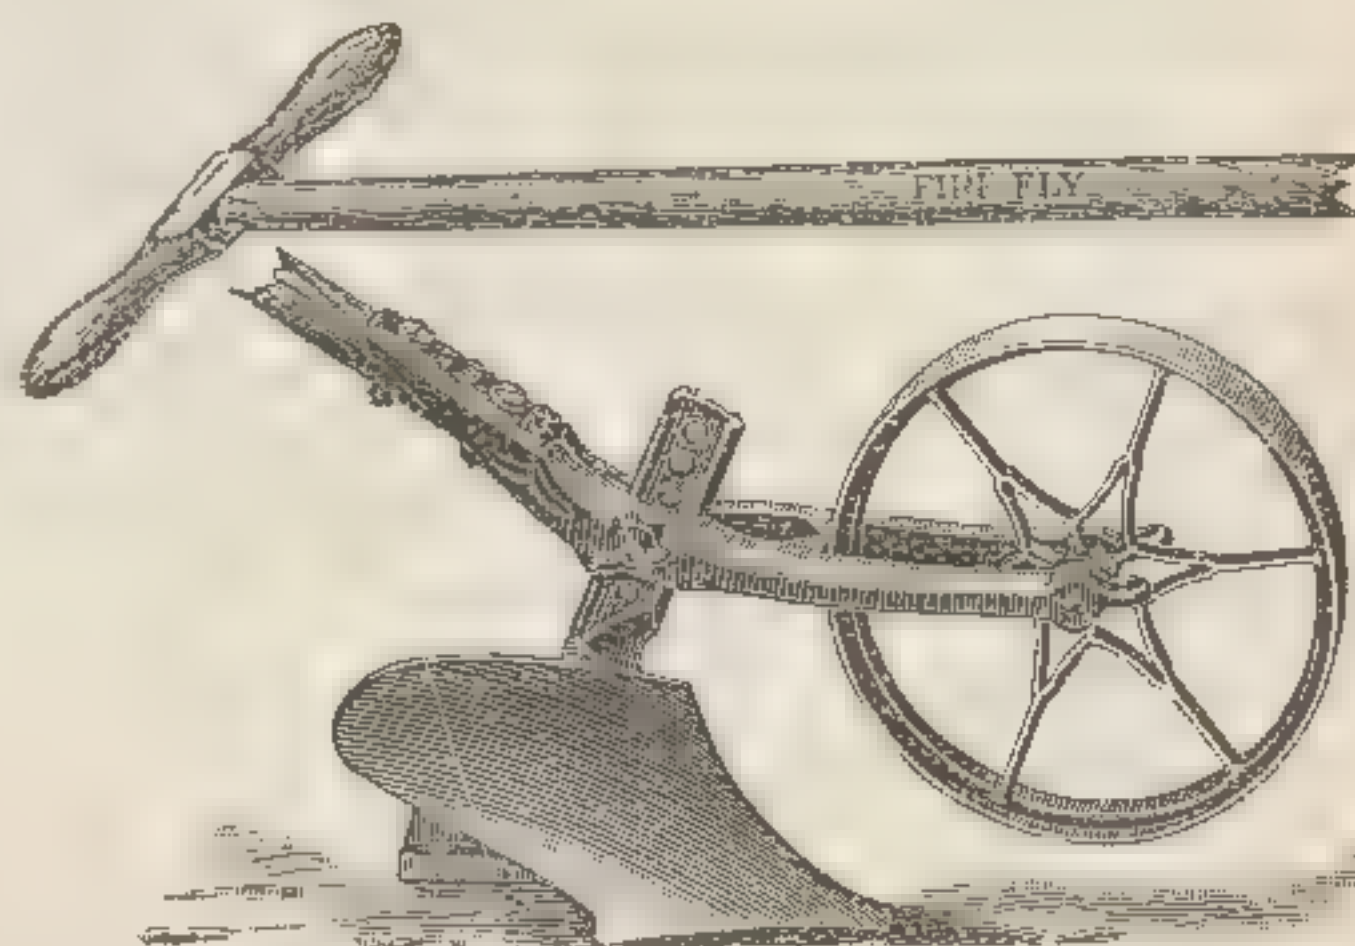

Corn can be drilled with the No. 3 without removing fertilizer box, but it is better to take it off if any great amount of corn is to be put in without fertilizer.

The Corn box or the Fertilizer box can be thrown out of or into gear whenever it is desired to stop or start them.

FIRE-FLY GARDEN PLOUGH, PRICE 12.6.

This Tool is exceedingly useful to owners of small gardens. It will throw a furrow four to six inches wide, and one to three inches deep. Furrows for manure or seeds can be opened and covered. In cultivating, plough away, weed and plough back again. This tool will enable a busy man to do in his spare minutes nearly all the work of a family garden.

Chicken Raisers find it of great advantage in ploughing up their scratching yards.

AGRICULTURAL IMPLEMENTS.

The Daisy All Steel Cultivator

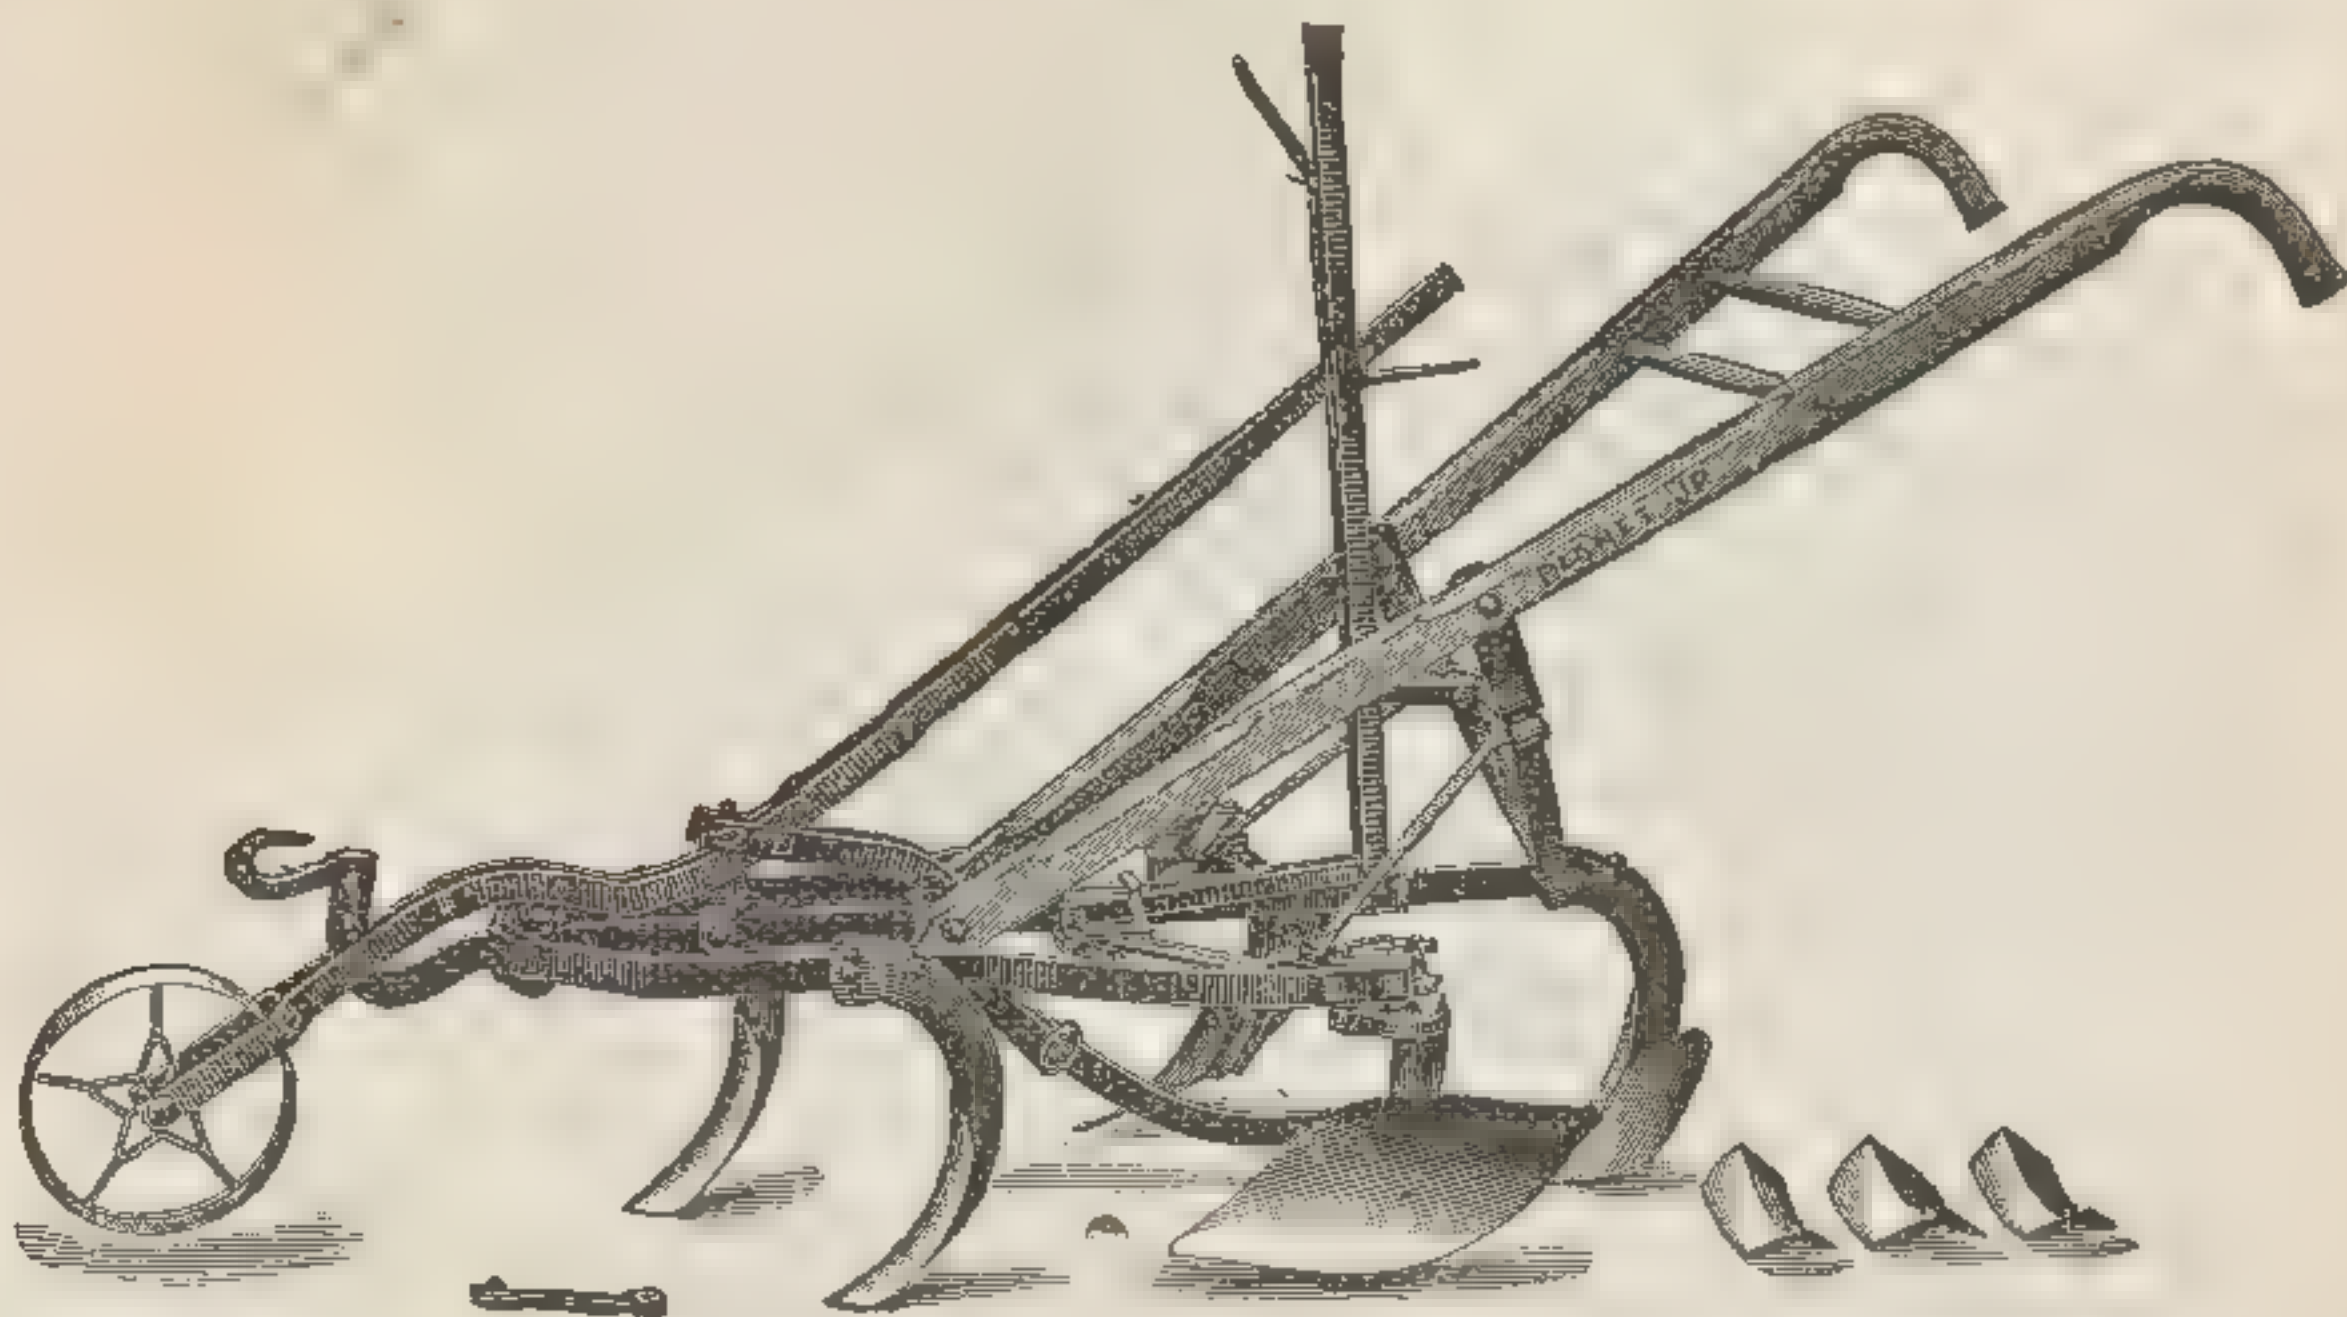

This tool is one of the latest imported Horse Hoes, and is fitted with lever wheel depth regulator and outside handle braces. It has never been possible to regulate the depth of these tools perfectly until this wheel depth regulator was made. It can be set at any depth simultaneously with the front wheel by the wheel lever. It will make the cultivator run more steadily, and can be gauged to a nicety instantly while in motion. This rear wheel depth regulator will relieve the operator from all strain in holding cultivator from running too deep. It is used also for transport-

ing from field to field without lifting the cultivator. The lever wheel enables the operator to change its depth in a moment and while in motion, and to turn easily at the end of the row, by the lever expander the width can also be changed instantly. The outside handle braces make the cultivator very solid and rigid. This rigidity is maintained while the tool is being expanded or contracted.

PLANET JR. No. 72.

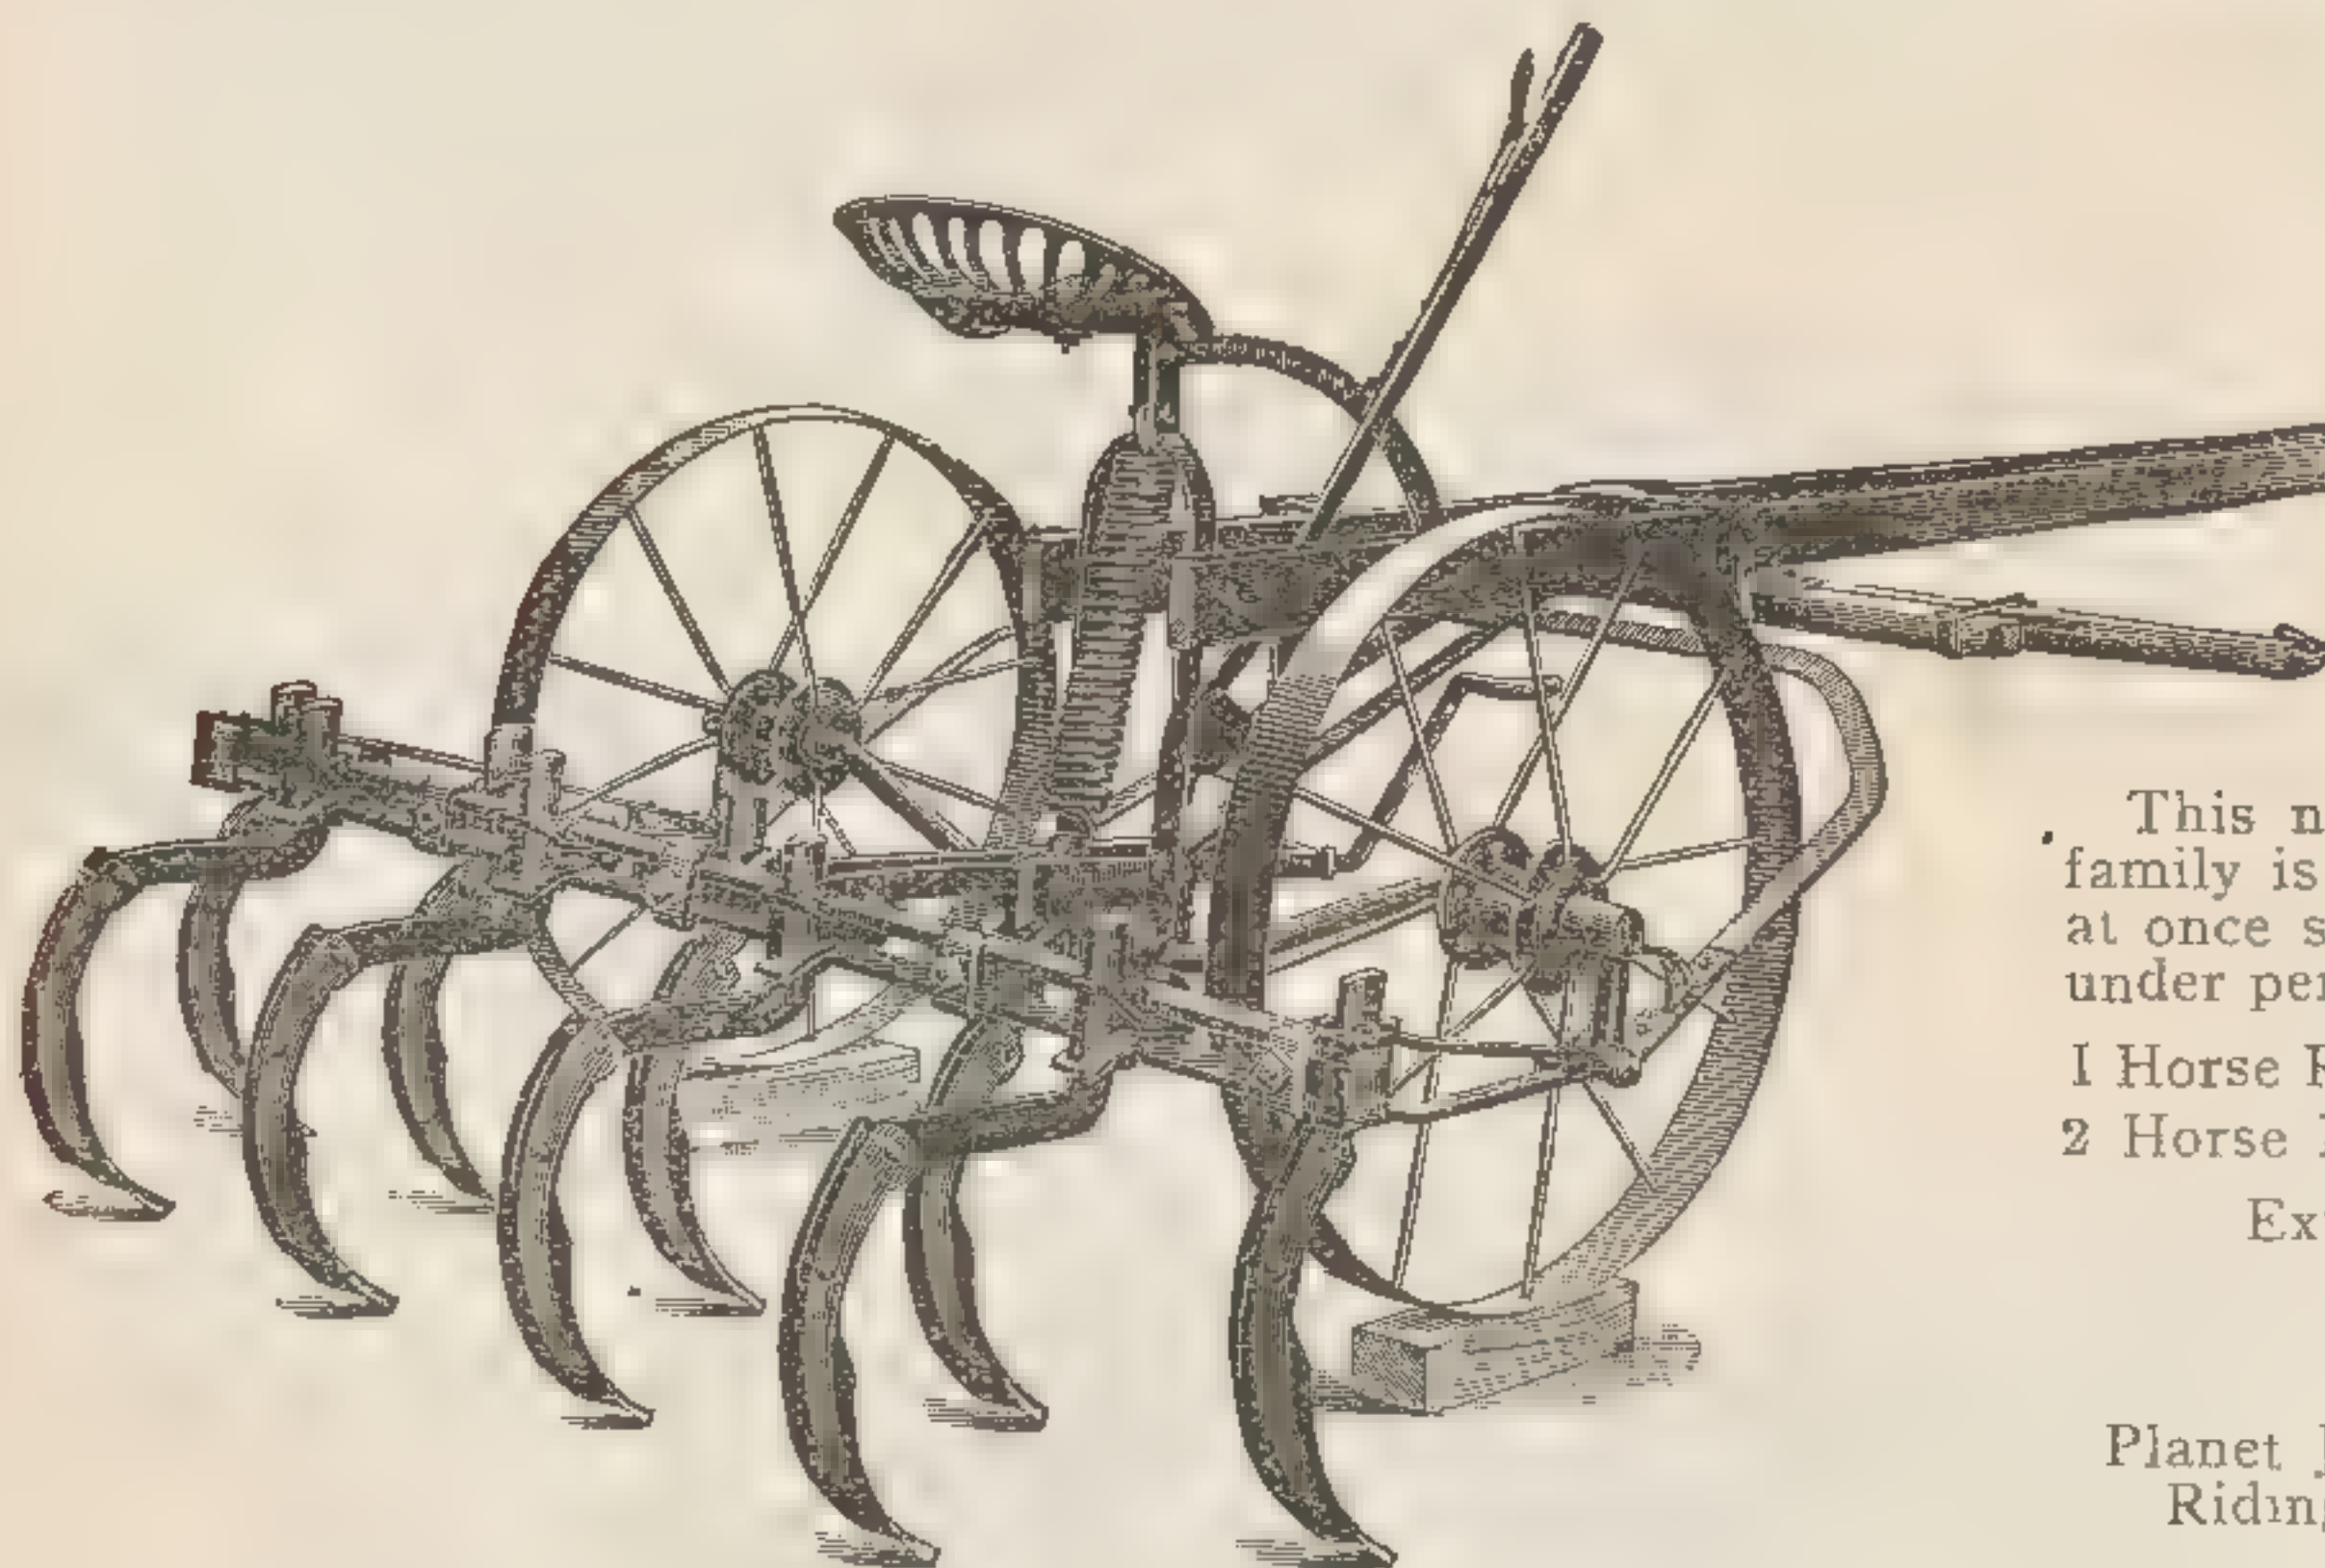

Two-Row Pivot Wheel Riding Cultivator, Plow, Furrower and Ridger.

Corn and potato growers should rivet their attention to the implement they see above. It is the greatest labor-saving tool of the century. Its use means two rows cultivated at one passage, and it matters not whether the rows are straight or crooked, wide or narrow, regular or irregular in width. Think of the saving made in cultivating perfectly two rows of corn, potatoes or beans, or any crop planted in rows not over 44 inches apart at a single passage. This means double speed at single cost; and the arrangement of the fourteen teeth is such that all the ground is well tilled and no open furrows are left next to the crop.

Price £15/15/-.

MU 30.

MU 31.

The wheels are heavy and strong, 2½ in. tread, 30 in. high, carried on a bent axle, to which the tongue is securely attached and braced. The Frame.—This is made of two bars of flat steel, 2 in. x ½ in., securely fastened together in truss form. The Seat is adjustable back or forward. The teeth are 10 in. long and 2½ in. wide, with heavy steel standards, adjustable quickly by loosening a simple clevis. Depth.—This is instantly changed from a mere touching of the points of the teeth to almost any pressure, by a single lever within easy reach of the driver, combined with a powerful steel spring, which is connected at its lower end to a small 2-wheel truck, movable

The Planet Junr. Riding Harrow and Cultivator.

New Steel Harrow with Folding Teeth.

With Channel Beams.

This illustration represents a set of three Harrows folded and packed for transport. In this position they occupy but little space and no charges for packing are incurred.

These Harrows combine lightness with great strength, and have been specially designed for the Australian trade. The Teeth and Beams are made of solid steel, and the particular construction and advantages of the Harrow will easily be seen from the engraving. They are readily folded for transport, so as to occupy but very little space, and all charge for packing is avoided. Four Beam Harrows, with 5 rows of Teeth and Wood Pommeltree, complete,

F.H. 44, Three Harrows to the Set, to cover $8\frac{1}{2}$ ft. for 1 or 2 horses. Weight 133 lbs. £5 15/-.

F.H. 54, Three Harrows to the Set, to cover $9\frac{1}{2}$ ft., for 2 horses, Weight 184 lbs. £6.

New Steel Solid Frame Harrows.

MU 34.

These New Harrows are made with Steel Teeth, secured to the frame by nuts which are locked, so that they can never shake loose. The teeth are set at equal distances, and each tooth cuts a separate uniform track. Although the teeth are so securely fixed in the frame, there is, however, no difficulty in removing them for renewal or repair. These Harrows are very

durable, and thoroughly adapted for every description of work.

Four Beam Harrows, with 5 rows of Teeth, and Wood Pommeltree, complete.
SH 54.—Three Harrows to the set, to cover $9\frac{1}{2}$ feet, for 2 horses. Weight, 195 lbs. £5 10/-.
Chain Harrows, Price £5/5/-.
Drawing and particulars on application.

The Zig-Zag Steel Lever Harrow.

With $\frac{5}{8}$ in. Teeth.

Covers 10 ft.

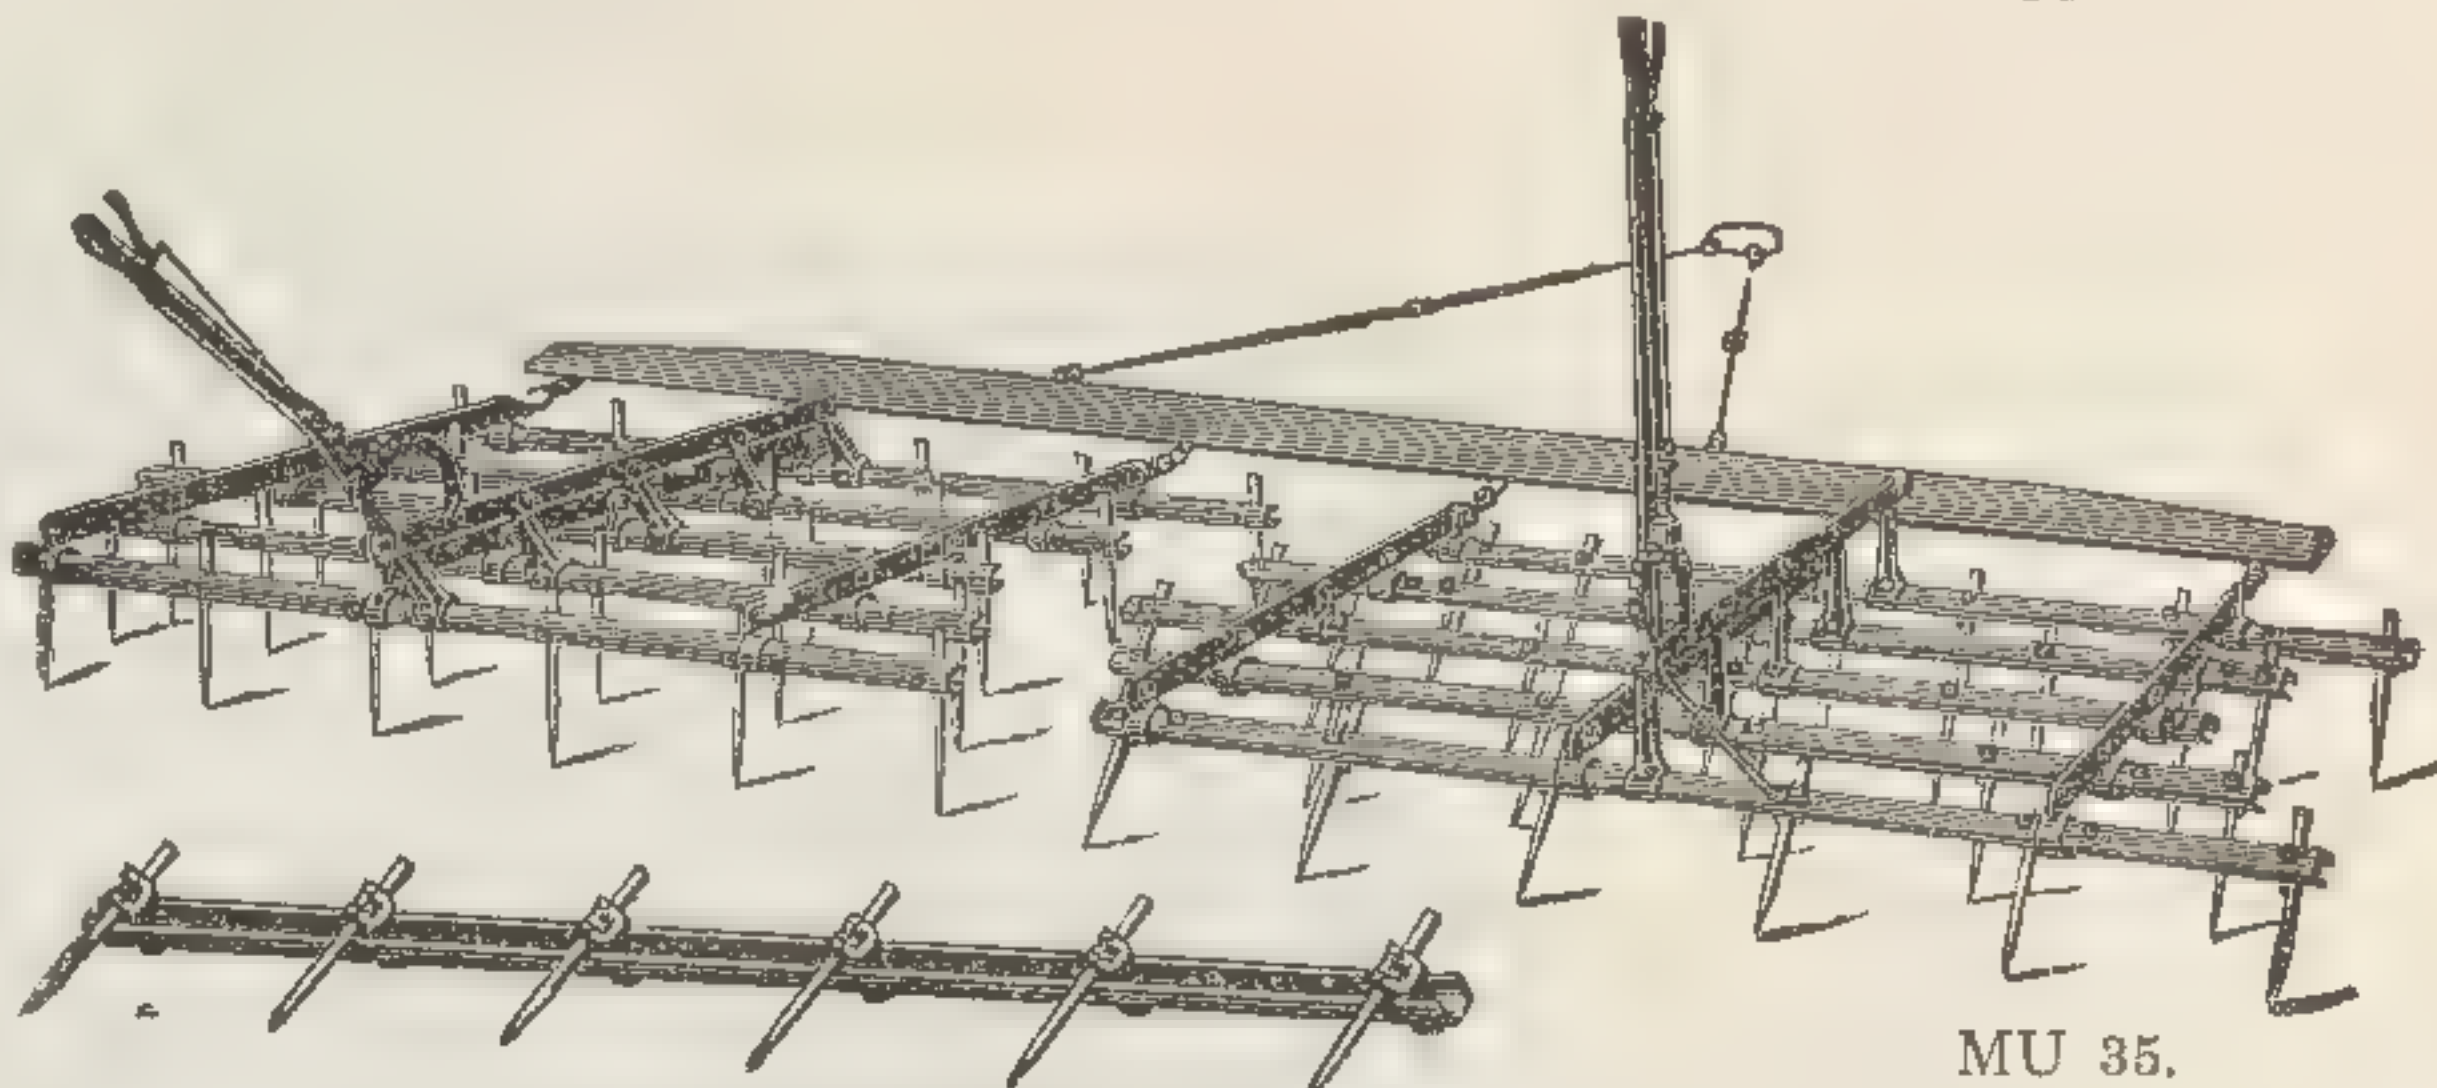

In Pairs, £5 5/-; weight, 272 lbs.

Sets of Three, £7 17/6.

Weight, 424 lbs.

Covers 15 ft.

The above can be supplied in Single Harrows at £2 12/6.

This is another new and important improvement in Steel Harrows. It may be seen by the illustration that in the construction of this Harrow the threaded tooth with a top nut has been dispensed with, and in its place a simple, strong clamp device is used, holding the square tooth firmly in its place, easily released, and admitting of adjustment for depth or for turning the tooth, so that different edges may be presented, thus insuring a keen cutting edge and

uniform wear. The bars, of channel steel, are set in collars at either end, giving a short leverage to the resistance of the tooth and a consequent light strain upon the frame. The range of the lever is sufficient to give the teeth any angle, from a slight pitch forward, backward to a horizontal position for transportation. The coupling or running rods are all upon the top of the frame, giving perfect clearance underneath, with no tendency to gather trash.

To Cover 8 feet,
Price, £27.

Machine is fitted
with two wheels;

if

Swivel Wheel

required,

£3 extra.

1. Simplest and Strongest Cultivator in the Market, and with Fewest Parts.

This Cultivator has been specially designed throughout. It has ONE steel "through" axle, of very strong section, and ONE lever for raising and depressing the tines.

2. Strong Steel Wheels, with Renewable Centres.

The wheels are of steel (much more durable than wood), and the centres are made in such a way that when worn they can be taken out and replaced by new ones, thus making them equal to new.

3. Front Swivel Wheel.

A Swivel Wheel is attached to a short pole, and takes all the weight off the horses. In some districts this is considered an improvement on the POLE system, and it is given with no other Cultivator. A pole can, however, be fitted if desired.

4. Hinged Sectional Frames.

The Tines are carried by 4 frames, which are hinged in front. The tines are thus free to follow all irregularities of the soil.

5. Reversible Steel Points.

When one end of the steel points is worn, they can be turned round, and the other end used. The points are made with ribs on each side to strengthen them, and require ONE bolt ONLY to fix them. Patent chilled cast points are also supplied, and answer well on most farms. Hoes, 5½ inches wide, can be supplied to cut all the land, and are suitable for fair working land which is not hard baked.

6. Spring Steel Tines.

The Tines are patented, and of taper spring steel, which no other maker can use. They can be moved sideways, and set with more or less pitch. Spiral instead of flat pressure springs are employed, giving greater freedom in work.

7. Pressure and Depth of Work.

The pressure can be varied at pleasure to work either shallow or deep. As this is a strong machine, it will work on harder land, and at a greater depth than others.

8. Tines are Adjustable.

The Tines can be moved sideways, and can be set with more or less pitch. On very foul land some of the tines can be removed to prevent clogging.

9. Advantage over Old Cultivators.

Having spring curved tines on hinged sectional frames, the action of this implement on the soil is much greater than with solid frames and solid tines. The soil and weeds are lifted and shaken, and there is all the difference between working DEAD and being ALL ALIVE. All the weeds are brought to the surface and killed, and the soil is thoroughly aired and sunned.

10. Flinches at Nothing.

The "Ipswich" Steel Cultivator will face the hardest baked soil, and even roadways will not stop or injure it; it goes through all alike.

11. The Farmer's Friend.

This Cultivator has been pronounced one of the most valuable labor-saving implements of the day. The difficulty is not in saying what it WILL do, but what it WILL NOT do.

Plano stands for all that is desirable in harvesting machinery. "Plano" means light running. This feature is indisputably an important one, and has always been characteristic of the Plano products. "Plano" also means durability. No farmer wants a machine that is going to wear out in a single season, and so this feature is never overlooked by prospective purchasers. A machine must last, and in this respect the record of the Plano is irreproachable. And again, "Plano" means ease and entire satisfaction in operating. The Plano machine is convenient to operate, requires little attention, few repairs, and in every way is a "dandy to run"—such a machine is the one to buy. When a machine is light running, durable, and properly designed, besides being convenient to

operate, the acme of perfection has indeed been obtained. Plano binders, mowers, reapers, rakes, knife grinders, and attachments embody these desirable features and commend themselves to particular farmers all over the world. In a word, "Plano" means "perfection."

(COPY.)

Wagga Experimental Farm,
Bomen, 10th October, 1906.

To Messrs. F. Lassetter and Co., Ltd.,
George Street Sydney.

Dear Sirs, In reply to yours of the 7th instant, No. D., I beg to state that I purchased the first Plano Reaper and Binder from you for the harvest of 1900, and another machine was obtained in 1903. They have been used for cutting very heavy crops, including wheaten hay yielding up to 4 tons per acre, and the machine first obtained has also been regularly used for cutting sorghum.

Their work has been of the most satisfactory character wherever we have used them.

The Plano is to be commended for its strength and simplicity of construction, and strong evidence of these qualities is given in the fact that notwithstanding the heavy work our machines have done, the cost of repairs to each has averaged only £2 11s. 8d. per annum.

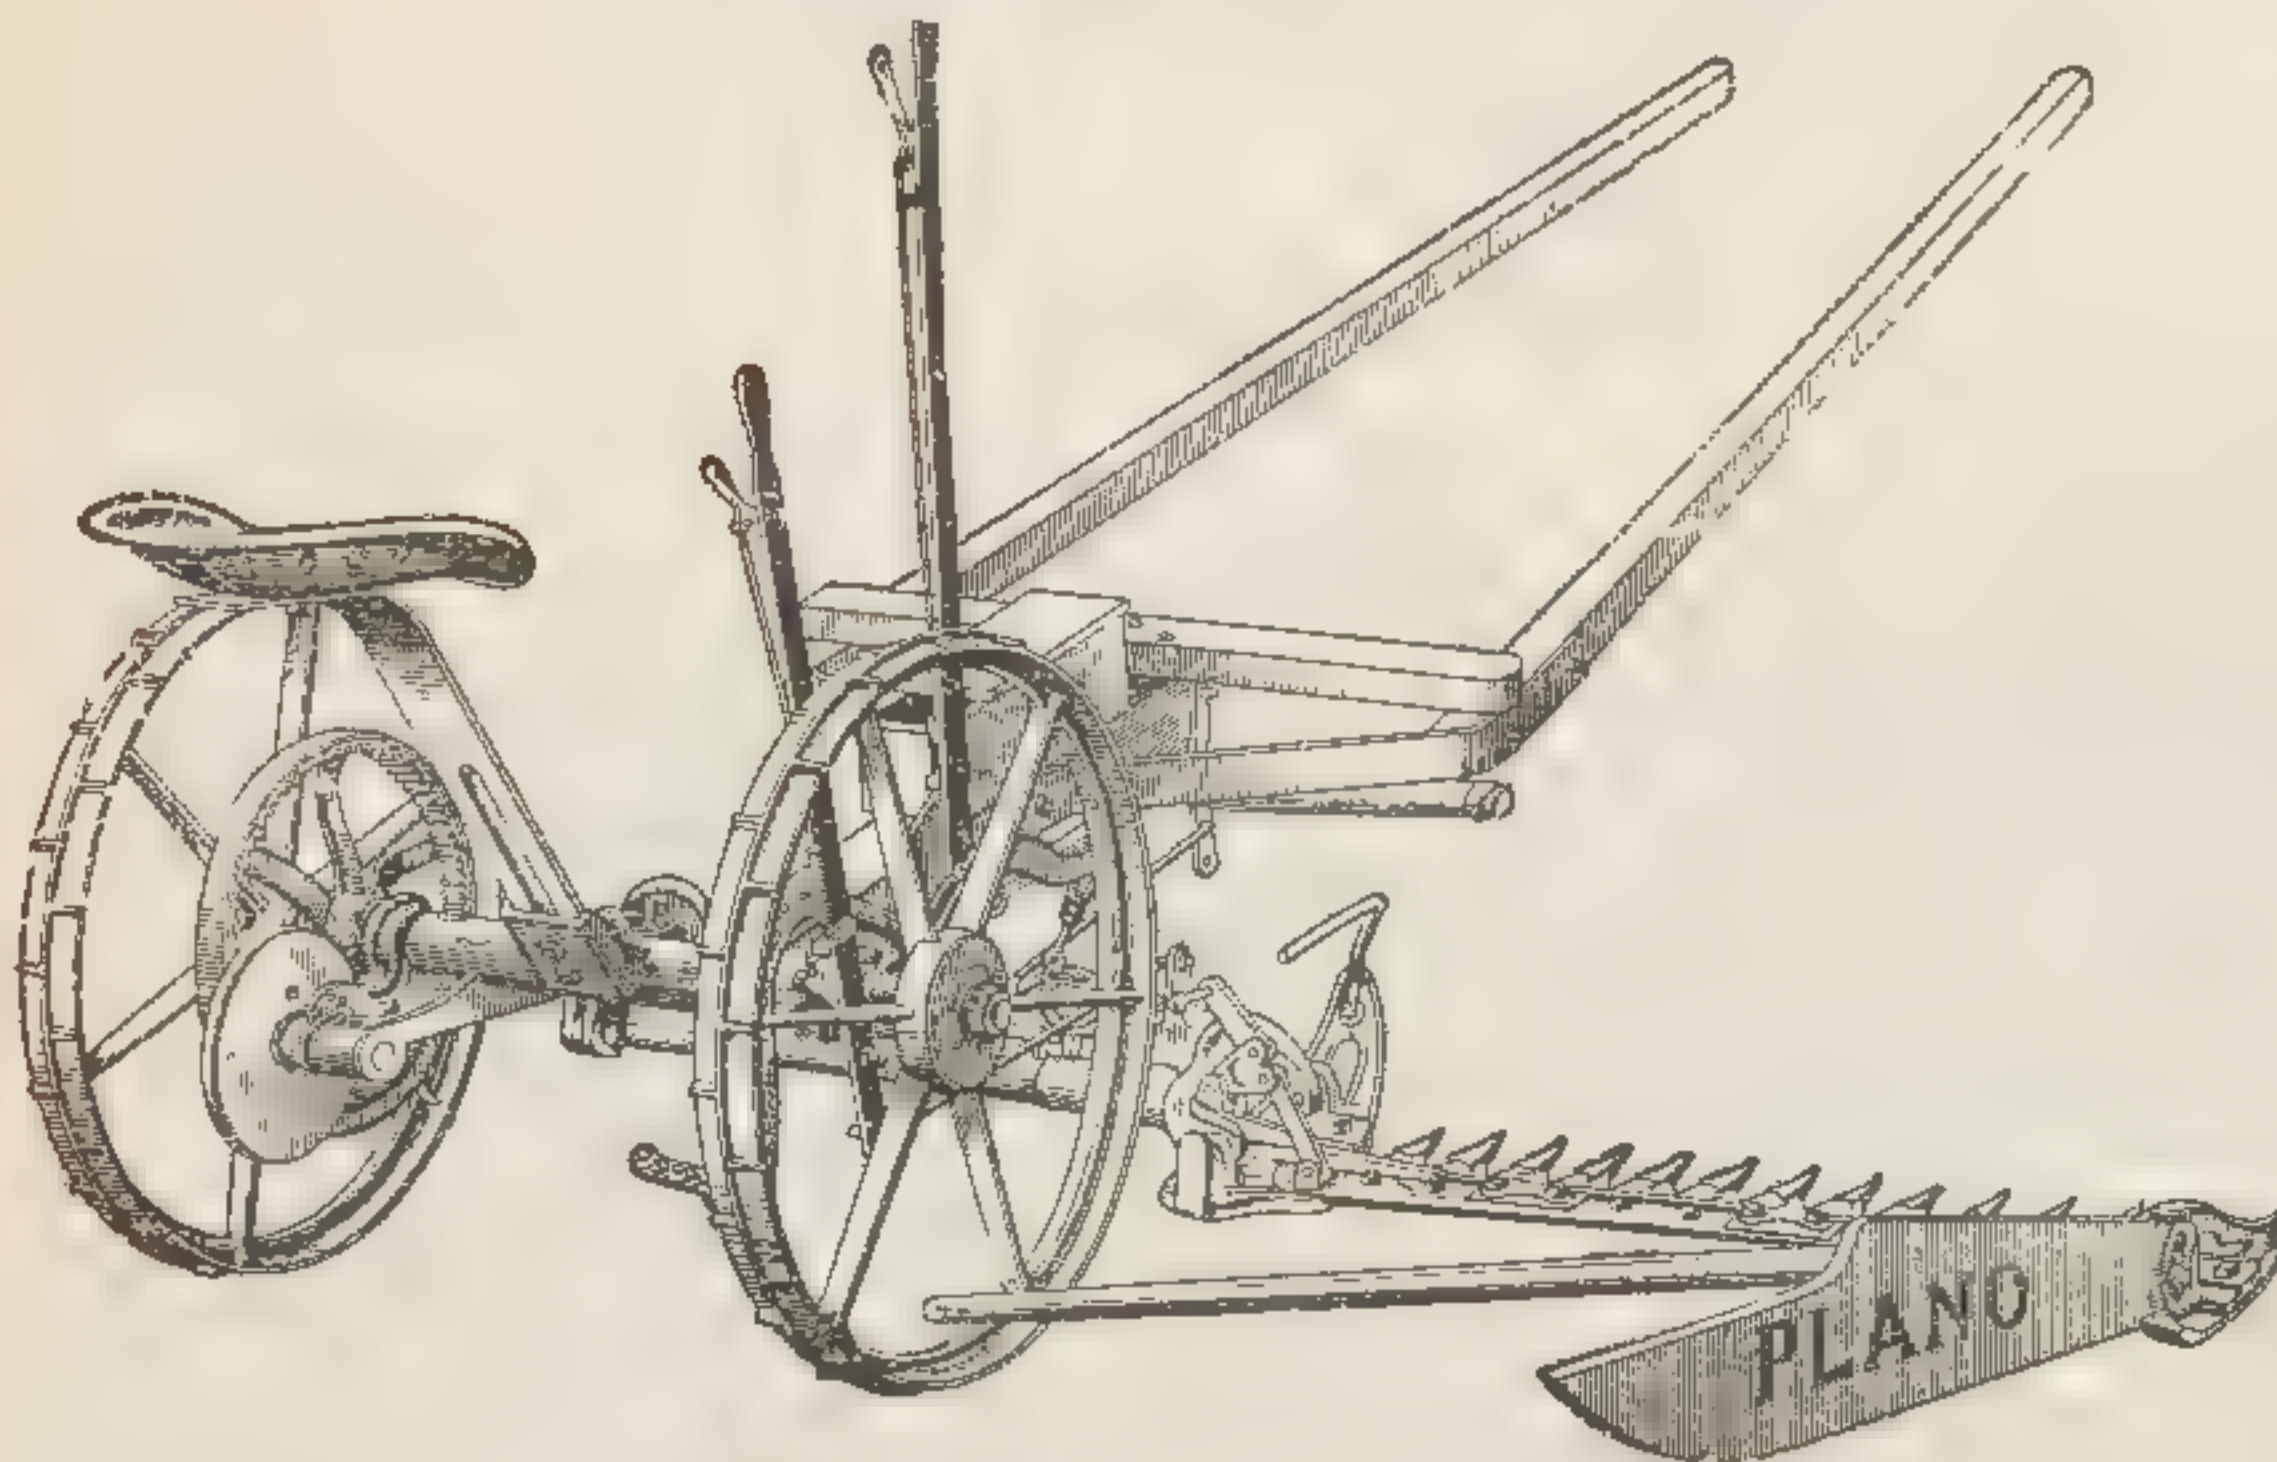

Yours faithfully.

5 " 	£20 10s.

MU 46.

THE PLANO MOWER WITH REAPING ATTACHMENT.

The Plano Reaping Attachment affords a most economical machine for farmers who have only a little grain to harvest. It can be quickly attached to any of the Plano mowers, 4½ or 5 foot cuts. The Reaping Attachment consists of a strong adjustable carrying platform and a grain divider, which are fastened to the cutter-bar, an extra seat for the operator and a hand rake. The extra seat is placed directly over the drive wheel next to the cutter-bar, so that the operator is convenient to his work. He has a foot trip by which the platform is dropped and the gravel allowed

to slide off to the ground. The Reaping Attachment is so perfectly designed, that with a well-trained team it may be operated with one man, but usually it has been found that two men, or a man and a boy, can operate the attachment to the best advantage. This Reaping attachment is provided with a centre guide on the cutter-bar, which prevents the rake from being caught in the knife. After a little practice the operator can leave the gavels in as convenient shape for binding as does a regular reaper. He can gauge the size according to his wishes and deposit the gavels when he pleases. In ordering it is necessary to specify the size of the machine, and to state whether it is for a vertical lift or a chain drive mower.

PLANO

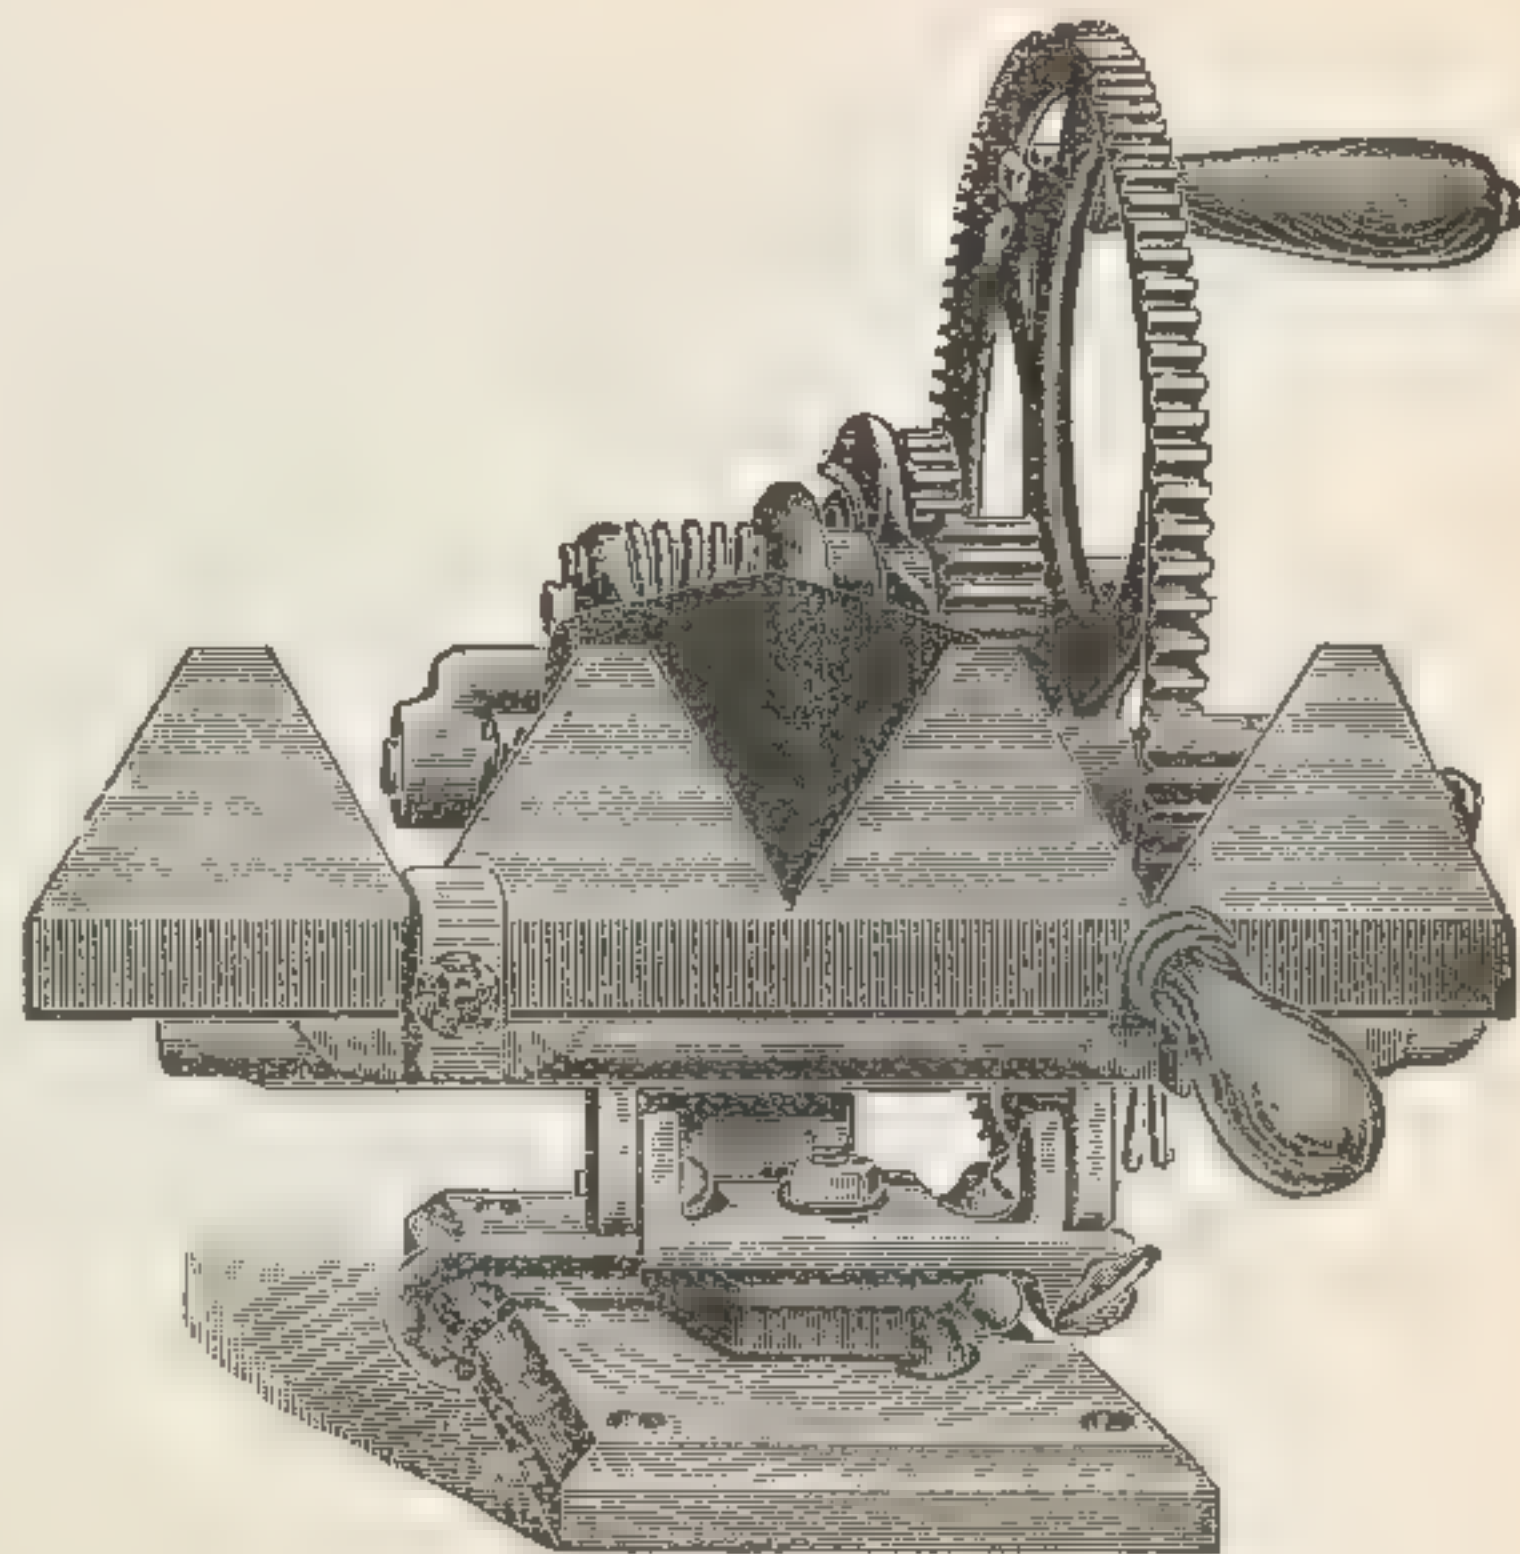

LIGHT RUNNING

The "Plano" Sickle Grinder (MU 47)

is the simplest and only reliable Grinder in use.

It can be operated by the most inexperienced. All the farmer has to do is to adjust the sickle to the Grinder, turn the crank, and the machine does the rest. A sustaining spring carries the entire weight of the emery wheel in its upward movement. It is self-aligning on the sections. The emery wheel is given a high speed with a rapid vibrating movement the whole length of the section, which prevents the possibility of heating the knife. It is adjustable to a thick or thin bar, or any size sickle head, and will grind a short or long section with equal facility.

A unique feature of the Plano Grinder is the ease with which the grinding stone can be changed; only the removal of two cotters is necessary. It can be done in a minute, and the machine is converted into a stationary Grinder. This change affords the user of the Plano Grinder an advantage not found in any other similar machine, viz., he can transform it into a machine for general use, such as the sharpening of fine tools, scythes, axes, household cutlery, etc., thus making the Plano Grinder not only a necessity in harvest time, but a useful article in the tool-house or kitchen the year round. A special emery wheel is furnished for this change.

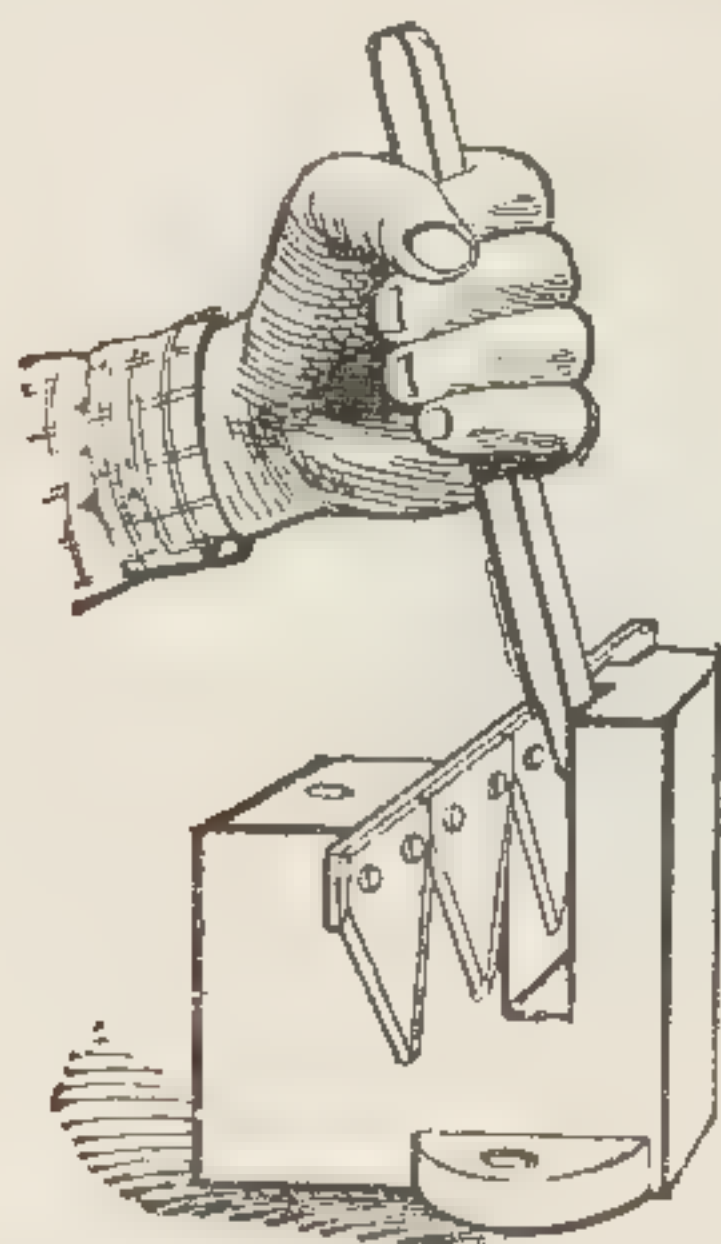

MU 47.

The Plano Sickle Grinder ready for Business.

Price, £1/8, 6.

The "Rapid" Section Remover

MU 48.

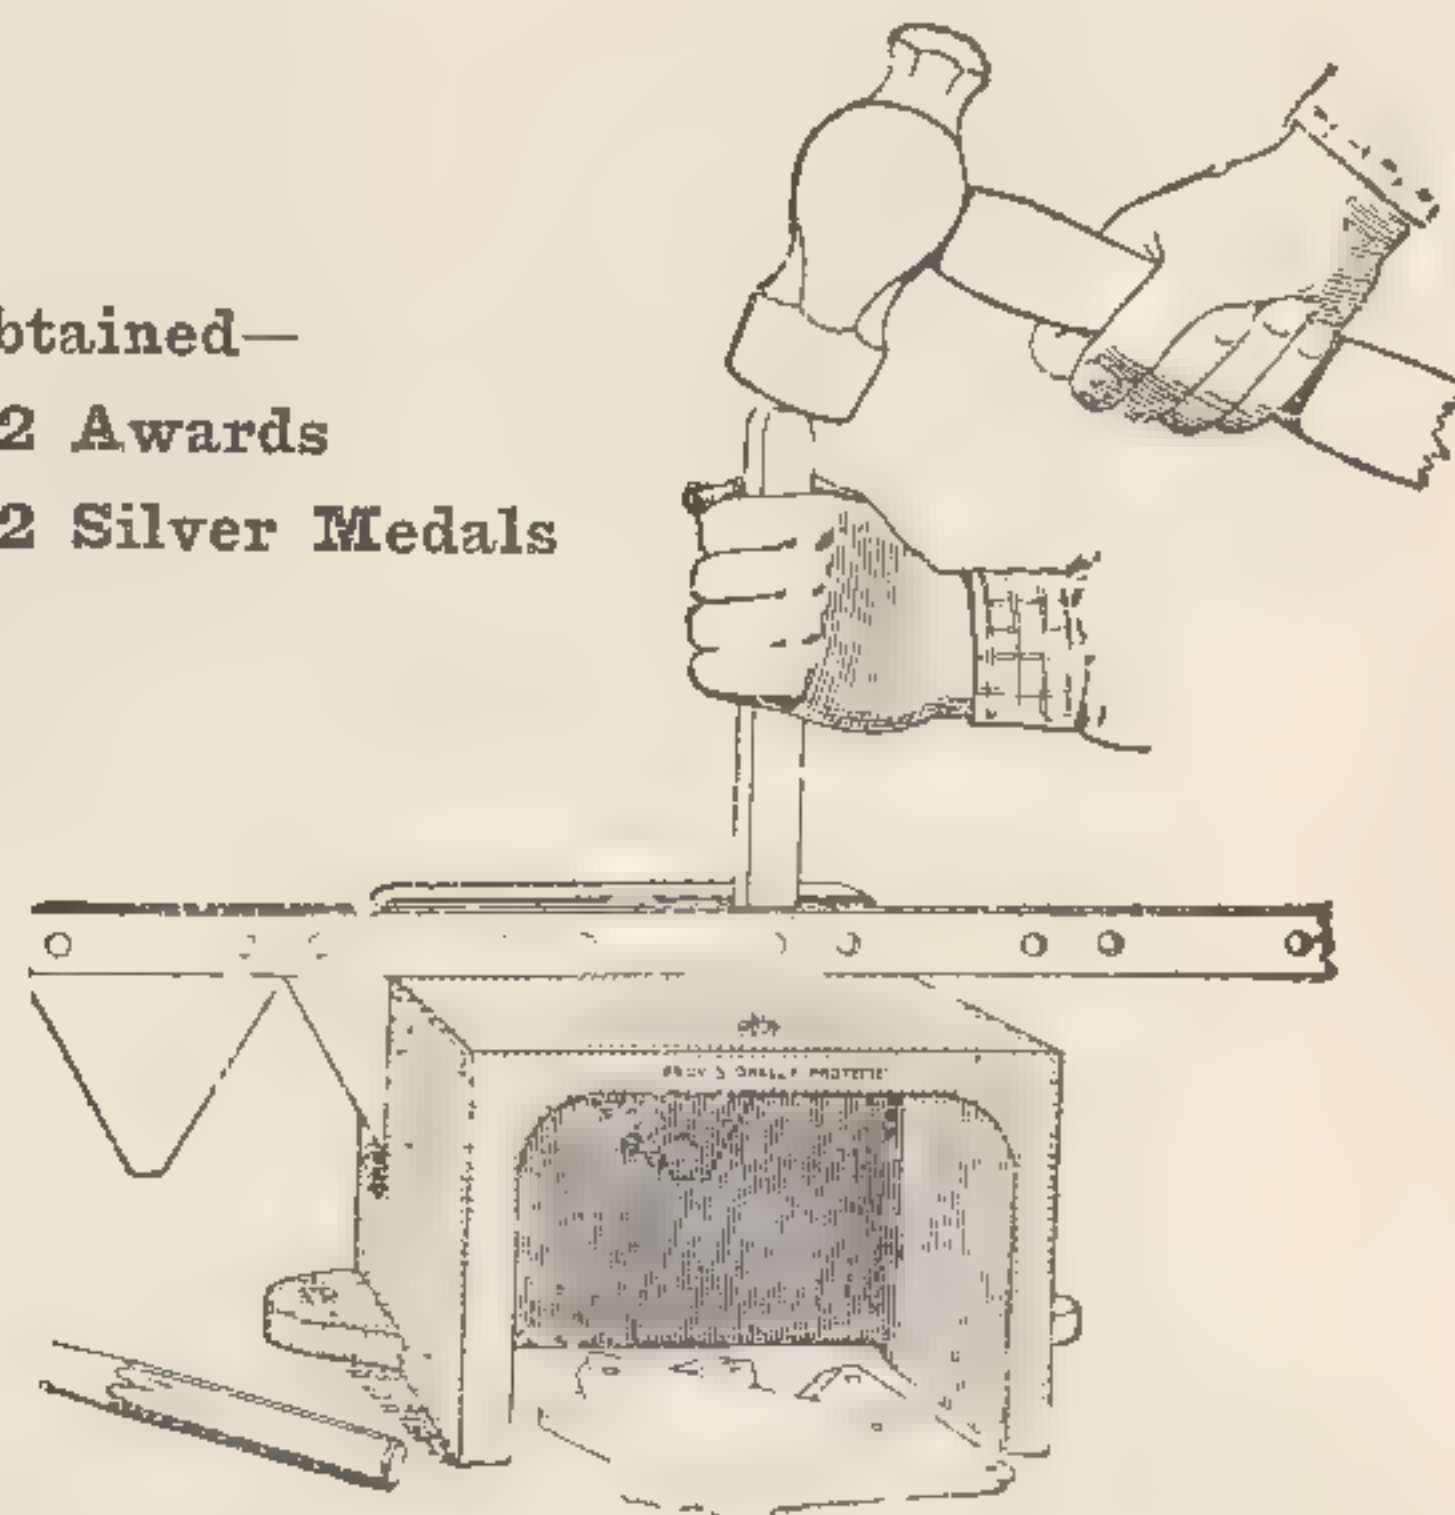

There is a little tool called the "Rapid." It is for removing broken or damaged teeth from harvester blades. It does this quickly and well, and it is impossible for you to bend or injure the knife back. This "Rapid" section remover enables you to get on with your work quickly. It's worth having, for it will save you pounds in loss of time. They are cheap, too.

Price, as illustrated with Hand, Tool and Punch, 22, 6
Hammer extra.

Obtained—

2 Awards

2 Silver Medals

UNIVERSAL PROVIDERS.

The "Plano"

Adjustable Hay Rake

Built of Special High Carbon Steel and Malleable Iron.

MU 50.

The setting lever of the "Plano" Rake affords instant adjustability for meeting all the varying conditions of the field or size of horse. Another feature of the "Plano" is an oil tempered cushion spring, which prevents jar, shock, or noise when dumping the rake; a bell-shaped axle shield which precludes the possibility of winding hay around the axle, as is so common with other rakes; its substantial, durable, steel wheels, with a wide channel tyre and strong spokes, more thickly and rigidly set than on other

rakes. It has more teeth to the foot than any other rake, which are strong and flexible, and will not break; it has an adjustable seat; longer and stronger shafts than the ordinary rake; it has a powerful rigid frame, which cannot bend or break. To put it briefly, the "Plano" Rake is the *ne plus ultra* of perfection, and is without an equal. Like the binder and mower of similar make, it is an up-to date implement, and highly suited to the requirements of New South Wales farmers.

Ransome's "Through-Axle" Rakes

MU 51.

These rakes have a solid "through" axle. The teeth are of steel of "T" section, and can be taken out and replaced with the greatest ease.

The road wheels have detachable centres, which when worn can be quickly renewed at a small cost, thus making the wheel as good as new. These centres are of ample length to ensure durability and steadiness. Dirt is carefully excluded, and a covered oil-hole is provided.

The "Through-Axle" rakes are always fitted with a seat, as shown, and also with a hand lever. The leverage is very light, and can be worked by a lad from the seat, or when walking behind the rake.

UNIVERSAL PROVIDERS.

MU 52.

This is a very efficient machine for stitching straw, grass, reeds, rushes, etc., for thatch. It is now fitted with three wrought iron tubes in the frame, and so constructed that it is much lighter than the earlier patterns. It has two needles working up from underneath the table; the looper hocks are above, and arranged to work accurately with the needles. It is fitted with a double chain feed, which is intermittent, stopping when the needles are passing through the straw advancing only when they are below. It is provided with a top feed appliance which greatly assists the person feeding the machine.

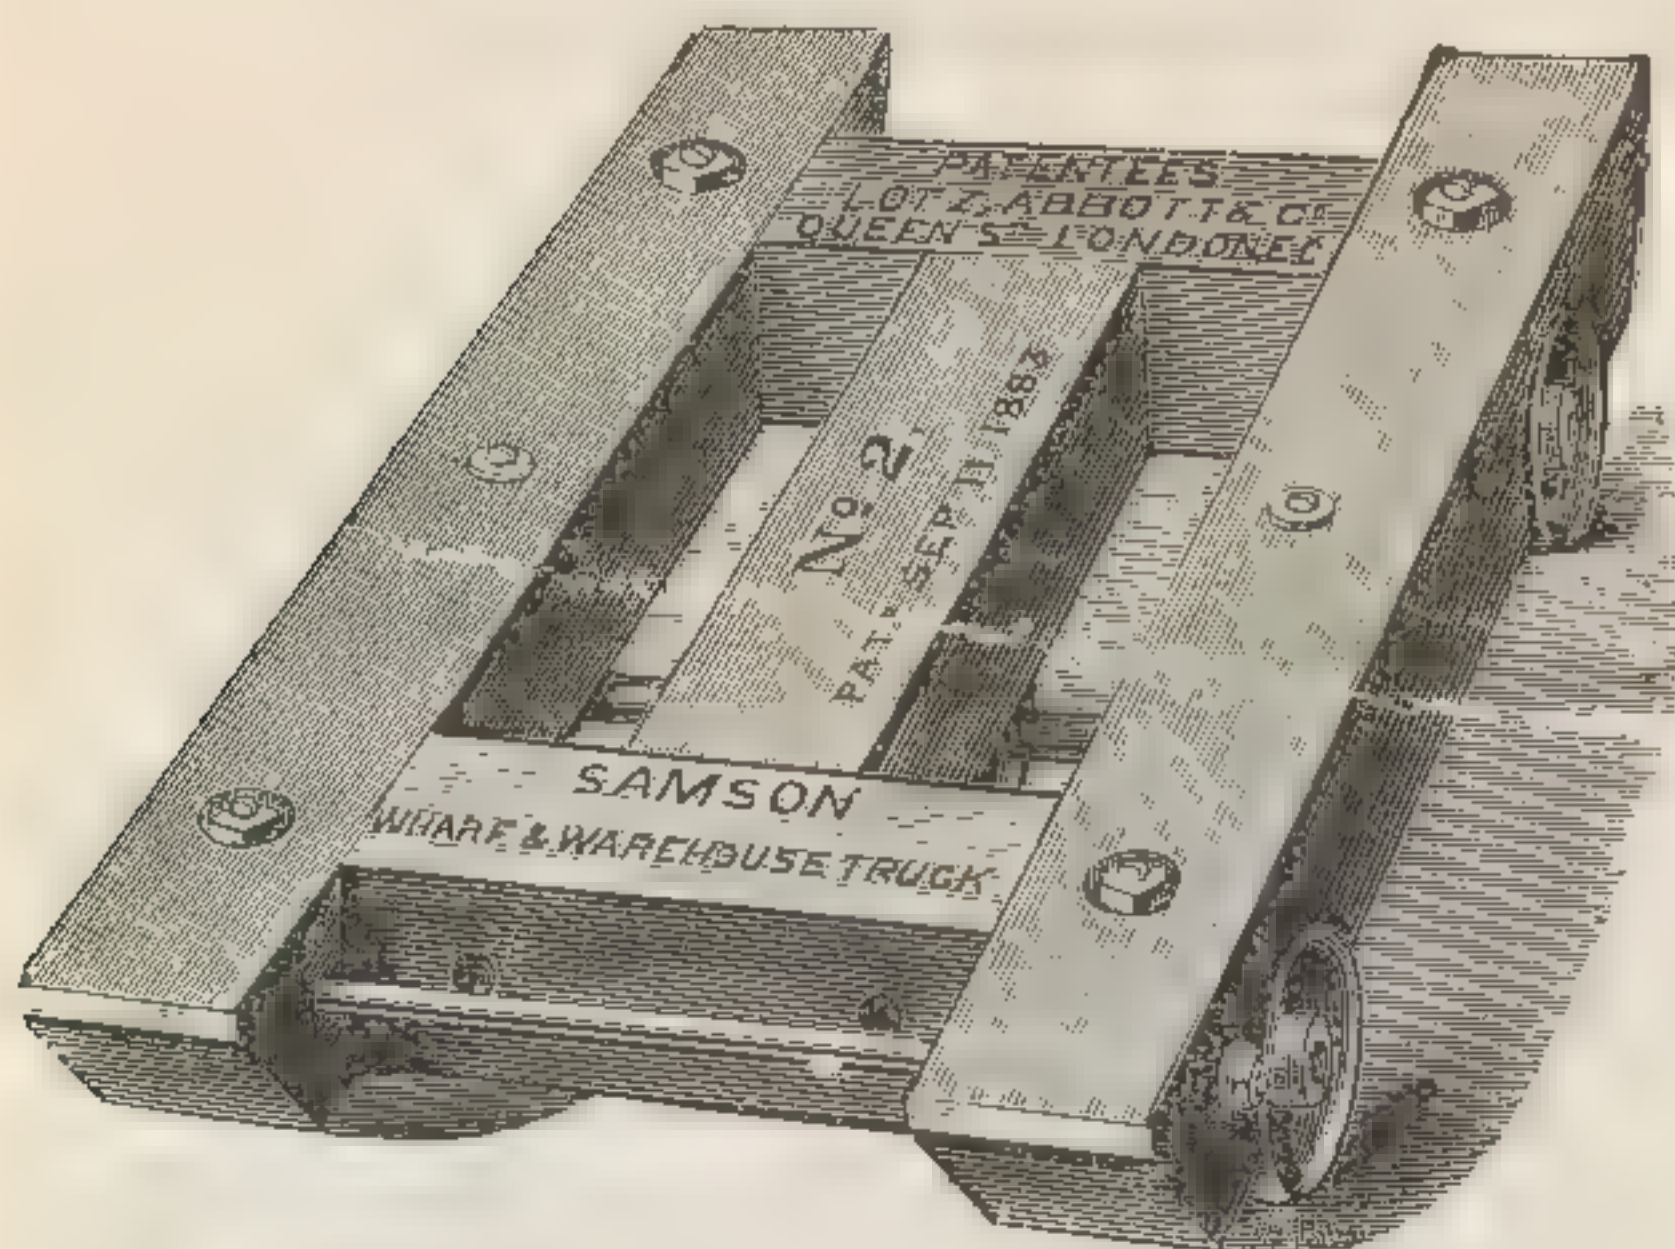

This machine can be supplied with fast and loose pulleys for power at extra cost of £2.

For Hand Power, £16.5.-.

Mills and Crushers

MU 75.

New Maize Mill (MU 75).

MM1. Price, £4/13/-..

The Roller is made of solid steel and case hardened, special machinery being used to ensure a keen and perfectly true-cutting edge.

The Cutting Plate is made of very hard White Pig Metal, and the bottom cutting edge is ground sharp and true, so that it lies parallel with the roller, thus producing a fine and even sample.

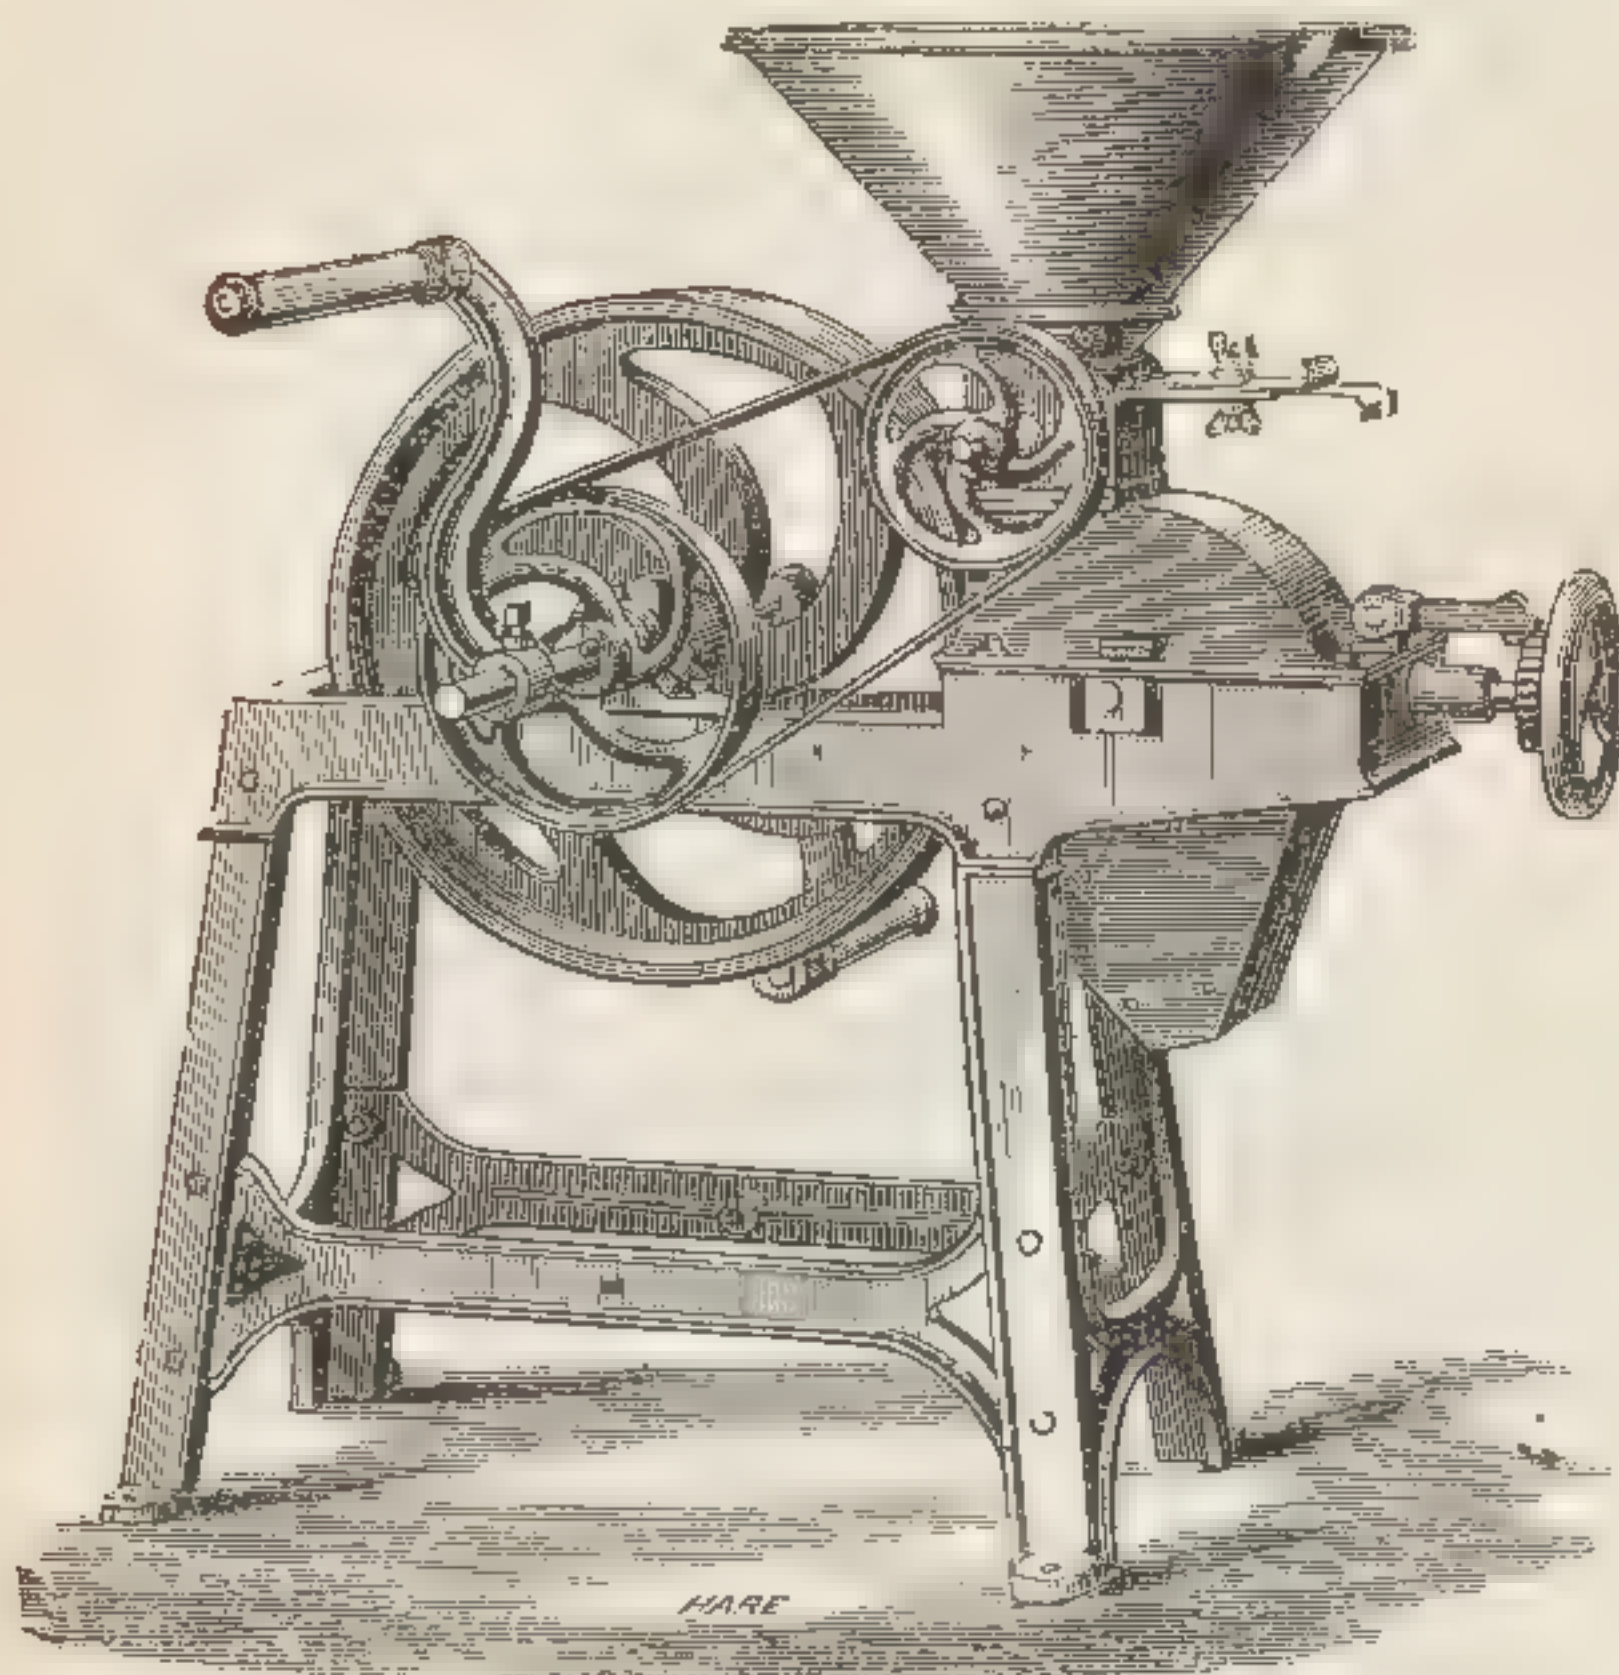

The Feed is regulated by a lever and screw.

Maize can be ground sufficiently fine for all feeding purposes; and by passing it through a second time it can be reduced to meal.

Oats can also be crushed without change of cutting plate or roller.

Beans can be kibbled if perfectly dry, for which a special cutting plate is required.

Capacity, 3 to 4 bushels per hour.

MU 76.

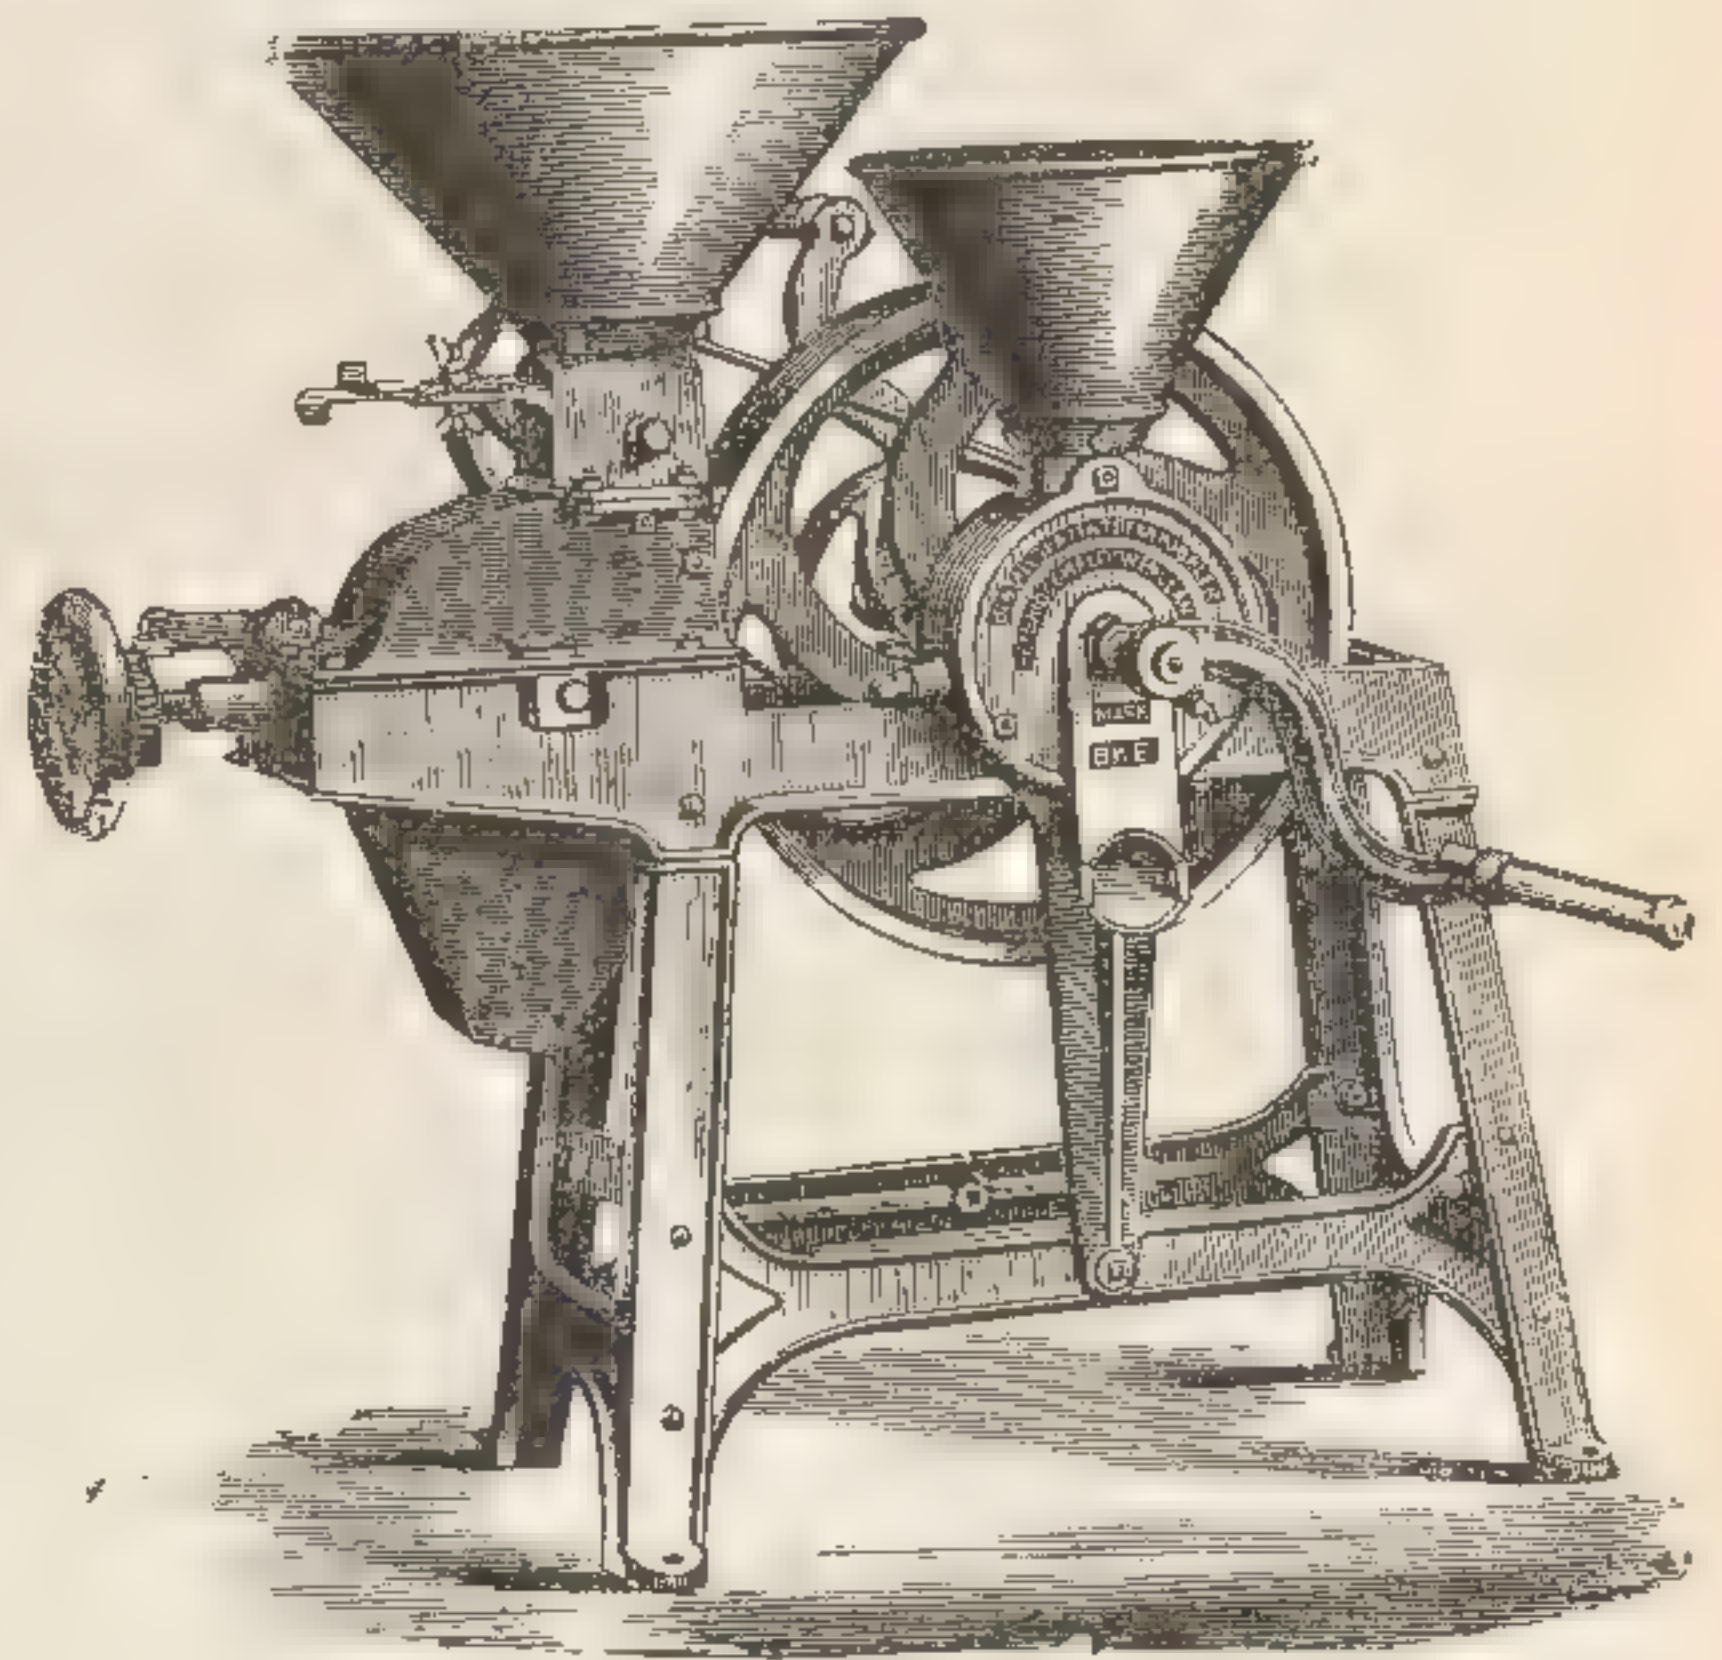

MU 76.—IMPROVED MALT AND OAT MILLS.

With case-hardened fluted rollers, which can be regulated by single screw.

They are also fitted with spiral spring arrangement to allow hard substance to pass through the rollers. FR. No. 1, £8/10/-. 8 Bushels Maize per hour per hand. FR. No. 2, £12. 12 Bushels Maize per hour per hand.

Bone, Shell and Corn Mill

MU 80.

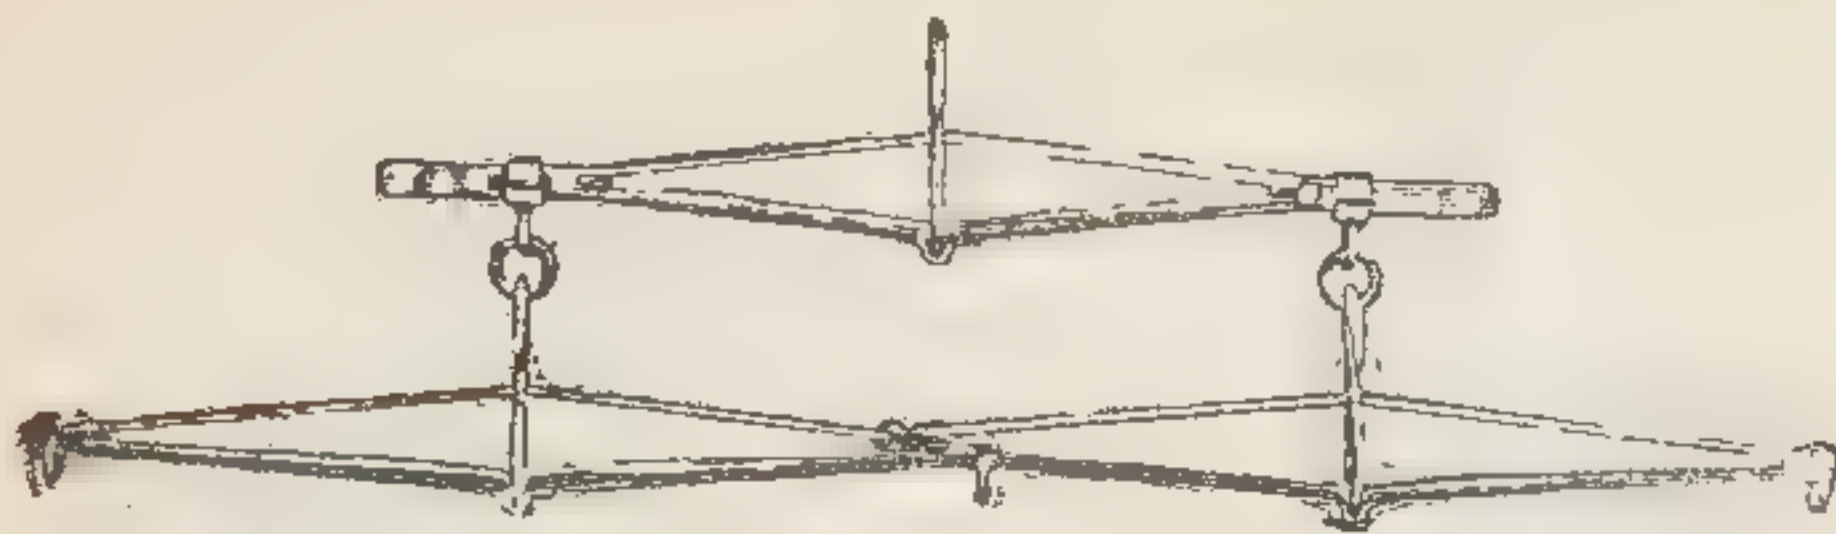

It is a well-known fact that bone meal, ground shells, cracked corn, etc., are excellent for poultry. This mill is especially adapted to grinding bones (when dry only), shells, corn, roots, bark, grain, chicken feed, etc. When it is considered that bone meal is one of the best fertilisers, it will soon pay for itself for that purpose alone. It is a good general mill for farmers, poultrymen, etc., and for compactness, strength, and durability, we regard it as unexcelled. This mill is not intended for grinding green bone.

Capacity—1½ bushels of corn per hour.

Price, £1 12 6.

Drilling Machines

(MU 90)

NO. 12 UPRIGHT WALL-DRILLING MACHINES
For Hand-power, Fast and Slow Speed. Self-feed.

The automatic feeding device of this machine is new and simple, yet efficient and positive. It is located at the back of the spindle and is worked by a cam on inside of main gear wheel. This cam is constructed so as to give nearly a continuous feed. By this arrangement the drill does not jamb into the work, as is frequently the case in the use of hand drills. The lower column is in nice alignment with the drill spindle and the table is at right angles with it. These points tend to lessen friction in the use of the drill and assure light draught. They also lessen the breakage of drill bits.

MU 90—No. 12.

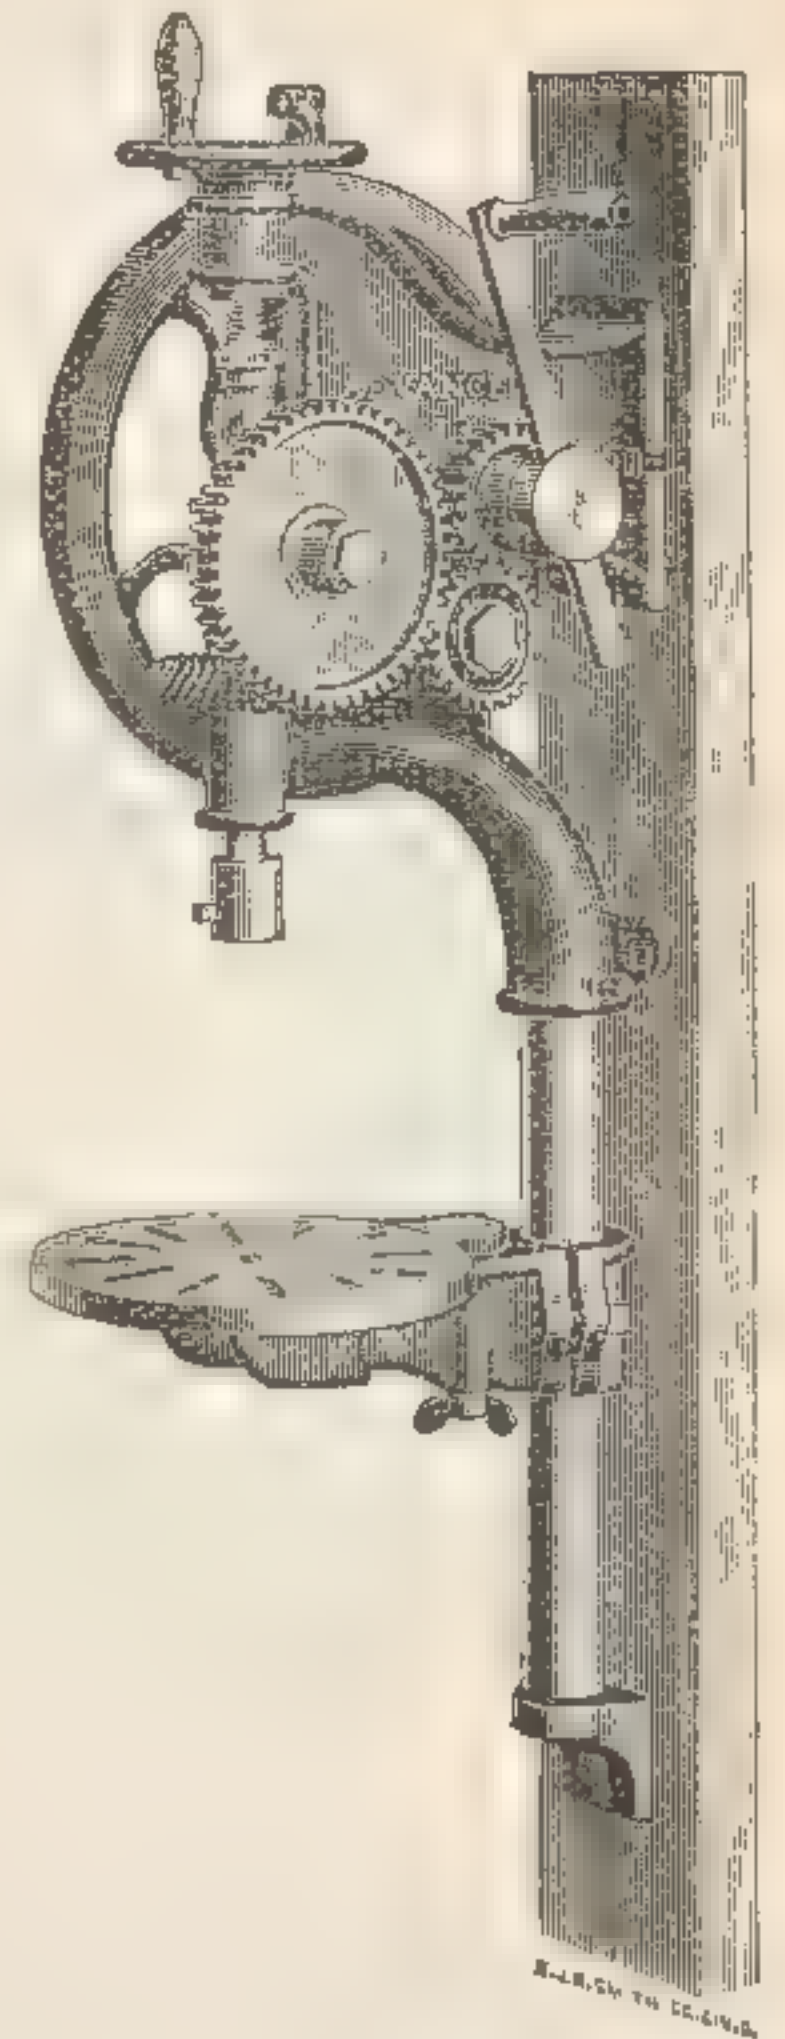

Price £3/2 6

(MU 91)

NO. 13 UPRIGHT WALL-DRILLING MACHINES
For Hand-power, Fast and Slow Speed. Self-feed.

The general design of this drill is the same as No. 12, with the exception of the intermediate gear wheel introduced to change the direction (from the operator) on both speeds. The drill is also somewhat heavier which adapts it for larger works.

We recommend this in place of the old pattern.

EVERYTHING SOLID VALUE

Earth Scoops

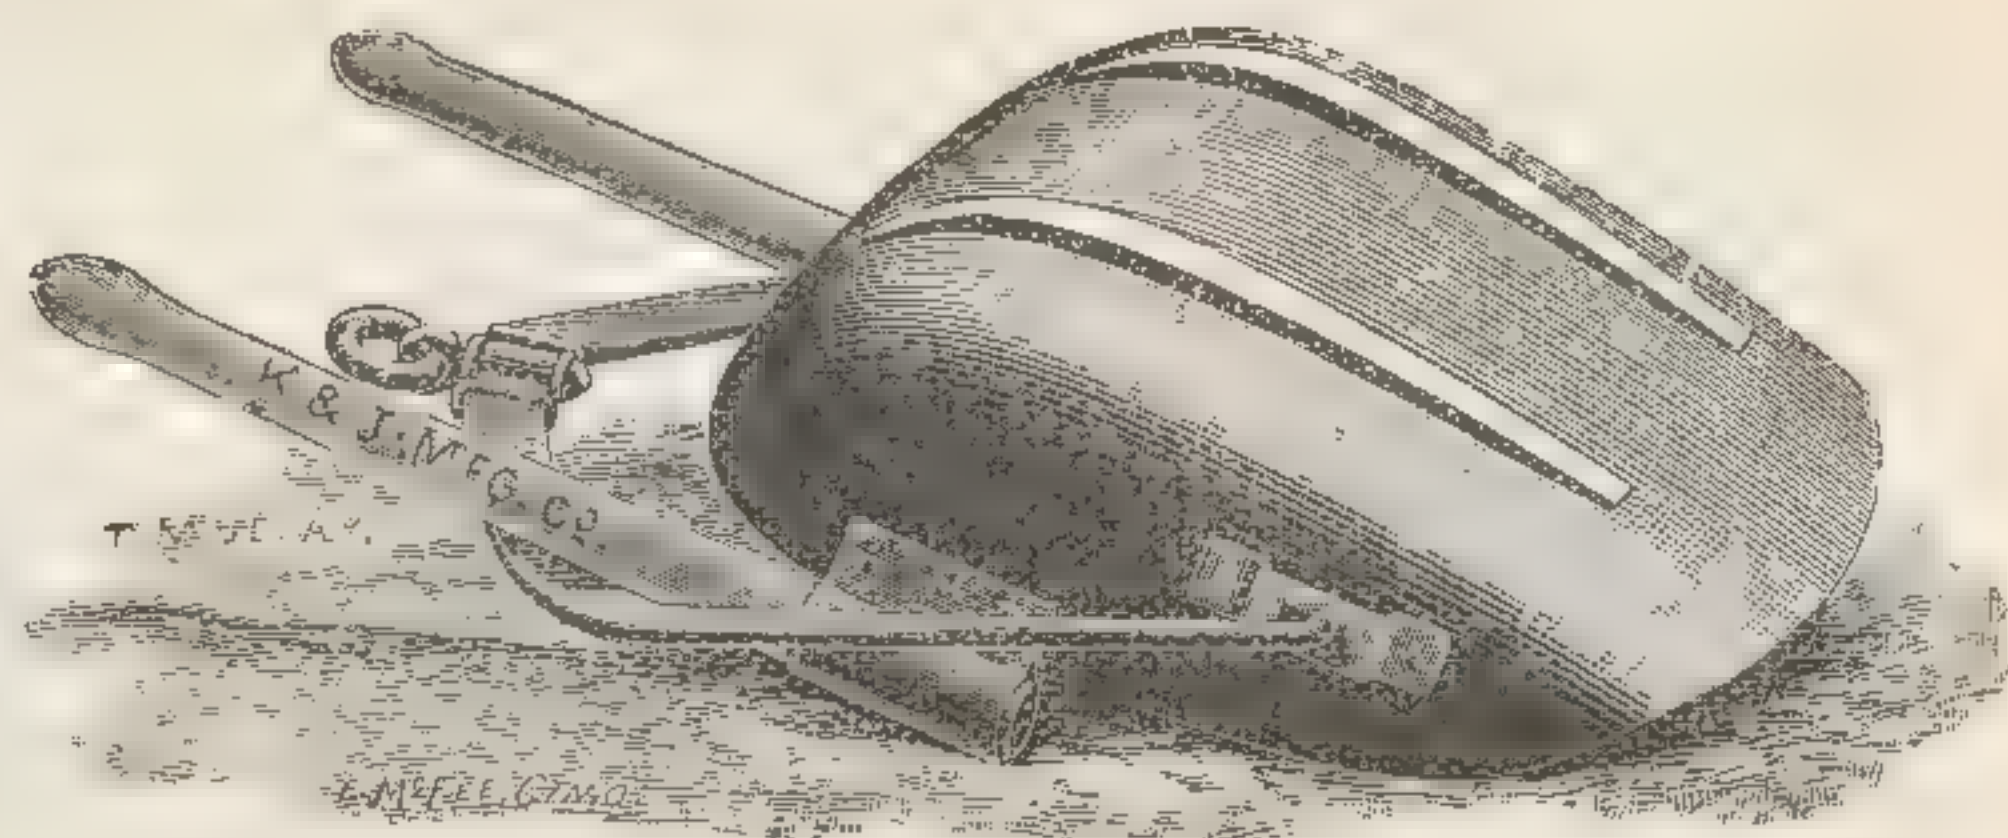

The "Columbus" Solid Steel Drag Scraper

MU 96.

The perfect scraper, made of a single sheet of steel pressed into the best and most practicable shape for working; it is made with one continuous curve from the centre up the sides and back, giving it greater strength and capacity than can be obtained in any other way.

It is without joint or seam, and there is not a sharp corner, bolt, brace, or stay-rod about the scraper. It will work in any kind of soil, whether ploughed or not, and enters the ground as readily as a plough. We guarantee it to fill easier and clean better than any other scraper, and it will scour where no other scraper will. It is not injured by exposure to the weather, and there is nothing about it to get out of order.

MU 95.

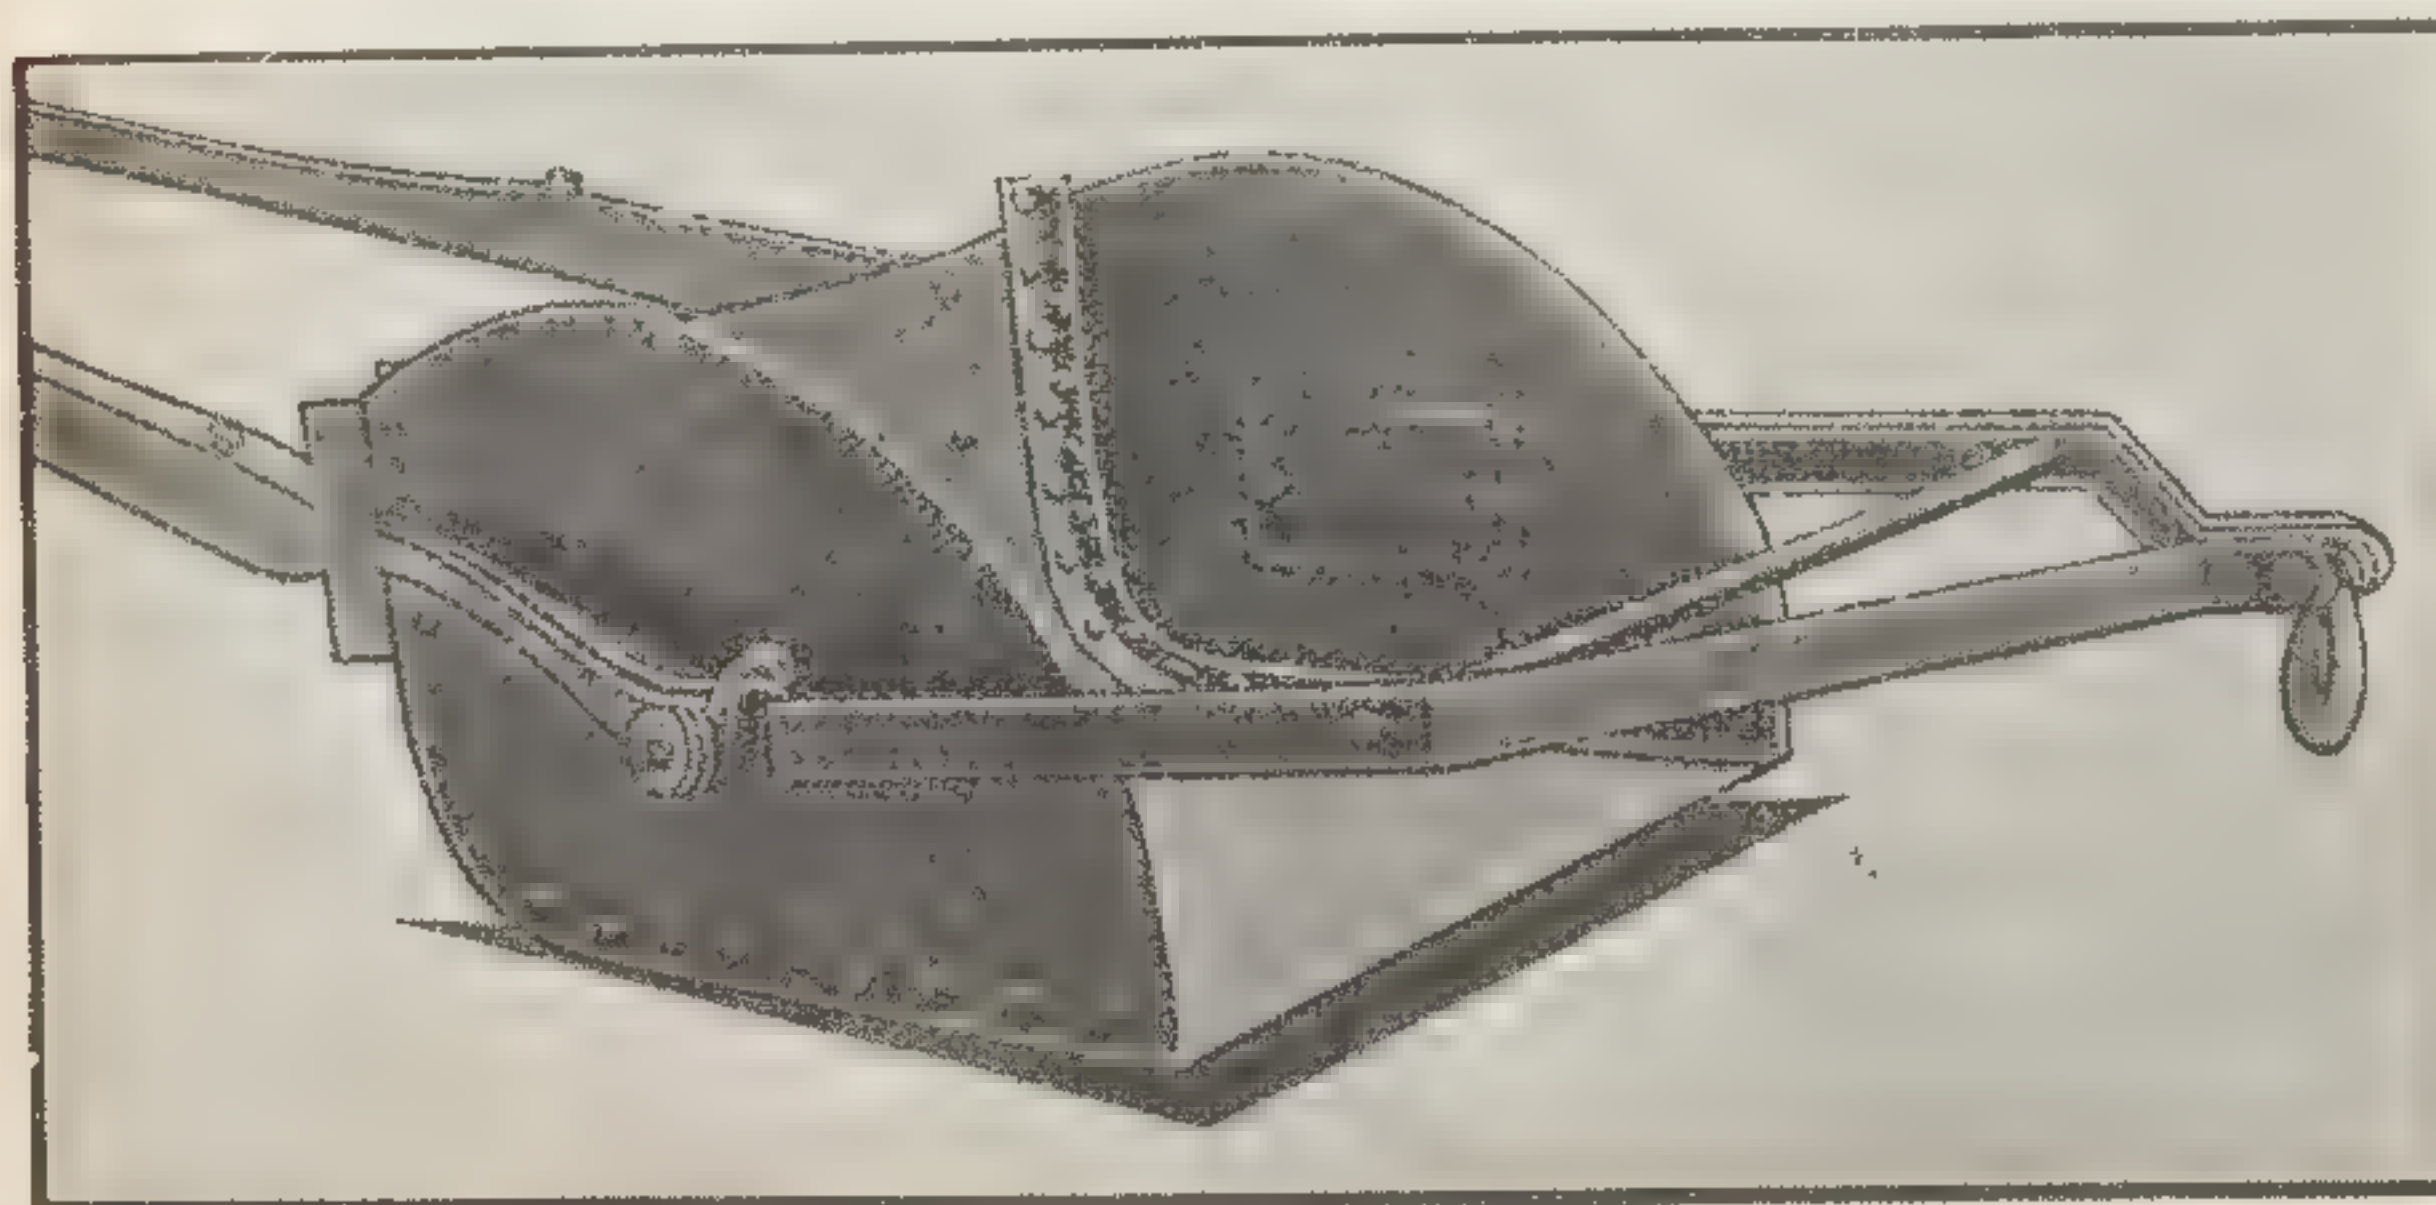

Columbus Earth Scoop, showing runners on the Bottom.

The "Columbus" (MU 96) Solid Steel Drag Scraper

The handles will commend themselves to everyone, as they can, if broken, be easily replaced anywhere. Bails of steel, and of improved pattern, with strong and perfect working swivels. The best bails ever put on scrapers. The entire bowl of the scraper is made of one heat of heavy steel, and is the only one so made.

It is the lightest, strongest, and most durable, and will displace all others wherever it is known. Improved, in that we now make the scraper longer and deeper, so that, while it carries more earth, at the same time it runs much easier and has more wearing surface.

IF STEEL FACE REQUIRED, FITTED TO SCOOP, 5/- PER FOOT EXTRA

The "Little Giant" Wheel Scraper (MU 99)

MU 99.

With "Sarven" Patent Wood Wheels.

Price, £16/10.-.

In carrying position showing end gate detached.

End gates always furnished with the scrapers.

The Wheels are 31in. diameter and 36in. tread.

The great success of our Solid Steel Drag Scraper has led us to make a Wheel Scraper having bowl of same shape, meeting the demand for a wheel scraper lighter, stronger, and cheaper than heretofore made. The lifting apparatus is entirely new, and so constructed that the team does the greater part of the work of lifting and dumping.

The end gate is simple in construction, automatic in action, and cannot get out of order, and the only one ever made that operates perfectly under any conditions. By its use the load may be hauled up and

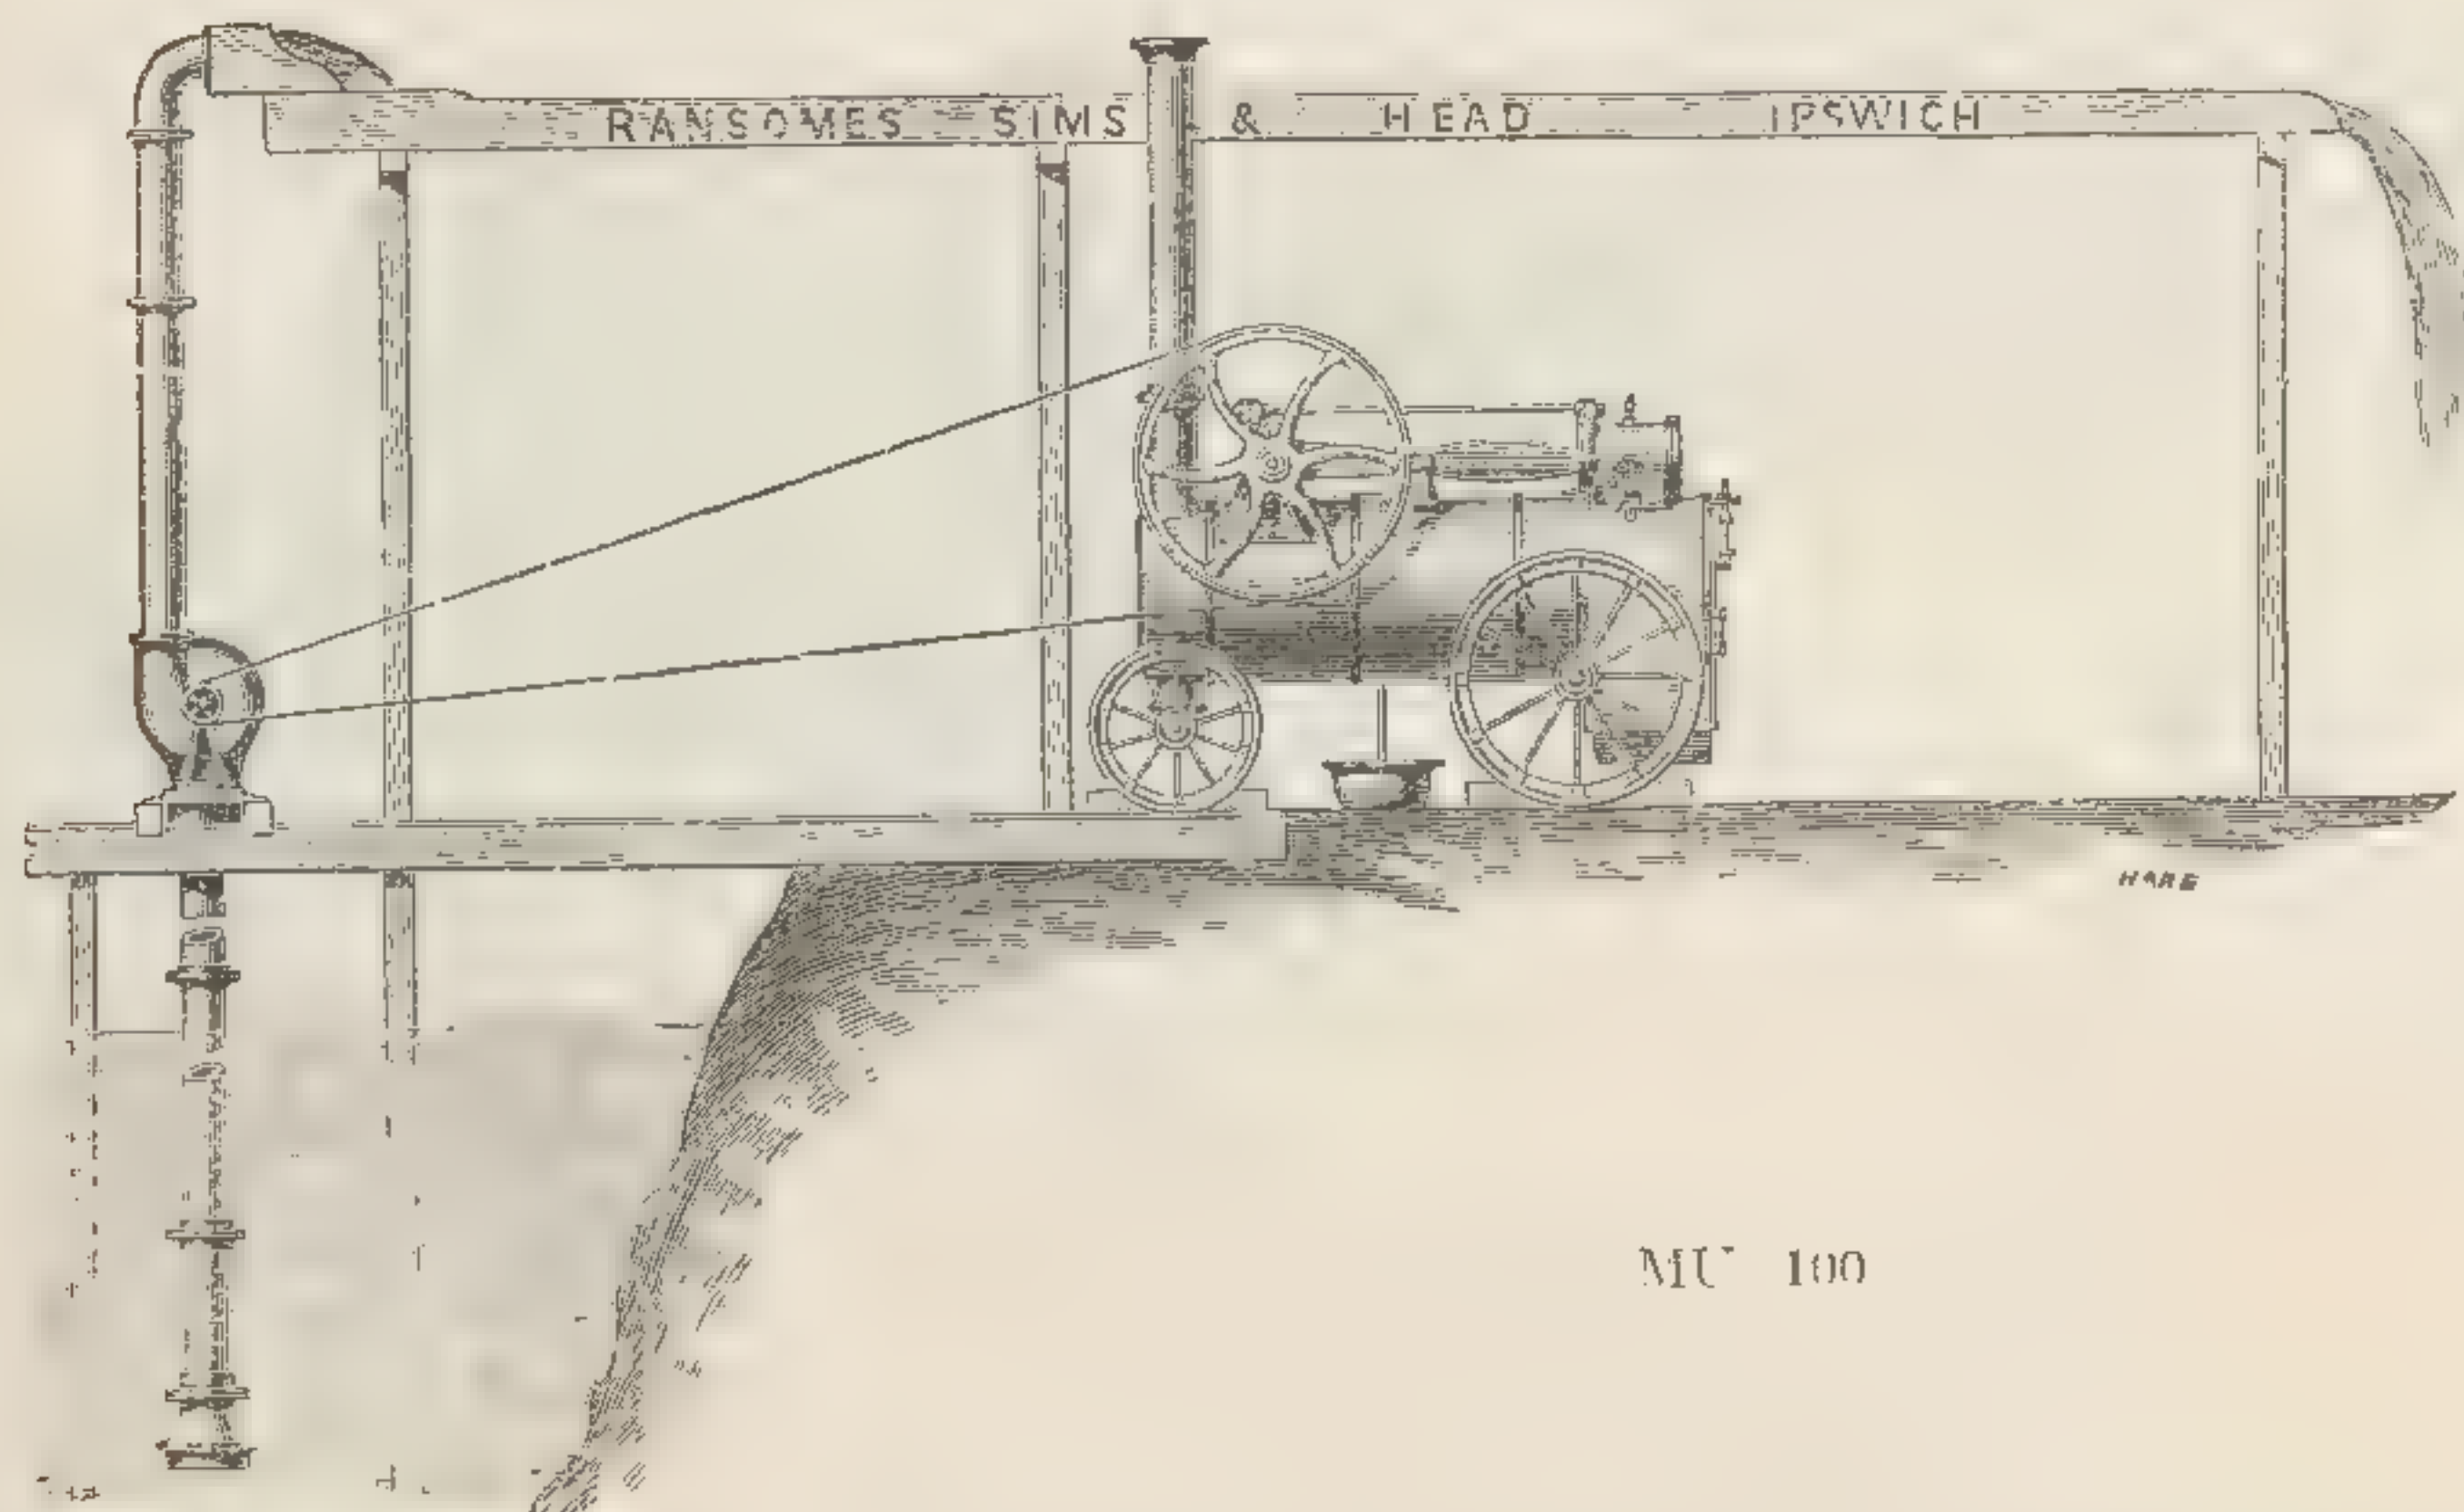

down hill and over the roughest roads without loss. It is pronounced by all who have seen it the greatest improvement ever made in wheel scrapers.

The entire scraper is of wrought metal, steel and iron; no wood parts to rot or castings to break, and instead of the cheap wood hub wheels used on other wheel scrapers, the celebrated "Sarven" Patent Wheels, which are the strongest and most durable wheels made. It will stand exposure to the weather and the hardest usage without injury, and will work and scour where no other scraper will.

Drawing of Portable Engine driving a Centrifugal Pump

Price and Particulars of Steam Engines, Boilers, and Steam Pumps on Application.

If favoured with an order for pump, will you kindly inform us the quantity of water required per hour, and the distance and elevation, if any, the water has to be forced. If pumping from a well please state depth; if from a river or creek please state elevation and distance you require the water forced.

When ordering windmill please state the quantity of water you require per day, elevation and distance water has to be forced, if any. If pumping from a well please state depth; if from a creek or river we will require to know elevation and distance you require water forced, as the efficient working of the windmill depends on its receiving wind from every quarter. We always advise our customers to erect the mill away from buildings or trees or any obstacle that will obstruct the mill receiving the wind from every quarter.

STEAM PUMPS: When making inquiries for steam pumps kindly inform us the following:—

- (1). Quantity of water you require delivered per hour.
- (2). Whether pumping from a well or river, if from well please state depth; if from a river elevation if any and distance you require water forced.
- (3). No pump will lift more than 25 feet vertical, although the pump may be 50 or 200 feet away from the water or more providing the vertical lift does not exceed 25 feet.

Windmills, Pumping Machinery, &c.

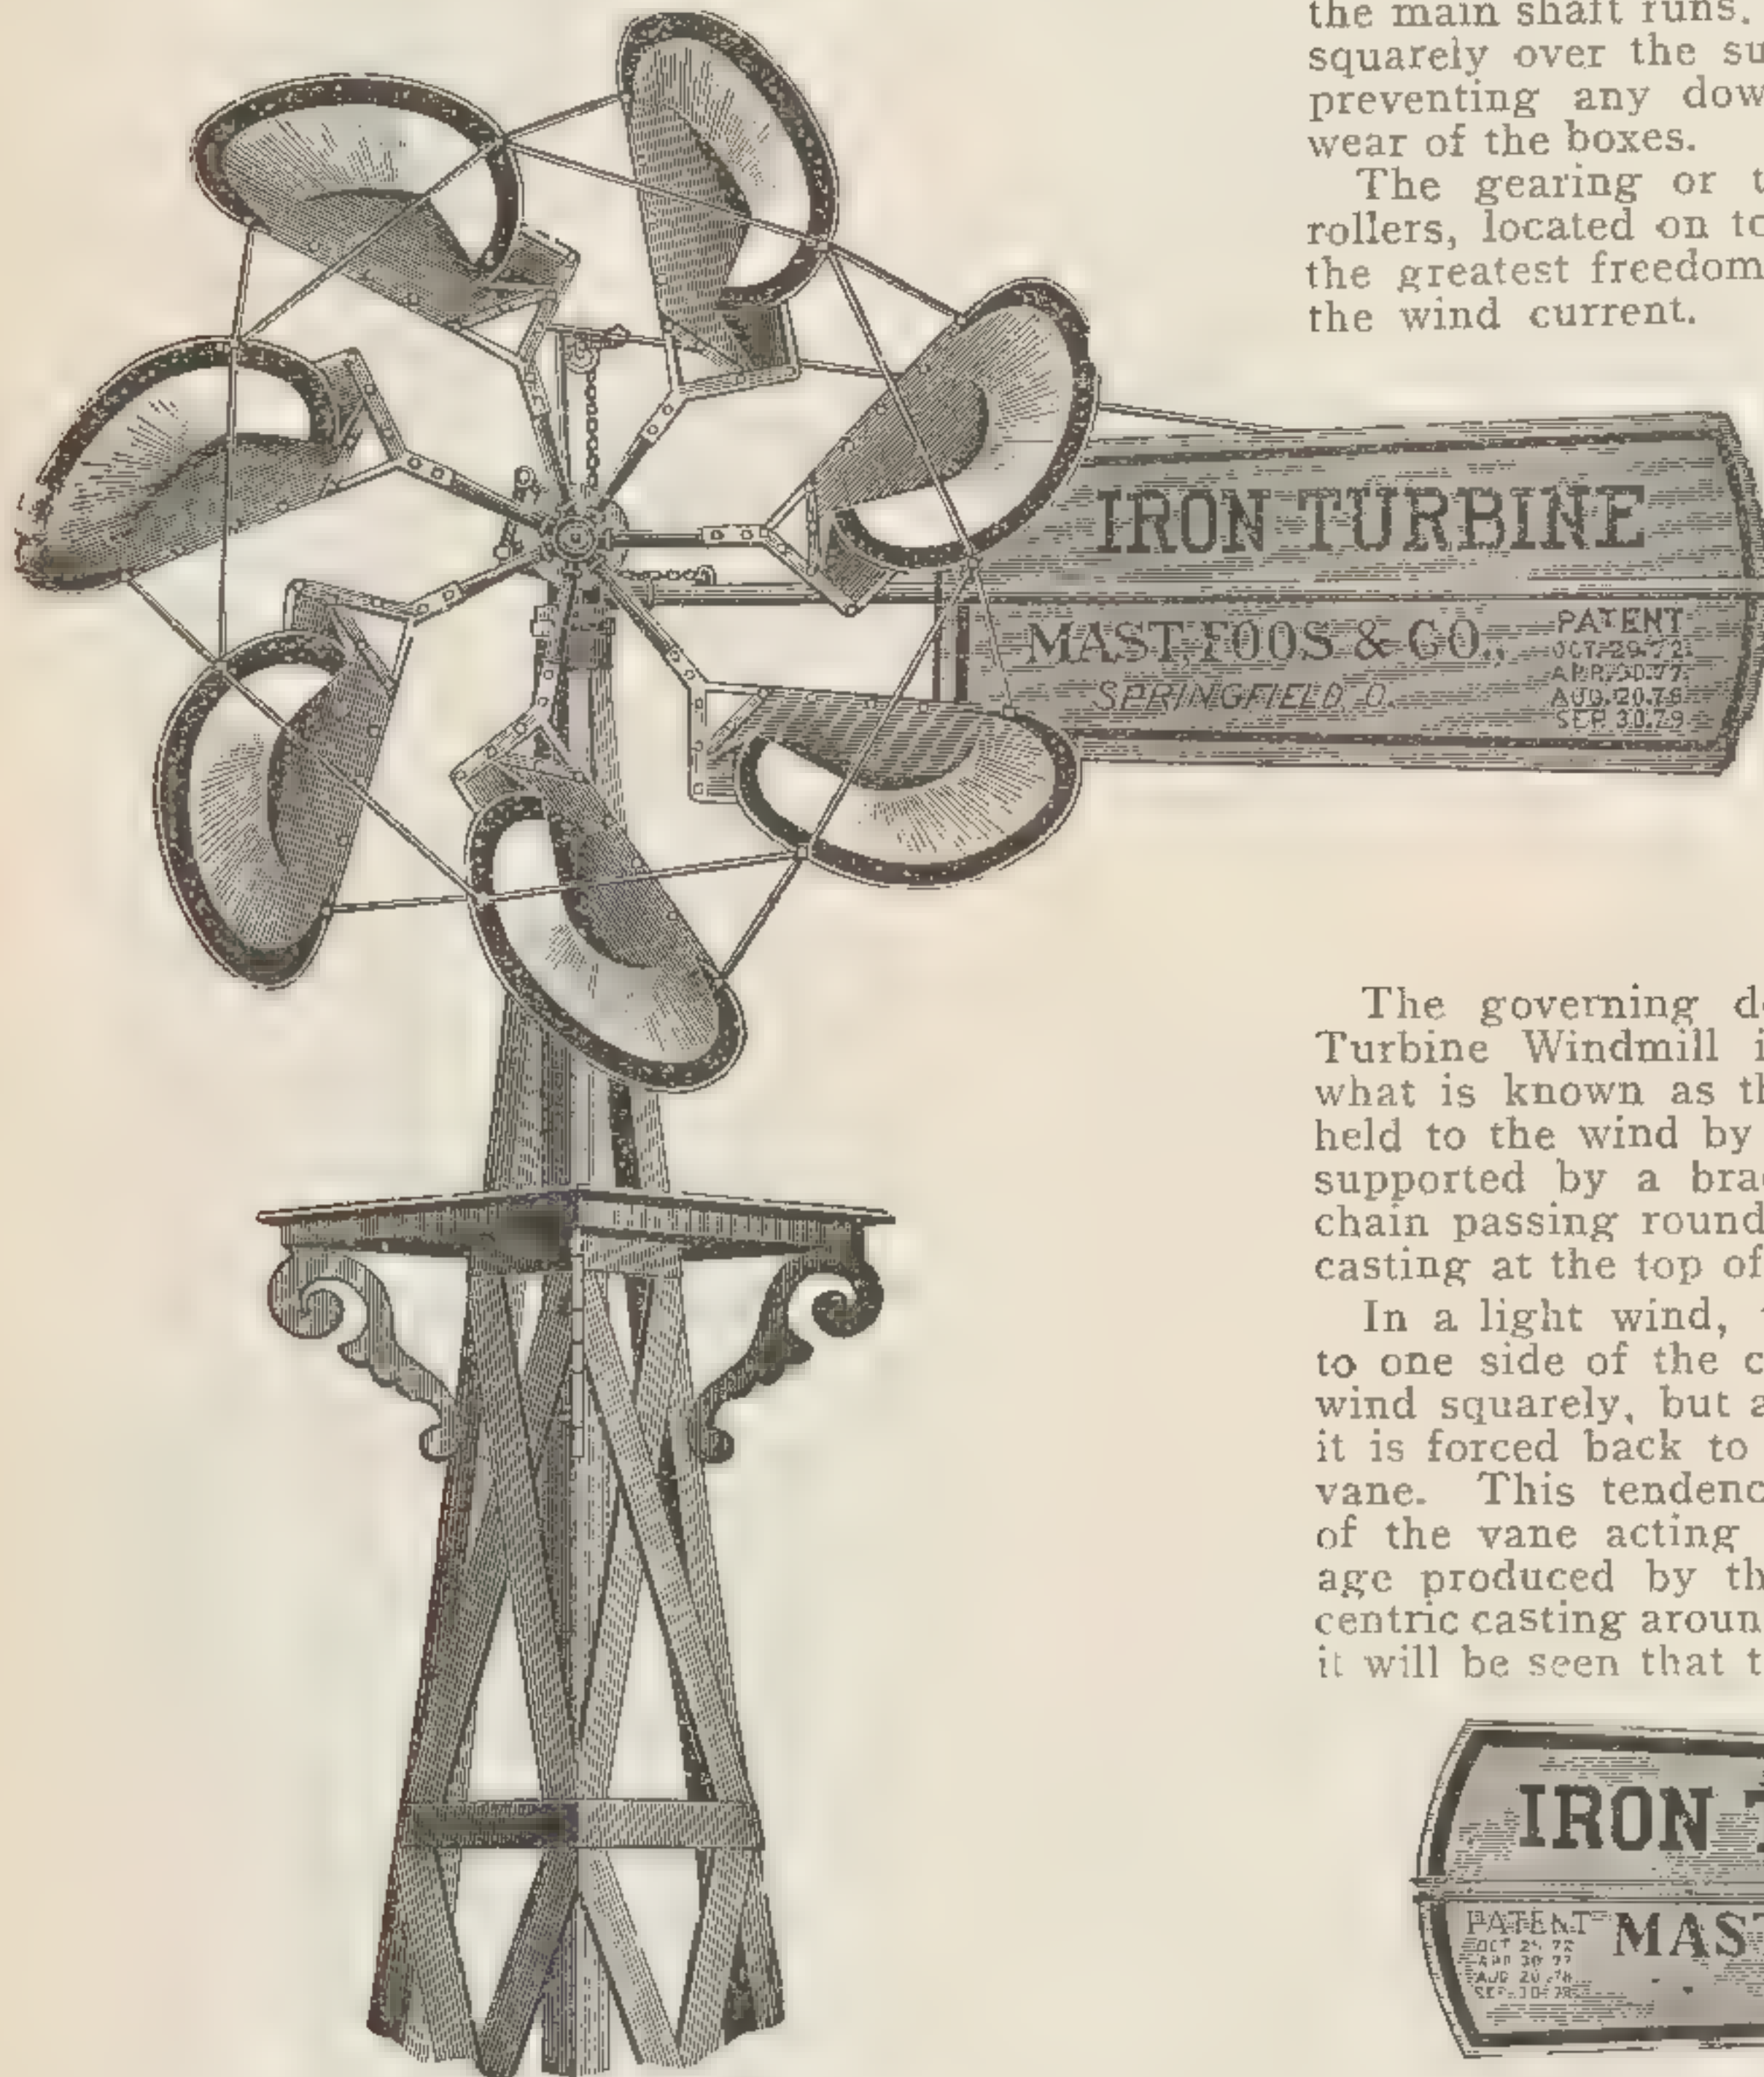

The Geared Self-Regulating Pumping Iron Turbine Windmills

Manufactured specially for us.

THE MAST FOOS.

8½ ft.	£19
10 ft.	£20
12 ft.	£28 10 -

Tower and Pump Extra.

MU 101.

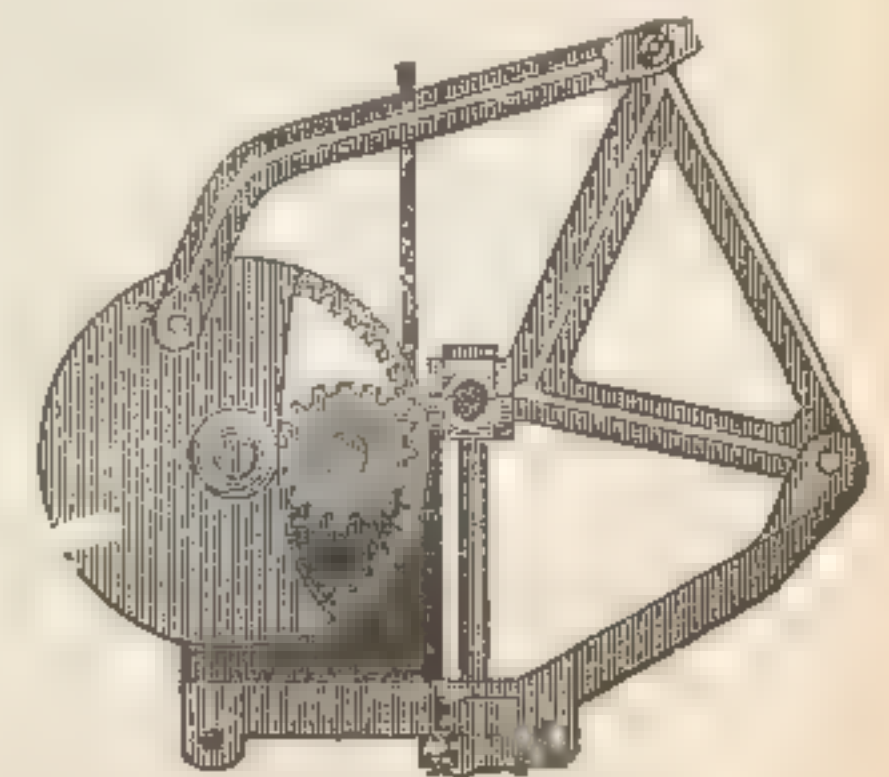

The above cut represents the latest improved and most advantageous construction of a gearing to utilise the power of a wind wheel, and convert it in the best possible way to the operation of pumping and forcing water evenly under extremely high pressure.

In building the windmill we use a wheel constructed entirely of steel and iron, and built upon a plan adopted after years of scientific experimenting and close study of the action of wind currents on

surfaces of varying curves and angles, at rest and in motion. The result is a wheel of which each section contains a combination of a curved and spiral surface, so combined as to secure the greatest supporting strength and to present the best possible angle to the wind current, thus securing the maximum of power for a given sized wheel.

The buckets or sails are supported by Two sets of arms or spokes, and are secured together with stay rods to a truss which unites them into a strong and symmetrical wheel. The hub is clamped to the main shaft with a heavy bolt, and secured by the use of two set screws provided with lock nuts. The hub is hollow and projects back over the bearing in which the main shaft runs, bringing the weight of the wheel squarely over the supporting box of the main shaft, preventing any down sag of the wheel or uneven wear of the boxes.

The gearing or turntable is supported on steel rollers, located on top of a bed plate, which permits the greatest freedom of motion to the wheel to face the wind current.

MU 102.

The governing device of the Back Geared Iron Turbine Windmill is very simple. The wheel is what is known as the solid or rosette wheel, and is held to the wind by the weight of the vane, which is supported by a brace rod, connected to which is a chain passing round a groove in an eccentric-shaped casting at the top of the mill.

In a light wind, the wheel, which is set a little to one side of the centre of the turntable, faces the wind squarely, but as the wind increases in velocity, it is forced back to an angle nearer in line with the vane. This tendency is counteracted by the weight of the vane acting on a gradually increasing leverage produced by the shape and position of the eccentric casting around which the vane chain passes. So it will be seen that to secure any speed at which it is

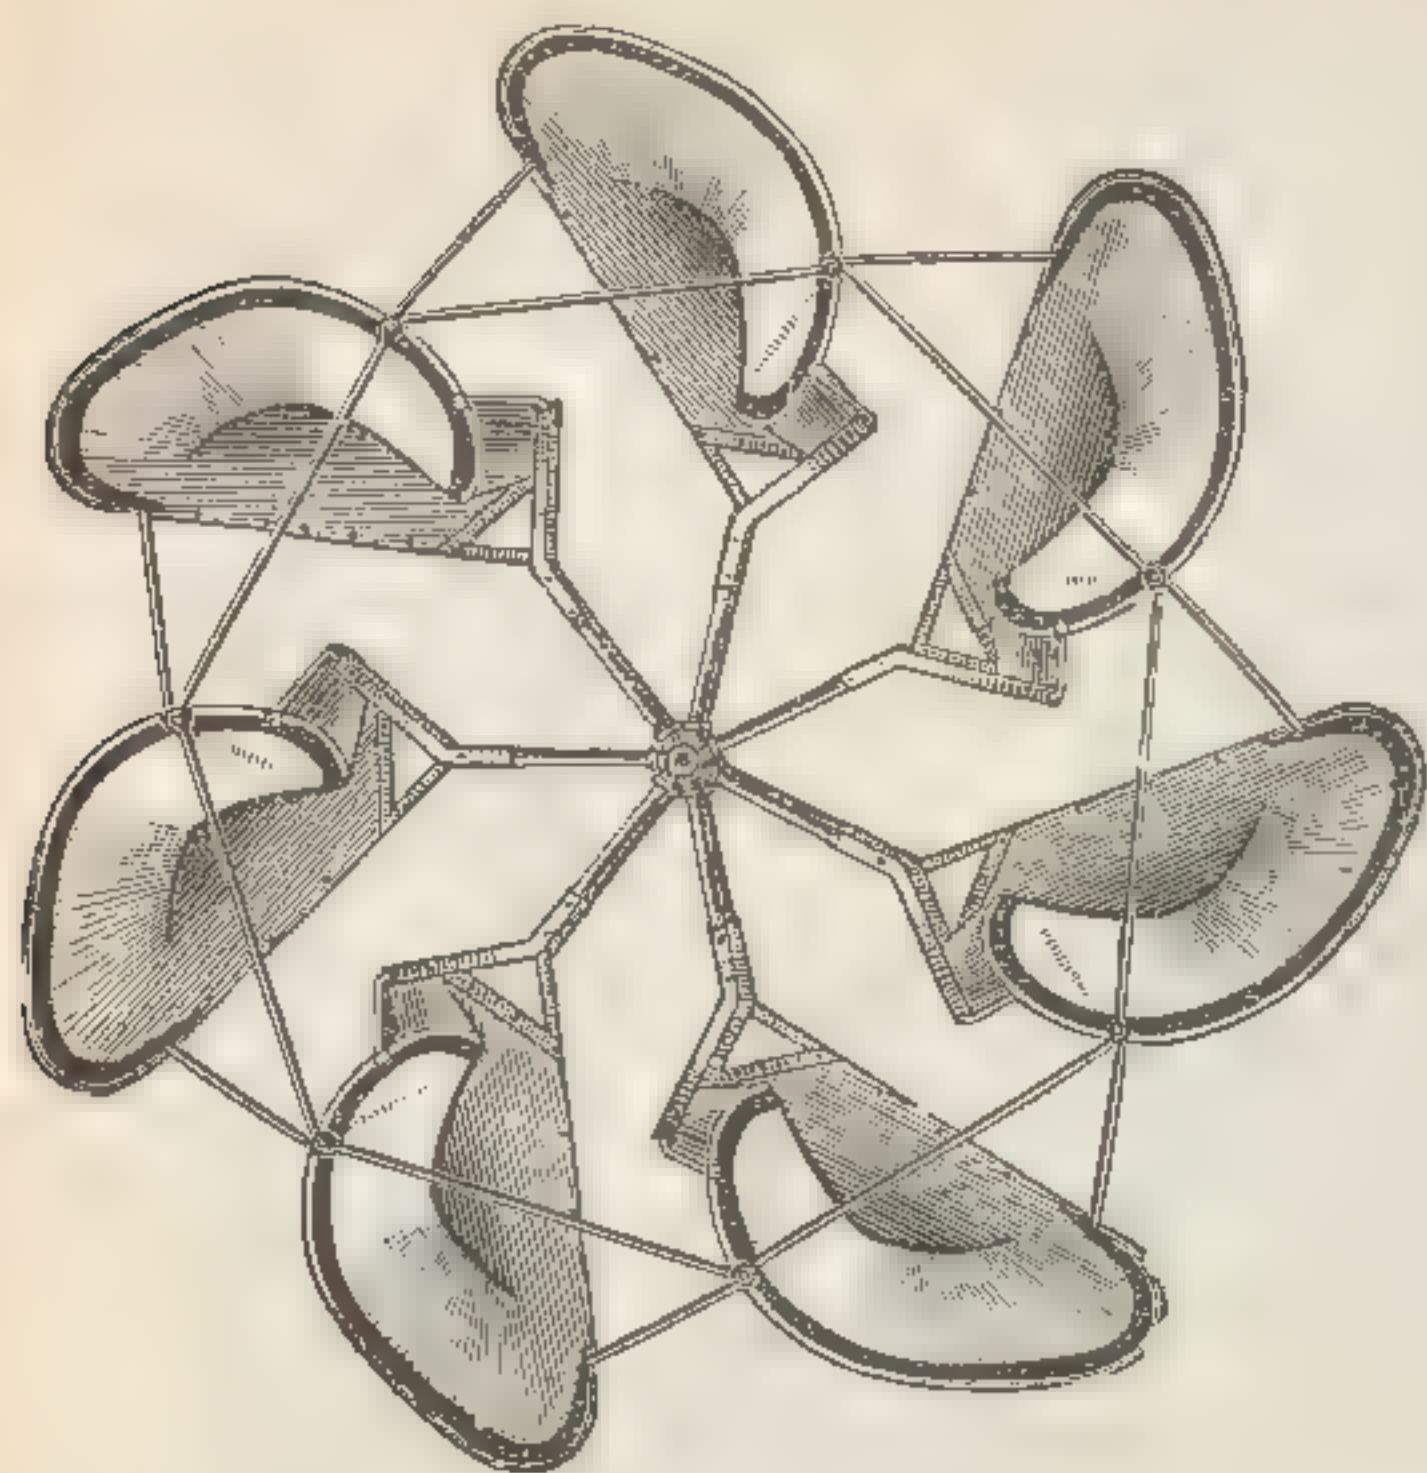

MU 103.

desired to run the wheel it is only necessary to adjust the position of the eccentric casting with reference to increasing or decreasing the leverage with which the weight of the vane acts.

The gearing on the Back Geared Iron Turbine Windmill consists of the internal gear and pinion. The latter is on the inner end of the main shaft, and acts upon the large gear wheel, to which is attached the wrist pin, which, in turn, drives the

© CHEAPSIDE, SYDNEY. ©

UNIVERSAL PROVIDERS.

MU 104.

pitman of the windmill. This internal gear is devised so as to avoid the back lash common in spur gears, and by its use a normal speed is given to the pump, while the wheel is allowed to reach its maximum of power, the wheel making two revolutions to each stroke of the pump, more than doubling the power of the wheel on any given length of stroke.

Another advantage of a powerful windmill, operated on a long stroke, is that of throwing the wear over a larger surface of the cylinder and decreasing the valve action. It increases the life and utility of the pump as well as furnishing a better supply of water during a season of light winds.

The Imperial Steel Derrick

Is constructed in a most thorough and substantial manner. It is made in sections of 10 ft. each with cross girt every 5 ft., with corner irons and four bolts at each junction of girt and corner post, and is thoroughly braced; and, as shown in the cut, has a permanent ladder extending down the centre of one side of the structure.

These derricks can readily be erected from the ground up, putting on a section at a time, or may be put together on the ground and raised afterwards as is customary with other makes of derricks. Price, £10 10/-.

Angle Steel Derricks

Specially constructed for Mast Foss Windmills.

For 12ft. Mill, 30ft., £12.

For 8½ft. and 10ft. Mill, 30ft., £11/15/-.

A Wood Tower, if preferred, can be built on the spot, and save carriage, as we supply with each Mill a diagram and full particulars for erecting. No skilled mechanic required.

MU 112.

The Waterman is a Patent Revolving Stand Premium Pump. The colander, piston, valve seat, and tube, and all parts below the spout excepting the flange, are extra strong. It is constructed with Patent Detachable Ears, and two bolts to hold the cylinder to the case, which is a decided improvement over the old screw base, as the cylinder can be readily changed so as to place the spout in any position, and the valves are easy of access.

No. 3—2½-in. bore, 6½-in. stroke, 1½-in. pipe .. 13/9

Capacities are approximate.

Price of larger Pumps and Pipe on application.

The New Handy Wing Semi-Rotary Pump

With Iron Handle.

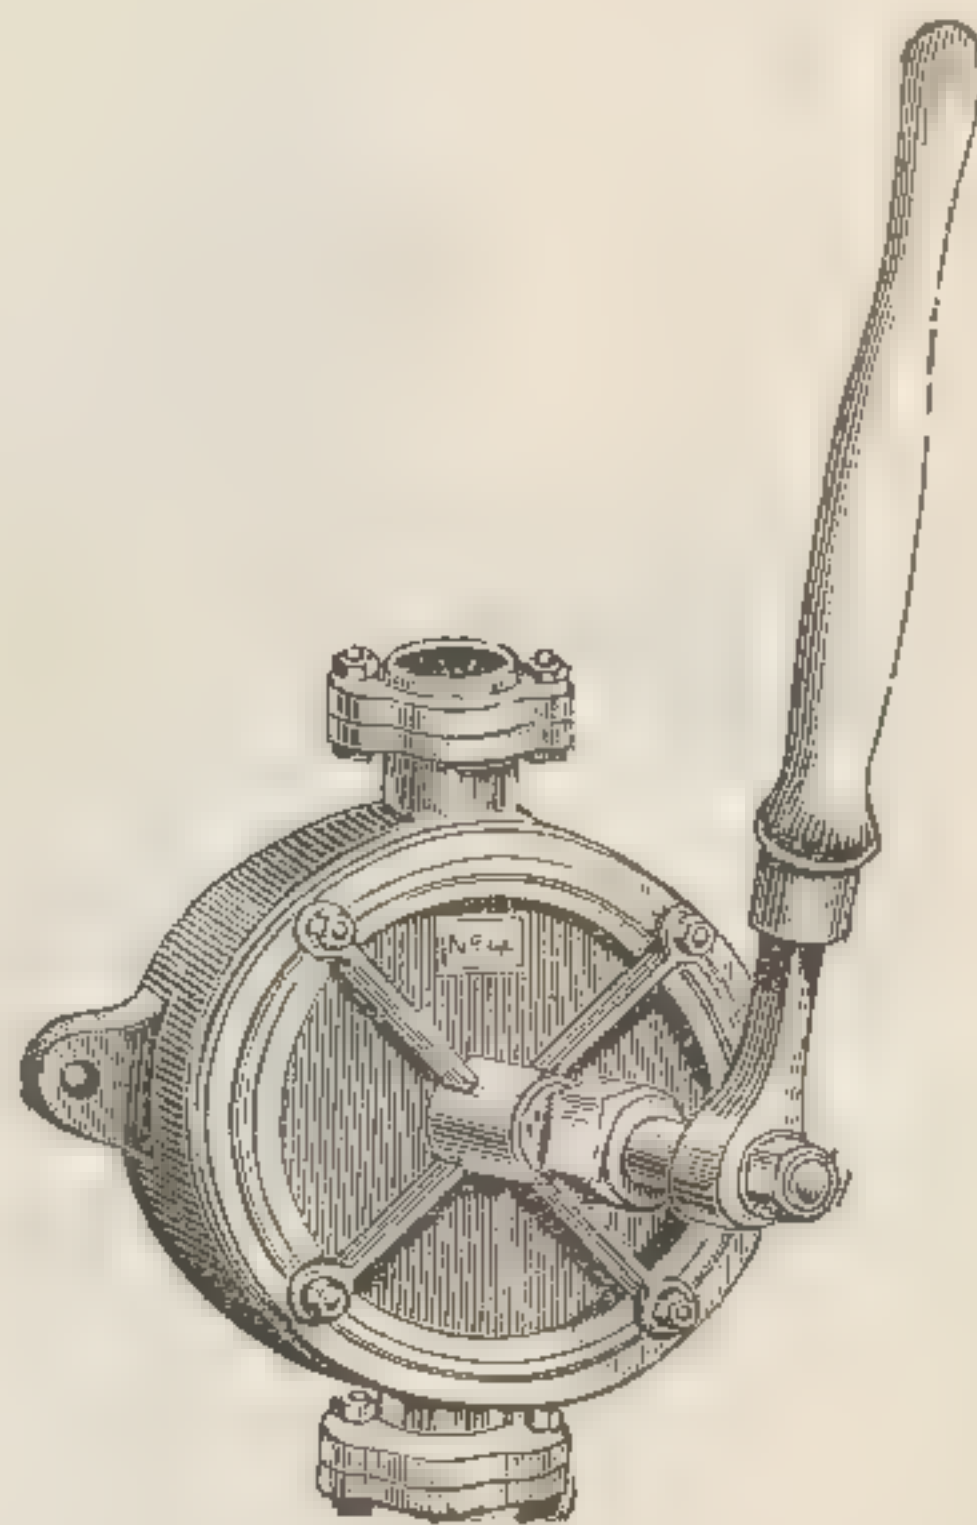

These pumps are the simplest, most lasting and economical that can be found, and most serviceable for wells, domestic purposes, watering gardens, spraying fruit trees, for drawing wine, beer, petroleum and all kinds of liquids, hot or cold.

1st.—There is less wear.

2nd.—Less power is needed to raise the same amount of water to the same height.

3rd.—Their wings or valves are stronger, and the internal parts fitted with the utmost care.

The same consists of a perfectly circular casing, in which a strong brass flap or "wing plunger," provided with two clock valves, is oscillated. The casing is closed by a cover fixed to the same by means of 4, 6, or 8 screws, according to the size of the pump, and which may be easily removed in case of any accidental disturbance of the working of the pump.

MU 117.

Outside the casing a lever is attached to the "wing plunger" shaft, which lever is adjustable in every direction, so that the pump may be employed in any desired position. This lever, which is attached to the wing or plunger shaft without any hinge or pin, only makes half a revolution, and thus every engineer will easily understand that the wear and tear of the pump is very slight.

No. 1.—300 gals. per hour (approximate), $\frac{3}{4}$ -in. pipe	20 9
No. 2.—360 gals. per hour (approximate), 1-in. pipe	25 3

The "Dodger" Double-Acting Suction and Force Pump

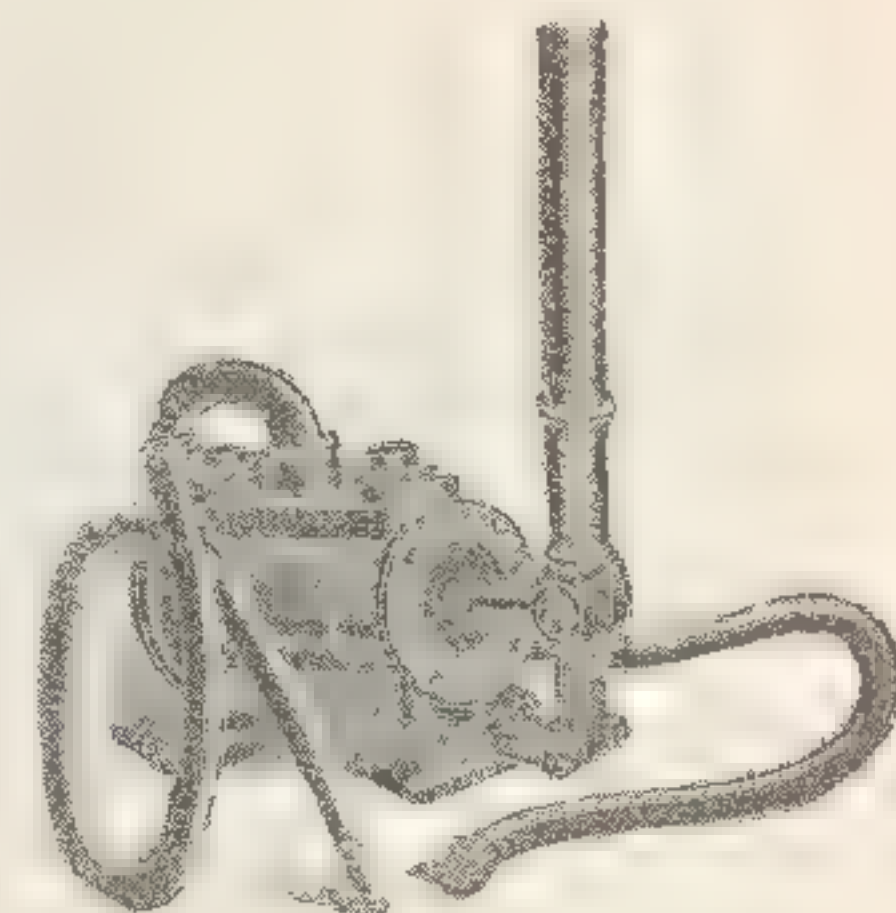

Best and Cheapest Pump in the Market

Construction.—Has one working cylinder, plunger, and rod, yet takes water at each end of stroke, meaning no lost motion or labor for recovery. Metal valves and valve seats, insuring freedom from trouble with stiff, useless leathers. Removable plugs covering valves, allowing easy examination of working parts. Detachable wood lever, permitting safe removal in transit or storage. Occupies space 9 x 20 in.

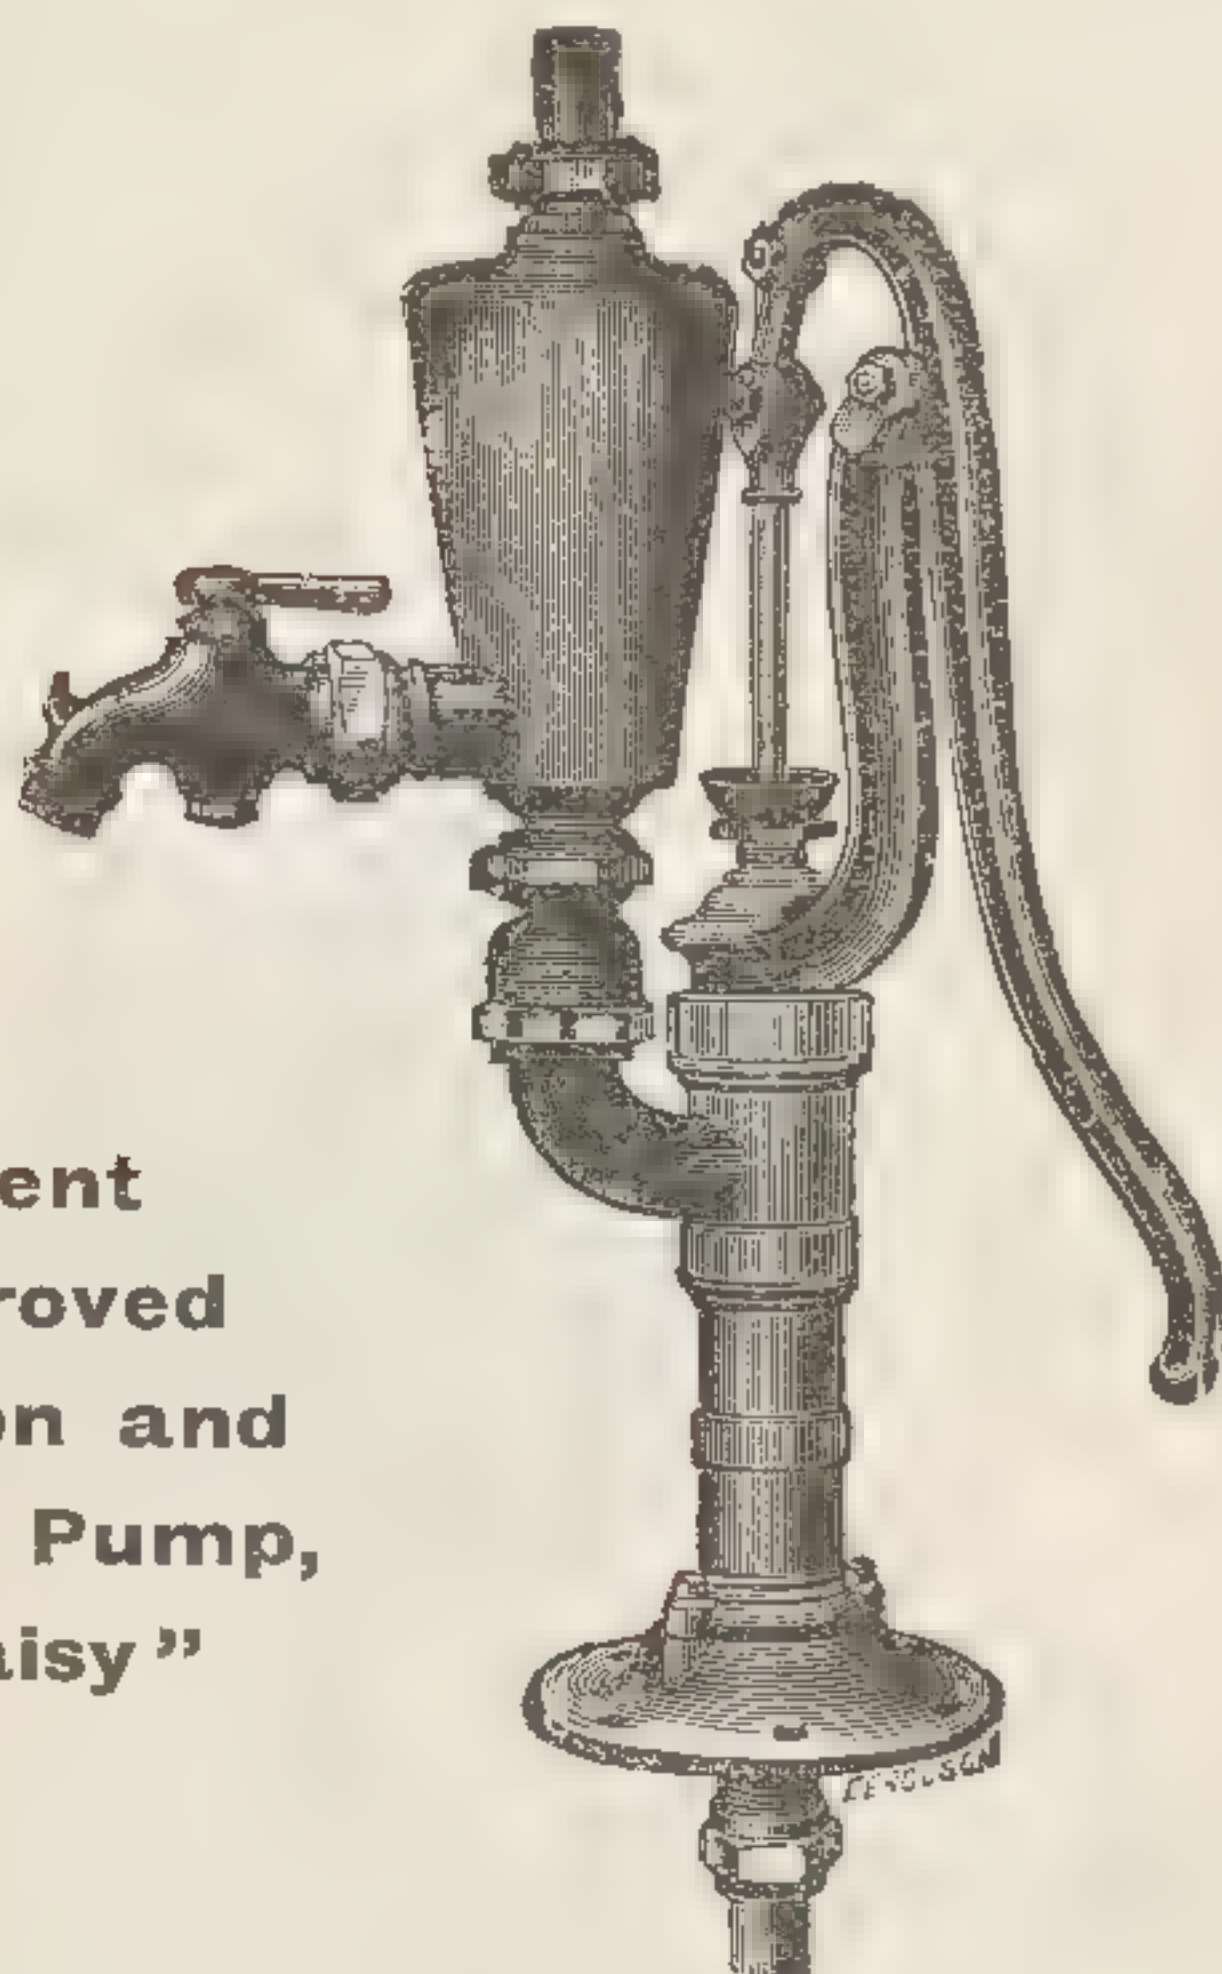

Application.—Filling thresher waggon tanks for boiler supply household uses, watering stock, etc.; cleaning out boilers, draining cellars barnyards, etc.; irrigating land from ditches or shallow wells; washing waggons, windows, etc.; spraying fruit trees, shrubs and bushes; protecting property against fire.

Capacity.—Calculated to work at a lift of 25 ft. and force to any distance. 1,200 to 1,500 gallons per hour.

Price, without Hose or Bend, £2/12/-.

MU 122.

THE "SYD" BUCKET SPRAY PUMP

All Brass working parts. With indestructible Bronze Valves. Malleable Iron Combination Foot Rest.

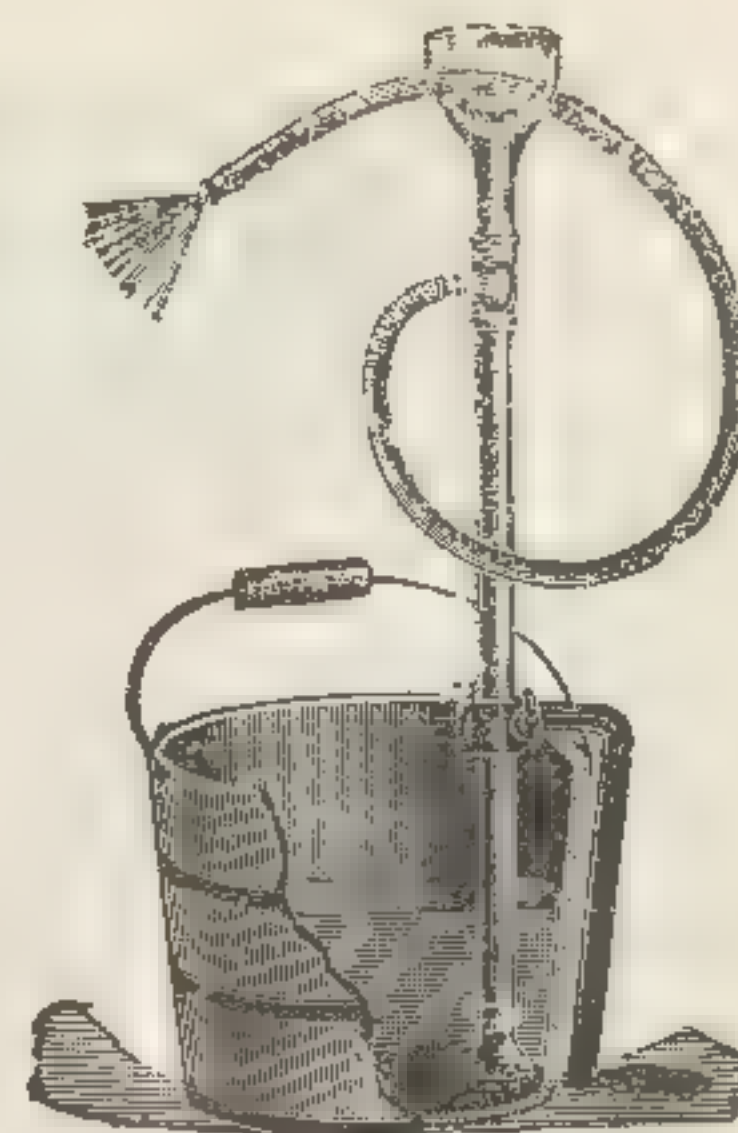

The above cut represents our well-known Success Spray Pump, with improved combination foot rest, bucket clamp, and bail holder. Florists, gardeners, fruitgrowers and farmers who wish a durable, convenient Spray Pump at a low cost can find nothing better. This outfit is a most excellent one for ordinary use in gardens, vineyards, and orchards; for washing windows and buggies, and for the application of whitewash. Our new combination bucket clamp and foot rest enables the operator to have the pump and bucket clamped together as one outfit, with the bail standing upright in a rigid position. Thus the entire outfit can be carried in one hand, a feature possessed by no other Spray Pump. The Pump has a large air chamber and is double-acting, throwing a continuous stream either solid or in fine spray. It is provided with Bordeaux nozzle, and four feet of discharge hose.

This outfit should be on every farm. No matter what other style of Spray Pump one may possess, there is nothing quite so handy for general purposes. With this outfit the washing of windows and buggies, the watering of flowers, and the application of whitewash, become a pleasure. Its value as a protection against fire should not be overlooked.

Price, 23/6.

UNIVERSAL PROVIDERS.

"Climax" Spray Pumps

MU 125.

"CLIMAX" SPRAY PUMPS.

We particularly wish to draw your attention to this illustration showing the "Climax" Pump mounted on a cask, after the legs have been unbolted and removed. It also shows the Automatic Agitator used in connection with Nos. 1, 2, 3, and 4 Pumps. It is easily adjusted to the top of the cask (as shown in the cut), and works automatically with every motion of the pump handle.

With this Agitator the liquids in the cask are stirred with each stroke of the Pump, and the first spray is as well mixed as the last that come from the cask. Its importance is plainly manifest.

We do not supply the Agitator unless specially ordered. Price 4/6 extra.

Empty oil casks, which are very suitable for mounting the Pump on, we can supply at 5 6 each.

No. 1.—£2,17 6.

Is fitted with a cylinder 1½ in. diameter, 5 in. stroke, one length 12½ ft. ½-in. delivery hose, 3 ft. suction hose, and one Nixon's "Climax" Nozzle, each No. 3 and 4. Any other nozzles to the same value illustrated in this catalogue will be substituted if preferred. The Pump has two discharge orifices. Pump only, without Hose, Nozzles, or Fittings, 40/-.

No. 2.—£3,15/-.

Is fitted with a cylinder 1½ in. diameter, 5 in. stroke, one length 12½ ft. ½-in. delivery hose, 3 ft. suction hose, and two "Climax" Nozzles. Any other nozzles to the same value illustrated in this catalogue will be substituted, if preferred. The Pump has two discharged orifices. Pump only, without Hose, Nozzles, or Fittings, 57/6.

No. 3.—£5,10/-.

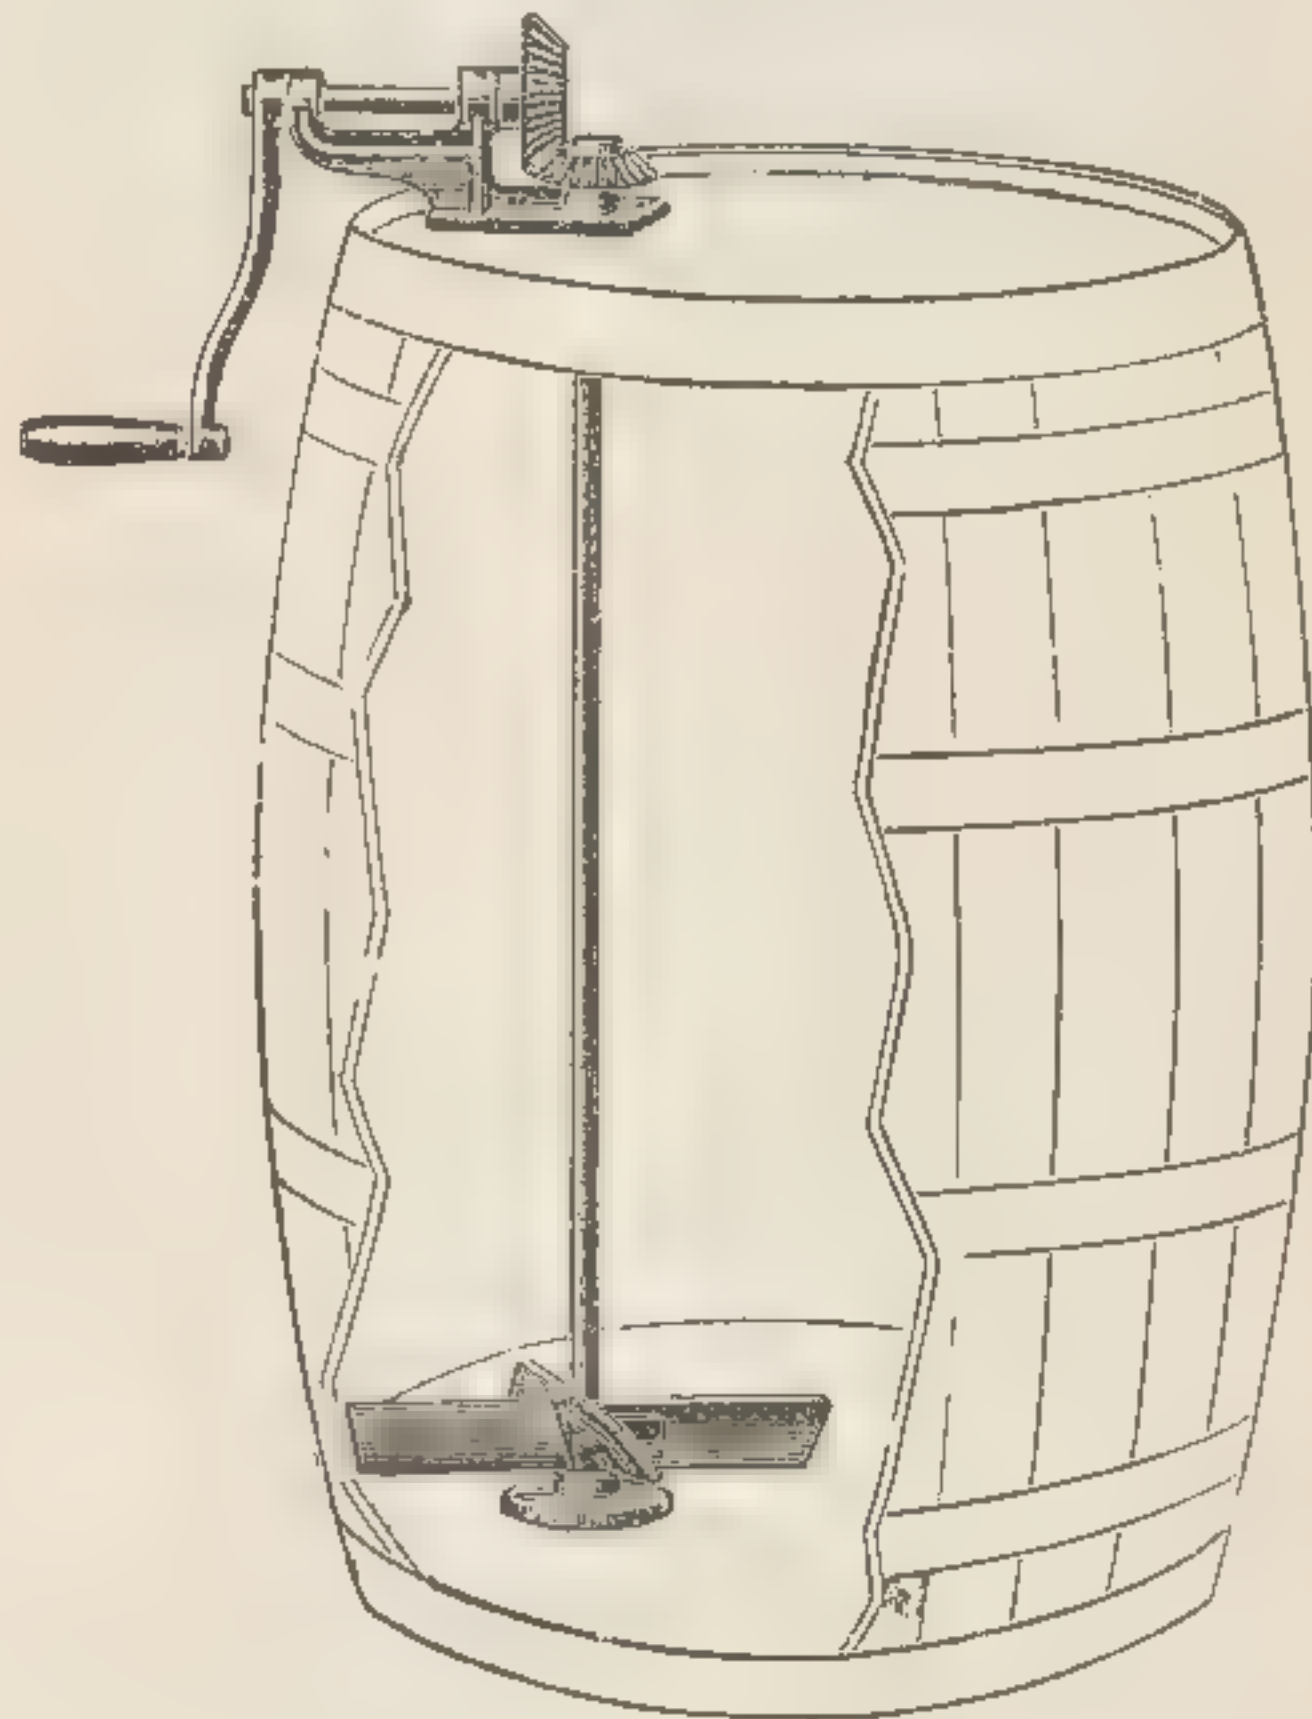

Is fitted with a cylinder 2 in. diameter, 5 in. stroke, two lengths each 12½ ft. ½-in. delivery hose, 3 ft. suction hose, and four "Climax" Nozzles. Any other nozzles to the same value illustrated in this catalogue will be substituted if preferred.

Pump only, without Hose, Nozzles, or Fittings, £3,15/-.

No. 4.—£6,5/-.

Is fitted with a cylinder 2½ in. diameter, 5 in. stroke, fittings same as No. 3.

Pump only, without Hose, Nozzles, or Fittings, £4 10/-.

MU 126.

INDEPENDENT REVOLVING AGITATOR.

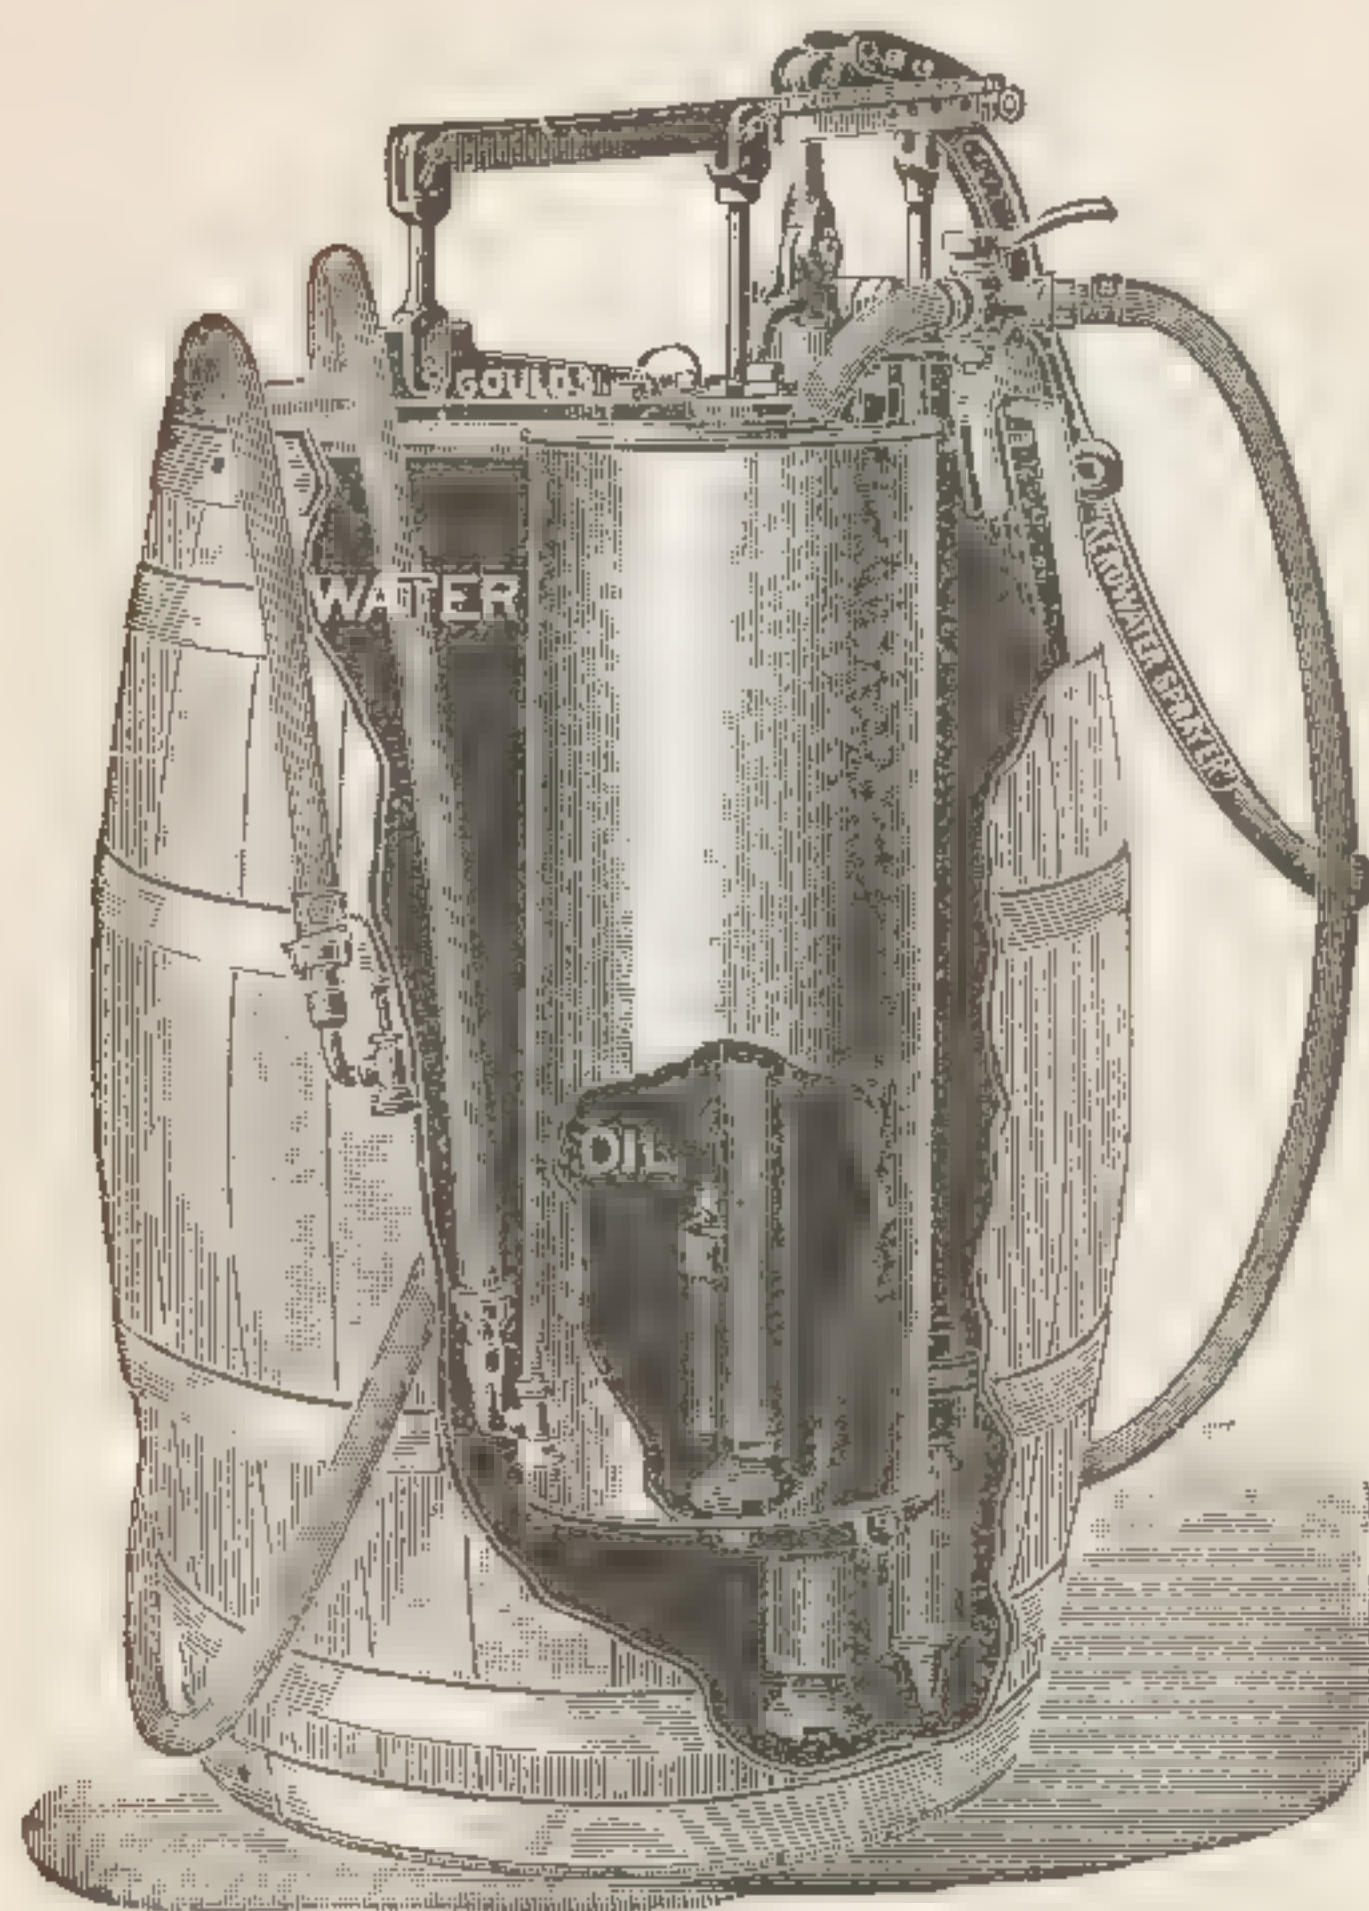

The Independent Revolving Agitator offers advantages over anything yet devised. Power is transmitted through a small pair of Bevel gears to a paddle wheel, comprising four arms set at such an angle that as the wheel revolves the liquid is carried both around and upwards in the barrel, thus insuring thorough agitation of the entire contents of the barrel.

Revolving Agitator only, 12 6.

Spray Pumps.

MU 127.

GOULD'S "KEROWATER."

For Emulsifying and Spraying Kerosene and Water.
(Patented March 7, 1899.)

SIZES, PRICES, ETC.

Pump only.—Plunger 2in. diameter, 4in. stroke,
 $\frac{1}{2}$ in. hose discharge.

Price £2 10/-

Outfit A, for Single Spray.—"Kerowater," with one
lead 12 $\frac{1}{2}$ ft., $\frac{1}{2}$ in. discharge hose, with "Seneca" or
"Vermorel" Spray Nozzle. Mounted in barrel and
supplied with double shut-off.

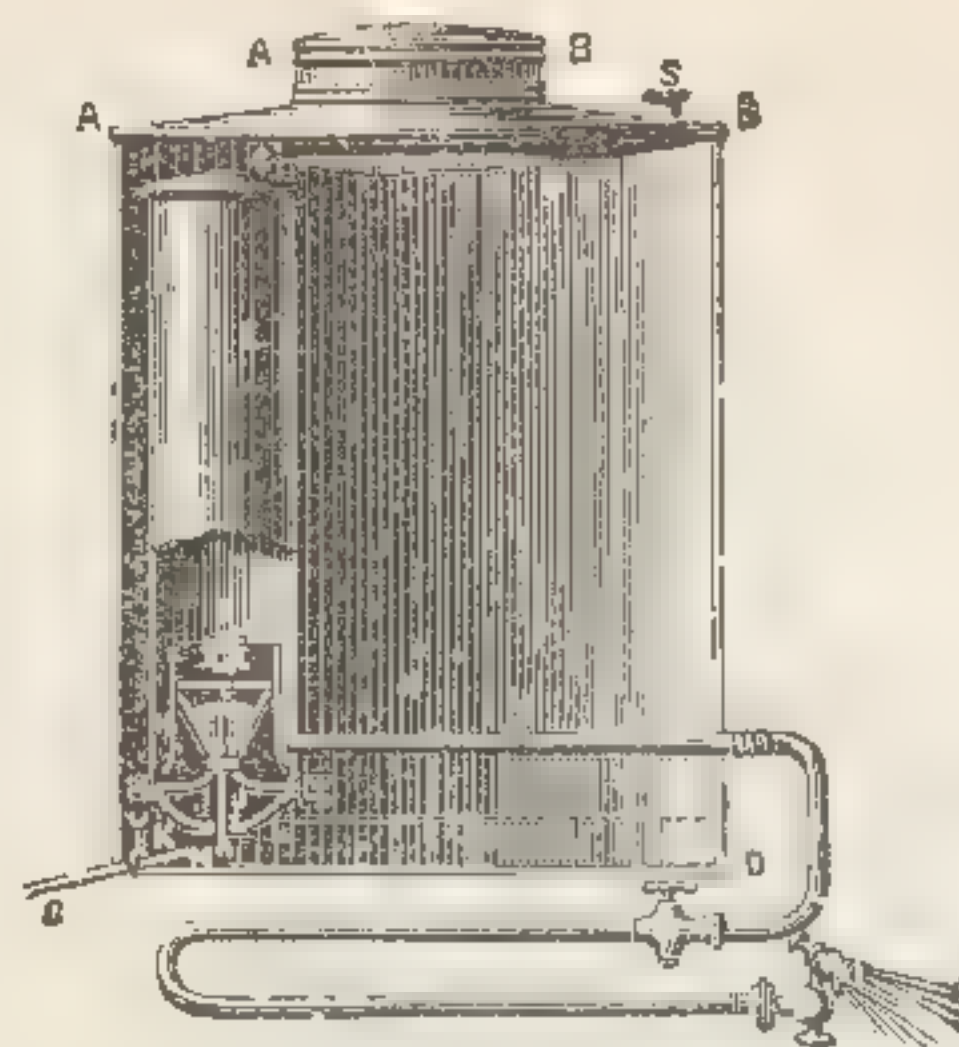

Price £3 5/-

Outfit B, for Double Spray.—"Kerowater," with
two lead 12 $\frac{1}{2}$ ft., $\frac{1}{2}$ in. discharge hose, with "Seneca"
or "Vermorel" Spray Nozzle. Mounted in barrel,
and supplied with double shut-off.

Price £3 12 6

The "Kerowater" is the most efficient apparatus
for mixing and spraying kerosene and water on the
market. It consists of a combination of two Pumps,
one for water, and one for oil, an inner tank for
kerosene and a barrel for water. The oil Pump is
contained within the oil tank, which partly surrounds
the water Pump. Both Pumps and the oil tank are
contained within the water barrel.

It is constructed upon an entirely different principle
from any similar apparatus now used. Instead of
mixing the oil and water at the suction, which cannot
accurately be controlled, we make the emulsion at the
discharge. The two Pumps, each independent of the
other, are operated by a common lever. Kerosene is
poured into the oil tank and water into the barrel.
By operating the lever an emulsion is produced which
can be applied where and when required.

MU 128.

"FIGARO" KNAPSACK SPRAY PUMP.

Fitted with indiarubber valves, 2ft. hose, lance,
and "Vermorel" Nozzle. The tank is copper, with
copper air chamber inside.

Price, £2 7/6.

HOW TO OPEN "FIGARO" PUMPS FOR INSPECTION.

Turn the Pump bottom up and remove the six
small screws that hold the valve cap KL in position,
lift off the cap (possibly it may require force to
remove it, as the pressure of the screws will have
fastened the rubber to the brass). When the cap is
removed the whole of the mechanism of the Pump
is exposed. If the rubber disc and the cone are
sound, then the fault lies with the valve. Look into
the well from which you have removed the cone, and
at the bottom you will notice a piece of brass per-
forated; this is the valve seat F. When in use
the liquid is driven through these holes into the air
chamber; the rubber valve at the back of the seat
prevents the liquid returning into the well, and keeps
up the necessary pressure to make the spray. If the
rubber valve has perished, remove the seat, force the
small brass button at the back of seat through the
hole in the centre of valve, replace everything again
in position, and the pump will be found to be in
perfect working order.

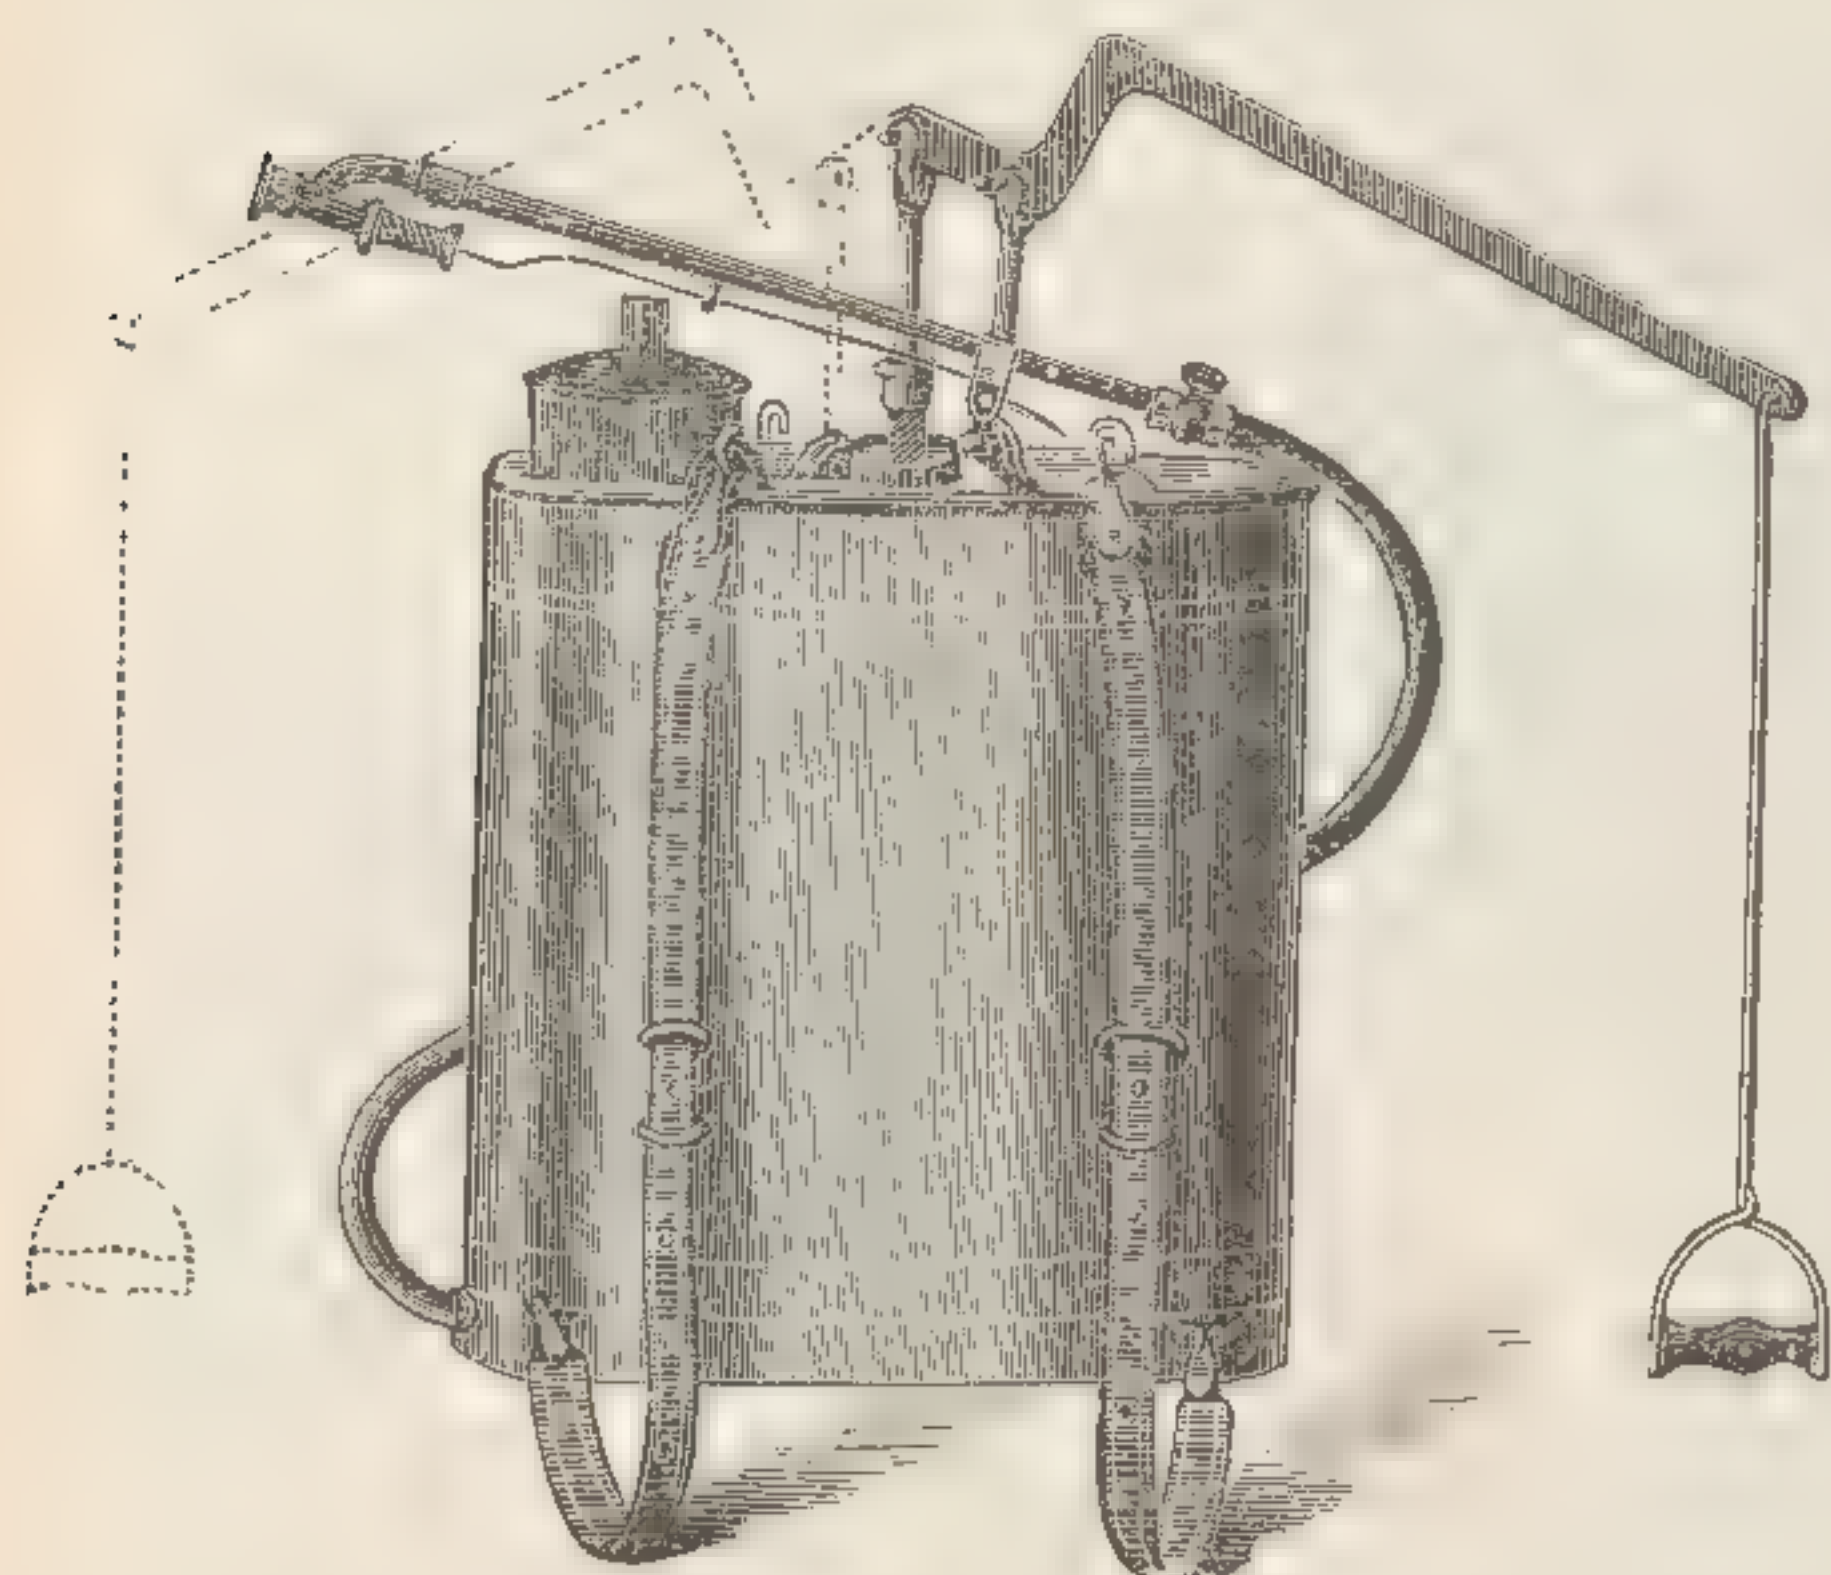

NOTE.—After using, pump about half a gallon
of clean water through the Pump. After using any
mixture containing oil, see that the Pump is left per-
fectly clean, as oil will destroy the rubber valves and
cones. It is better to lubricate the parts of this
machine with tallow or grease—never with oil.

Don't forget that oil destroys rubber.

CHEAPSIDE, SYDNEY.

UNIVERSAL PROVIDERS.

"Handy" Knapsack Sprayer

MU 129.

"HANDY" KNAPSACK SPRAYER.

For Vineyard, Orchard, or Field Service.

Will be found the best pump of this class upon the market. It is made entirely of brass and copper, with ball valves and metal plunger, all of which are easily accessible.

The discharge is at the bottom, and the Pump can be entirely drained of the liquid. Any leakage of fluid out of the stuffing box will drip back into the tank. The change from the right to the left hand is simple, and made by disconnecting the bearer link and bringing it over to the jaw provided for it on the other side.

An eye on the top and back of knapsack enables one to suspend it steadily when he wishes to take it off his back. It should be carried on back with the straps crossed in front.

The reservoir is made of heavy copper, and will hold about five gallons of liquid.

SIZE, PRICE, ETC.

Complete, as shown in cut, with 3½ ft. of ¾ in. discharge hose, "Vermorel" Nozzle and lance for degroger. £3/15/-.

"Knapsack" Kerowater

MU 130

"KNAPSACK" KEROWATER.

For Emulsifying and Spraying Kerosene and Water.
(Patented March 7, 1899.)

It has a galvanised iron tank provided with straps for carrying on back, or may be used with reservoir resting on ground, and consists of two independent Pumps, operated by a common lever, placed in the tank, with divisions for oil and water. Combined capacity about five gallons. Quantity of oil used is controlled by adjustment of a single pin, and may be varied to 5, 10, 15, 20, or 25 per cent. Pump may be operated by either hand by changing lever to right or left.

Many conditions are encountered under which our barrel "Kerowater" cannot be advantageously operated, as in greenhouses, work on side hills, etc. For these purposes we offer the Knapsack "Kerowater."

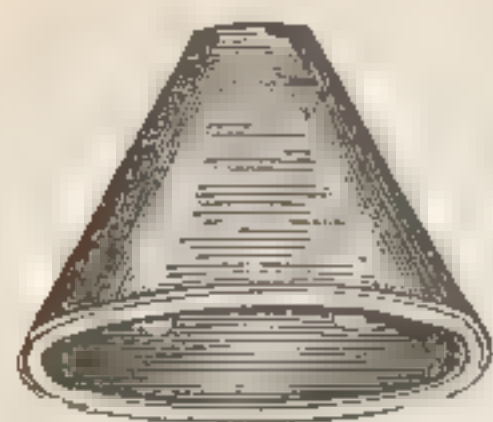

PRICE, ETC.

Knapsack "Kerowater" complete, as shown in cut, with 4 ft. of ¾ in. discharge hose, "Seneca" Nozzle and pipe extension, 12 in. long, £2/5/-.

Sulphurers

"Knapsack"

Sulphurer

(MU 138)

For distributing Sulphur Flower and other Powders for the Destruction of Mildew, etc.

Capacity, 22lbs.

Price, 35/-.

MU 138.

The value of the "Knapsack" Sulphurer is now fully recognised, and it should be in the hands of all up-to-date vigneron. For distributing sulphur it stands unrivalled, doing its work with economy. It does not blow the sulphur out in a thick mass, but distributes it in a fine cloud that enables the operator to give to the vines a sufficient quantity of the sulphur or other powder for the effectual destruction of the fungus pest it is desired to exterminate. This advantage would be fully appreciated by those who have used the old style bellows, and found the sulphur blown out suddenly in a thick mass, which, if not dusted from the vines, would eventually do more harm than good. Then, again, the saving of time to those who employ hired labor is a point that cannot be overlooked. If you do not use the "Knapsack," you are behind the times; obtain one for the present season, and, after using, its value will be fully appreciated, and you will be money in pocket. The illustration fully explains how it is used.

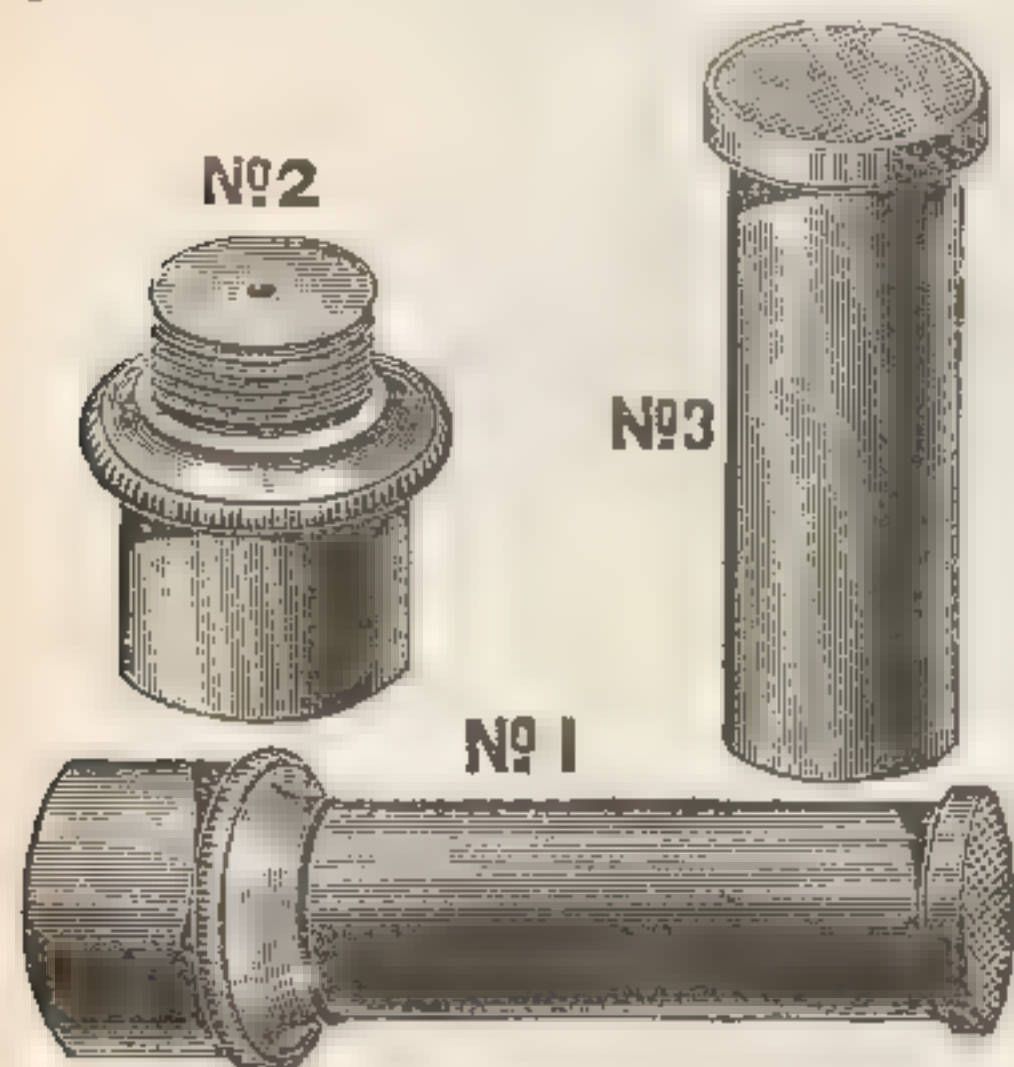

@ CHEAPSIDE, SYDNEY. @

UNIVERSAL PROVIDERS.

Spraying Nozzles

The use of the Nozzle in creating spray is universal, and by its wonderful adaptability all arsenical and poisonous preparations are brought directly in contact with insects, moths, etc., effectually exterminating them.

NOTE.—When ordering Nozzles, state the size and thread of the connection you wish to screw it on to; or if you wish us to supply nozzle and connection, quote the inside diameter of the hose.

MU 139.
"CLIMAX"
NOZZLES.

These cuts illustrate the "Climax" Nozzles. No. 3 shows the outer end covered by a wire screen, which cuts the water into a mist or spray. No. 2 shows nipple end of same. No. 1 shows the Nozzle entire.

The Nozzles are simple in construction, cannot get out of order, and are very durable, being made entirely of brass.

We stock four sizes, Nos. 2 to 5. These sizes are intended for conservatory, flower garden, orchard, and field use. Price 3 3

"TRIPLE CYCLONE" NOZZLE.

This Nozzle is very well known. It has three discharge orifices on the main delivery. It shows a large volume of spray in a mist-like form, and will cover a tree quicker than any other Nozzle made.

Price 8/-.

MU 141.
THE
"INCOMPARABLE" BOR.
DEAUX SPRAY NOZZLE.

The "Bordeaux" Nozzle is the simplest and best combination spraying Nozzle on the market. It throws a solid stream or a fan-shaped spray, adjustable to any fineness; is readily degorged by turning the cock handle. It will also throw a long distance coarser spray for spraying very large trees; or it may be shut off altogether—features possessed by no other Spray Nozzle.

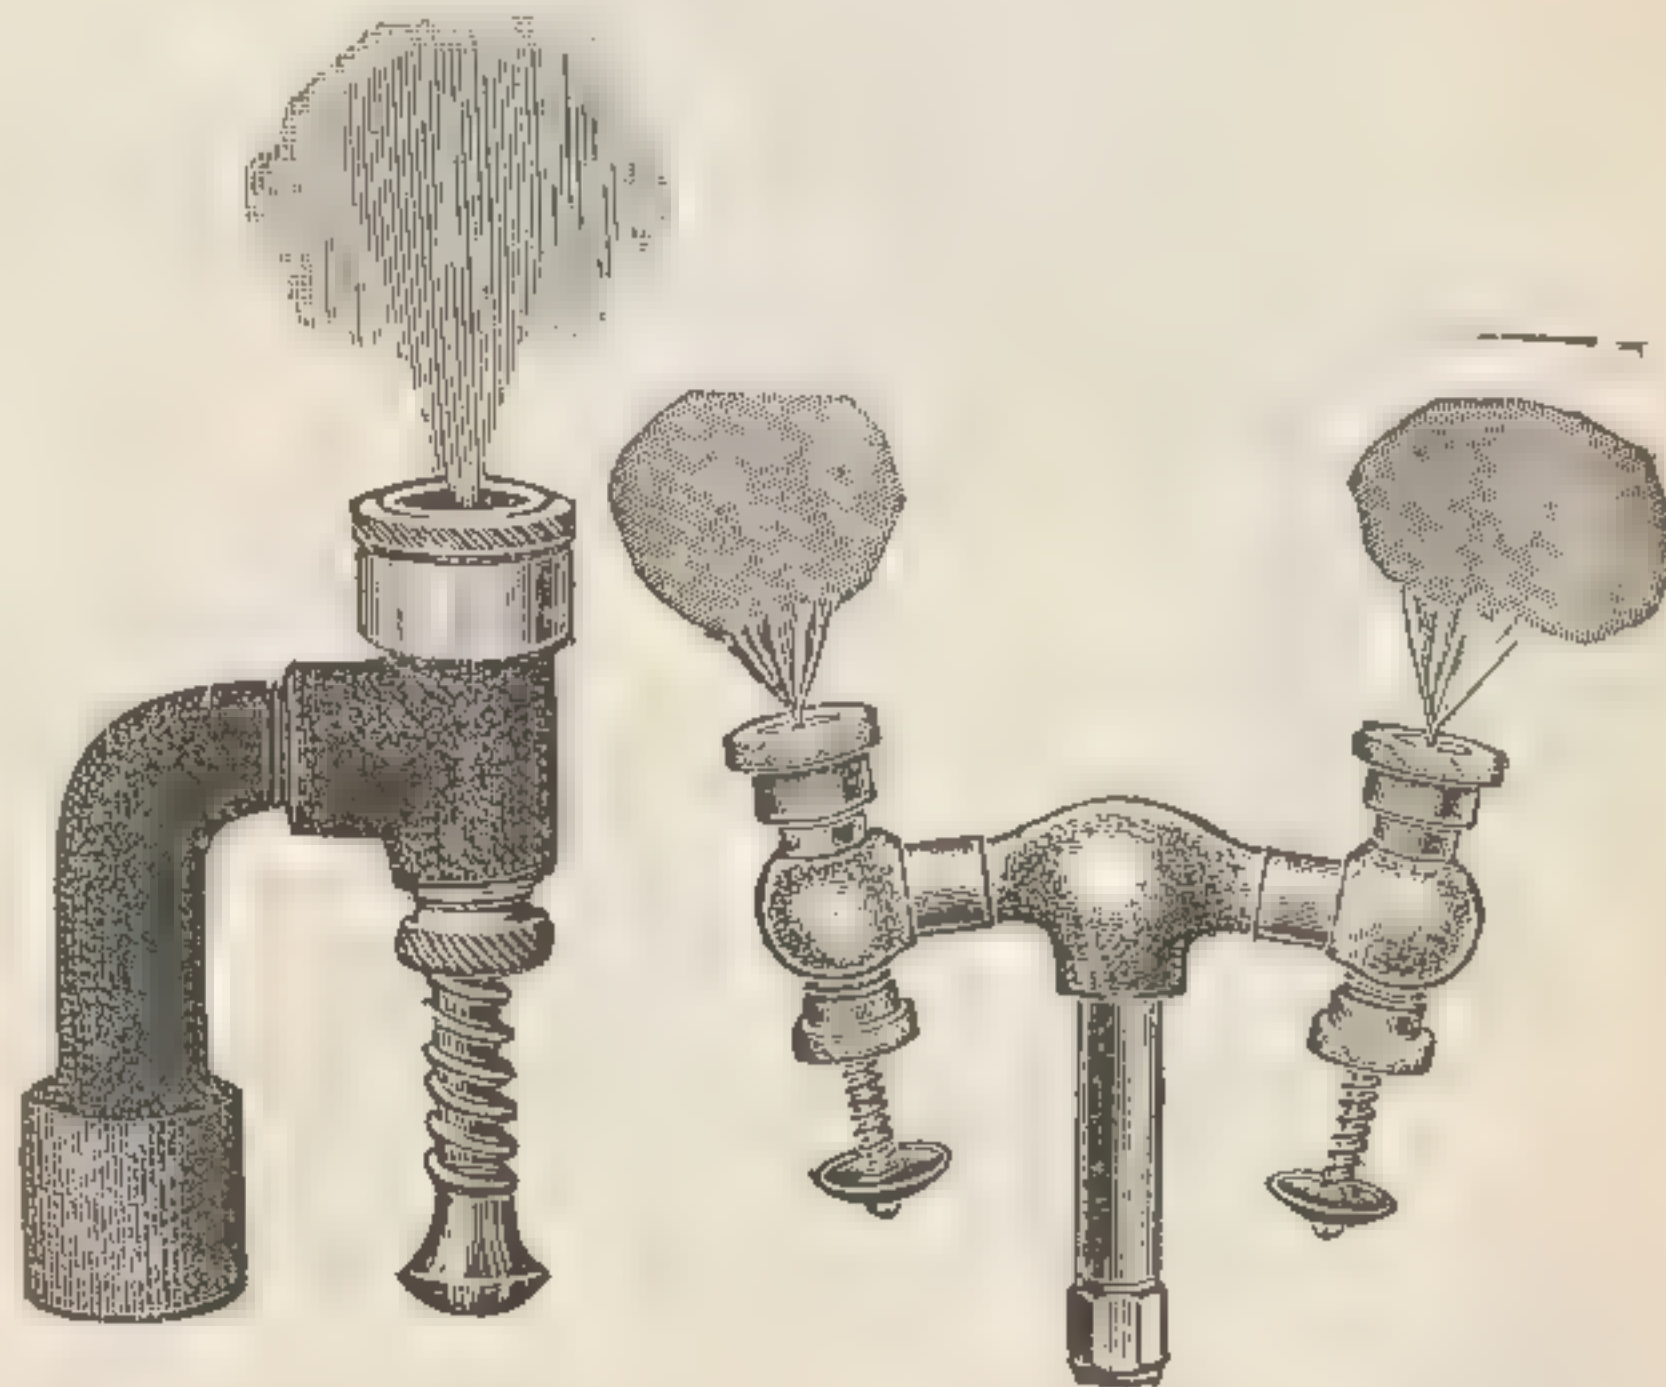

Price, Original Bordeaux, 4/-.

"VERMOREL."

Each with Degorger.

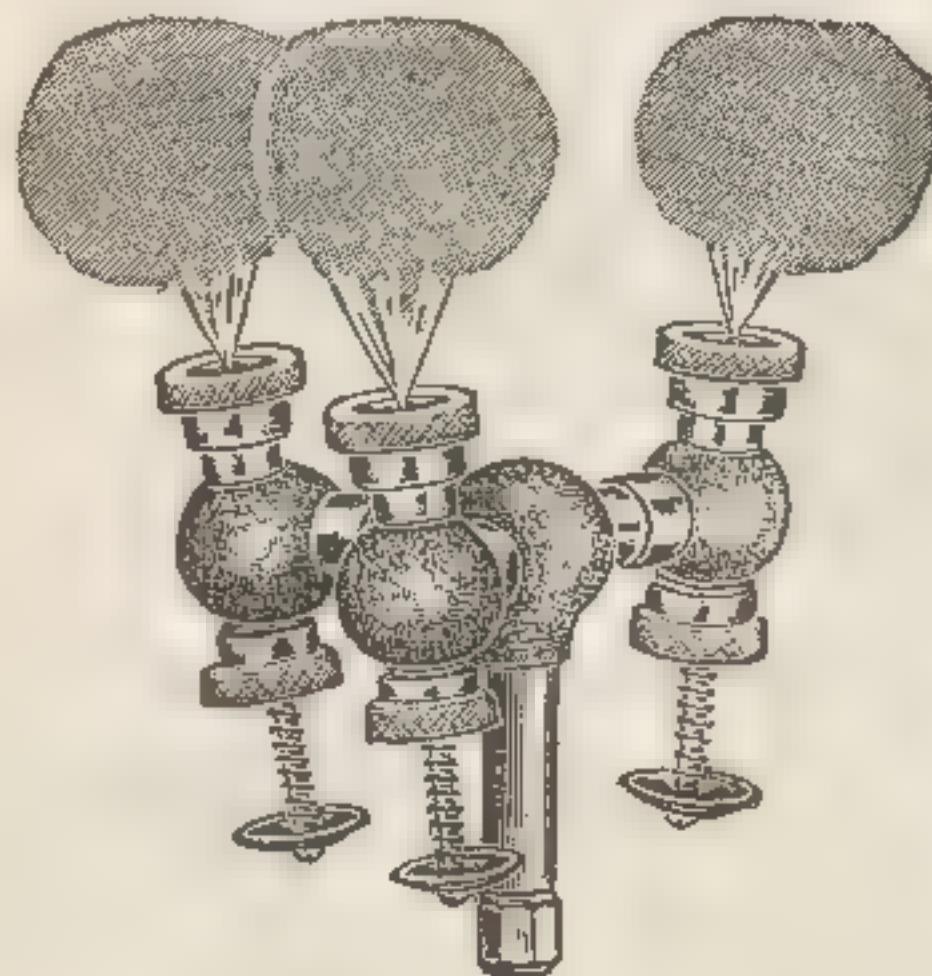

"Vermorel" Spray Nozzle with Degorger, affords a conical discharge, adapting it for close range spraying of vines, trees, etc. The liquid is forced through an eddy chamber and discharge cap.

This Nozzle is constructed in two sections, making it possible of being taken apart and cleaned. The one piece Nozzle, when plugged, is worthless. It has a stuffing box, which prevents leakage. It is readily cleaned in operation by pulling or pressing the Degorger against limb of tree.

MU 157.

BRASS STOP COCK.

Is designed to be used with any of our Spray Pumps, to shut off spray quickly and save loss of liquid. It has shank for attaching $\frac{1}{2}$ -in. discharge hose, and $\frac{1}{2}$ -in. male pipe thread to attach Spray Nozzle or extension. Price 2/3

BRASS WHEEL VALVE, used as above.

Price 3/6

MU 158.

NOZZLE HOLDER EXTENSION.

For spraying large trees, the Nozzle Holder Extension will be found a great help. Take a light pole, fit one end to holder, as shown in illustration. With this the Nozzle can be elevated amongst the branches, and the highest trees sprayed with ease. The holder will fit all our Nozzle Connections, except "Figaro."

Price 3/-

MU 159.

BAMBOO EXTENSION.

In place of long pole mentioned above, the Bamboo Extension will be found an improvement. This consists of a length of bamboo with a piece of solid brass tube running through the centre; to the latter are fastened two nipples, one end screws on to the tap connected with the hose, and on the other the nozzle for distributing the liquid. The connection is very simple, and, in use, the extension will be found far more convenient than the pole. This extension can also be used in connection with the "Knapsack" Pumps, but we do not recommend these Pumps for spraying trees. Price, 6ft. long, 8/6 each.

Longer Lengths, 6d. per ft. extra.

Incubator Thermometers

An accurate thermometer has much to do with successful results with an incubator and brooder. In fact, failures are quite often the result of the thermometer being two or three degrees off. Ours are the best that experience and money can produce. The glass tubes are blown two years before they are filled and sealed, and we offer for sale only those which are thoroughly seasoned and tested.

Price, 3/-.

EVERYTHING SOLID VALUE

© F. LASSETTER & CO., LIMITED ©

No. 1 Indoor Brooder Price, 30s.

Realising the need of a low-priced and effective brooder for those who desire something cheaper than the renowned Des Moines Successful brooders, we have designed three brooders for which we claim superiority over any so-called cheap brooder on the market. These brooders are as near perfection as it is possible to construct a brooder where a regulator is not used. Like the Des Moines, they are perfect in the supply and distribution of the heat. The heat, though produced underneath, is distributed from the top of the brooder, and bottom heat is not used at all.

A further important feature is that the centre of the brooder is the warmest, thus preventing the chicks crowding into the corners of the machine. The advantage of this will be obvious to all poultry-raisers.

As will be seen from the illustration, this is for indoor use only. It has a wire-netting top, but the two pieces shown supporting the top are not supplied with the brooder being used only to enable the photographer to obtain an interior view. As shown with run down it has a floor space 24 x 24 in.; it will be noticed that this run or platform, leading to the

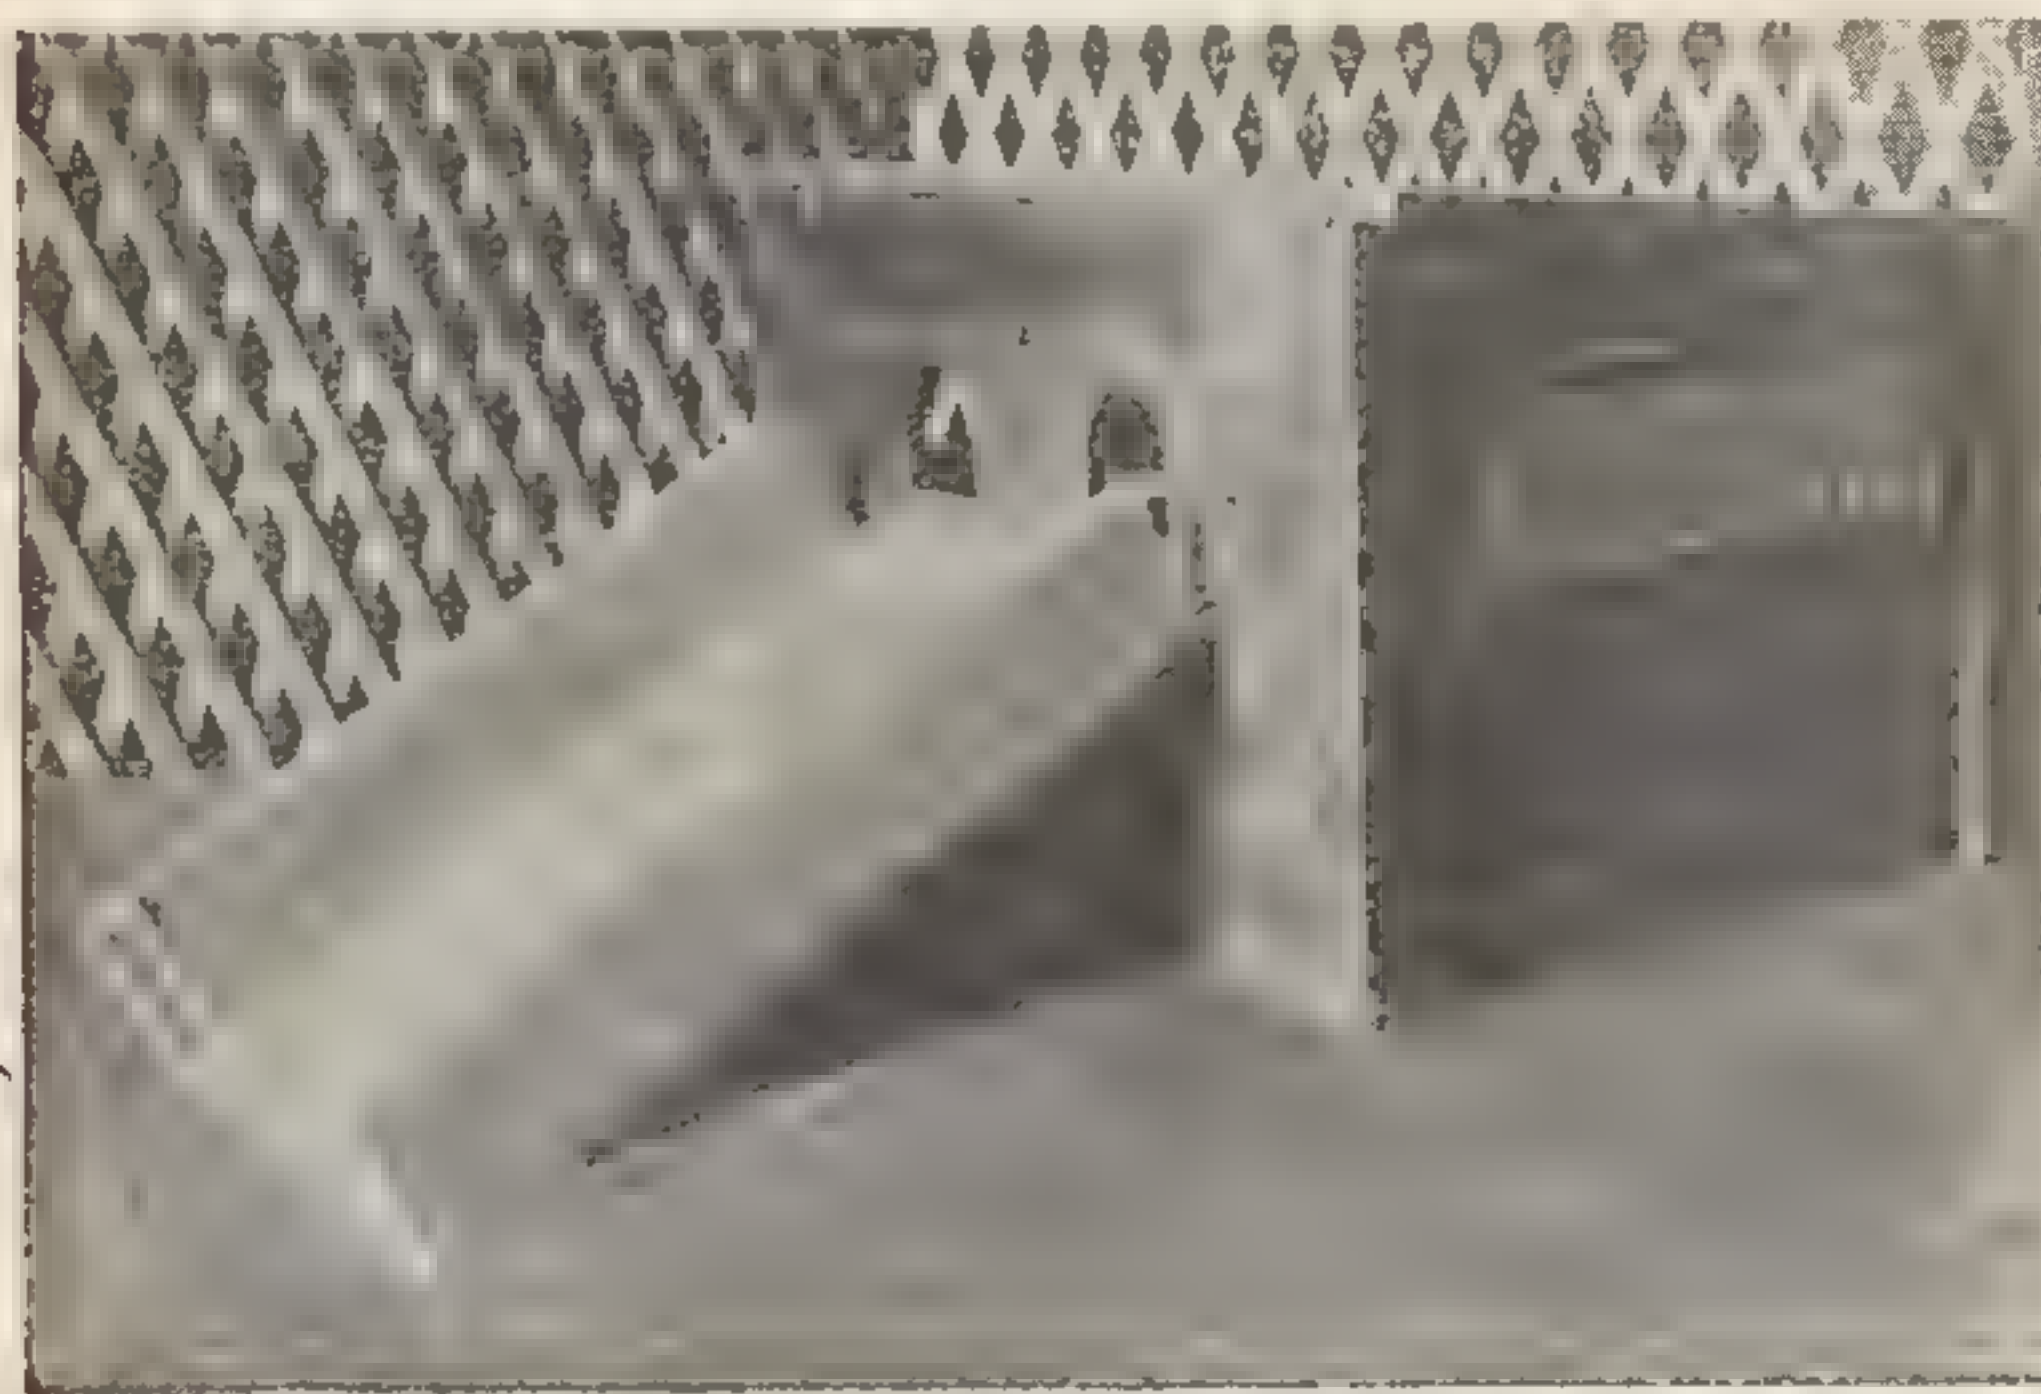

MU 163.—No. 1 Indoor Brooder.

ground level, is hinged. This enables the brooder to be closed in at night, keeping in the chicks, and making the brooder rat, cat, and vermin proof. When thus closed, it has a floor space 36 x 24 in., and will mother from seventy to eighty chicks. It is easily cleaned, as every inch of the floor is easily accessible.

No. 2 Outdoor Brooder, Price, £1 17s. 6d.

A demand has arisen for a thoroughly well-built outdoor brooder at a low cost. With our No. 2 outdoor brooders we are in a position to meet this de-

mand, placing before you the most perfect and cheapest outdoor brooder yet introduced to the market. It may be placed in any exposed position, and no matter how boisterous the weather, the chicks, when in the brooder, do not run the slightest risk from the cold or wet. The system of heating is exactly the same as in the No. 1 brooder, but it will be noticed from the illustration that it is far more elaborate in construction. It is shown with the run in position to enable the chicks to get from the ground into the brooder. This run is very easily detached, and the two holes or inlets for the chicks close with sliding doors. It has glass at the side, giving a good light inside the machine. The ventilation is entirely under the control of the operator. The roof is hinged, and can be held in any position by a support on the inside, or can be thrown right back for cleaning out the inside of the brooder. This machine has a floor space 24 x 28 in., and will mother up to 100 chicks.

MU 164.—No. 2 Outdoor Brooder.

No. 3 Outdoor Brooder. Price £2 5s.

MU 168.

Italian Queen Bee (Enlarged)

Our stock of Beekeepers' Supplies is the largest and best assorted stock in Australia. Every article is up-to-date, and we are the people to consult upon all matters appertaining to this instructing and profitable science. If you are interested in this subject write for our special descriptive catalogue, which contains every information about appliances; also valuable instruction about how to manipulate bees, information that will help you considerably along the road to the pinnacle of success.

Comb Foundation

We again wish to draw your special attention to our

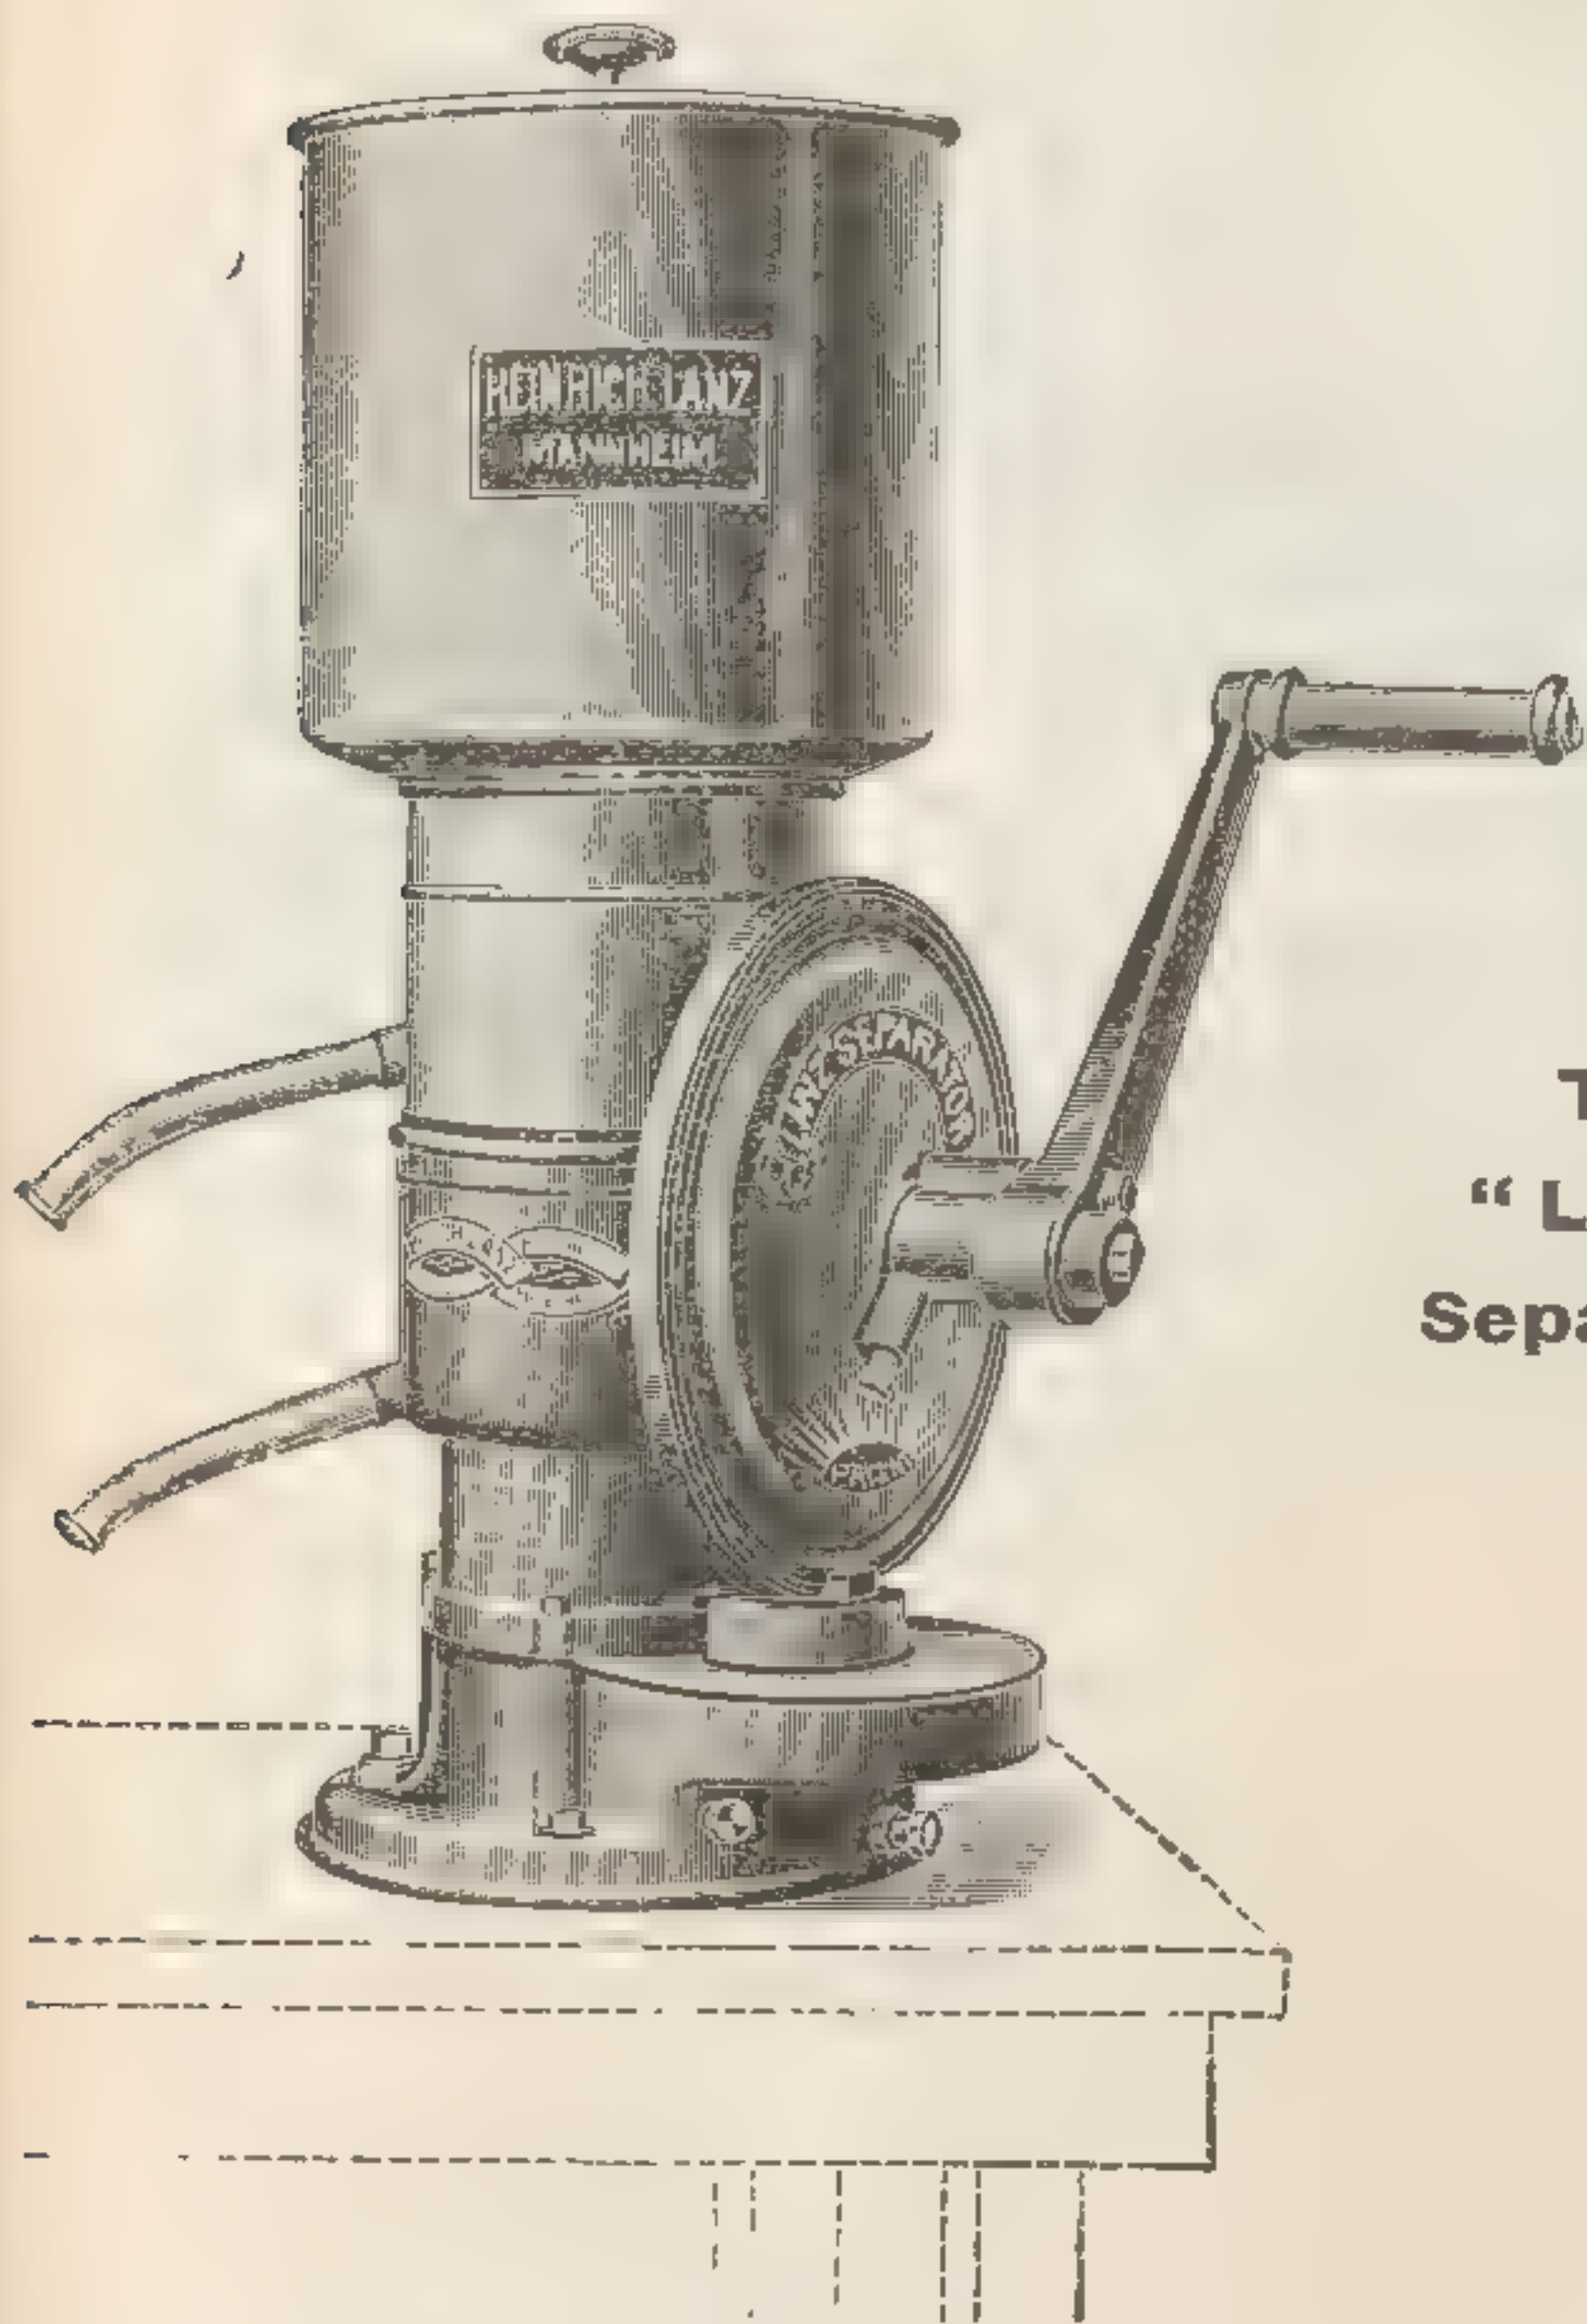

Weed Patent Process Comb Foundation

The superiority of this Foundation over that made by any other process now remains undisputed. Its superiority does not alone rest in the method of sheeting and printing; the process of refining is so perfect that, should the wax, before entering the machine, contain, any particle of impure matter, it is entirely destroyed and eliminated, without in any way destroying the purity or natural color of the wax. This desirability is accomplished through the medium of steam only, neither acid nor any other chemical or foreign matter being used in our process of refining. Do not be misled by any other Foundation sold as "New Process" or "American." The recognised New Process is the "WEED," for which we are the patentees and only manufacturers in New South Wales. For full and interesting particulars of this wonderful process, write for catalogue mentioned above.

Anyone selling Comb Foundation as Weed Patent is infringing our rights and misleading the Purchaser.

Cream Separators

MU. 169.—With Handle.

No. EO, 12 Gallons, £7/10/-.

No. GO, 28 Gallons, £11/10/-.

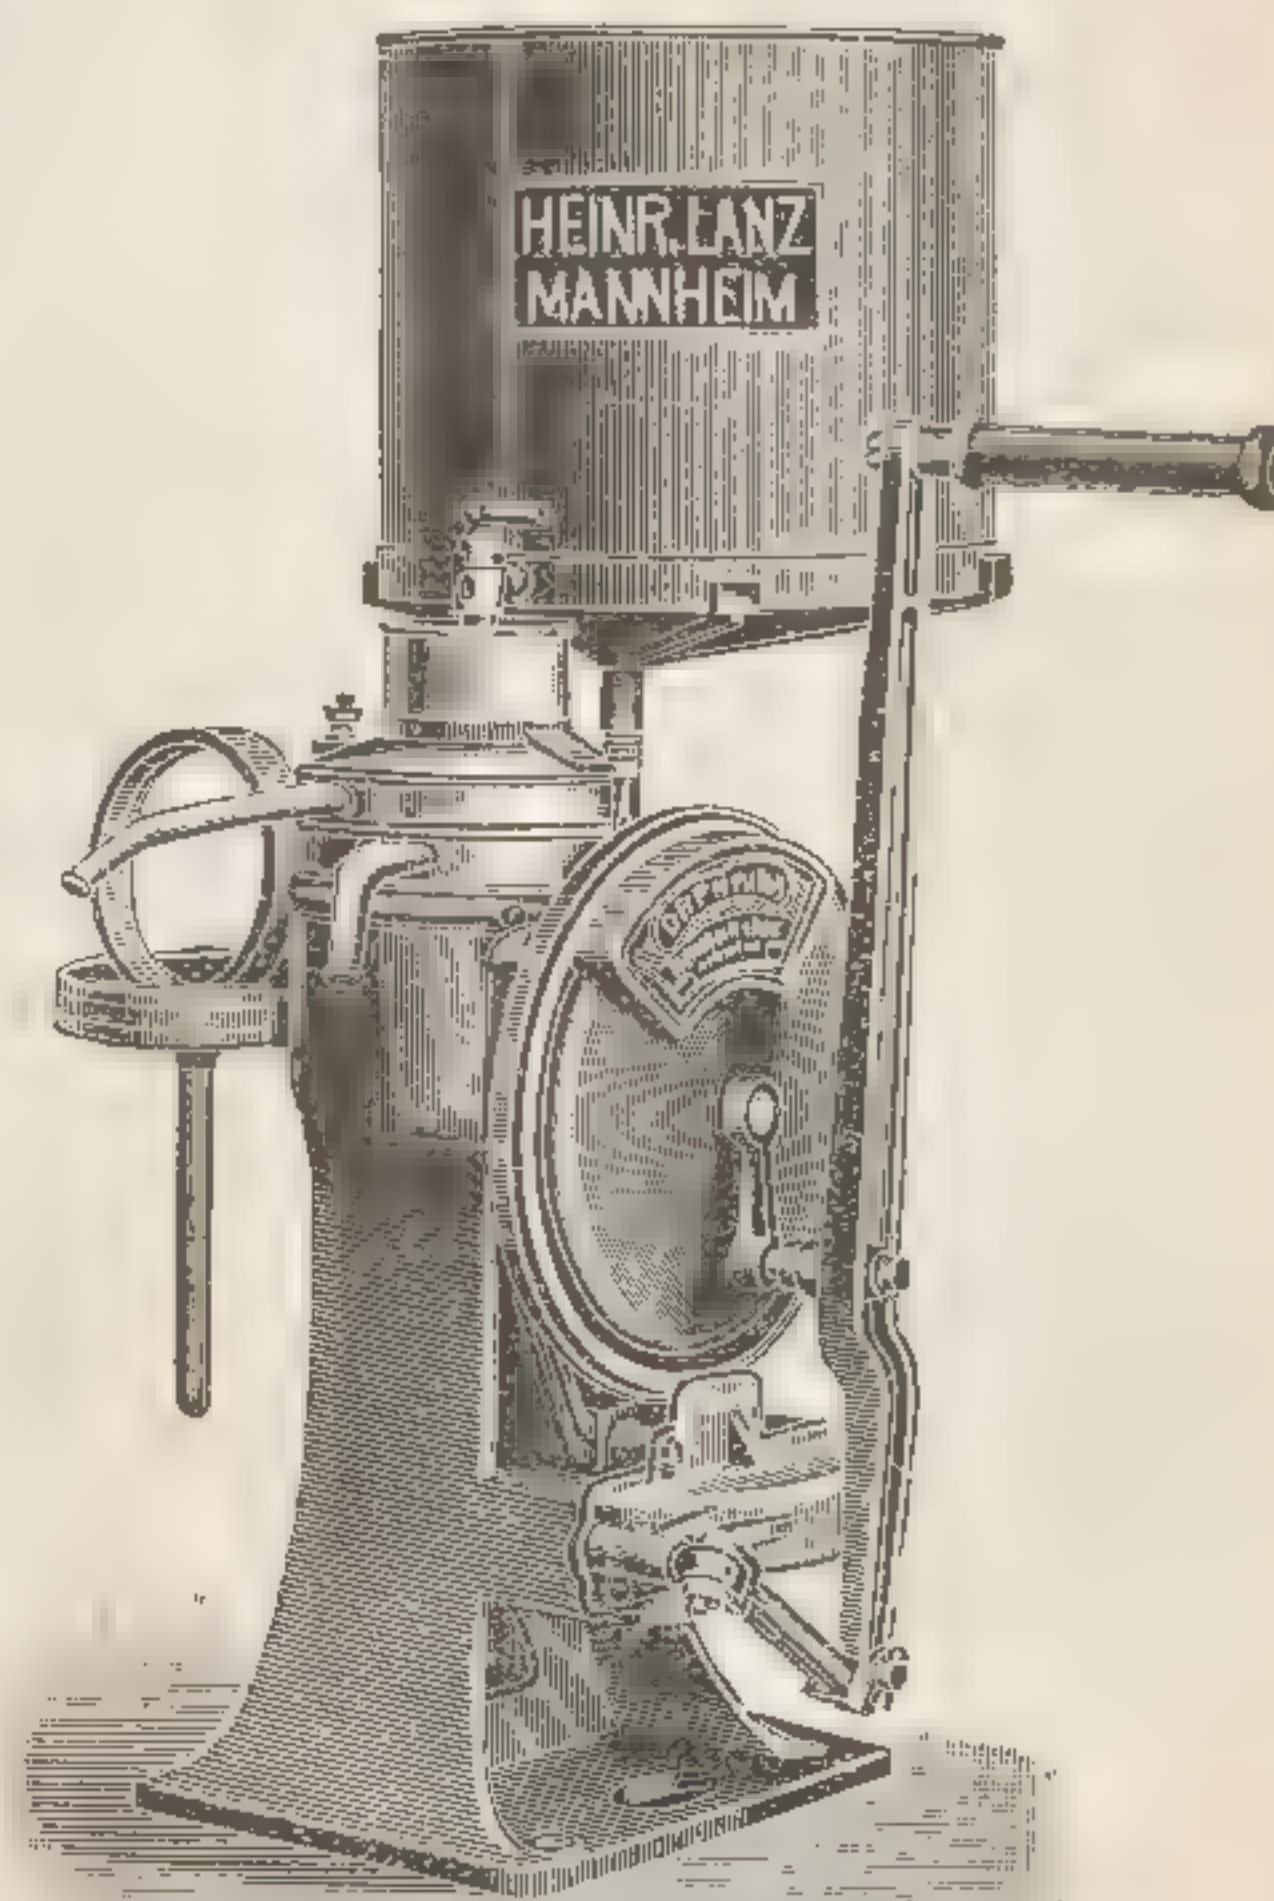

How does the "Lanz" fulfil the requirements of a good Cream Separator?

Its perfect skimming has been attested by "The German Society of Agriculture," which is of world wide reputation; further, a number of agricultural Schools have tested and proved the "Lanz" Separator to be a great success.

The "Lanz" Separator requires lubricating in 3 places only and uses very little oil.

Work with a handle, and can be bolted to stand on firm tables. Always obtain the correct speed before allowing the milk to flow into the bowl.

The
"Lanz"
Separator

MU 170.—With Lever.

No. H2, 55 Gallons, £20.

No. H3, 75 Gallons, £24.

NEWEST CONTRIVANCE FOR DRIVING CREAM SEPARATORS.

The greater the hourly capacity of a machine, the more tiring it becomes to refill the feed-can, if it lies too high, this with the unavoidable bending necessary in turning the handle requires a considerable effort.

The LANZ SEPARATOR with lever driving contrivance is an important advance in the manufacture of Separators. Driving the machine by means of a lever is more convenient and much less tiring than by means of a crank, especially in machines of the greater capacities. When once the drum has attained the required speed, it is very easy to maintain the same without unnecessary bending which is always very tiring.

No farmer having a LANZ SEPARATOR with a lever will have his employees complaining that the Separator is too hard to work.

Besides this, the arrangement of the lever has made it possible to place the feed can quite low down, so that it can be refilled without trouble.

In short, the lever driven Centrifugal machine in which are combined all the before mentioned advantages is in every respect

The "non plus ultra" of Cream Separators.

Easy driving without tiring bending, can only be accomplished by means of the lever driving contrivance

LASSETTERS' CONCUSSION CHURN.

(MU 173.)

MU 173.

VERY POPULAR IN
FACTORIES,
AND RECOMMENDED
BY MANY OF THE
LEADING BUTTER
MAKERS IN THE
COLONY.

These Churns are as easy to work as the Barrel Churn, and being perfectly plain inside, can be kept clean without difficulty.

As the whole of the cream must fall from side to side as the Churn revolves, the cream is churned equally, thus bringing all the butter at the same time, and preventing the streaky appearance too common in ordinary butter.

DIRECTIONS:—Pour in sufficient water and revolve churn two or three times, then open brass gate to permit the steam to escape, closing, again and again revolving as before several times, then open the gate and allow the water to run out. Then pour in a bucket of cold water and revolve the churn a few times, to well rinse and cool; run water out as before, and put in your cream. As cream expands greatly during the early part of the churning, it is necessary to partly open gate about every twenty seconds to allow the air to escape (opening thus about four times is sufficient) the churning can then be proceeded

with. In very hot weather the Churn requires being turned very steadily (about twenty to thirty revolutions per minute), increasing the speed in cooler weather; and in winter it may be turned as fast as desired without danger. It will be known when the butter has come by the difference in the sound and by the glass in lid of churn becoming clearer. The buttermilk should be drawn off through the brass gate. Water can then be poured in and the churn rocked back and forward or revolved so as to wash the butter; this can then be run off and more poured in as often as deemed necessary.

Revolution in Dairying.

Received First Award at the 1893 Exhibition of the Royal Agricultural Society of London.

Butter Made in Five Minutes.

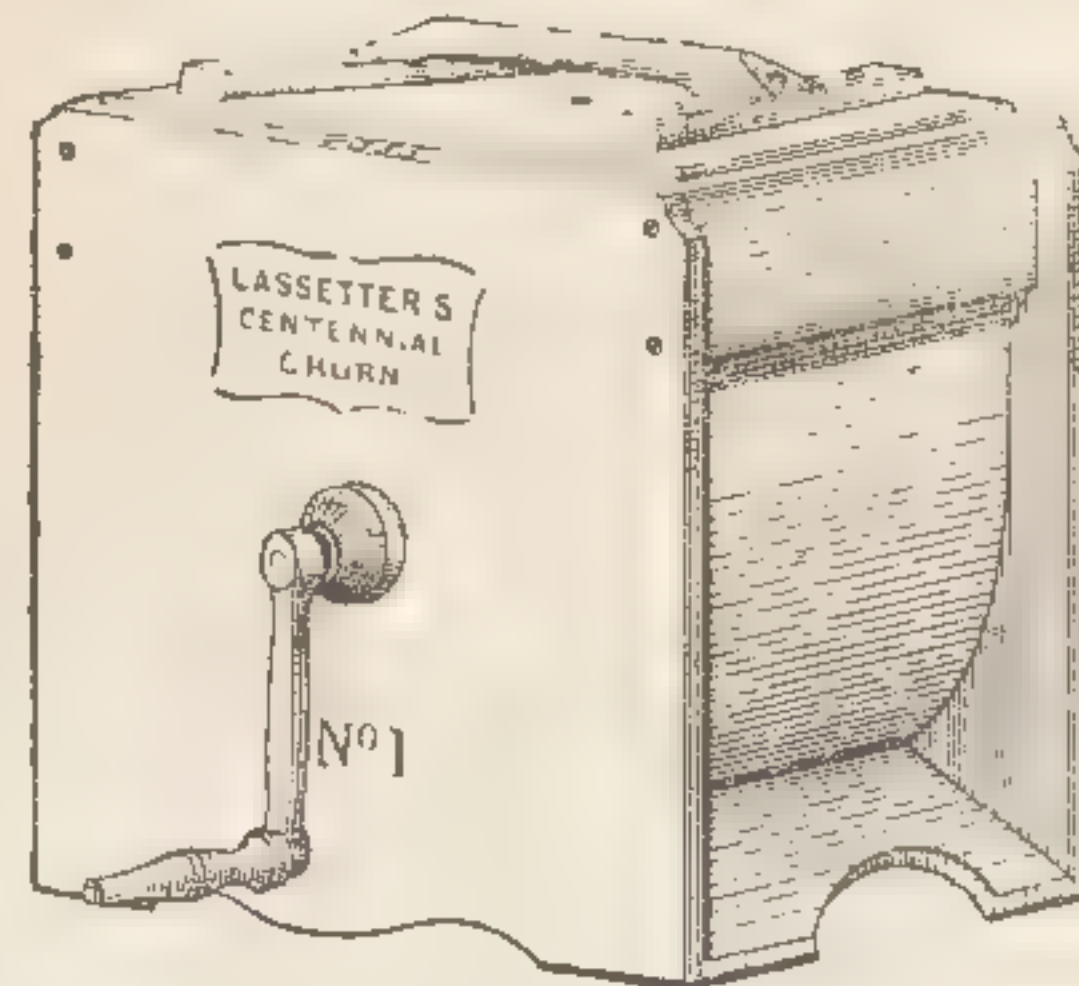

The Superiority this Churn claims to have over others is—

- 1st. It makes the butter in Five Minutes.
- 2nd. Having an open top all gases escape freely.
- 3rd. It renders the grain perfect.
- 4th. The butter can be brined in the Churn.
- 5th. The butter does not require handling.

MU 175.—THE DRYER.

The Centennial Bentwood Churn

MU 177.

This is, without doubt, the best Box Churn ever introduced; its special features are as follows:—The bottom and sides are made of one piece of bentwood, thus obviating the unpleasantness arising from so many crevices in the Churn, into which pieces of butter find their way, and no end of trouble is caused in the endeavor to keep properly clean. It has a double dasher, which can be easily taken out by unscrewing the spindle handle which passes through the centre of Churn.

Zinc-Lined Thermometer Churns

These are so constructed that cream or milk is readily brought to the desired temperature without mixing water or other substances, and the temperature certainly and definitely determined, which proves invaluable in the art of making butter.

One improvement consists in the construction of a double bottom, made in the form of a semi-circle of two sheets of zinc, placed one above the other, the cream to rest upon the uppermost; between the two sheets forming the bottom is a space or chamber, into which may be introduced cold or warm water, as may be required to increase or diminish the temperature of the cream or milk.

MU 178.

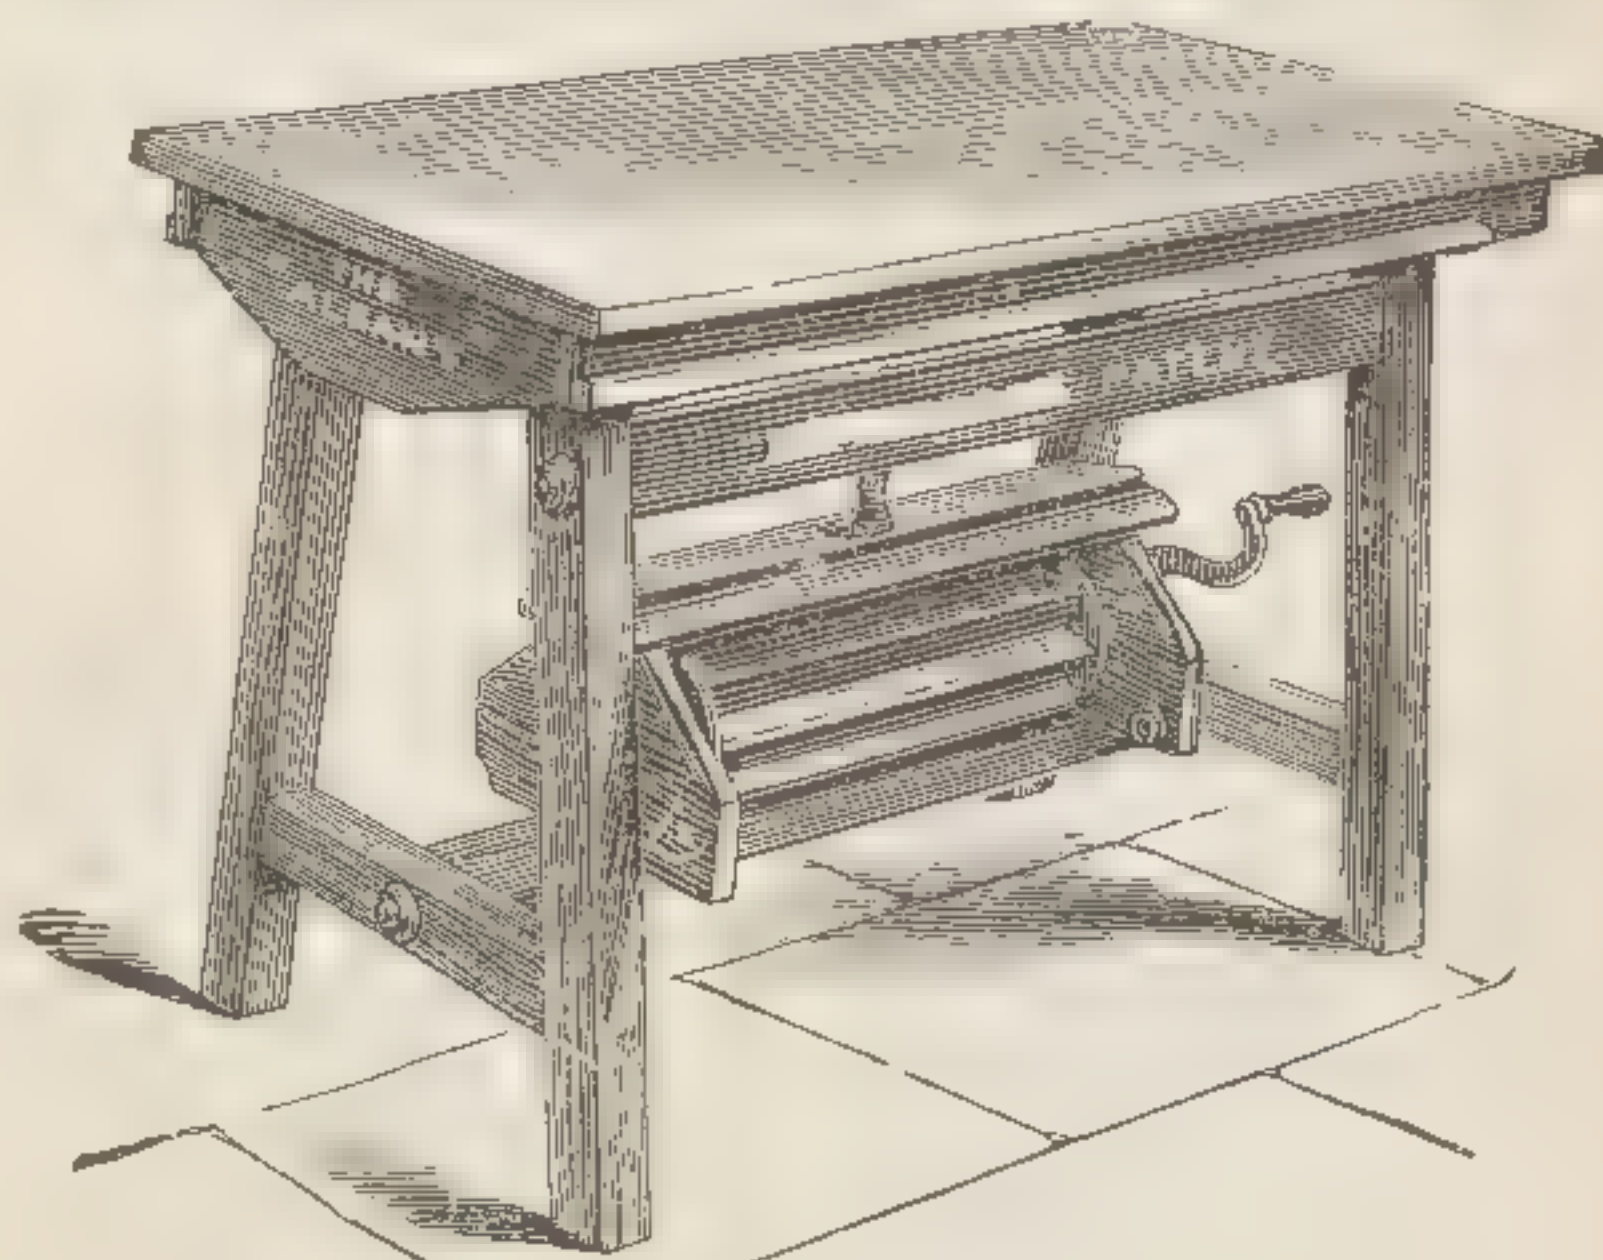

Another improvement is a thermometer permanently placed in one end of Churn, entirely secured from breaking or accident, marked at 62 degrees, and which is always visible, so that the operator may know and determine with certainty when the cream or milk is brought to the proper temperature. If the cream is too warm, the mercury in thermometer will rise above the mark of 62 degrees, and cold water should be applied in the chamber described; if too cold, the mercury will fall below the mark, when warm water must be used instead of cold. The cream or milk should be stirred or agitated by turning the crank while the water is being introduced to give the cream or milk an equal temperature throughout. When the thermometer indicates that the cream or milk is of the proper temperature, the water may be drawn out through the tube placed for the purpose, when the churning should be performed by giving the crank about forty revolutions per minute.

The Churn is simple in construction is light, portable, durable, very easily operated, and readily cleansed.

The "Albany"

Combined Butter Worker and Table

MU 179.

The Butter Worker when used as a Table.

MU 180.

The Butter Worker when in use.

EVERYTHING SOLID VALUE

© F. LASSETTER & CO., LIMITED ©

This convenient and powerful Butter Worker is recommended for medium size dairies. It rolls out the butter into fluted layers by a forward movement, and again rolls or lumps it up by a backward movement, ready for re-rolling, thereby ensuring not only its being perfectly cleaned, but also perfectly salted in the easiest possible manner. When not in use as a Butter Worker, the fluted roller can be instantly removed and placed between the galvanised iron standards in the bottom stay of the table (see illustration), and when the tray is reversed and secured, it forms a most useful and convenient Dairy Table. (See annexed drawing.)

The tray and roller are made of the best sycamore, the working parts of best hardwood, and the table is well framed and bolted.

"One of the best-made implements ever introduced into the dairy."—Professor Long.

No. 1—20-in. £5, 10/-; No. 2—24-in. £7

Special Quotations for Rotary Workers for Factory use on application.

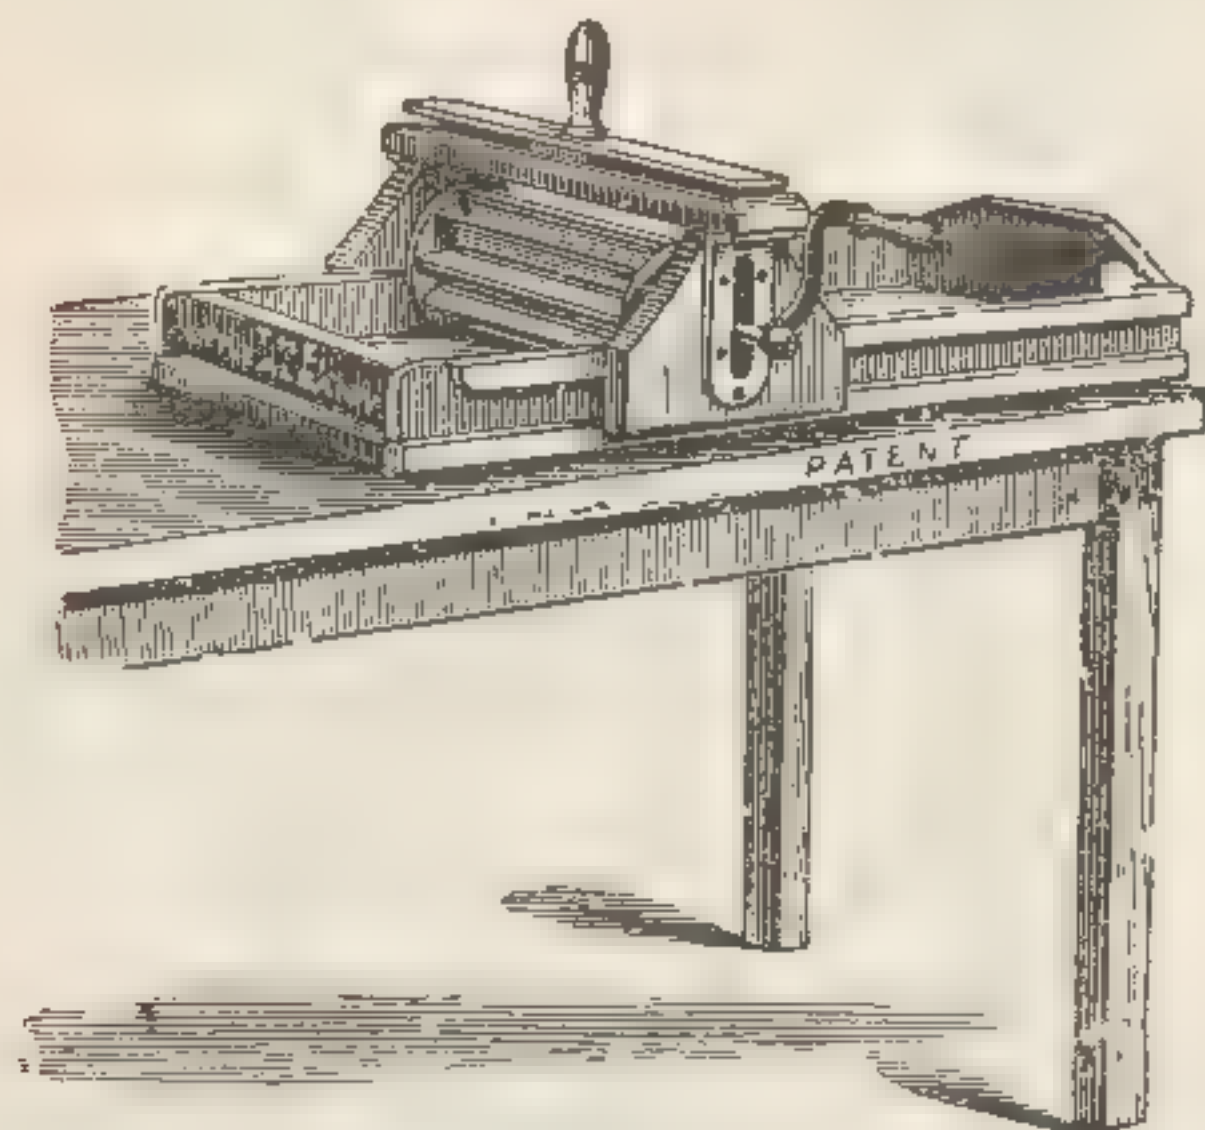

BUTTER WORKERS.

These machines work the butter perfectly, and expel every particle of buttermilk and whey without the hands having to touch it at all, and their first cost would soon be saved by the production of better butter, that will command a better price than butter made by the hand.

"The reason why the superior butters of the Continent keep sweet and retain their delicious flavor so long is mainly attributable to their being kneaded by Mechanical Butter Workers, which expel every particle of the objectionable buttermilk and whey."

Awarded the Special Silver Medal of the Royal Agricultural Society of England.

The "Little Albany" Butter Worker

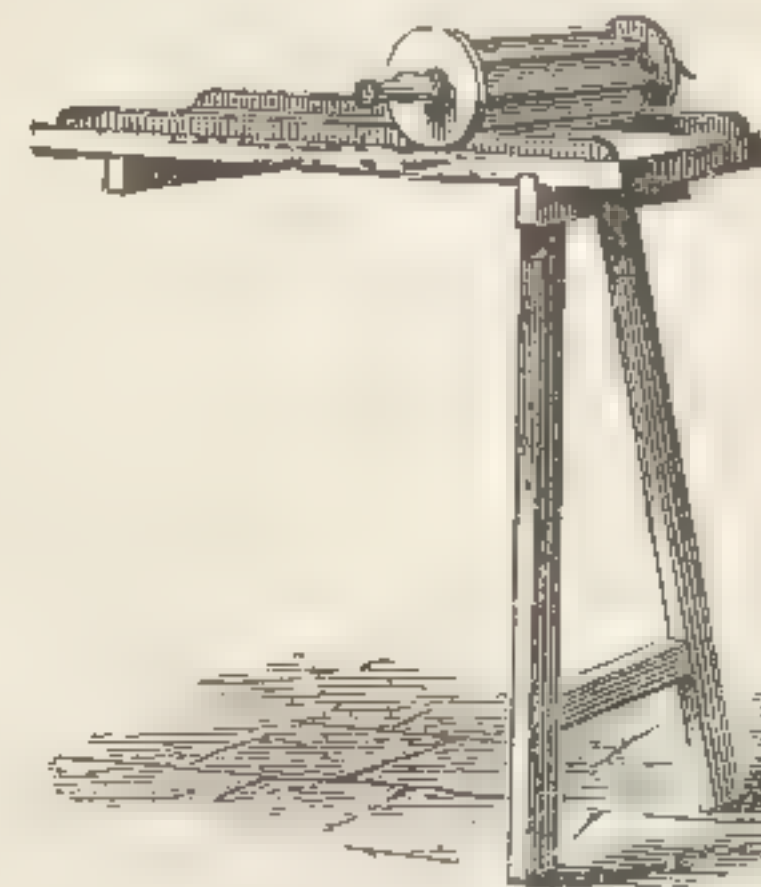

MU 181.

The "Little Albany" Butter Worker is a very compact and portable modification of the "Albany," and is specially adapted for small dairies; it can be used upon any ordinary table, and after use can be put away on a shelf, or hung upon a wall-hook or bracket.

No. A, 14-in., £2/16 -; No. B., 17-in., £3/5/-

Butter Board

For Family Use.

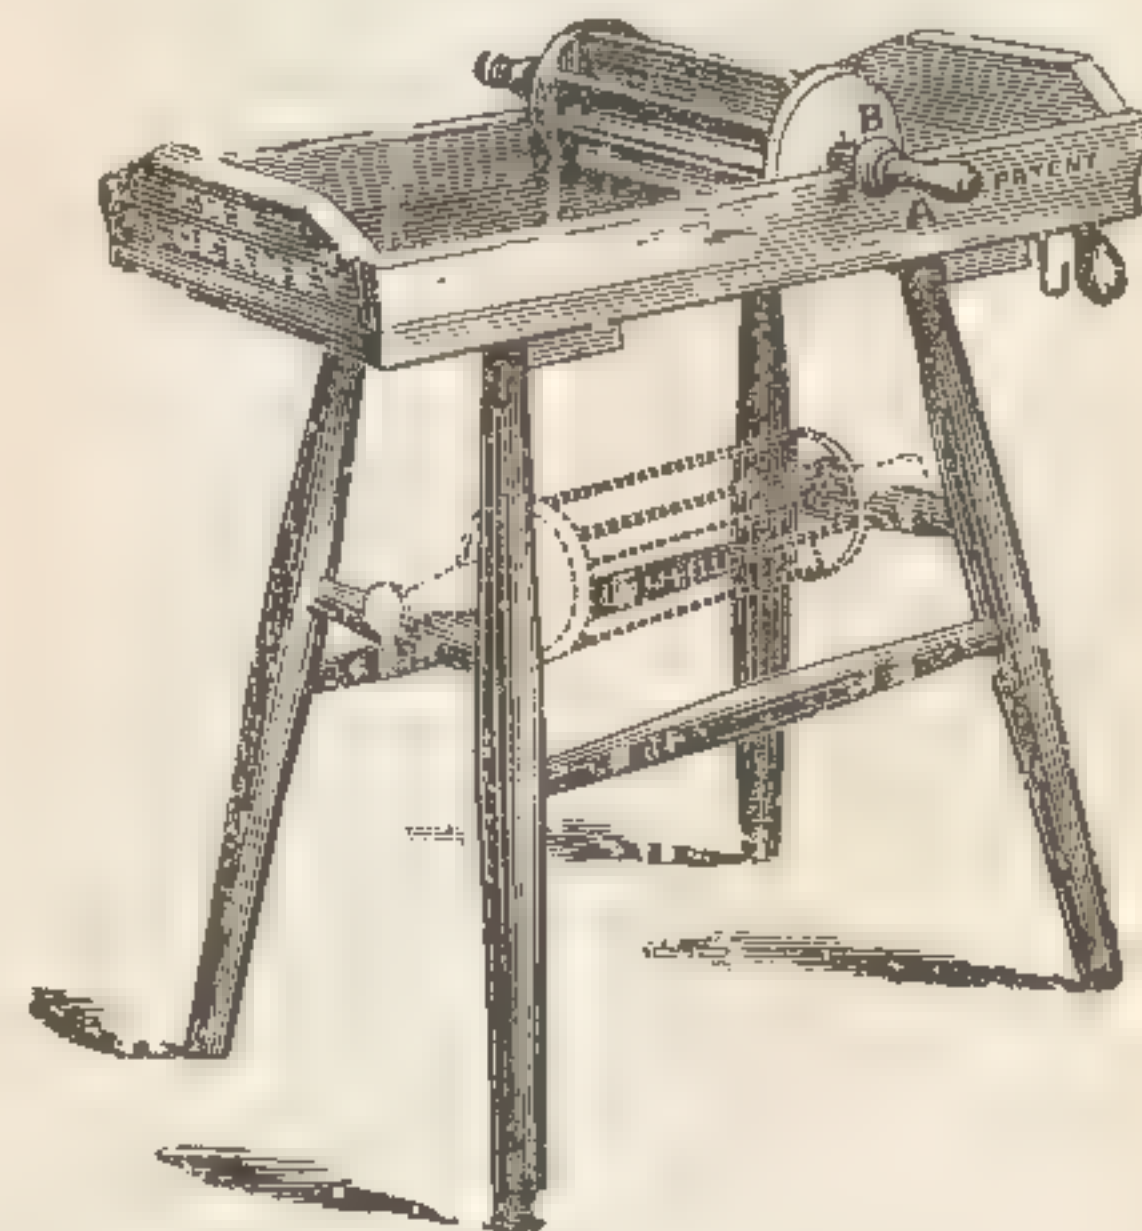

MU 182.

Recommended by the Royal Agricultural Society of England.

Price £1/5/-

The open end should rest upon a table or other convenient support.

The "Alderney" Butter Worker

MU 183.

The "Alderney" is a compact, efficient, and in expensive Butter Worker, specially suitable for small dairies.

The loose handle A (see drawing) is held to revolve the fluted roller, and the fast handle B is held to collect the butter into a lump for re-rolling.

When not in use as a Butter Worker, the fluted roller can be placed underneath the tray out of the way (as shown in the drawing), and the tray used for other purposes, such as making up butter, etc. Behind the plug is fixed a hook upon which to hang a pail to catch the buttermilk which drains to that corner.

Milk Testing Machines

The Patent "Victoria" Testing Machine

For Milk, Butter, Lard, etc.

The importance of being able to test the quality and richness of milk will be admitted by everyone. It is important to the farmer, who naturally wants to see that his cows are giving him that return in the richness of their milk which he is entitled to expect. It is important to the butter or cheese maker, more especially in face of recent discussions, which have so emphasised the value—and, indeed, the necessity—of Uniformity of Quality as one means of meeting foreign competition. It is important to the dairyman, who merely buys from the farmer to sell to the public, as the selling of an improper article exposes him to severe legal penalties, as well as to the publicity calculated to do him great harm. It is important to the hotel proprietor, as few things are more quickly recognised or more highly appreciated by the public than a superior quality of milk at the breakfast table. It is important to the master of the workhouse, and still more so to the superintendent of the hospital or asylum. Lastly, it is important to the general public, and to the borough or other official analyst, into whose hands the interests of the public in this respect are entrusted.

MU 188.

Nevertheless there has hitherto been no method generally available, and at once simple and rapid, by which the quantity of milk could be accurately ascertained. Analysis or evaporation, though, of course, the most perfect methods, and necessary for certain purposes, are tedious, costly and wasteful, and require special knowledge and training; whilst the only other method hitherto used on a practical scale requires at least 12 to 24 hours, is much affected

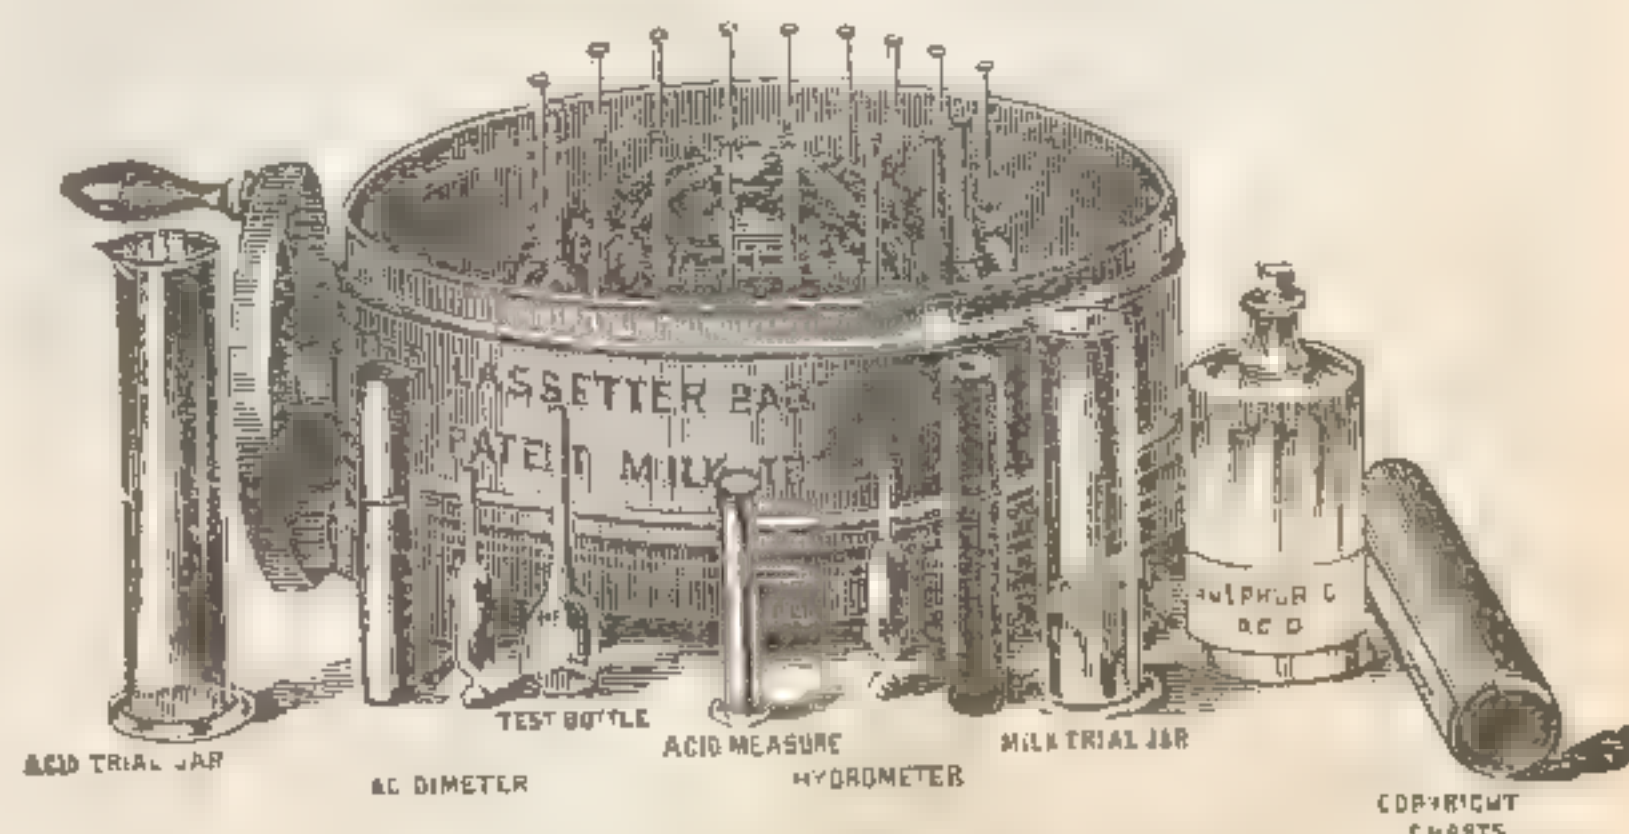

by the weather and at the best gives results which are only roughly correct. Indeed, the want of a simple apparatus by which quality or richness of milk could be quickly and accurately determined has long been felt.

The little machine shown on this page perfectly meets this want.

Price £2/10/-.

"Babcock" Milk Tester

This machine is now in use in nearly all the butter factories and creameries throughout the colonies, and is without doubt the best Tester of the day.

MU 189.

MU 190.

The managers of our dairy factories alone know the benefit derived from using the "Babcock" Tester, since paying by result has become a necessity. It is not the quantity of milk that pays, but the yield of butter-fat contained therein. Many cows will give 50 per cent. more milk than others, while the yield of fat from the cow giving the smaller quantity of milk will oftentimes be much greater.

@ CHEAPSIDE . SYDNEY. @

UNIVERSAL PROVIDERS.

CHEAPSIDE, SYDNEY,

For all YOUR REQUIREMENTS in

Vehicles, Coachware, Harness, and Saddlery,

Always Specify LASSETTERS' Goods if you Really Want the Best Value
Lassetters' especially INVITE ORDERS from those who desire a BETTER CLASS of GOODS
than are generally sold at REASONABLE PRICES

GENERAL COACHWARE AND VEHICLES

When Ordering, please give full particulars of your requirements, as it will greatly assist us to know the class of work for which goods are required.

NOTE.—The weights stated in our Catalogues are approximate only, and all prices in these sections are subject to market changes.

SPECIAL NOTICE.—The great scarcity and difficulty in securing a full line of all kinds of American Carriage Woodware, and the increasing demand for its use here is having the result of constantly advancing prices. Our prices are now based on the present market rates, but let no one be surprised at advancing prices. They are sure to come; each year will be higher than the previous one. Lassetters' prices, however, will not at any time be higher than other houses for the same quality of goods.

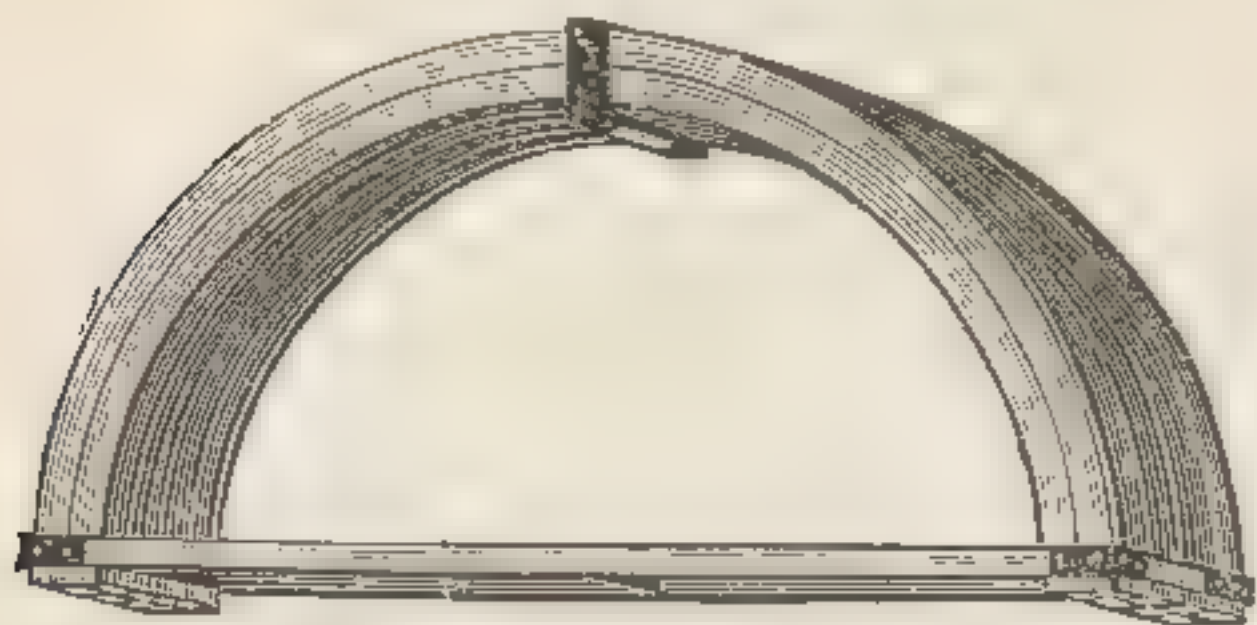

Carriage Woodware.

HICKORY RIMS.

Our rims are made from a superior quality of second-growth timber, and are recommended to those desiring the best. All Rims are thoroughly seasoned, planed on all sides, bent to a true circle, and cut 4 inches longer than half-circle, to allow for nailing and season checks.

When ordering always mention depth last—thus, $1\frac{1}{2}$ x 2 deep. All Rims in sets and pairs up to $1\frac{1}{2}$ wide are supplied $\frac{1}{8}$ inch deeper than width; larger sizes are $\frac{1}{4}$ inch deeper. We stock Rims in sets, 3ft. 8in. and 4ft. 2in., and in pairs 4ft. 4in., 4ft. 6in., 4ft. 8in., and 4ft. 10in. Special sizes bent to order. Prices on application.

COLONIAL (HARDWOOD) WHEELSTUFF.

We are prepared to supply every description of Colonial Hardwood Wheelstuff. We stock nothing but the best in Naves, Felloes, and Dressed Spokes.

SPECIAL NOTICE.

Owing to continued demands for seasoned Wheel Material in all sizes, we desire our customers to distinctly understand that we cannot guarantee to fill orders from thoroughly-seasoned Colonial Hardwood. We will use every endeavor to supply such in ordinary stock sizes when available, and in special sizes when practicable.

When ordering, please be careful to give diameter and length of Naves, also number of holes wanted; depth and width of Felloe, and if Spokes require to be shouldered or dray-pattern.

NOTE.—Naves are usually supplied with 14 holes, and Felloes are stocked to suit 4 ft. 8in. and 4ft. 10in. Wheel.

EVERYTHING SOLID VALUE

Carriage Woodware. Colonial Hardwood Wheels

We carry selected stocks of thoroughly seasoned materials, and employ only first-class mechanics in making up our Wheels enabling us to give exceptional value. The following proportions give the best service for general use. The sizes of Naves and width of Tyre Tread may be slightly altered to suit requirements without additional cost.

COLONIAL HARDWOOD SPRING CART AND VAN WHEELS (Wood only). Any height, 4ft. 6in. to 5ft.

MV 9.

2 1/2 "	3	x 2 1/2	10	x 10	2 1/4 "	82/6

PRICE LIST FOR TYRING AND MOUNTING WHEELS ONLY.

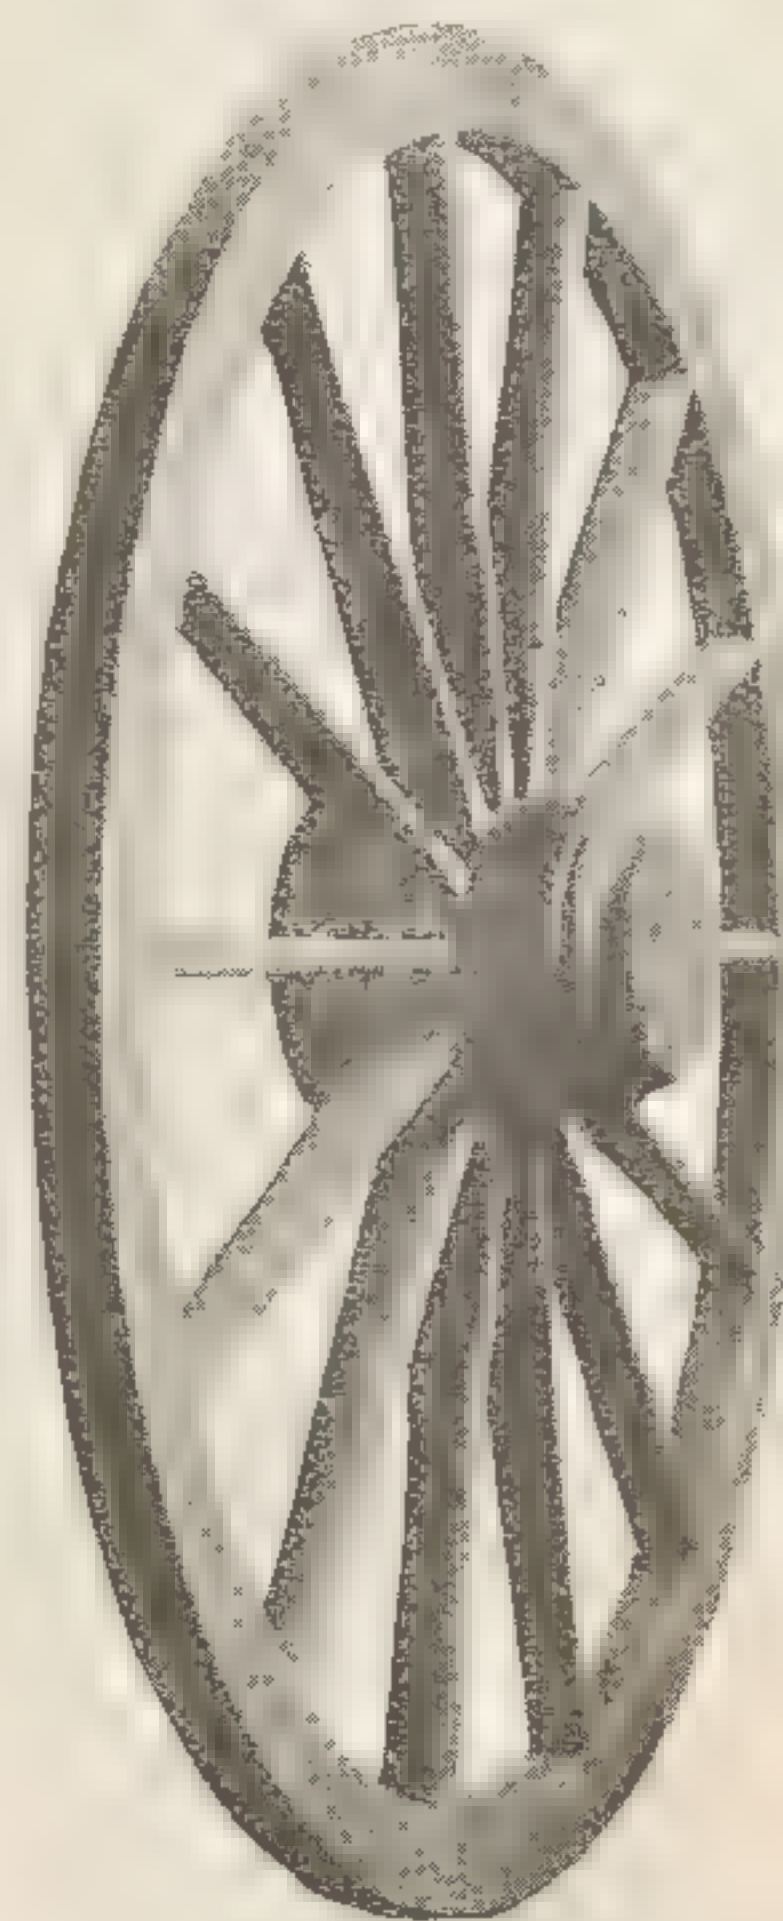

We are prepared to furnish Wheels Tyred and Mounted complete. This work is entrusted to experienced workmen only. We prime all Wheels either in lead, or size, according to requirements. This process is necessary to prevent soakage of water into Wheels when tyring. Unless otherwise ordered, we prime all Wheels in lead.

SPECIAL NOTE.

Especial care is exercised in setting Tyres of Wheels, but we cannot provide against climatic changes. The driest timber is most effected in damp seasons, and the best-seasoned timber will shrink away from the Tyre in unusually dry weather. It is essential that Tyres and all Bolts should be carefully attended to immediately Tyres begin to loosen. No Wheel, however good the material or workmanship, will stand unless the Tyre is kept tight, and the Wheel in proper dish. Time or service does not alter this rule.

COLONIAL HARDWOOD DRAY WHEELS (Wood only). Any height, 4ft. 6in. to 5ft.

Note.—Dray wheels price includes Hoops fitted on.

MV 10.

UNIVERSAL PROVIDERS.

Axles

We stock only highest-grade English and American Axles. For strength, durability and finish, our Axles have attained a high reputation. We carry a complete line suitable for every class or kind of vehicle. Extra boxes can be supplied.

When ordering extra Boxes, please be particular to give exact measurements of all sections, also make of Axles, is possible, as Boxes by different makers vary considerably. State length of Box over all, inside diameter at each end, and depth of all collar sections. These particulars are very necessary to ensure correct fit.

In calculating maximum weight load for all Axles, due allowance must be made for weight of body, which is not included in estimate. All dimensions, weights, etc., are given approximately, and without responsibility.

IMPROVED SPRING CART AND VAN AXLES. English Nut End, Round Bed, Solid Collar, Bright Nuts, Hard Chilled Boxes, Linch Pin outside Nuts, with Wrench.

NOTE.—Arms of this Axle are extra large in front of Collar, ensuring great strength. Boxes are bell-shaped to correspond, and are turned a true taper. Stock Sizes.

Price per pair, Two Arms and Boxes, Round Bed	13/-	14/-	15/-

LONG DISTANCE (Plated Double Nut) STEEL PATENT OIL AXLES, with Wrench.

NOTE.—Like the Collinge Collar Axle, the form of the Collar and Box secures the exclusion of dirt or grit, and the retention of the oil. This Axle is supplied in two styles—Single and Double Nut. The Single Nut is the simplest, being no different as to number of parts from the Ordinary Half-Patent Axle.

The Double Nut form has an additional cap on outside of nut, not for use in oiling, but to make the point of the Axle, as well as the collar, dirt and oil proof. These Axles are guaranteed by the manufacturers to run from one to three months, according to use, without re-oiling

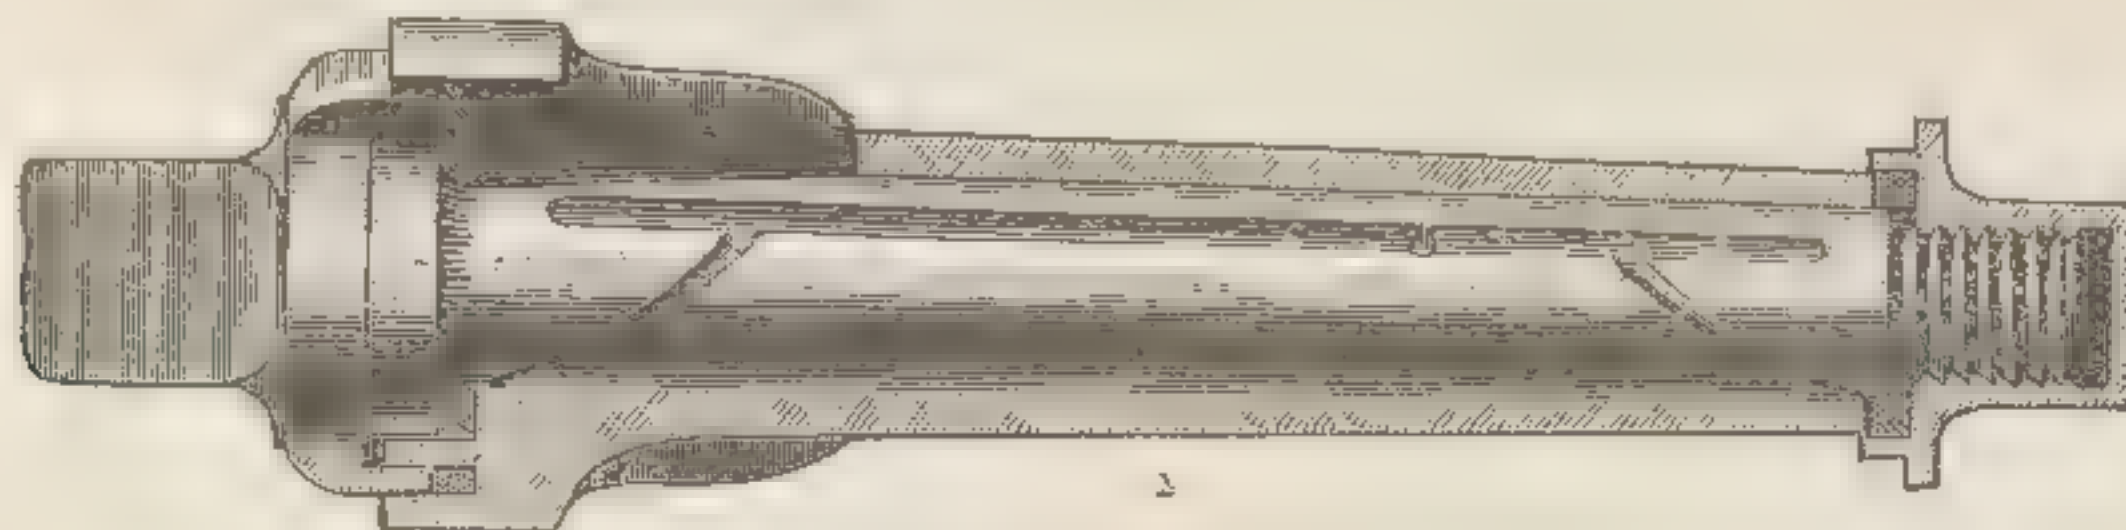

MV 29.—Double Nut.

Size Axle	1	1½	1½ inch

VEHICLE SPRINGS

Our Vehicle Springs are warranted made from best Spring Steel, thoroughly tested by steam power, and well finished. We make special Springs to any specification, and guarantee the quality.

When ordering, please state width of Spring, number of plates, length from centre to centre of eye, and, if required to match springs in use, state compass at centre of spring, outside measurement. The stock thickness of plates of all spring is 1/4 inch, and

5-16 in. Main Plate, with the exception of 2 1/4 x 8 and 9 plate Cart Springs, the Main Plates of which are 3/8 in. thick, and remainder 5-16 in.

In calculating maximum weight of load for Cart Side and Elliptic Springs, due allowance must be made for weight of body, which is not included in this estimate. Weight and strength of Springs in all cases are approximate only, and are given without responsibility.

BLACK FINISH CART SIDE SPRINGS.

As illustrated. Stock sizes.

DEITZ IMPROVED TUBULAR BUGGY DRIVING LAMP.

The Beauty of a Deitz Buggy Lamp is, it always ensures a Good, Safe and Reliable Light.

MV 83.

The Lamp will not blow or jar out. Burns Kerosene. No smoke, no smell; and can be instantly attached to front or side of buggy dash, or carried in the hand as a lantern.

It has a 5in. dial, and projects the light farther than any other Buggy Lamp.

SPECIAL NOTE.—We have recently added several improvements to this now popular seller. New and improved pattern Nickel Reflectors have been substituted, thereby increasing the reflective power and projection of light. The general appearance and design of the Lamp has also been very much improved by nickelling upper flanges and adding a neat outer rim.

All Japanned, 15/- each.

Japanned, with Nickel Tops, 16 6 each.

BUGGY LAMP SPRINGS (Covered).

Price, 10 x $\frac{3}{4}$ in., 2/6; 12 x $\frac{3}{4}$ in., 2/9; 12 x 1in., 3 3 per doz.

BUGGY LAMP BARRELS (Plain).

Japanned, price 1/3; Silver-plated, 1/9 each upwards.

THE "A1" STEEL CARRIAGE JACK, SELF-LOCKING.

MV 134.

Is desirable in every way insuring, as it does, lightness, with strength and compactness.

There is not a particle of cast or malleable iron in its construction; consequently no annoyance from breakage.

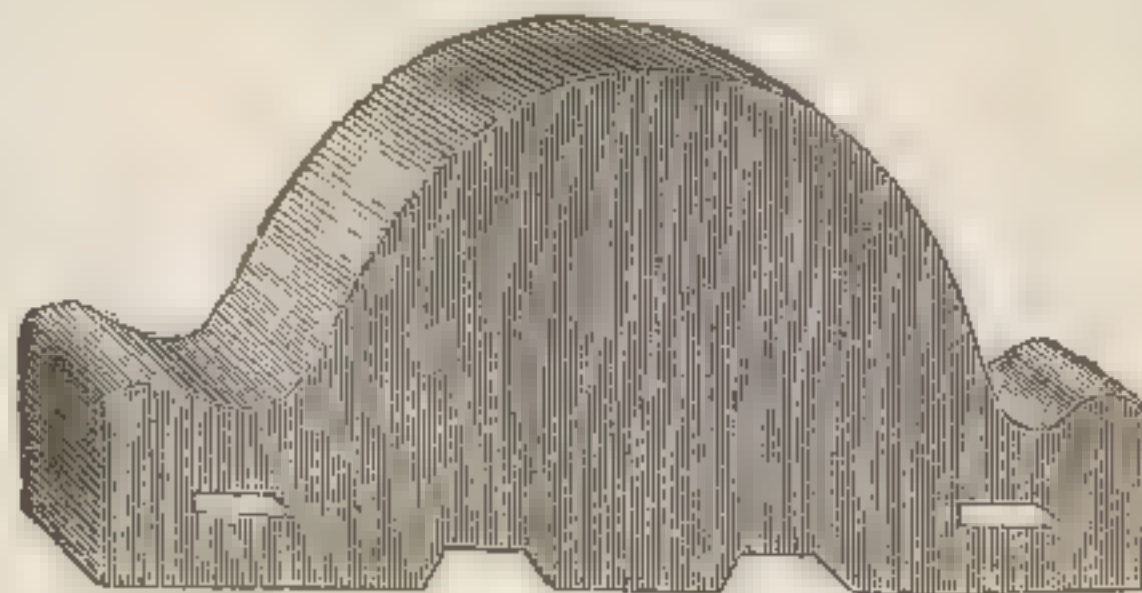

It has double levers near the base, giving great lifting capacity for the size of the Jack. These levers are mainly inside the steel case, free from obstruction, and are all near the base. It will be observed that whatever may be the height of the axle, it is sustained directly over the centre of the base, thus obviating any tendency to carry the wagon forward or back and tip the Jack over.

The adjustment is convenient and rapid with a wide range in height, to fit all ordinary vehicles.

AN ALL STEEL JACK

Vehicles

All vehicles are supplied with steel axles, hard spindles, and have double collars. We can furnish Collinge Collar Axles at an extra cost of 5/- per axle. We can also fit Richard's Patent Long-Distance Axle (guaranteed to run 1,000 miles without re-oiling), to all vehicles, 15/- per Axle extra.

Best Quality Springs only used, made of Special Spring Steel, and thoroughly tested.

Round Edge Tyre, projecting over rims of wheels to protect face.

Shaft Mountings are supplied in Japanned, Nickel, Brass, or Silver, as required.

(See special remarks re Wheels, Tyres, etc., on pages 961 and 962.

SPECIAL NOTE.

Especially care is exercised in setting Tyres of Wheels, but we cannot provide against climatic changes. The driest timber is most affected in damp seasons, and the best seasoned timber will shrink away from the tyre in unusually dry weather. It is essential that tyres and bolts should be carefully attended to immediately tyre begins to loosen. No wheel, however good the material or workmanship, will stand unless the tyre is kept tight, and the wheel in proper dish. Time or service does not alter this rule.

CARE OF VEHICLES.

DO NOT allow mud to dry on a newly-varnished vehicle. Mud from macadamised roads contains lime, and should, therefore, be carefully removed after using the vehicle. The vehicle should be washed in clear, cold water, with a sponge, and should be wiped

dry with a chamois. DO NOT USE SOAP OR HOT WATER. Varnish will lose its lustre, and paint will fade if the vehicle is left to stand near stable manure or decaying vegetable matter, or come in contact with lime. The cloth in the trimmings also fades more or less from the same cause. After the vehicle has been used, it is essential to take off wheels, clean axle arms, and re-oil. Be careful not to screw up axle-nuts or caps too tightly. See that vehicle is properly provided with washers, and that all nuts are thoroughly screwed up.

WHEN ORDERING.

- (1) State color of painting desired, and kind of trimming, if leather, duck or cloth.
- (2) Style of Wheels required, whether Sarven Patent, or Wood Hub, width of spoke AT HUB, also height of wheel.
- (3) State if Pole or Shafts are required, or both.
- (4) Kind of Springs required.
- (5) Do not cut Illustrations of Vehicles or Lamps, but order by number.
- (6) Give full directions for and to whose care consignments from Sydney should be made. We carefully pack all vehicles, unless otherwise ordered, at an extra charge—Buggies, 20/-; Sulkies, 12 6; delivered F.O.B. Steamer or Rail.

RAILWAY RATES FOR VEHICLES.

Buggies, 4d. per mile; Sulkies, 2d. per mile, if sent on wheels, but if packed in crate are carried at third-class rates. Buggies weigh from 350 to 500 lbs., varying according to style. Sulkies weigh about 300 lbs. Crate, 70 to 100 lbs.

MV 178.

LONG TRAY PANEL SIDE SULKY, No. 17a.

(With Raised Lid and Drop Door at rear.)

Hung on Three Springs (2 side and 1 back); 1½ in. Steel Axle; Half Patent Double Collar; 1½ Hickory Sarven Patent or Wood-Hub Wheels, with 1½-inch Round-edge Tyres; High Squab-Back Seat; Lamp Irons; Wingboards; Sliding Seat; Double Steps each side; trimmed in best quality Duck or Imitation Leather, in Black, Green, or Claret; painted to match.

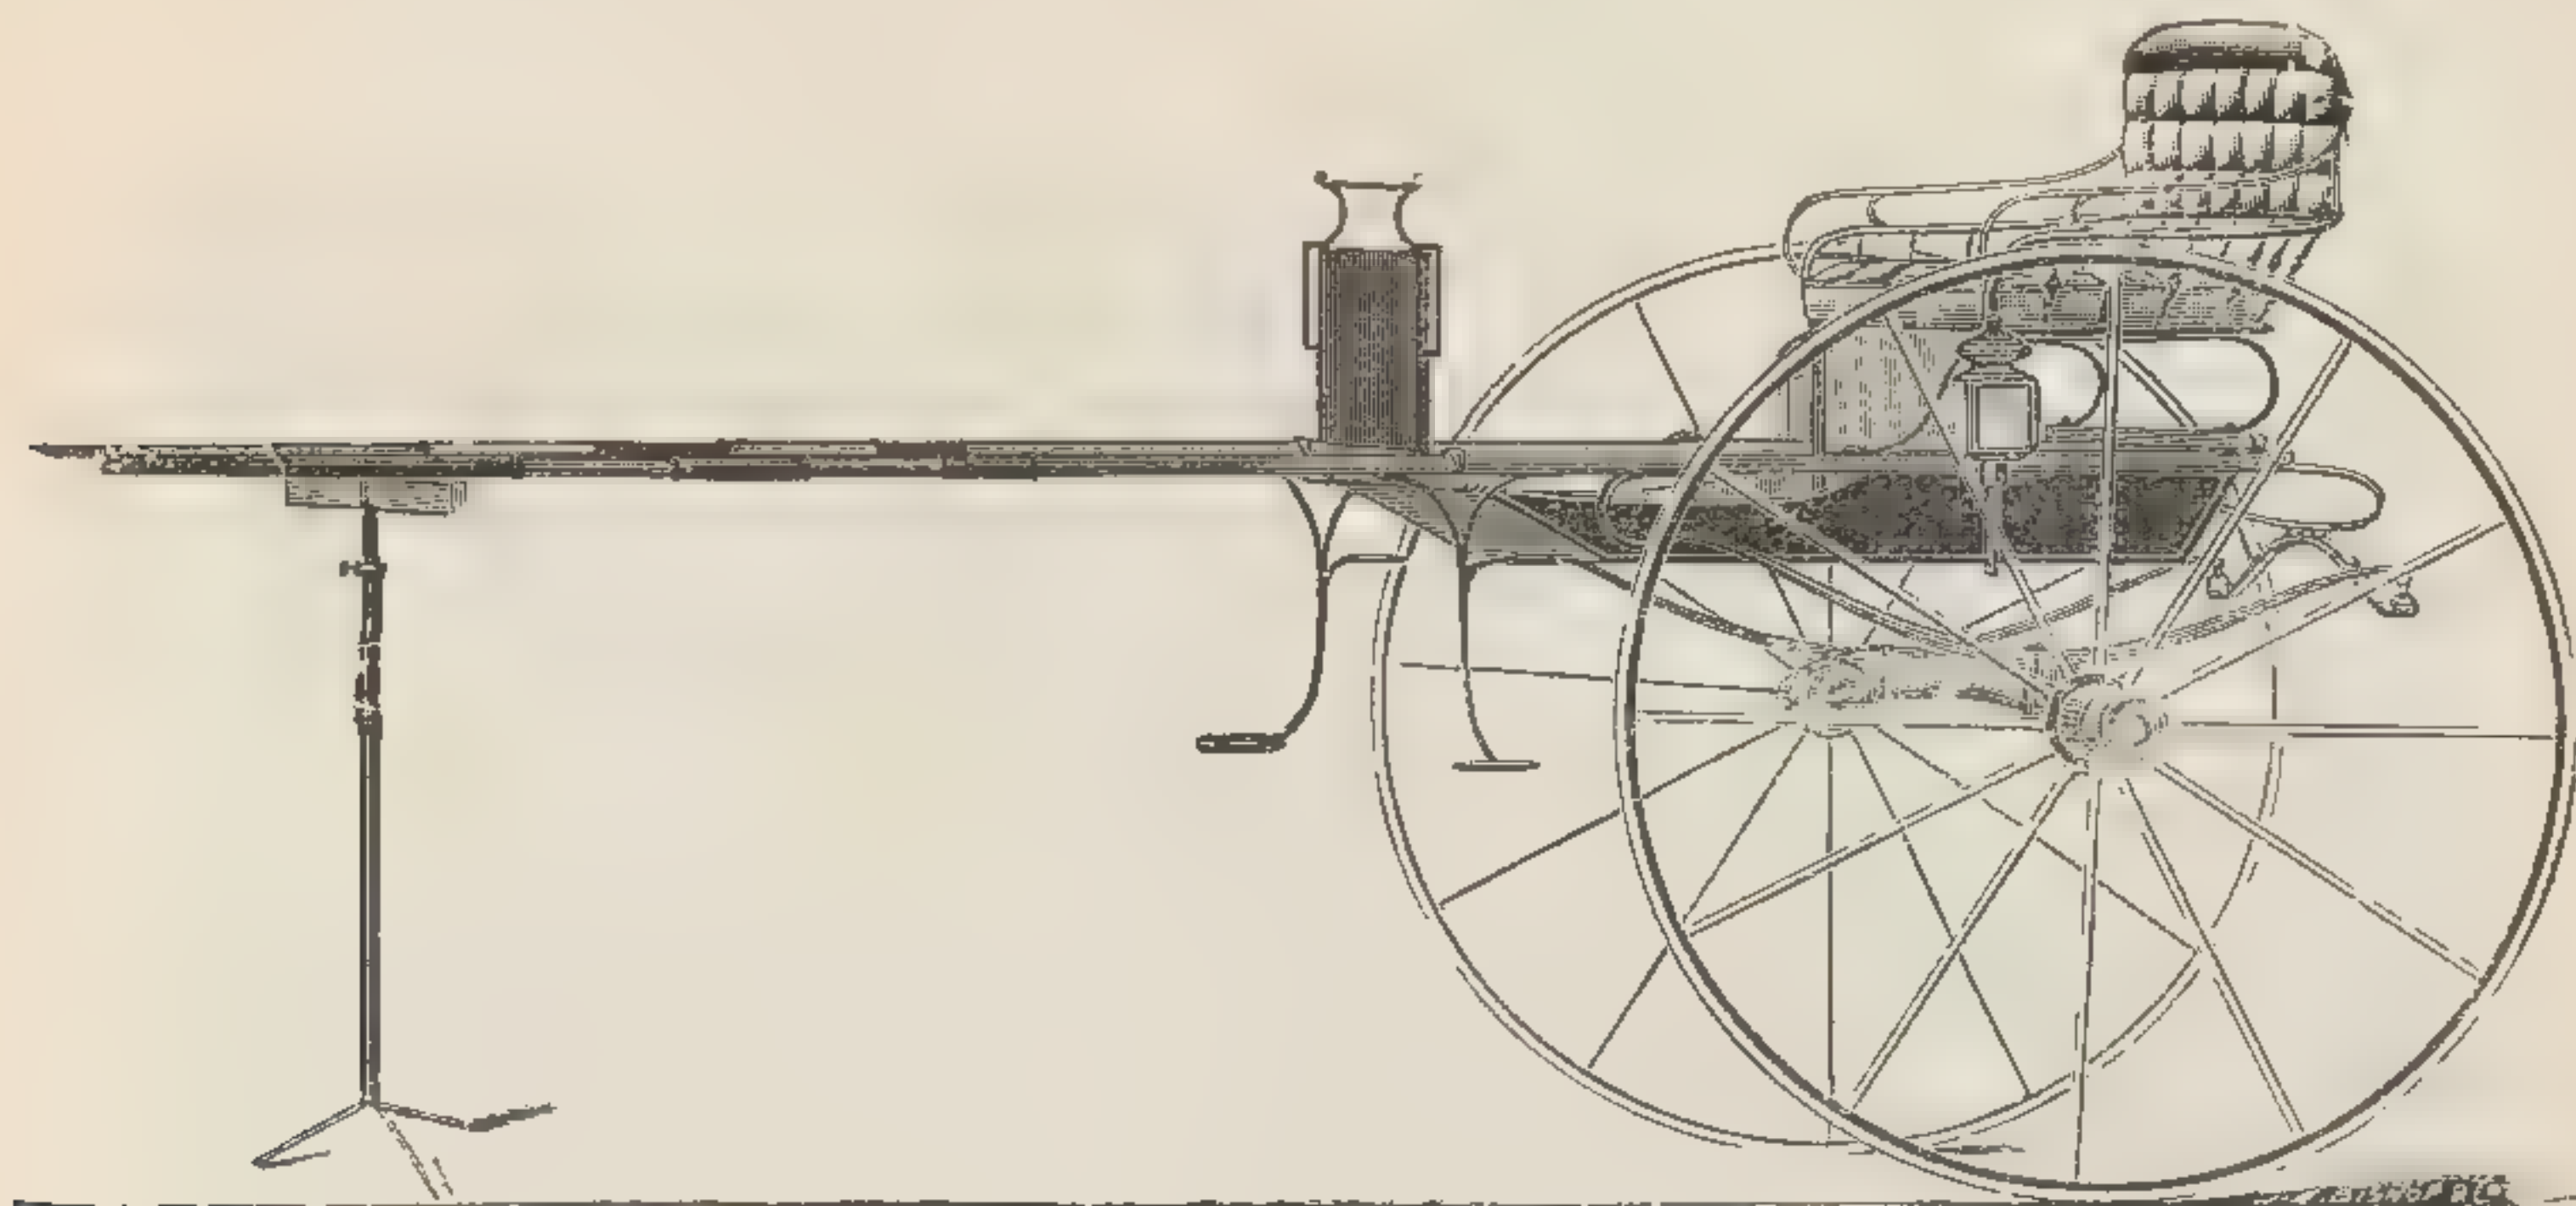

Price, £16/10/-.

With Solid Leather Trimmings and Plated Mounts, and best finish, £18 10 -

Lamps from 10/- per pair extra.

Hoods fitted complete, from 75/- extra.

This is an ideal Sulky for general country use. Long Tray is roomy and well adapted for carrying large packages. The Sulky is fitted with Drop Door, also Raised Lid at rear, and is altogether a most convenient vehicle for all purposes. Although heavy-looking in appearance, this Sulky is no heavier-running than the ordinary Tray Sulky.

MV 179.

Long Tray Sulky, No. 17b.

Three Springs (2 side and 1 back); 1½ in. Steel Axles, 1½ Half Patent Double Collar; Hickory Sarven Patent or Wood Hub Wheels, with 1½ Round Edge Tyres; High Squab Back; PANEL SEAT, with Risers; Double Steps; Lamp Irons; trimmed in best quality Duck or Imitation Leather, in Black, Green, or Claret; Painted to suit, or Varnished in Natural Wood; Sliding Seat. An Easy-Riding and Perfectly-

Balanced Sulky. Long Tray; well adapted for carrying large packages.

Price, £15/10/-

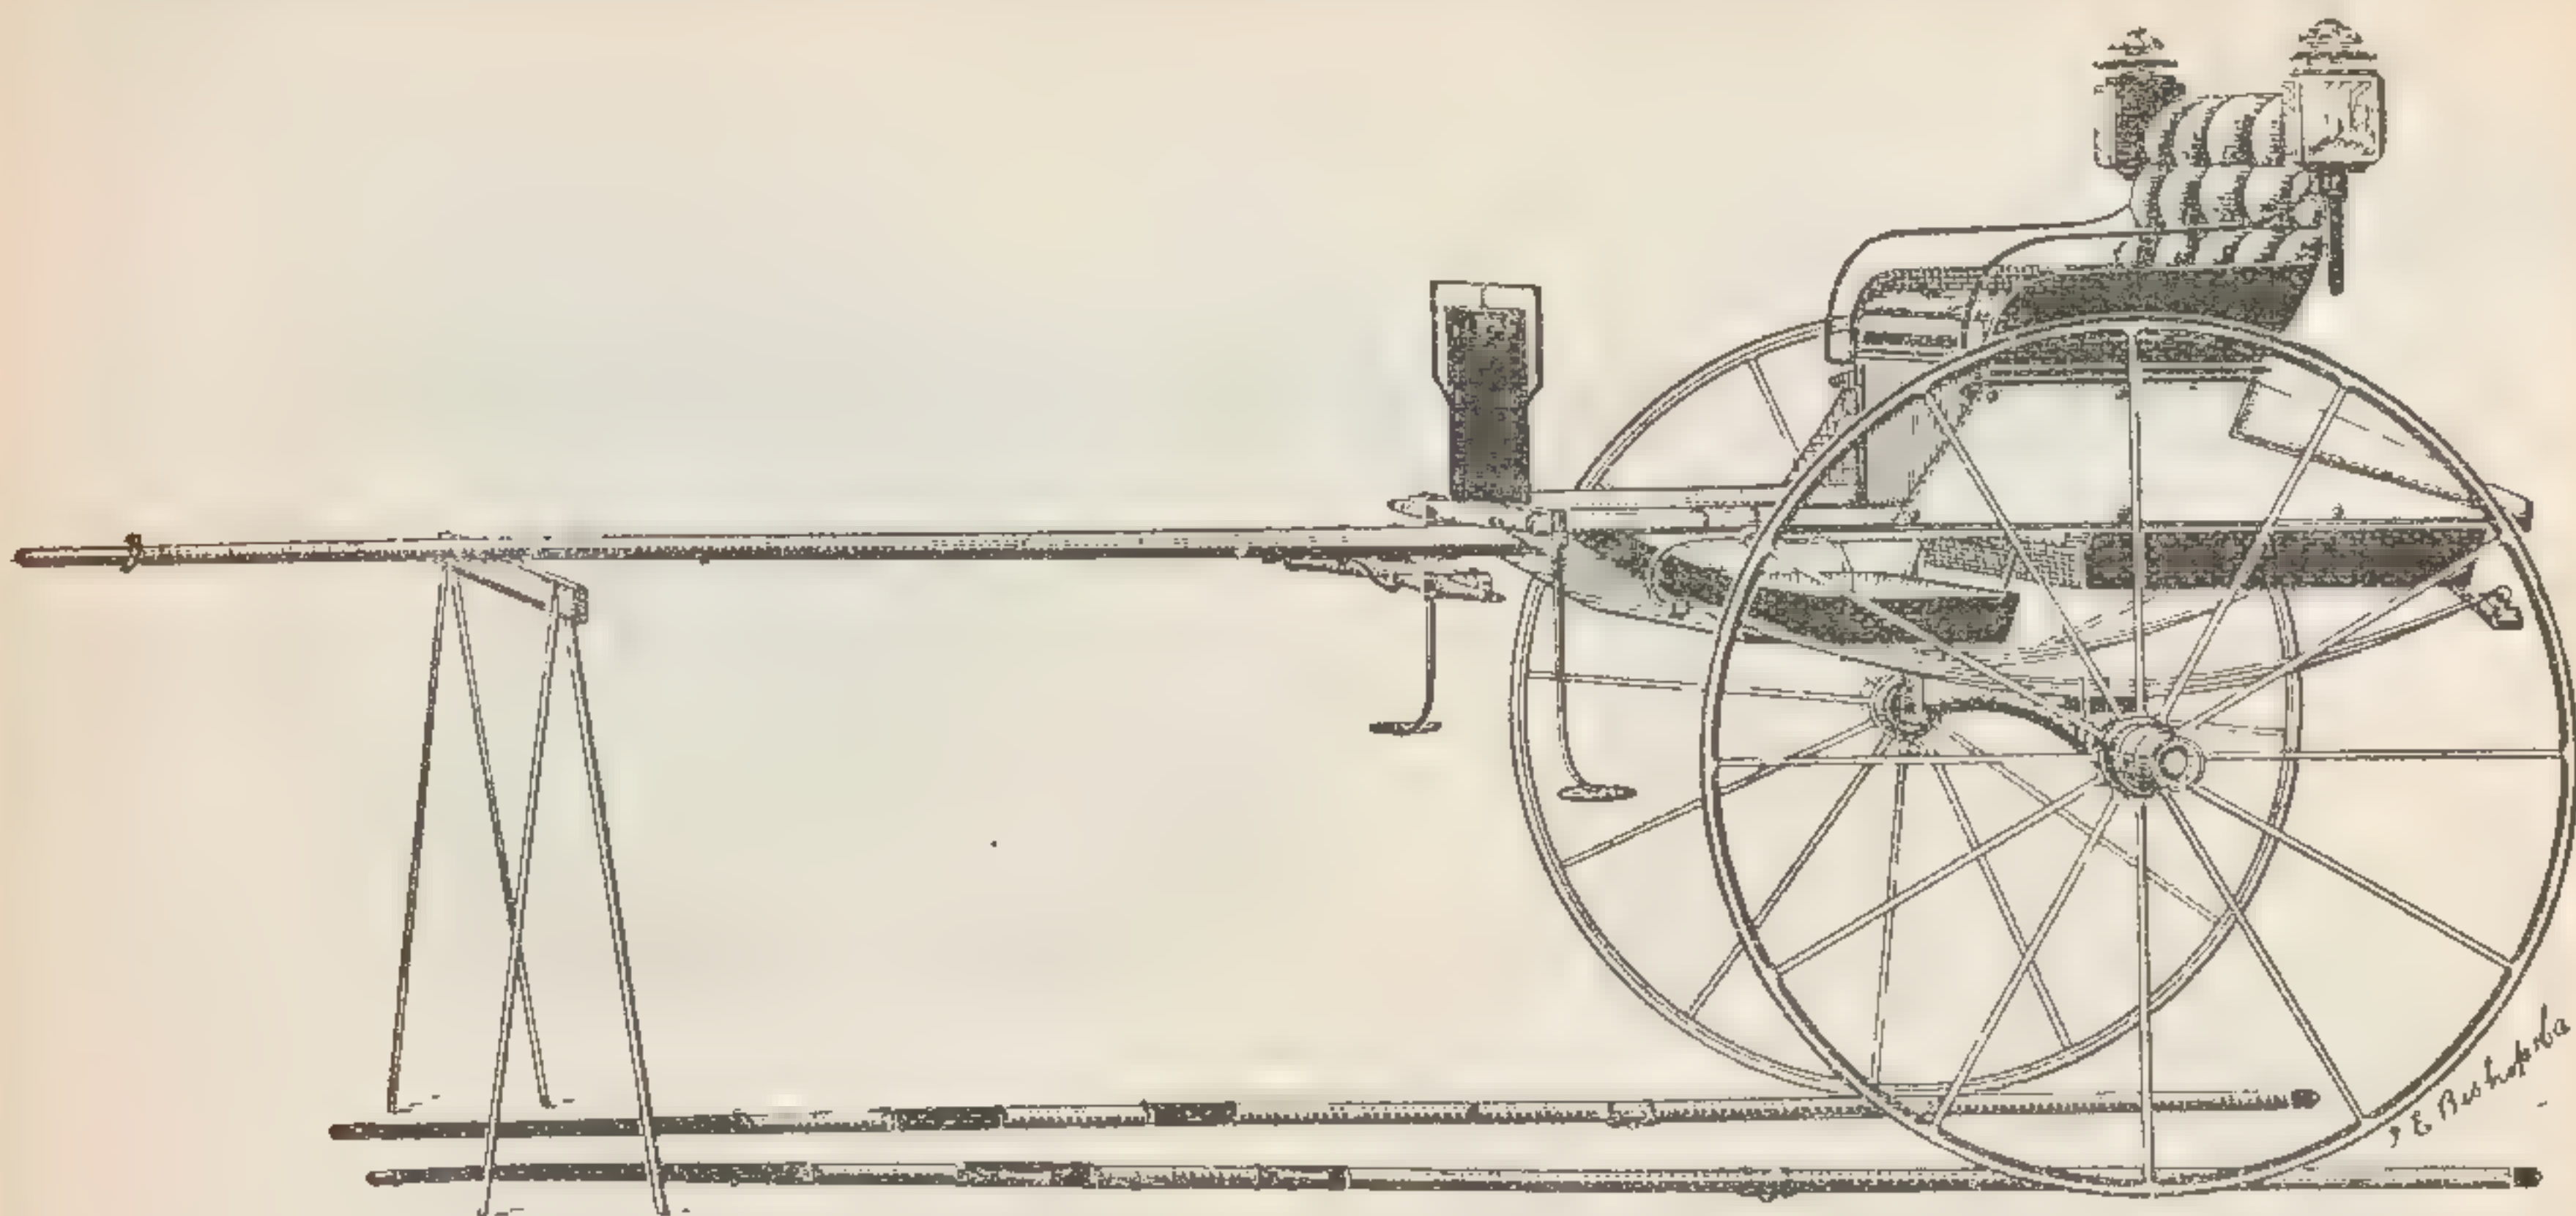

With Solid Leather Trimmings, Plated Mountings, Spindle Seat and better finish, £17/17/-.

Lamps, extra, from 10/- per pair.

Hoods, fitted complete, from 75 - extra.

LASSETTERS'
PATENT HAMELESS HORSE COLLAR

Patent No. 7901.

A New Invention in the construction
of Horse Collars.

MV 198a—Buggy Collar.

MV 198b—Cab or Light Spring Cart, Pagnol Cart
Coach Collar.

HAMES ENTIRELY SUPERSEDED.

THE NEATEST, LIGHTEST, AND MOST PERFECT-FITTING
COLLAR EVER INVENTED.

ADVANTAGES :

1. Half the weight of the ordinary Collar and Hames.
2. Will outlast the ordinary pattern collar and retain its shape under all condition.
3. No more Breast-collars necessary, as LASSETTERS' PATENT is so constructed that the draught is more evenly distributed than a Breast-collar, and is much easier on the horse's shoulders.
4. Can be fitted or removed in a moment.
5. This invention removes all difficulty and annoyance usually experienced with ill-fitting hames, besides effecting a saving in cost of hame straps.
6. A great advance on the old style at NO EXTRA COST.

© CHEAPSIDE . SYDNEY. ©

Comparison is invited to demonstrate its
great superiority over all others.

Inside View of Collar, showing shape
and felt lining.

PRICES.

For Buggy and Sulky Collars, with Tugs for $1\frac{1}{2}$ or
 $1\frac{3}{8}$ Traces.

35/- each.

For Pair Horse Buggy Collars, with tugs for
 $1\frac{1}{2}$ or $1\frac{3}{8}$ point traces, single leather,
or lined as required,

40/- each.

For Light Spring Cart, Pagnel Cart, Coach or Cab
Collars, including pair traces sewn to D
loops (traces $1\frac{1}{2}$ " to $1\frac{5}{8}$ " wide),

45/- each.

— SPECIAL NOTICE. —

LASSETTERS' are Sole Distributing Agents for the
whole of New South Wales and Queensland, and will
gladly answer all enquiries and give any information
required concerning this useful invention.

WHEN ORDERING PATENT COLLARS

Give exact length measurement inside rim of old collar as illustrated, MV 196,
Page 1007.

We will furnish our Patent Collar with any set of Harness ordered, CHARGING THE
DIFFERENCE [ONLY WHERE NECESSARY] between the collar and hames ordered in
single or double Buggy or Sulky Sets, also collar, hames and traces of Spring Cart or Cab
Sets. The difference in price, it will be noticed, will really only apply to the Cheapest
Quality sets on our List.

When requiring a new set of Harness or Collar, DON'T FORGET TO SPECIFY

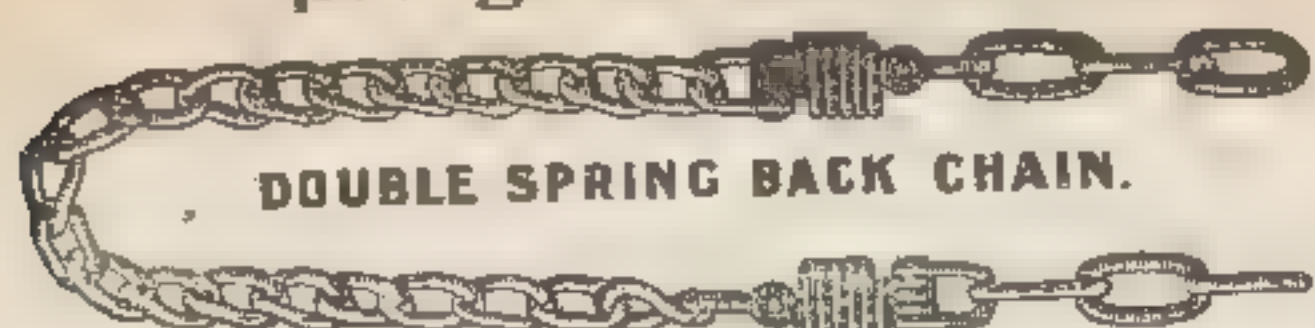

LASSETTERS' PATENT HAMELESS COLLAR

in your order, and recommend it to your friends. You take NO RISK as Lassetters' guarantee
all they claim for it, having TRIED AND PROVED ITS MERITS.

American Mixture	3d.	6d.	1/-	4/-

We particularly desire to introduce to smokers of a high class Tobacco, our KENTUCKY MIXTURE, a blend comprising the choicest and most carefully selected Tobaccos. This high grade Mixture is manufactured from the finest Tobaccos obtainable, and we guarantee it absolutely free from all artificial flavorings. Made in three Strengths—Mild, Medium, and Full. When ordering please state what strength is required.

Our trade in Cut Tobaccos is growing far beyond our expectations.

For our Long and Rough Cuts we draw the cases of Tobaccos straight from Bond, and have it cut medium gauge, to ensure cool smoking. It is then specially packed in oil paper, tinfoil, and neat cardboard boxes. You thus get your Tobaccos in perfect condition.

Finest Quality Cut Tobacco, in Tins.

A good Pipe is always a cheap Pipe, because it outlasts half-a-dozen common Pipes, and the longer it is smoked the sweeter and better seasoned it becomes. Many smokers who indulge in a really high-class tobacco, and yet only use a cheap pipe, often wonder why they do not thoroughly appreciate their smoke! The reason lies not with the tobacco, but the pipe. To enjoy good tobacco a good Pipe is absolutely essential. Be sure and use a GOOD PIPE.

Lassetters' Silver-Mounted Briars are the Best. Guaranteed against Cracking or Burning.

Gun and Rifle Repairs a Speciality

We have an efficient staff of skilled gunsmiths, and any work entrusted to us is carried out equal to London workmanship, and prices charged are the lowest possible consistent with good work.

Never send your repairs to country blacksmiths, as invariably more harm than good is the result.

Send us the whole of your Gun if you require it re-Stocked, new Fore-End, tightening Action, alterations to Strikers, new Extractors, etc., or if new Hammers or Locks are required in Muzzle-Loading Guns.

When parts of Locks, Springs, etc., are required, it is always necessary to send broken pieces as samples.

Fittings are only kept in the rough, and require to be altered to fit the respective Guns they are desired for—no two weapons taking the same.

We are always pleased to thoroughly examine Guns and Rifles, and quote prices for effecting necessary repairs before proceeding with the work.

We have no outlet whatever for second-hand fire-arms, and consequently cannot allow anything for Guns that have been used.

It is very difficult to quote prices for repairs with out first examining, but the following may be taken as approximate prices.—

Re-Stocking ordinary Guns with reliable work and material, with Plain Stock, which only includes the wood-work, and not Locks, Trigger Guards, etc. from 50/- upwards

New Pistol Stock from 60/- upwards

New Fore-End from 30/- upwards

Re-Browning from 10/- upwards

Fitting New Hammer from 5/- each upwards

Fitting Strikers from 2/6 pair upwards

Fitting Mainsprings from 5/- each upwards

Fitting Top Action and Sear Springs, from 1/6 each upwards

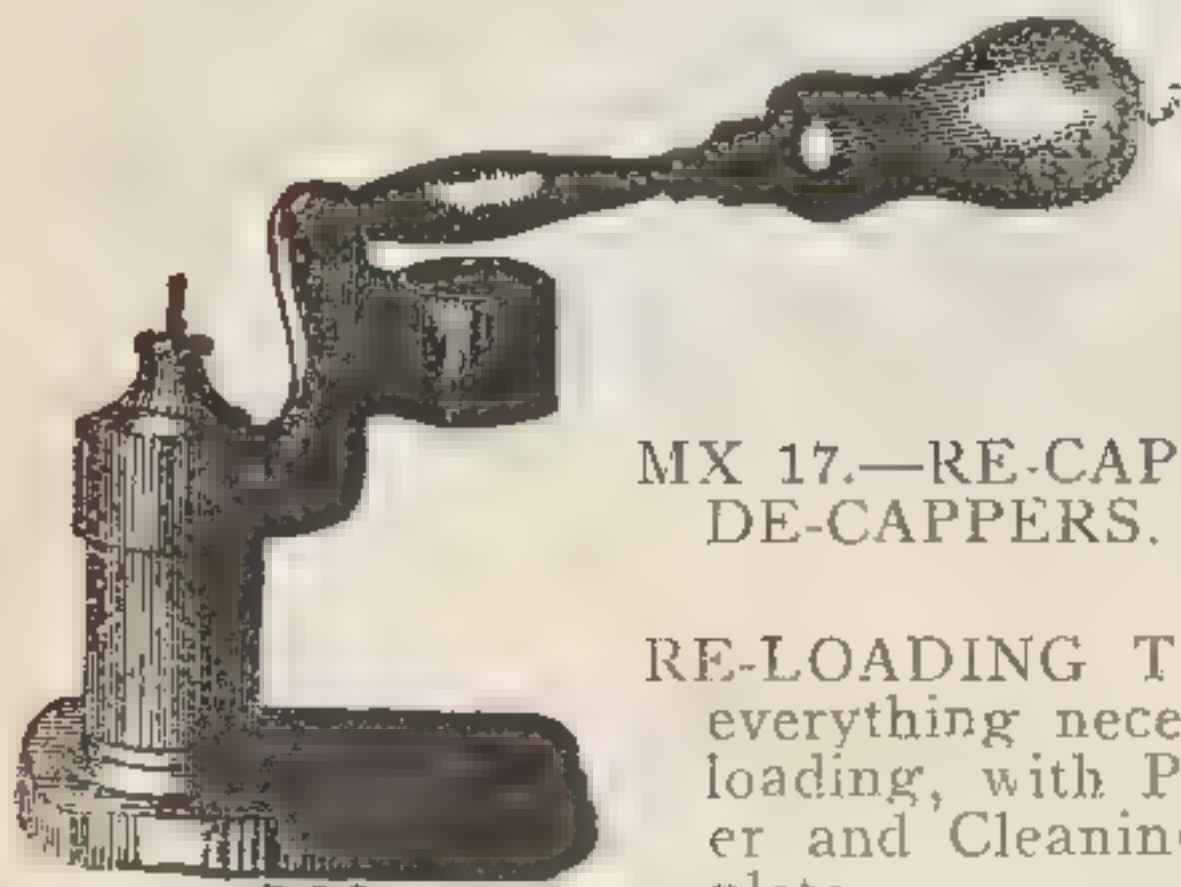

Fitting New Locks from 10/- pair upwards

Re-joining and Tightening Actions, from 10/- upwards

Stripping and Cleaning only from 5/- upwards

Re-Boring Barrels.—Alterations to Choke Boring and Stock-Bending a specialty.

Rifles

MX 47.—THE NEW "DAISY" WINCHESTER TAKE DOWN RIFLE IS PERFECTION (M/92)

To meet the demand of Sportsmen for a light, quick-firing Rifle, we have pleasure in offering the New "DAISY" Rifles, which are undoubtedly the very best and most accurate weapons ever introduced. The "Take-Down" Rifle is so arranged that the Barrel can be easily removed from the Stock, which makes it very handy and portable. 6 and 14 Shots, 32 and .44 Calibre, 24in. Barrel, Oct., weight 7½lbs. 75/-

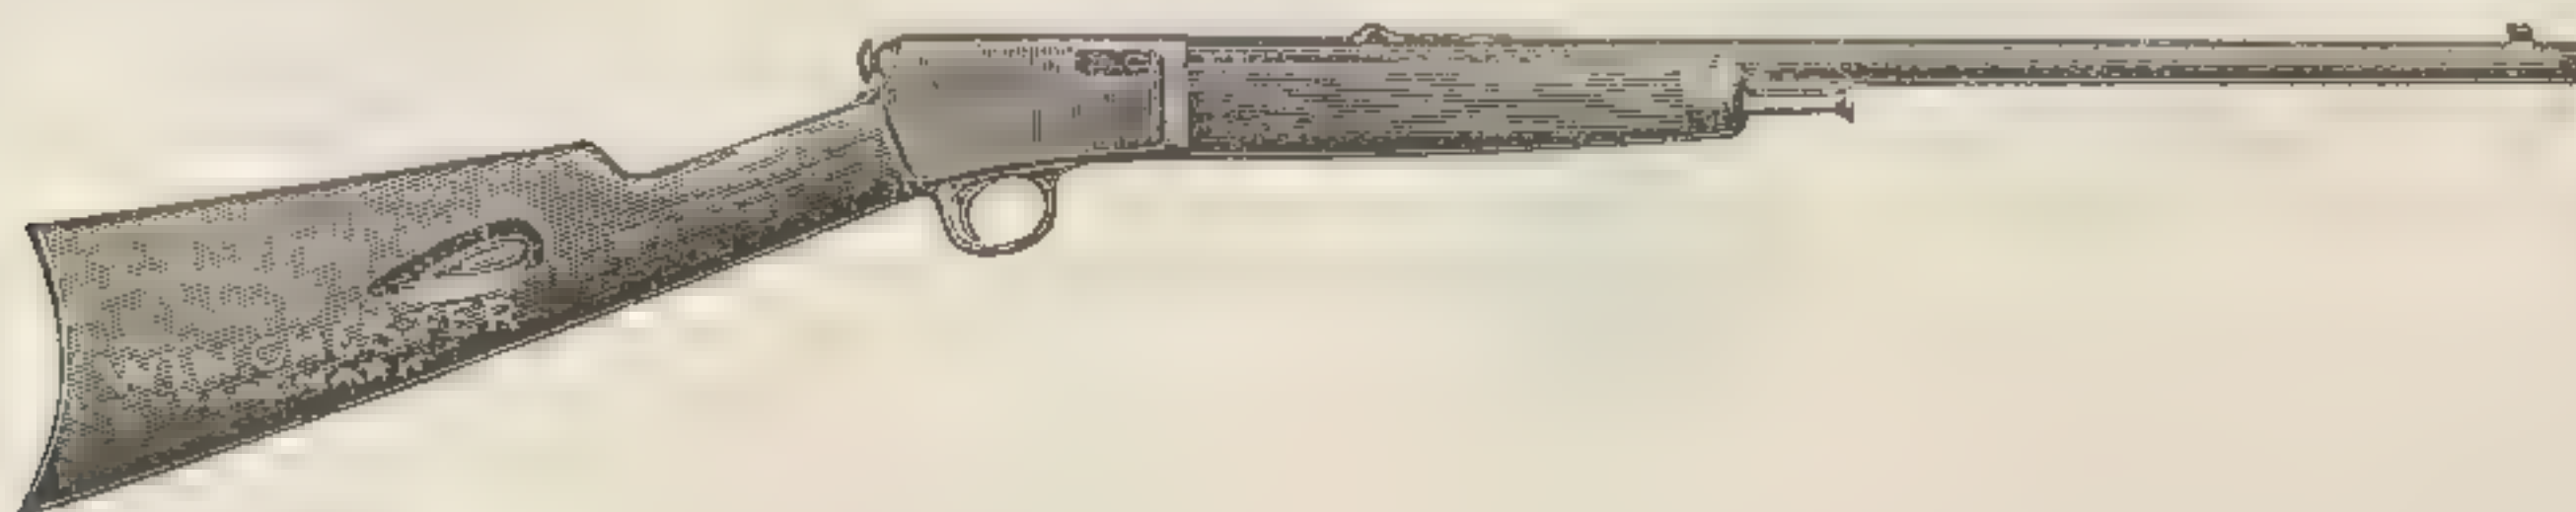

MX 48.—THE SPORTING "SNIDER" RIFLE, commands attention, the simplest and strongest action made, none truer or surer; Best Quality, special value £3

The Sporting "Snider" Rifle, .450 Calibre, No. 1 will always be a favorite, as it is very true, and weighs only about 5½lbs.

MX 49.—THE "RAPID" SPORTING MARTINI, is a Perfect Weapon, light, penetrating and sure, the best that is made, .380 and .442 Calibre £4 15/-

The "Rapid" is specially built to our order, and is of the best quality, with Safety Bolt, Engine-turned Octagon Barrel, with 3 Silver-liner Sights, and is most accurate and deadly up to 300 yards. Buyers can thoroughly rely upon them. Weight, only 5½lbs.

MX 50.—THE "DAISY" WINCHESTER AUTOMATIC RIFLE (M/03), made for .22 Automatic Rim-Fire Cartridge only £4 10/-

The Winchester Model 1903 is a Ten-Shot Automatic Hammerless Take-Down Rifle, using a new, inexpensive, rim-fire cartridge, known as the .22 Cal. Automatic, loaded with smokeless powder, and greaseless bullet. The rifle can be shot as fast as the trigger can be pulled. The stock is 13½in. long, with a 20in. round barrel fitted with open front and Rear Sights. Length of Rifle over all, 36in. Weight, about 5½lbs.

ORTHOPTICS, Six Apertures, Quick Adjustment,
in Strong Leather Case per pair 7/6
BEST POLARISED ORTHOPTICS, per pair 11/-
THE "IRIS" ORTHOPTICS per pair 20/-
This improved form of Orthoptic has of late been
in great favor. The chief merit is the rapidity with
which the aperture can be adjusted.

NOTE.—No explosives of any kind can be sent
through the post under a £50 penalty.

The minimum charge for sending Powder by Goods
Train is 7'6, it is therefore advisable to make orders
as large as possible to minimise carriage.

Cartridges, Caps, Cases, etc., can be sent at the
ordinary Parcels Rate by Passenger Trains or by
Steamer.

Where Gunpowder has to be sent by Steamer, we
have to engage Powder Magazine, and the cost is
10/-, and a Special Government Permit has to be ob-
tained before it can be forwarded.

TAYLOR'S EXTRA QUALITY, Ivory Mounted, No. 3 Bias, 5 in., 5 1-16 in., 5 1/8 in., 5 3-16 in. diameter, 24/- per pair.

JACKS, Special Quality 8d. each

The above Bowls are turned with special bowl-making machinery, securing absolute accuracy in size and bias. They are tested and officially stamped by an appointed officer of the leading associations, and are sold with a guarantee that they comply—in every respect—with the standard regulations laid down by the authorities in England, Scotland, and Australasia. Only the finest selected Lignum Vitae is used in their manufacture, and the bowls are fitted with large ivory mounts and richly ornamented.

Furnishing Department

Lassetters' Furniture Department is most complete, and everything necessary to furnish either a Cottage or a Mansion will be found nicely displayed and marked in plain figures. The Styles are up-to-date and Workmanship first-class, while the Prices are the Lowest consistent with the quality. The illustrations will give you a good idea of the class of Furniture in stock, but as new designs are being constantly made, a personal visit, when possible, is preferable. Should the selection be left to us, satisfaction is guaranteed.

Pianos

MY 42.

The LASSETTER PIANOS, though first-class in every particular, are moderate in price. We do not hesitate to assert that no instrument before the public to-day is so entirely entitled to confidence as the "Lassetter" Piano; and though a piano of equal price may be obtained from another maker, it will not give greater satisfaction than the "Lassetter," nor will it prove more durable.

SPECIFICATION.

Complete Metal Frame, Cross Stringed, Full Trichord, Patent Check and Repetition Action, with Pinned Hammers and Metal-covered Hammer Rest Cross Bar, and Brass Pin Plates with Nickel Bolts, Ivory Keys, Full Compass, Single Sconces, Upper Damper, Wire Back Lining, Truss Legs, Brass Pedal Feet, and Hand Holes. The Frame in best Italian Walnut, with Gold Engravings.

No. 1 Piano, 4 ft. 1 in. high.

Kitchen Furniture

The "Iceberg" Refrigerator (MY 394.)

IS THE BEST MADE.

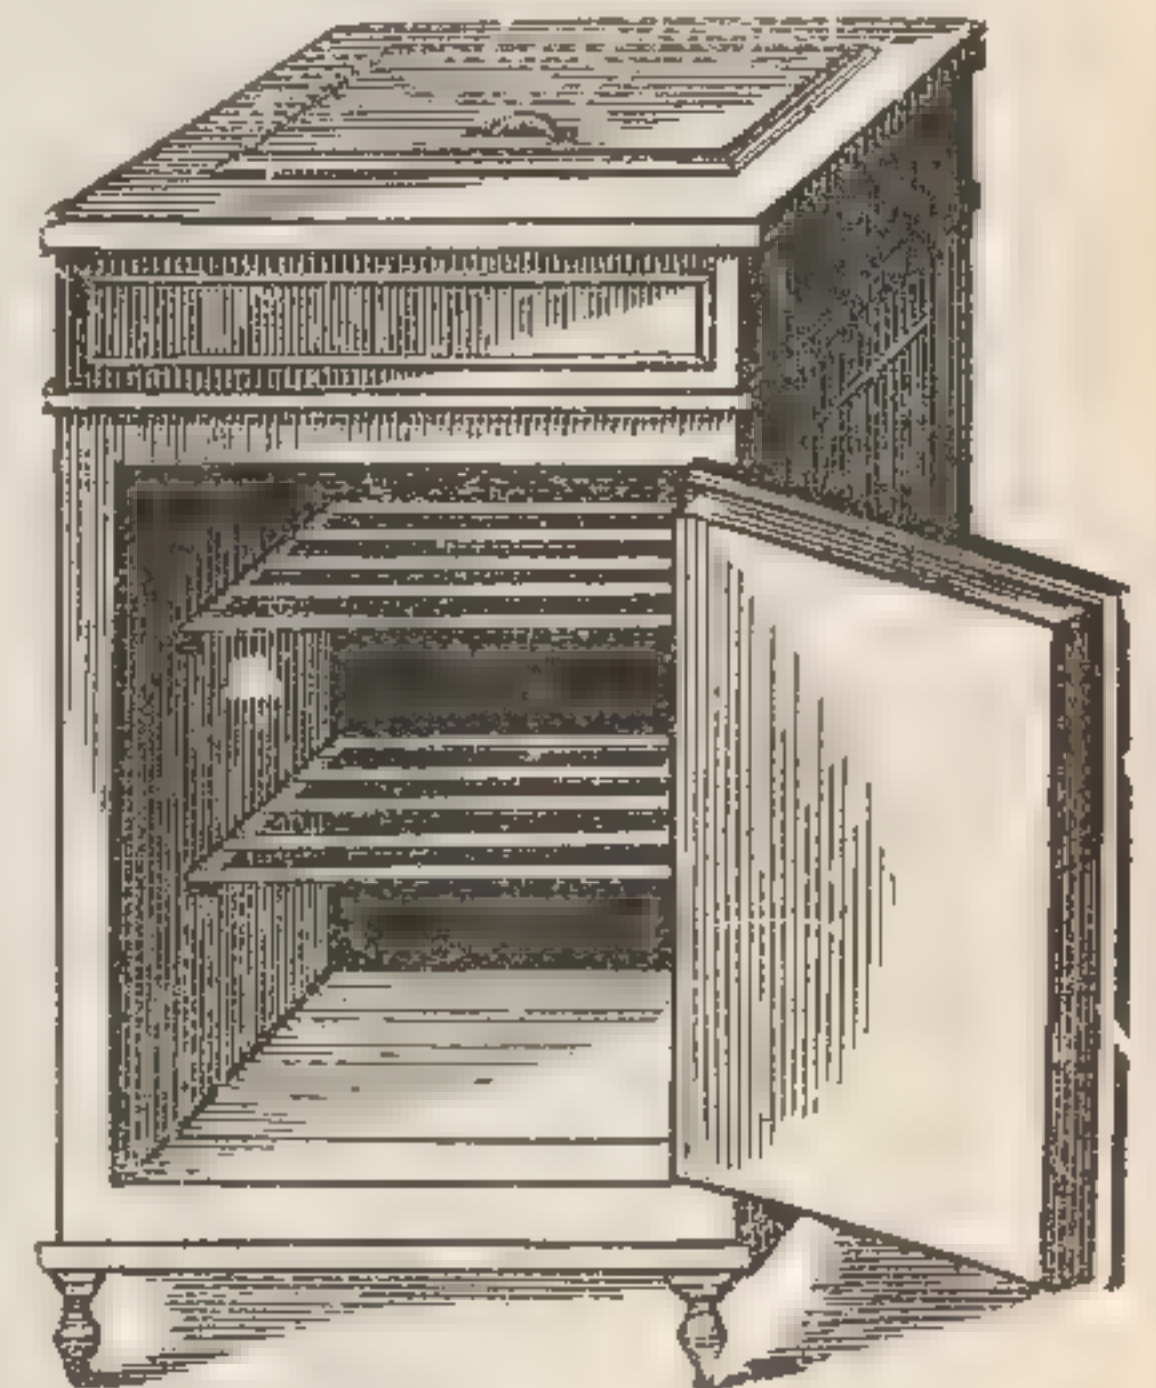

HAS STOOD THE TEST OF TIME.

IS THE MOST ECONOMICAL. CONSUMES LESS ICE THAN ANY ON THE MARKET.

The No. 1 "ICEBERG" REFRIGERATOR can be effectually worked with a consumption of 30lbs. of ice weekly, while the No. 9 would not require more than 120lbs. The consumption of ice will vary with the quantity of edibles which require to be cooled.

SPECIAL SIZES BUILT TO SUIT CUSTOMERS' REQUIREMENTS.

No.	Description.	Sizes.			Price.
		HIGH	DEEP.	WIDE.	
1	Has 1 Cupboard with Shelf, also Compartment for Ice ...	3ft	1ft. 8in.	1ft. 9in.	2 15 0
2	Has 1 Cupboard with Shelf, also Compartment for Ice ...	3ft.	1ft. 8in.	2ft. 2in.	3 10 0
3	Has 1 Cupboard, with Shelves, also Compartment for Ice ...	3ft. 7in.	1ft. 8in.	2ft. 3in.	4 4 0
4	Has 1 Large Cupboard, with 2 Shelves, also Compartment for Ice ...	3ft. 9in.	1ft. 9in.	2ft. 6in.	4 12 6
5	Has 1 Large Cupboard, with 2 Shelves, also Compartment for Ice ...	3ft. 11in.	1ft. 10in.	2ft. 9in.	5 17 6
6	Has 2 Cupboards, with Shelves in each, also Compartment for Ice ...	3ft. 4in.	1ft. 8in.	3ft. 3in.	8 2 6
7	Has 2 Cupboards, with 2 Shelves in each, also Compartment for Ice ...	3ft. 8in.	1ft. 8in.	3ft. 6in.	10 0 0
8	Has 2 Large Cupboards, with 2 Shelves in each, also Compartment for Ice ...	4ft. 6in.	2ft.	3ft. 10in.	11 10 0
9	Has 1 Large Cupboard on one side and 2 smaller ones on the other both with Shelves complete: also Large Compartment for Ice, in which can also be stored Aerated Waters ...	4ft. 8in.	2 ft.	4ft.	13 15 0

MY 394.

THE "LASSETTER" REFRIGERATORS
Antique Oak Finish, Hollow Walls lined with Charcoal Sneathing, Odorless, Airtight Water-proof, Interior lined with Zinc, Brass Trimmings, Patent Drip Cup, Solid Metal Shelves, Swinging Base Boards, Ball-bearing Casters. In point of Workmanship, Material and Finish the "Iceberg" outclasses its competitors. We believe it to be the Best Refrigerator made for the price asked.

Lassetters' Duchess Drophead Sewing Machine

MY 447.

Price—Three-Drawer (as shown), £5/10/-; Five-Drawer, £5/15/-.

We anticipate that this new style of machine will commend itself to most housekeepers, as it answers two purposes, viz., an ideal Sewing Machine and, when not in use, an artistic Table.

LASSETTERS' in offering the DUCHESS SEWING MACHINE to the Public, do so with the utmost confidence. They have satisfied themselves that there is no better machine made, however high the price charged.

LASSETTERS' intend only charging a reasonable price for this Machine, and thus put an end to the exorbitant profits that have been the custom in the Sewing Machine Trade.

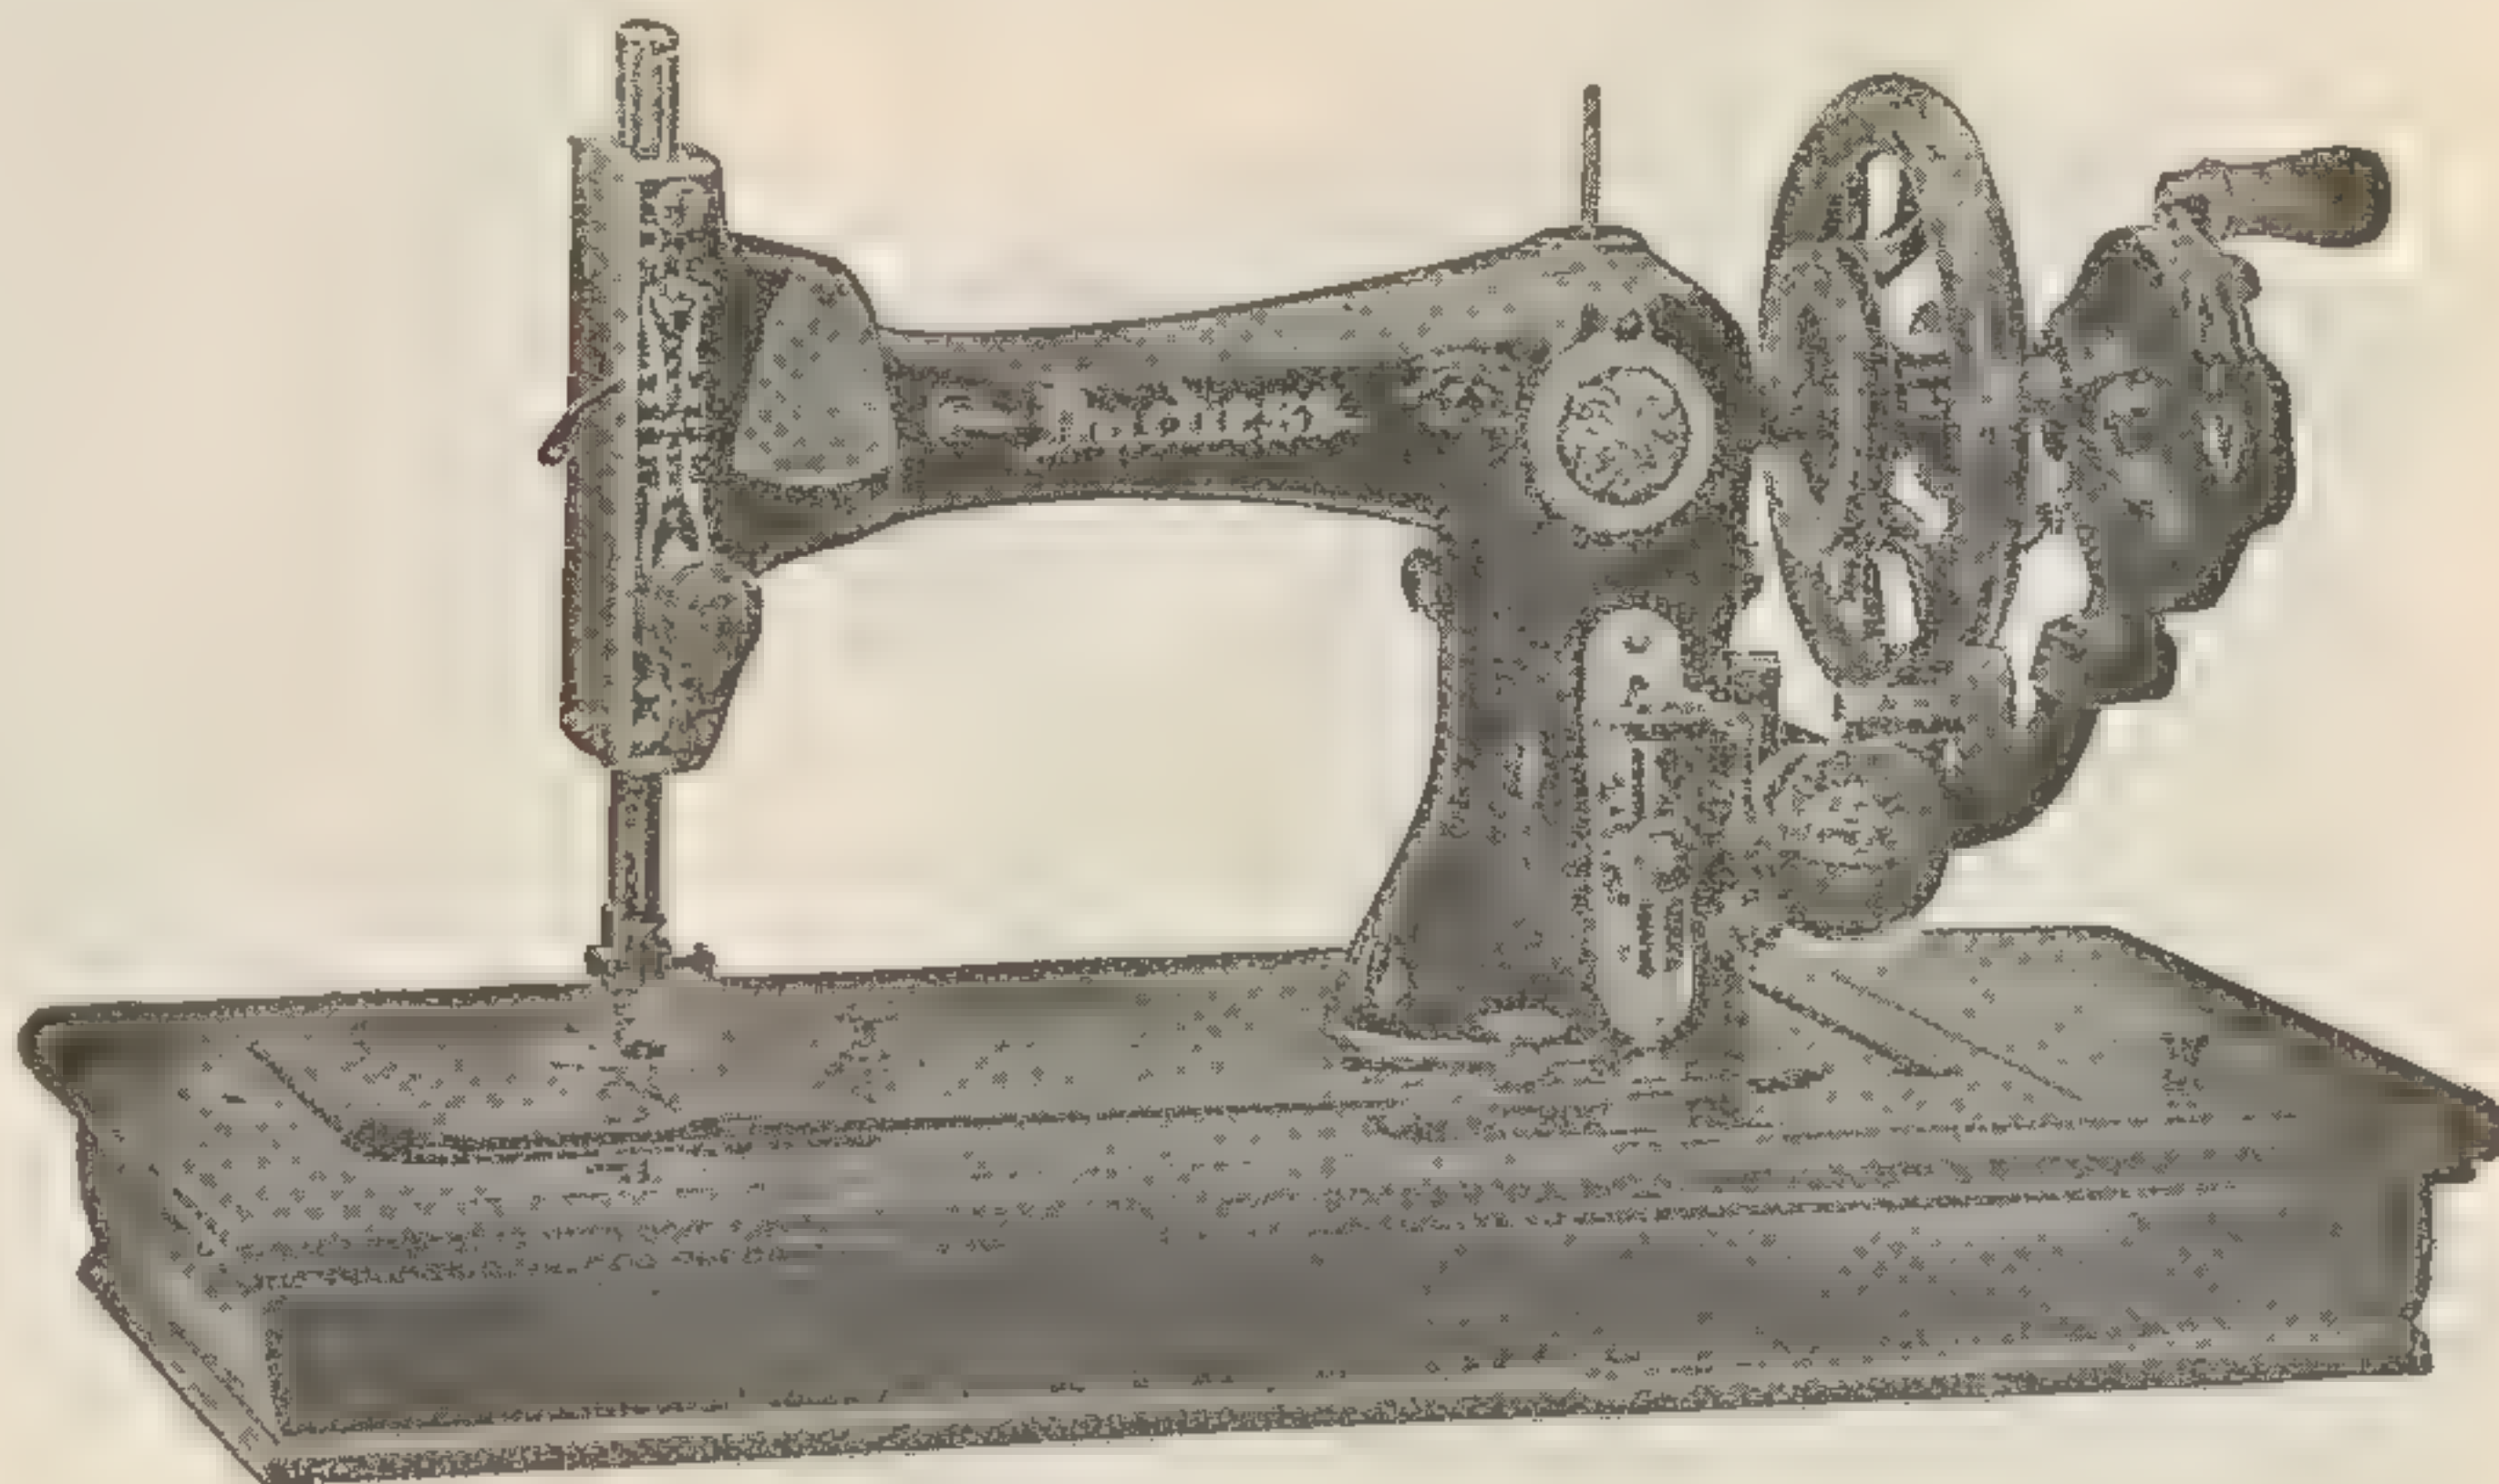

LASSETTERS' will not sell their Machines on Time Payment, and they are only charging the public for the DUCHESS MACHINE just one-half what is being asked by others for the same class of Machine.

The Best the Word Produces for one-half the Usual Price.

HAND MACHINE

Price £3/3/-.

These Machines are finished in exactly the same manner as those worked by the treadle, and therefore can be recommended with the utmost confidence.

MY 448.

Each Machine has a complete set of Attachments as shown on Page 1225. Cost of packing Machine in crate, 2/6 extra.

Our Machines are now made right up to date, with automatic Lift Lid, raising the Machine and securing it ready for use.

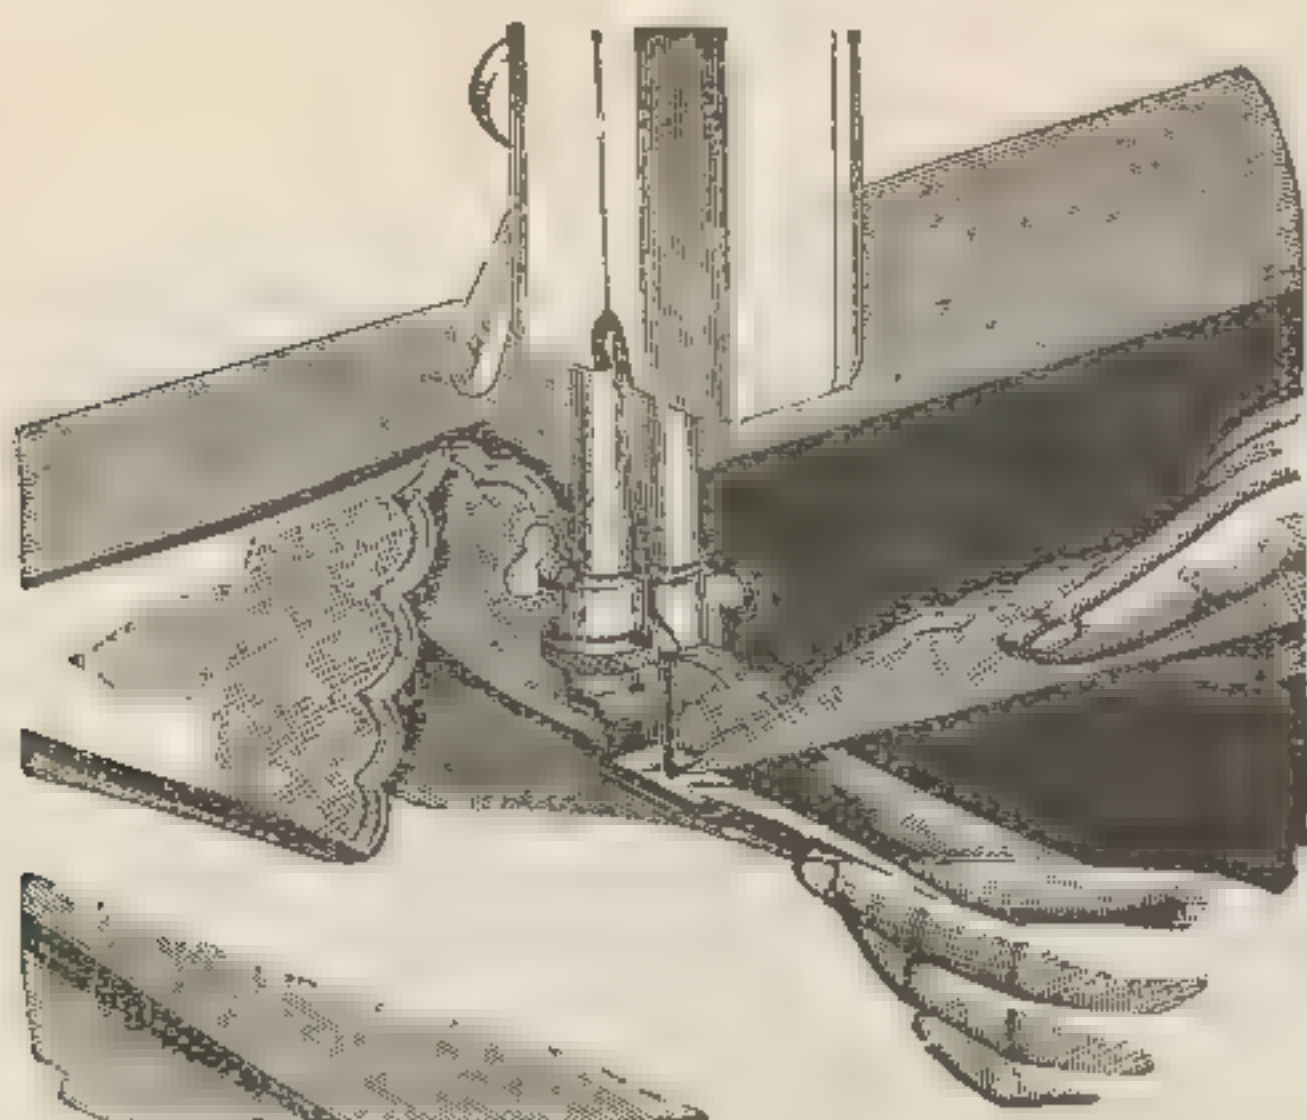

No extra charge for this Improvement.

Carpets, Rugs, Mats and Mattings

Patterns of Linoleums, Floorcloths and Mattings, with all the necessary information submitted free by post on receipt of post-card or letter.

Carpets.

Patent Axminster Carpets, in all the Latest Designs and Colorings, suitable for Drawing Rooms, Dining Rooms, etc. Beautiful and soft effects; New Goods continually arriving—27 inches wide, **5/11, 6/6, 6/11** per yard. Borders, 18 inches wide, to match same, **5/6** and **5/11** per yard.

In this range of Axminster Carpets are to be seen patterns selected from the best British makers only.

We have also a Large Variety in Seamless Axminster Carpets. These are our own Special Designs and Colorings. Exceptionally good value. They are to be had in the following sizes:—

9ft. x 9ft.	63 -
9ft. x 10ft. 6in.	67/6, 75/-, 84/-
9ft. x 12ft.	75/-, 90/-, 99/6
10ft. 6in. x 12ft.	95/-
10ft. 6in. x 13ft. 6in.	100/-, 120/-

Axminster Rugs to match above Carpets.—

4ft. 6in. x 2ft.	10/6	12/6	15/-
5ft. x 2ft. 3in.	13/6	16/6	19/-
5ft. 6in. x 2ft. 6in.	15/6	19/-	21/- 24/-

As Carpet Squares are now so generally used and appreciated, being much nicer and easier kept clean than covering the whole room, and with a surround of plain Linoleum or Felt, which can be fitted into all the corners and recesses, they present a much better appearance and save the constant moving of heavy furniture. We always have a very large stock in all the different makes of Carpet Squares to select from.

BRUSSELS SQUARES (Bordered).

9ft. x 9ft.	54/-, 63/-
9ft. x 10ft. 6in.	63/-, 70/-

How to Cook Dried Apricots, Pears and Peaches.

Select the fruit that you intend to use and rinse it thoroughly in clear, fresh water: then place it in a dish with sufficient water to cover it, and allow it to soak for from ten to fifteen hours before it is required for use. After this the vessel in which it is to be cooked should be placed on the back of the stove, and the fruit with the water in which it has been soaked allowed to simmer slowly, just once in a while coming to a boil, until it is thoroughly cooked. If the water in which the fruit was soaked was thrown away, and fresh water substituted, much of the flavor and nutriment of the fruit will be lost. Sufficient sugar should be added when the fruit is nearly done to make it palatable. Dried fruit cooked in this way can be served either hot or cold, as may be desired. As a rule, when allowed to cool, it will be fully as palatable as if eaten warm. By cooking dried fruit according to this method there will be secured a wholesome and palatable dish, full flavoured, and resembling as near as possible, in appearance, size and taste, the original fresh product.

SINGER'S EGG PRODUCER.

This poultry food and tonic is rapidly coming into favor. It is now used by the leading breeders and keepers of poultry in Australasia. "Singer's Egg Producer" is a scientifically prepared Food, designed for the sole purpose of assisting nature in the production of eggs. In chick raising this preparation is invaluable. The young birds will grow up strong and mature much earlier when it is used.

Sold in packets at 1/- and 1/6.

LASSETTERS' TEA.

DESCRIPTIONS and PRICES.

These Teas are guaranteed absolutely pure and the freshest leaf in the market. The higher qualities are young leaves of the first crop, bought on the plantations having the finest plants, for Messrs. LASSETTER & Co. Even the cheapest Teas have nothing in common with the notorious Chinese "lie" teas. They are all sound wholesome leaves, and better value for money than any other Teas sold in Australia. The Ai Crown Blends are rapidly growing in favour. For body, flavour, colour and aroma, they are unapproached by any other blends offered to the public. We pin our good reputation to the high quality and absolute purity of these Teas.

Heinz Pure Food Products

We append a SHORT DESCRIPTION and PRICE LIST of these POPULAR GOODS.

TOMATO SOUP, prepared from selected red ripe tomatoes and fresh cream, blended with the choicest spices, resulting in soup that gives zest to the appetite and pleases the palate. Small size tins, 9d.; medium, 1/-; large, 1/6.

TOMATO KETCHUP, made of choice tomatoes, fully ripened on the vines. The ketchup is filled directly into bottles whilst hot, thus retaining the natural flavor. Pleasantly spiced, this condiment is sure to give satisfaction. Octagon bottles, 10oz. bottles, 1/-.

TOMATO CHUTNEY, made of the whole tomato, seasoned to bring out its delicate flavor. Appetising and nutritious. Screw-top bottles, 1/-.

BAKED BEANS WITH TOMATO SAUCE, palatable and nutritious food, composed of selected beans (baked, not boiled), combined with digestion-aiding sauce made of carefully-selected tomatoes—Small tins, 8d.; medium, 1/-; large, 1 4.

PLAIN PORK AND BEANS, selected pork and baked beans, without sauce—Medium tins, 10½d.; large tins, 1/3.

MANDALAY SAUCE, made from a recipe of an English officer in the East Indies, prepared from the pulp and juice of choice fruits and vegetables, skilfully seasoned with spices. Stimulating, appetising and piquant. For use with hot and cold meats, fish, and game—1/5 per bot.

TOBASCO PEPPER SAUCE, green or red—per bot. 1/-.

SWEET MIXED PICKLES, thoroughly preserved in sweet spiced liquid; these pickles have a flavor distinctly their own. Octagon bottles, 11d. and 1/6.

INDIA RELISH, prepared from finely chopped vegetables, specially selected. Highly spiced, to give the piquancy which lends zest to appetite. Polygon jars, 1/6.

SWEET GHERKINS, preserved like the pickles. Tender and crisp. Octagon bottles, 14oz., 1/6.

PEARL ONIONS, specially cultivated and pickled in Heinz white vinegar. Small, crisp, white, uniform in size, and of mild flavor, per 10oz. bottle, 1/4.

PICNIC ONIONS, pint bottles, 1/-.

MUSTARD DRESSING, unequalled for salads, and as a base for mayonnaise has no superior. Has a delicate, mellow flavor and never turns rancid, 8oz. octagon bottles, 1/-.

EVAPORATED HORSERADISH, in granulated form, absolutely pure, and retaining the aromatic flavor and pungency of the natural root. Mix with water. Evaporated Horseradish is a fine relish with oysters, and an excellent seasoning for meats, 8oz. bottles, 1/4.

OLIVES, Manzanilla, in keystone bottles, 1/-.

OLIVES, Selected Queen, everyone perfect—10oz. bot., 1/6; 16oz. bot., 2 6; 24oz. bot., 3/8.

OLIVES, Stuffed, 10oz. bottles, 1 8.

**Waterman's
Ideal
Fountain-Pen**

SUNNYBOWER
LIGHTERDAY
Monday

Dear Jack—
It is simply
splendid. I understand
now why you always
use a Waterman.
I don't know how
I existed without it.

Price, 12 6 Post Free.

A FOUNTAIN PEN THAT WRITES WHEN YOU WANT IT TO.

There's no need to shake or jerk it to make it write.

It's ready for use at a moment's notice. It's just the pen for the man who wants to write quickly and satisfactorily.

The flow of ink is free, steady and perfectly regular. Its patent spoon-feed regulates the flow of ink and makes blotting impossible.

We are Agents for the Waterman Pen

which is a good recommendation isn't it?

If it wasn't the best fountain pen we wouldn't stock it.

If you want a genuine Waterman Pen send direct to us—we only keep the genuine make.

It's a fountain pen that will give you splendid service and will never go on strike.

The Price is 12,6 Post Free.

AGENCIES THROUGHOUT THE WORLD.

"SILVASHEEN" SATIN

"SILVASHEEN," of glorious lustre and sheen, silky to the touch, and fascinating to the eye. Finish is guaranteed permanent. In place of genuine sateen for all linings, as well as Fancy work, "SILVASHEEN" is beyond compare.

"SILVASHEEN"

The praise of its pleased customers has made the success of "SILVASHEEN." Thousands of well-dressed, fastidious women have bought "SILVASHEEN," and have proved that it holds its beauty and proved its value by their own experience. No advertisement can speak half so strongly for "SILVASHEEN" as the praise of these thousands of women, who know "SILVASHEEN," and who buy it again and again every season.

"SILVASHEEN"

"The Queen," London, says:—" 'SILVASHEEN' is a capital lining; it lasts where silks does not, and has all the sheen of a silk."

"The Ladies' Field," London, says:—" 'SILVASHEEN' is not to be compared with ordinary Silk Substitutes, being far superior in every respect, and a gown made up 'SILVASHEEN' will look every bit as well as if over silk. 'SILVASHEEN' is an absolute necessity in the production of a smart stylish gown."

LOOK FOR THE NAME.

No matter what you are told, and no matter who tells it, there is no genuine "SILVASHEEN" unless it bears the "SILVASHEEN" name printed on the selvedge. If your draper hasn't "SILVASHEEN" with the name on the selvedge, don't be talked into buying a substitute, or you will be sorry. For your own safety and satisfaction insist on the genuine "SILVASHEEN," with the name "SILVASHEEN" stamped on the edge.

Try it on your New Gown.

Lassetters' CHEMIST'S DEPARTMENT

Lassetters' Chemis'ts Department

under the management of MR. BAINBRIDGE (British Pharmaceutical qualification, and many years' Australian experience).
